RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, February 12, 1870.

Stock Exchange and Money Market.

The Money Market has shown no really new features. The supply available to borrowers, especially on call, has been in excess of the demand for accommodation, and rates have been quoted easy on the basis of 4@6 per cent. in a temporary form, and 7@8 per cent. per annum on prime mercantile credits. The city banks, last week, added over 4½ millions to their deposits, and 1¼ millions to their reserve of legal tender notes, while reporting a reduction of nearly 1½ millions of their specie average. The loan and discount average was increased over four millions. The specie average is now about 39 millions; and the legal tender hoard exceeds 58 millions. The deposits are 215 millions, against 190 millions at the beginning of the year. The U. S. Sub-Treasury, last week, reported an increase of about 1½ millions in its currency balance, with a slight addition to its coin reserve. The general balance of the office on Wednesday, was $82,617,568, as against $80,766,970 on the 1st inst.

The specie reserve of the city banks according to the latest return is $38,997,246, against $27,939,404 same time last year. The city bank deposits are now $214,739,179, against $196,602,899 week ending Feb. 6. 1869. The legal tender reserve amounts to $58,048,384, against $53,424,133 same time last year. The circulation now stands at $33,746,481, against $24,246,436 same time last year. The loans are now $264,514,119, against $266,541,732 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $90,206,700 a day, against a daily average of $91,603,925 the preceding week, and $88,361,485 the week ending with Jan. 23, 1870. The current week's exchanges average about 87 millions a day. The city banks, last week, reported a loss of $1,478,468 of specie, with a further gain of $4,588,266 of deposits, and $1,266,216 of legal tender notes. They increased their loans, $4,189,848; and their circulation, $34,199.

National Bank notes to the amount of $188,270 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $320,514,391, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $20,922,010, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,592,381. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,310,350; and for the public deposits, $18,571,000—making a total of $360,881,350. The Treasury Department last week redeemed and destroyed $552,300 of worn and mutilated fractional currency, and issued $247,600 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 5, were $5,105,287 in coin, (including $2,304,000 from customs duties,) and $4,227,612 in currency; payments, $5,101,871 in coin, (including $563,248 of coin interest,) and $2,729,741 in currency; balance at the close of the week, $81,156,217 (including $75,552,602, of coin, and $5,355,314 of currency,) against $80,681,207 at the close of the preceding week, showing an increase of $465,010. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $691,769 in coin, (including $618,000 from customs,) and $552,546 in currency; payments, $66,851 in coin, (including $53,000 of coin interest,) and $248,141 in currency. On Tuesday, receipts, $663,196 in coin, (including $561,000 from customs,) and $497,206 in currency; and payments $61,917 in coin, (including $55,000 of coin interest,) and $408,538 in currency. The balance at the close of business on Tuesday stood at $82,617,568, (including $5,748,388 of currency, and $76,778,779 of coin,) against $79,931,305 a week previous; and $79,126,407 on Jan. 25, 1870.

The aggregate receipts of the office in January were $68,407,045, including $10,152,398 in coin from customs at the port; aggregate payments, $77,697,503, including $17,693,727 of coin interest, and $1,232,271 of currency interest.

The U. S. Sub Treasurer retired, last week, $2,168,673 of coin certificates, received for customs.

Government revenues, since our last, have been yielding quite handsomely for the season. The customs show an important increase, in the current week. The excises are up to a fair average,

The excises have yielded about four millions; customs at the port of New York, $2,270,674, and at the outports about $750,000 (in coin) more, making the grand total income for the week equal to about $8,133,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 103 millions.

A moderately active movement has been reported in Gold, which has ranged from 120⅜@121⅜, leaving off on Wednesday at 120⅜. The speculative inquiry has shown some spirit. The customs call has been on an enlarged scale. There has not been much demand, however, for shipping purpose. The imports of foreign specie, last week, were considerably heavier than the exports of specie from the port. Government disposed of a million of Gold on the 3d inst., at 121.03@121.38. On Wednesday, of this week, the bidding for the million of Government Gold was unusually brisk. Messrs. Fisk & Hatch offered 120.40 for the whole amount. Messrs. Trevor & Colgate offered the same price for $800,000. The million was awarded at from 120.40@120.60. The aggregate of the bids was nearly four millions ($3,840,000.) The exciting news from Paris tended to stimulate speculation toward the close.

The customs demand for Gold last week, averaged $384,000 a day; thus far this week, it has averaged $589,000 a day, or equal to a weekly aggregate of $3,534,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $509,632; and since Jan. 1 1870, $2,030,238, against $600,794 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $76,749,653, against $71,650,340 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to Jan. 28, was $415,590, against $452,750 same time last year.

The exports of specie, from this port, last week, were $249,304, against $996,953 same week last year; total, since July 1, 1869, $19,588,248, against $26,020,331 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $563,248, and since July 1, 1869, $62,006,443, against $62,240,371 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to Jan. 28, were $3,188,344, against $3,161,497 same time last year.

Foreign Exchange has been in fair demand, most of the week, and generally held with firmness. The offerings of prime bankers' bills have been very moderate. Bankers' prime sixty day bills on London closed buoyantly on Wednesday at 108⅞@109⅛, and on Paris to 5.21¼@5.17½; sight bills on London to 109½@109¾, and on Paris to 5.16¼c.@5.15. The offering of produce bills continue on a rather more liberal scale. The week's exports of domestic produce have been to the currency value of $3,461,230, making the total since July 1, 1869, $124,382,381, against $96,364,510 same time preceding fiscal year.

Government securities have been in rather better supply, and very moderate request at drooping prices. The principal holders have not been offering their bonds with freedom at the going rates, as they have been generally looking for an early rally in values. The later issues of the Five-twenties, and the U. S. Currency Six per cents have been most sought after. The foreign advices have not been favorable to active movements. Operators have been unwilling to do much either way, pending the action of Congress, on the funding project. The ruling of the Supreme Court, in the legal tender case, as published in the daily journals on Tuesday, though freely canvassed in the street, had but little influence on the public funds.

The bonds purchased by Secretary Boutwell up to the 1st of February, amount to $96,278,050; and the accrued interest to $809,334 36—making a grand total of $97,082,384 36. The market value of these bonds, estimated at an average premium of twelve and a half per cent., would be $108,307,181; $25,497,500 of these belong to the sinking fund, and $70,075,550 are held subject to the future action of Congress. The Secretary recommends in his annual report that the latter be added to the sinking fund, and the funding bill just reported provides for so doing.

U. S. sixes of 1881 closed here rather heavily at 118@118¼; U. S. Five-twenties of 1862, 114⅞@115⅛; U. S. Five-twenties of 1864 at 114⅛@114¾; U. S. Five-twenties of 1865 at 114⅝@114⅞; U. S. Five-twenties of 1865, consolidated, 113½@113¾; U. S. Five-twenties of 1867, 113¾@114; U. S. Five-twenties of 1868, 113⅞@114⅛; U. S. Ten-forties at 112⅛@112¼; U. S. Six per cent. currency bonds, 111⅞@112.

State bonds have been generally strong and buoyant, on a fairly active business.

On Tuesday, an unusually brisk investment call was started for the Railway Mortgages, to which the ruling of the United States Supreme Court in the legal tender issue, gave additional interest leading to quite liberal purchases at advancing prices. Central Pacific Sixes were taken as freely as offered, and closed quite buoyantly at 96. Union Pacific Sixes were quoted at 87½@87¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 26.	Feb. 2.	Feb. 9.
Consols	92½	92⅜	92½
U. S. 5-20's of 1862	86⅞	86⅞	87
U. S. 5-20s, 1865	86¾	86¾	86⅞
" 1867	85¼	85⅞	85⅞
" 10-40s	84¼	84½	84¾
Erie	17¾	20	20
Ill. Central	103¼	103½	107¾
At. and Gt. West	25½	26½	....

The dealings in railway and miscellaneous share property have been fairly active at, in most instances, a further improvement in prices, favored by the unusual ease in money.

There has been a moderate trade reported in the leading kinds of domestic produce, but at less buoyant prices in most instances. Middling upland cotton closed heavily on Wednesday at 25¾cts. per lb. The stock of cotton now here is given at about 65,000 bales. The receipts at the port this week, have averaged about 3,750 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,806,125 bales, against 1,415,700 bales in 1868–'9; exports, same time 987,850 bales, against 706,750 bales same time in 1868–'9; stock on hand at latest dates, 503,550 bales, against 385,000 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 687 pkgs., against 840 pkgs., same time in 1869. From Boston, 393 pkgs., in 1870, against 826 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in moderate demand, at from 9½@17c½., per lb.; week's receipts, 6,817. Milch cows continue very dull, at $40@$100 each, receipts, 125. Veal calves have been plenty and heavy at from 8@13c. per lb.; receipts, 704. Sheep and lambs in liberal supply and limited demand at from 4½@8½c., and 6½@9c. per lb.; receipts, 30,080. Swine in less request at 9¼@10c. per lb., all live weight; receipts, 15,565.

Foreign goods have been in pretty fair demand, and held with firmness, as a rule, though the dealings have shown nothing like general activity. The week's imports of foreign dry goods were to the specie value of $2,936,004; and of foreign merchandise, $3,439,481, making a total of $6,375,485, against $4,625,828 same week last year.

Ocean freights have been inactive and depressed. For Liverpool we quote flour at 1s. 6d. by sail, and 1s. 4½@1s. 6d. by steamer, per bbl.; grain at 3½d.@4d. by sail, and 3½d.@3d. by steamer, per bushel; cotton at $\frac{5}{32}$d.@$\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 12s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 402.

The balance in the Sub-Treasury on Wednesday was $82,927,097 42.

The New York exports, exclusive of specie, for the week ending Feb. 8, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$2,660,313	$3,461,230
Previously reported	14,777,193	14,675,326
Since Jan. 1	$17,437,506	$18,136,556

The imports for the week ending February 5, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$1,887,580	$2,936,004
Gen. merchandise	2,738,248	3,439,481
Total for the week	$4,625,828	$6,375,485
Previously reported	20,586,534	20,295,335
Since January 1	$25,212,362	$26,670,820

Intercolonial Railway.

The Intercolonial Railway Commissioners will receive proposals until the 4th of April for the construction of two sections in the Province of Quebec—a distance of 43 miles on the east section eight.

Two sections in New Brunswick of thirty one miles.

The east section is to be completed by the first of July, 1872.

The Commissioners will also receive proposals for sections 3 and 4, the former contracts for these sections having been annulled by the Commissioners. Sections 3 and 4 to be completed by first of July, 1871.

☞ A bill has passed both houses of the North Carolina Legislature to recall to the treasury the unsold special tax bonds, and to stop the collection of the special tax, *pro rata*, with amount of bonds returned.

☞ A company has been organized for the building of a railroad from Dubuque to Bellevue. The Western Union Company will build from Sabula to Bellevue.

Worcester and Nashua Railroad.

The annual meeting of the stockholders of this company was held at Worcester on the 20th ult. The annual report of the directors, which was adopted, states that the earnings of the road for the year ending November 30th, 1869, were $538,021 23, and the expenses, $387,059 89, making the net profits, $150,961 34. Two semi-annual dividends, one of $4 and one of $5, free from Government, State and local taxes, have been declared, leaving an undivided surplus of $11,461 34. The assets of the road over its liabilities are $90,717 96. The earnings of the road, both from passenger and freight traffic, have materially increased over the preceding year, notwithstanding the great depression in the mechanical and manufacturing business which interests this road so much. The directors recommended that the construction account which was closed by a vote of the stockholders at a special meeting held on the 20th of March, 1856, be re opened, and that all permanent improvements and extraordinary expenses hereafter be charged to this account; and that new stock from time to time be issued and sold and the proceeds applied to the payment of such outlays. The following resolution was offered and adopted:

Resolved, That the directors be and hereby are authorized to charge to the construction account of the road such permanent expenditures, improvements, and changes as have been and may be hereafter made which they deem properly chargeable to that account.

It is proposed to lay a double track the entire length of the road, and to commence the work this season. The following gentlemen were elected directors for the ensuing year: Francis H. Kinnicutt, of Worcester, Stephen Salisbury, of Worcester, Alexander Dewitt, of Oxford, Jacob Fisher, of Lancaster, Thomas Chase, of Nashua, Asa F. Lawrence, of Groton, Francis H. Dewey, of Worcester, Alexander H. Bullock, of Worcester, Calvin B. Hill, of Nashua.

☞ At the regular meeting of the directors of the South Carolina Railroad Company, recently held, it was determined to begin the payment of quarterly dividends in July next. The road, which is one of the oldest in the country, has been rebuilt, and is in fine order; the rolling stock and motive power are thoroughly efficient; the debt of the company has been amicably adjusted, and the business of the road is steadily increasing.

☞ A special general meeting of the shareholders of the Great Western Railway of Canada will be held in London, Eng., on the 16th inst., for the purpose of approving or otherwise an agreement entered into between this Company, the Michigan Central Railroad Company, and the Detroit and Milwaukee Railroad Company, for the division of the through traffic of the three Companies.

☞ A dividend of four per cent., less U. S. government tax, has been declared, payable on the capital stock of the Peoria and Bureau Valley Railroad Company, at its office, No. 13 William street, on and after February 10th.

☞ The bill loaning the credit of the State to the amount of two millions of dollars to the Alabama and Chattanooga Railroad Company, has passed both branches of the Alabama legislature.

Cumberland Coal Trade.

The following statistics of the production of coal in the Cumberland (Md.) region during 1869 are complied from official sources by Mr. C SLACK, of Mt. Savage, Md.:

	To B. & O. R. R. Tons.	To C. & O. Canal. Tons.	Local. Tons.	Total. Tons.
Consolidation	121,224	101,645	33,921	256,790
Central	114,309	128,989	.....	243.298
American	91,771	128,225	.....	219,996
Cumberland	99,027	78,908	30,990	208.925
Hampshire and Balt.	109,548	47,727	1,278	158.553
Borden Mining	81,045	71,590	954	153,589
George's Creek	100,310	32,153	16	132,479
Piedmont	92,021	.....	.....	92,021
Atl & George's Creek	79,185	.....	.....	79,185
Potomac	67,458	.....	.....	67,458
Franklin	59,487	.....	.....	59,487
Midlothian	23,179	26,320	.....	49,499

Maryland	31,322	13,018	.....	44,340
Cooke Mines	8,782	23,472	529	32,783
Barton	32,720	.....	.....	32,720
Savage Mountain	2,936	104	.....	3,040
George's Creek Min'g	172	.....	.....	172
	1,162,830	652,151	67,688	1,882,669

Compared with 1868 the Consolidation Company shows an increased production of 73,313 tons; the American, 71,744; Cumberland Coal and Iron, 50,661; Hampshire and Baltimore, 4,761; Borden Mining, 46,729; George's Creek Coal and Iron, 54,377; Piedmont Coal and Iron, 45,762; Atlantic and George's Creek, 47,217; Potomac Coal, 12,497; Franklin Coal, 41,732; Midlothian Coal, 42,230; Swanton, 25,872; Maryland Coal, 44,340; Cooke Mines, 11,661; Barton Coal, 26,370; Savage Mountain, 335. There was a decrease of 32 397 tons in the production of the Central Mining Company; 39 tons in that of the George's Creek Mining Company; 9,749 in the New Hope Mines, and 5,190 in the National Coal Company. The net increase of production during the year was 552,226 tons. The following table gives a recapitulation of the manner of transportation of the coal:

By Cumberland and Pennsylvania Railroad to Baltimore and Ohio Railroad	981,297	
By Cumberland and Pennsylvania Railroad to Chesapeake and Ohio Canal	573,243	
By Cumberland and Pennsylvania Railroad to Local	35,480	
		1,590,020
By Cumberland Coal and Iron Co.'s Railroad to Baltimore and Ohio Railroad	99,027	
By Cumberland Coal and Iron Co.'s Railroad to Chesapeake and Ohio Canal	78,908	
By Cumberland Coal and Iron Co.'s Railroad to Local	30,990	
		208,925
By Hampshire and Balt. Co. (Va. Mines) to Baltimore and Ohio Railroad	82,506	
By Hampshire and Balt. Co. (Va. Mines) to Local	1,218	
		83,724
Total tons in 1869		1,882,669

The following table shows the aggregate production of the mines from 1842 to 1869, inclusive—twenty-eight years:

	C. & P. R. R. Tons.	C. C. & I. Co.'s R. R. Tons.	G. C. R. R. Tons.	H. R. R. Tons.	Ag'rate. Tons.
1842	757	951	.....	.....	1,708
1843	3,661	6 421	.....	.....	10,082

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN COMMON CARRIERS OF PASSENGERS BY FREIGHT TRAINS—PENALTY TO PASSENGERS FOR VIOLATING RULES—WHEN NEGLECT OF COMPANY'S AGENTS EXCUSES PURCHASE OF TICKET.

The facts of the recent case of The Chicago and Alton Railroad Company *vs.* Flagg (43 Ill., 365,) are fully and clearly stated in the following opinion by

LAWRENCE, J.—This was an action on the case brought by the appellee against the railway company for wrongfully expelling him from one of its trains. Being desirous of traveling a short distance on the road, he entered what is called a caboose car, attached to a freight train, without a ticket. From the conversation which subsequently took place between him and the conductor, as drawn out by the defendant's counsel on the cross-examination of witness, it appears he was unable to procure a ticket because the ticket office was closed. When his ticket was demanded on the train he offered to pay his fare, and also offered to give the conductor ten dollars to be kept by him until a ticket could be procured at the next station.

The conductor replied that he was forbidden by the rules of the road to receive money for fares, and should he do so he might lose his place. The train stopped at a water tank about a quarter of a mile from a station called Lanndale, and the conductor there required the plaintiff to leave the train. No resistance was made by him, and no violence or insult offered by the conductor. The jury gave the plaintiff a verdict of one hundred dollars, for which the Court rendered judgment.

It appears from the record that, although this was a freight train, yet it regularly carried passengers, and was held out to the public as so doing. The company itself put in evidence a printed notice, with certain regulations in regard to the carriage of passengers on freight trains, and forbidding conductors to carry them unless provided with tickets in advance. It was therefore a common carrier of passengers by this train as well as by its regular passenger trains, and would have no more right to expel a traveler, wantonly and without cause, from one train than from the other.

It is urged, that the company must have the power to make reasonable rules for the government of its trains. Undoubtedly, and if a company deem it advisable to require tickets to be purchased before taking passage on certain classes of trains, its authority to do so must be conceded. If its rules in this respect are knowingly disregarded, a passenger may be required to leave the train at any regular station, but only at such stations, as decided in the C., B. & Q. R. R., *vs.* Parks, 18 Ill., 465. The wilful neglect to comply with the rules in this matter would be like a refusal to pay the fare, and could place the passenger in no worse position. But when the company requires tickets to be purchased at the station, it must furnish convenient facilities to the public by keeping open the office a reasonable time in advance of the hour fixed by the time table for the departure of the train. Should it fail to do this, a person desiring to take passage would have the right to enter the train and be carried to his place of destination by payment of the regular fare to the conductor. To permit a company to complain of a violation of its own rules necessitated by the negligence of its own agents, would be absurd. If then, as is fairly inferable from the evidence, the plaintiff was prevented from buying a ticket by the absence of the ticket agent, he was rightfully on the train, and his expulsion was unlawful.

But even if wrongfully on the train from wilful non-compliance with this rule, he was expelled at a place which, under the statute, rendered the expulsion itself illegal. It is urged, that a water tank, if an "usual stopping place," is within the letter of the law. It is within the letter, but so obviously without its spirit, that to permit a passenger to be expelled at a water tank, often miles from a station, and from remote highways and habitations, would defeat the object of the law, and be a striking instance of "sticking in the bark." As has been several times said by this Court, the statute means the usual stopping places for the discharge of passengers.

It is in proof that passengers, desiring to enter or leave the train at Lanndale station, often did so at this water tank, as the freight train frequently passes the station itself without stopping, and the tank was only a quarter of a mile distant. It is also in proof, that passengers left at the station when the train stopped there. Whether this tank was the usual place for the discharge of passengers from freight trains, was distinctly left to the jury by the sixth instruction for the defendant; and they found it was not. Their finding was undoubtedly right. A local usage, adopted by persons living in the neighborhood and familiar with the ground, for their own convenience, cannot be considered as making any place but the regular station the proper point for the discharge of passengers.

It is also urged, that, as the conductor acted in good faith, and without violence or insult, and there is no proof of actual damage to the plaintiff, the verdict should have been for only nominal damages. The verdict was for one hundred dollars. It was after dark when this affair occurred, and the plaintiff was lame and had two bundles that seemed to be heavy. In order to reach the station or village, he had to pass over a covered railway bridge which spanned a stream, and which he had to cross by means of a plank walk or foot path, about three feet wide, laid down upon the timbers. The only light came from below and from the ends of the bridge. For a stranger laden with bundles, to be compelled to walk through a dark railway bridge at night, on a narrow path, uncertain as to when a train may come, and liable to be crushed if one does come, is certainly not a desirable experience. The jury had the right to take these things into consideration, and as the plaintiff himself had been guilty of no delinquency, and was anxious to pay his fare, and as his legal rights were violated in expelling him from the train, it was proper for the jury also to consider, not only the annoyance, vexatious delay and risk, to which he was subjected, but also the indignity done to him by the mere fact of expulsion. This case is widely different from that of the Chicago and Alton R. R. Co., *vs.* Roberts, 40 Ill., 503. We cannot say the damages were accessive.

It is urged that the Court erred in refusing the defendant's seventh instruction, which was, in substance, that, even if the plaintiff was wrongfully put off the train, yet if the conductor acted

in good faith and without violence, the jury could give only such actual damages as the plaintiff sustained, or if he sustained none, then only nominal damages. It is unnecessary to add, what we have already said on this subject. In a case of this character, where the plaintiff was without fault, the jury had a right to give more than nominal damages, even though no pecuniary loss or actual injury to the plaintiff's person was proven. The considerations above named may properly enter into the verdict in a reasonable degree. Neither did the Court err in modifying the other instructions by adding that the phrase "usual stopping place," means in the statute a regular station for passengers to get on and off the train. That is what it does mean. Chicago, B. and Q. R. R. *vs.* Parks, 18 Ill., 465.

The judgment must be affirmed.

Judgment affirmed.

Anthracite Coal Trade of the United States.

We present our readers this morning with the official returns of the Anthracite Coal Trade of the United States, together also with the official returns of the Bituminous Coal Trade moving towards the seaboard which have been heretofore embraced in our tables. It will be seen that the supply of Anthracite coal has fallen off only 183,630 tons, while the Semi-Anthracite and Bituminous coals embraced in our table have increased 674,835 tons during the year.

The whole supply of Anthracite sent to market

	Tons.
In 1869 was	13,221,386
In 1868	13,405,016
Decrease in 1869	183,630
Semi-Anthracite and Bituminous in 1869	2,693,818
" " in 1868	2,040,495
Increase in 1869	653,323

Making the whole increase in Anthracite and Bituminous coal embraced in our table, for the year 1869, 491,204 tons against 1,336,813 tons in 1868.

The whole supply of coal mined in the United States in 1869 we give as follows:

	Tons.
Official quantity of Anthracite sent to market	13,221,386
Consumed in Coal Regions, (estimated).	2,500,000
	15,721,386
Bituminous, (official), including 423,810 tons imported.	3,117,628
Bituminous mined and consumed in the United States, in 1869, not embraced in our tables (estimated).	11,000,000
Total product for consumption in 1869.	29,889,014

The consumption of coal in England in 1868 was 103,141,157 tons. In 1859 it was 71,900,000 tons, showing an increase of 31,241,141 tons in ten years. Our consumption seems small compared with the consumption of Great Britain, which is not as large in territory as the States of Pennsylvania and New York. With ample protection to our home industry, our annual coal product will increase in a very short time equal to that of Great Britain.

To give a stronger comparison of our trade with that of Great Britain, we can state that the whole product of Anthracite coal sent to market from the Schuylkill and Lehigh Regions from 1820 and 1822 to 1869 inclusive, amounts in the aggregate to 112,640,632 tons, and only exceeds the product of Great Britain in the single year of 1868, 9,499,485 tons.

Of the total product of 15,721,386 tons Anthracite furnished in 1869, about 6,700,000 tons were consumed on the lines of the different transporting companies short of tide water, leaving but about 9,000,000 tons that reached tide. Of this quantity there was not less than 7,000,000 tons sent to New Jersey and markets East of New Jersey. Besides the consumption of Philadelphia and vicinity, there were only 171,631 tons, including 17,182 tons sent to foreign ports, shipped South of Pennsylvania, from Philadelphia.

The following is the official statement of the quantities sent to market in 1869, from the different Regions embraced in our table, compared with 1868, giving the increase and decrease from each region:

	1868. Tons.	1869. Tons.
Schuylkill Region:		
By Reading Railroad	3,120,923	*3,688,923
By Schuylkill Canal	987,628	698,879

Total inc. in 1869	.....	491,204

* The whole coal tonnage of the Reading Railroad in 1869 was 4,239,457 tons—the balance was derived from other regions, &c., and reported elsewhere.

† The coal trade of Pinegrove was 146,241 tons in 1869. The balance is reported in the Reading Railroad Report.

‡ The whole quantity transported over the Lehigh Valley Railroad in 1869 was 2,310,170 tons anthracite, and 21,227 tons bituminous coal, in all 2,331,497 tons, but a portion was delivered to and reported in other returns.

‖ The whole quantity transported over Lehigh and Susquehanna Railroad in 1869 was 1,297,825 tons. The balance is reported in Lehigh Canal, Lehigh Valley Railroad, &c.

§ Of this quantity 18,707 tons was sent *via* Delaware and Hudson Canal. The balance by rail.

¶ Of this quantity 181,684 tons was sent by Railroad from Honesdale.

** This is only the product of the Shamokin Region transported over the Shamokin Division Northern Central Railroad—the other is reported in the Reading Railroad and Canal reports.

The supply of Anthracite coal sent to market in 1868 and 1869 was furnished as follows:

	1868.	1869.
Wyoming Region	5,990,813	6,068,369
Schuylkill "	4,414,356	4,748,969
Lehigh "	2,507,582	1,929,583
Shamokin "	492,265	474,525
	13,405,016	13,221,386
	13,221,386	
Loss in 1869	183,630	

To show the course of the trade and the supply from different regions, we subjoin the following for reference:

Year.	Schuylkill.	Wyoming.	Lehigh.
1860	3,270,516	2,941,817	1,821,774
1861	2,697,489	3,055,140	1,738,377
1862	2,890,598	3,145,770	1,351,054
1863	3,433,265	3,759,610	1,984,713
1864	3,642,218	3,960,836	2,054,669
1865	3,735,802	3,256,658	1,822,535
1866	4,633,487	4,736,616	2,128,867
1867	4,334,820	6,328,322	2,062,446
1868	4,414,356	5,990,813	2,507,582
1869	4,748,969	6,068,369	1,929,583

At the close of last year's business we stated that if Congress, then in session, would remodel the Tariff in the interests of domestic industry, and our anthracite furnaces, the market would take about one million tons increase between the coal regions and the seaboard. They did not settle either of these questions, and the increase was only 491,204 tons. Many inquiries have also been made as to the prospects of the present year's business. We can only repeat what we stated last year, that if the Tariff question is adjusted early in the session in favor of American interests, and the financial questions settled satisfactorily to the producers, not the money changers, the market will take an increase of not less than one and a half million tons Anthracite, if prices are kept at a moderate rate, and about 400,000 tons Bituminous coal. If a different policy is pursued by Congress, it will reduce the consumption about a half million tons from the above estimate. With constant work, free from difficulties and stoppages, and with fair prices for coal, wages and transportation, the different coal regions can easily furnish this increase in 1870.—*Miners' Journal.*

☞ A dividend of three per cent., free, has been declared on the full shares of the capital stock of the Louisville, New Albany, and Chicago Railway Company, payable February 15, at the office of the Farmers' Loan and Trust Company, N. Y.

☞ The Cincinnati and Muskingum Valley Railroad Company has been incorporated for the purpose of building a railroad from Cincinnati to Cleveland. Capital four millions.

☞ The completion of the Mansfield and Framingham Railroad was celebrated on the 25th ult. This road is 21 miles in length, extending from the South Framingham Junction of the Boston and Albany Railroad to the Mansfield Junction of the Boston and Providence Railroad. The cost of the road has been $550,000. E. P. Carpenter is President, and H. A. Blood Superintendent.

☞ The Martinsburg and Potomac Railroad Company has been organized by the election of a board of directors with Hon. C. J. Faulkner as president. This company has been authorized to construct a railroad from the Potomac River to Martinsburg, West Virginia. It will be an extension of the Cumberland Valley Railroad, and is expected to be built during the present year.

☞ The following gentlemen have been elected officers of the Little Rock and Fort Smith Railroad for the ensuing year: C. G. Scott, president; J. L. Shinn, vice president; G. N. Peay, secretary and local treasurer; J. H. Haney, consulting engineer; G. L. Adams, treasurer, (at Boston.) Messrs. C. G. Scott, U. M. Rose and J. H. Haney were appointed an executive committee.

☞ The connection of the new branch of the South Side Railroad at Hunter's Point will be complete by the latter part of this week. The work of extending the eastern end of the road to Setank is being rapidly pushed forward. Ground has been broken on the Hempstead branch, and it is thought that by the 1st of July it will be in running order.

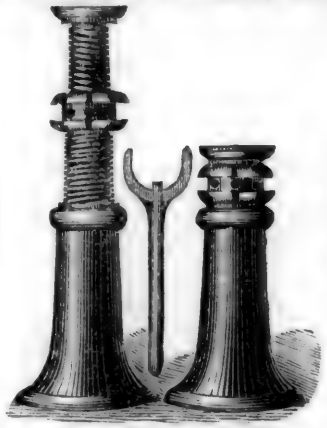
☞ The New York and Boston Railroad Company have concluded contracts for the construction of a railway from Brewster's, on the New York and Harlem Railroad, to Carmel and Lake Mahopac, a distance of eleven miles, and it is intended to begin work next week.

To Contractors.

SEALED PROPOSALS will be received until the 25th inst., for doing the Grading, Masonry and Bridging on the Ridgefield and New York Railroad from Port Chester, N. Y., to Ridgefield, Ct., 23 miles. For further particulars apply to

S. N. HAIGHT, Chief Eng.,
Morrisania, N. Y.

MORRISANIA, Feb. 7th, 1870.



A Merchant of Responsibility and in good standing desires to make an arrangement with some large manufacturer to act as agent for the sale of goods. He will be prepared to make advances upon goods consigned to his house, to an amount of $25,000 to $100,000. A business in metals preferred. Address E. R. H., Box No. 4,600 New York Post Office.

For Pure Water use this celebrated Pump, entirely tasteless, durable and reliable; equal to the good old-fashioned wooden Pump, and costing less than half the money. Easily arranged so as to be non-freezing, and in construction so simple that any one can put it up and keep it in repair.

THE BEST AND CHEAPEST PUMP NOW MADE.

BALL'S PATENT TELESCOPE JACK.

Hot and Cold Punched Nuts, Bolts, Lag Screws and Washers.

Belting, Packing Hose, Rubber Springs, Car Trimmings, Steam Pumps.

ALBERT BRIDGES,
MANUFACTURER AND DEALER IN
Railway and Mining Supplies and Machinery,
No. 46 CORTLANDT STREET,
P. O. Box, 2843. NEW YORK.

Notice to Contractors.

CHESAPEAKE AND OHIO RAILROAD.

SEALED PROPOSALS will be received at the Engineer's office at Charleston, W. Va., until 12 M. March 1, 1870, for the GRADUATION, MASONRY and the SUPERSTRUCTURE OF BRIDGES on the Chesapeake and Ohio Railroad between the Falls of Kanawha and the Ohio River, including THREE MILLIONS CUBIC YARDS OF EXCAVATION, and SEVENTY THOUSAND CUBIC YARDS OF MASONRY.

Also, at the Engineer's office at Richmond, Va., until 12 M. March 10, 1870, for several heavy sections east of the Falls of Kanawha, including the unfinished work near Millboro', and that eight miles east of the White Sulphur Springs, the Great Bend tunnel, 6,400 feet; Lewis tunnel, 3,800 feet; five other tunnels from 500 to 1,700 feet long; several sections in rock cutting; and about 70,000 cubic yards of masonry.

Profiles and specifications can be found at the office of the company, 54 William street, New York, on and after February 1; at Richmond, Va., and at Charleston, W. Va., on and after January 15, 1870. The company reserves the right to reject any or all the bids offered, and to make private contracts for the work.

Information as to time, etc., will be given at the letting. For further information apply to H. D. Whitcomb, Chief Engineer, Richmond, Va., or to W. A. Kuper, Principal Assistant Engineer, Charleston, West Virginia.

C. P. HUNTINGTON,
President.

414

TO BRIDGE BUILDERS.

OFFICE OF SOUTH STREET BRIDGE COMMISSION, No. 234 South FIFTH Street.
PHILADELPHIA, Jan. 17, 1870.

SEALED PROPOSALS for erecting a bridge over the River Schuylkill at South street will be received at the office of the Commission, in the Department of Surveys, No. 234 South FIFTH Street, until 12 o'clock M. of the FIRST DAY OF MARCH, 1870, for the construction of a wrought iron drawbridge, with Murphy's modification of the Pratt truss. To have cast iron piers in river, and stone abutments, with approaches of retaining walls; arches of brick, and iron I girders, as described in the specification. The entire length of structure to be 2,419 feet, the truss spans to be 185 feet each, with pivot draw, giving an opening of 77 feet on each side.

The proposal to be for an aggregate bid, to be accompanied by a bond with two approved sureties to an amount of $50,000. Fifteen per cent. to be retained as the work proceeds until the same, inclusive of the $50,000 noted in bond, shall amount to fifteen per cent. of the contract price, after which the current estimates will be paid in full.

Plans may be seen and specifications obtained at the office of the Commission on and after the 29th instant.

MOSES A. DROPSIE,
President of the Commission.

THE WHARTON Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

Locked Safety Valves.

TO
MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

CEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

Hemp Packing.

BEST HACKLED HEMP PACKING,

MANUFACTURERS OF

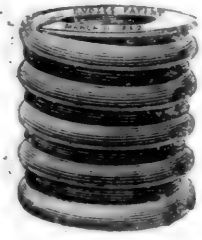
RAILWAY CAR SPRINGS.

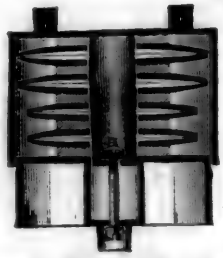
The Original Standard Volute Buffer Spring.



Patented.—All others are Infringements.

Small Rubber Centre Groupe Spiral.

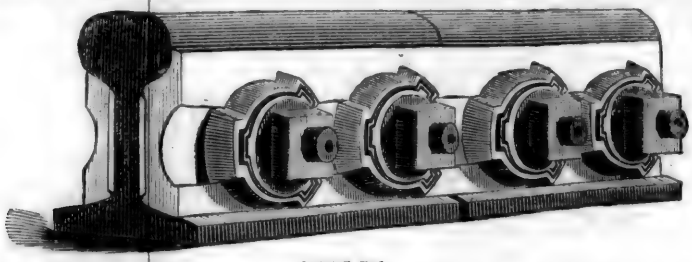
Large Rubber Centre Spiral.



Compound Spiral.

Soid India Rubber.

Double Volute Buffer.



Incased Belleville Spring.

All Springs made by us are WARRANTED.

All Steel and Rubber for our Springs Manufactured by ourselves expressly for the purpose.

Manufactory, Manhattanville, N.Y.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

TAYLOR MFG. CO.,
Exclusive Manufacturers, 73 Beekman St., N. Y.

PACIFIC MAIL
Steamship Company's
THROUGH LINE TO
California and China.

FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$125 to $170.	**$60.**

according to location of berth.

These rates include berths, board and all necessaries for the trip.

Steamers of the above line leave Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON 5TH AND 21ST OF EACH MONTH,

except when those days fall on Sunday, then the day previous.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Feb. 21, ALASKA, CAPT. GRAY, connecting with CONSTITUTION, CAPT. PARKER.

Steamer JAPAN, will leave San Francisco March 1, 1870, for China and Japan.

Freight for steamer ALASKA, received until 4 P. M. on SATURDAY, Feb. 19. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

ENVELOPES.

SAMUEL RAYNOR & CO.,
115 & 117 William street,
New York.

Manufacture every style of envelope, from the smallest drug size to the largest official; and any size, pattern, shape, or quality wanted for railroad companies, express and insurance companies, banks, bankers and brokers. All well made and gummed. Samples given when requested.

STAINED GLASS.

The Railroad System of Massachusetts.

The first annual report of the Board of Railroad Commissioners of the State of Massachusetts, lately published by order of the Legislature, is a document of much general, as well as local interest; and a few facts selected from the great mass of valuable information it contains will, doubtless, prove of interest to our readers in all parts of the country. The work for which the Board was appointed was to examine and report on the actual workings of the State Railroad system in its bearings upon the business and prosperity of the Commonwealth and to make such suggestions as to the general railroad policy of the State as might be needed for the information and guidance of the Legislature. In fulfillment of this duty the commissioners began their investigations in July last, and since that time have inspected, either privately or officially, all the railroads of the State, and have also gone carefully over such portions of the Boston and Albany, and Boston, Hartford and Erie Railroads as are situated in New York and Connecticut. With regard to their condition the report speaks favorably. They are said to be in very good order throughout, and under the control of experienced and thoroughly competent officials. In travelling upon roads in other parts of the country the Commissioners claim to have found nowhere, outside of New England, as luxurious accommodations as those afforded by the first class passenger cars in use in their own State. In order to admit of the use of still more commodious carriages, the Commissioners recommend that the tracks of all narrow gauge roads be separated so as to give a space of eight feet between them, which would admit of the wide cars now in use on the roads from Chicago to New York being run direct to Boston.

With reference to what is styled "the traditional railroad policy" of the State, the report speaks at considerable length. The key to that policy has ever been the ruling desire to open new and broader channels of commerce with the West. The Western Railroad was projected and chartered in 1833, and Massachusetts first identified itself with the system of railroad development in 1836 by subscribing to ten thousand shares of the capital stock of the enterprise. The precedent then established has been followed in repeated instances. State aid, as the loan of the credit of the State to private corporations has been called, was granted to a number of railroads, but almost invariably to corporations formed with a view to what is called through business; and in the great majority of cases to through business with the West. As a result of this liberal system, without considering the Northern lines of railroad connecting directly with the West, *via* Ogdensburg, or the Old Colony and Newport and the Boston and Providence Railroads connecting with the same region *via* Long Island Sound and New York City, none of which lines were ever subsidized by the State, Massachusetts and its railroad center, Boston, now have completed or in progress three distinct through lines connecting with the interior of the Continent. To these three lines—the Boston and Albany, the Boston, Hartford and Erie, and the Troy and Greenville roads—the State has already involved itself to the extent of $15,000,000. All of these lines have been thus subsidized simply to render Massachusetts and Boston as accessible to the West as the other seaboard states and commercial centres. The whole railroad policy, and nearly the whole of the railroad agitation and discussion for thirty years has been directed to this road. Other interests have been ignored, or considered only incidentally, but those who have come to the Legislature with any project of development or reform, whether asking for money for special legislation, for power to take property or for acts of consolidation, have ever been attentively and favorably listened to, providing only they proposed to have this end in view. It will thus be seen that an absorbing desire to successfully compete in the field of Western export and import trade has, from the first, been the leading feature of the public railroad policy of Massachusetts.

This policy, say the Commissioners, has not, up to this time, resulted in any marked success. It is, in the present stage of the discussion, wholly immaterial whether it has been caused by the inactivity of the railroads, by lack of competition, by insufficiency of means, or by geographical disadvantages. The fact of failure is patent, and has for years been made the subject of loud and reiterated complaints against certain of the Massachusetts Railroads. Whatever the cause may be, it is a matter of record that there are several great trunk lines running to seaboard cities of other States, any one of which yearly transports to and from the West, much more than all the Massachusetts lines combined. In view of these facts the Commissioners urge the proposition that great competing through lines of railway have proved a failure and are oppressive to the local trade and traffic. Competition is either merged in combination, by which rates are increased, or, where rivalry does exist, the reduction in through rates is made good by an increase on local traffic. Thus the people are taxed in their local business by the great lines, in order to meet the competition which reduces through prices. In the local traffic there can be, of course, no competition. The remedy for this suggested by the Commissioners is to discourage competing lines but strengthen and consolidate the main ones now in existence. Competition is recognized as oppressive to the internal business of the State, because, while decreasing through charges, it makes the reduction good, or more than good, by increased rates in home business. By the process of strengthening and consolidating existing railroad interests, the Commissioners argue that relief

could be enforced for the local trade. The report shows that passenger fares within the limits of the State are double those charged on through passengers. It is a difficult question to meet without doing injustice to one or more of the important interests involved, and the plan suggested by the Commissioners might have been good at the outset of railroad building, but we do not see how, in the event of its adoption by the legislature, it could be enforced at this time without depriving the railroads of their most valuable vested rights. The question is one, however, which we do not propose to discuss, as it is doubtful if any system could be devised to remedy the evils complained of by the Board that would command any general acceptance or stand the test of criticism.

Among the less important features of the report we notice a statement to the effect that between the 15th of July and the 1st of December 1869, seventy one accidents were reported on the railroads of the State. Fourteen of these happened to passengers, five of which were fatal; and all but one of the fourteen resulted from the recklessness of the victims in jumping from the cars while the trains were in motion. Twenty four accidents happened to employees from various causes assigned in the report, seven at crossings where the persons killed or wounded had themselves to blame, and twenty-five were incurred by persons unlawfully walking on the track. Of the total number forty were fatal. From this statement it will be seen that passenger travel in Massachusetts has been comparatively free from risk during the past year to persons who properly regarded their own safety by observing the rules of the companies. In the compilation of this able and comprehensive document the Commissioners have manifested a conscientious desire to discharge in every respect the responsible duties required of them, and from the imposing array of facts they have accumulated during the short space of time since they entered on the work, the Legislature will, doubtless, find valuable data for future reference and guidance in shaping the railroad policy of the State.

Boston and Albany Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 9th inst.:—C. W. Chapin, Esq., President, in the chair. The report of the directors, an abstract of which was published in our last issue, was accepted. The following gentlemen were elected directors for the ensuing year: Chester W. Chapin, of Springfield; Daniel Denny, of Boston; Ignatius Sargent, of Brookline; Josiah Stickney, of Watertown; Ginery Twitchell, of Brookline; D. Waldo Lincoln, of Worcester; William Claflin, of Newton; Henry Colt, of Pittsfield. The President stated that the temporary loan of £250,000, borrowed of Baring Brothers & Co., London, in 1868, to meet the bonds maturing in October of that year, was so conditioned that either party might terminate the loan on six months' notice. On the 6th of January notice was received from the Barings that they desired to recall the loan, and it was therefore necessary for the company to provide for the payment of the loan, £125,000 falling due on the 6th of July next, and £125,000 on the 24th of July. The President announced that this would probably be provided for by the issue of new stock, and that the balance of the foreign debt falling due in 1871 over and above the amount of the sinking fund would also be provided for in the same manner.

Rome, Watertown and Ogdensburg R. R.

The gross earnings of the road and branches of this company, (including the Oswego and Rome Railroad, leased) for the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$477,088 41	$496,473 96
" freight	658,143 50	699,975 25
" mails, etc.	73,708 54	77,684 84
	$1,208,940 75	$1,274,134 05
Expenses, viz:		
Operating & maintaining road	$691,383 54	$686,794 70
Expended on new construction	30,705 07	30,000 00
Taxes paid	56,996 29	55,341 66
	$779,084 90	$772,136 36
Leaving a balance of	$429,855 85	$501,997 69
Add balance from previous year		642,054 12
Add income of sinking fund		22,545 86
Total		$1,166,597 67
Thus accounted for:		
Rent to Rome and Oswego Railroad.		$50,540 85
Coupons and interest		119,090 72
Two dividends, 5 per cent. each, and taxes		262,500 00
Fifty per cent. on 4,764 shares new stock		238,200 00
Iron credited surplus account in error in 1868		19,296 29
Surplus, December 31, 1869		476,969 81
Total as above		$1,166,597 67

It will be seen that the earnings exceed those of the previous year $65,193 30, while the expenses are $6,948 54 less—showing a net increase of $72,141 84. The report says:

Often before, and now again, are we permitted, on reviewing the transactions of the year, to find new pleasure in the fact, that as the years move on in their ceaseless course, each makes its mark in advance of those of the past, while our confidence in the present and future value of the property acquires new strength and assurance. It could not well be otherwise, in view of the fact, that such confidence is based upon the already highly prosperous condition and progressive character of the country through which the road extends, and which cannot be expected, in the ordinary course of events, to reach the point of culmination for a great many years to come, either as regards the general agricultural advancement, or the progress which may be reasonably expected to utilize the immensely valuable mineral resources pervading so large a section on the northern portion of our line. That which has already been done, in the mining and shipment of the ores of this region, has served to attract the attention of capitalists and consumers from many sections of our own and other States, where the excellence of the article produced here is now appreciated. In the report of 1868, it was remarked, that the extent to which this ore could be marketed, was likely to be limited only by the quantity which could at present be mined and transported, the truth of which has been abundantly proven, by the experience of the year just closed. Furnaces for the manufacture of iron upon a large scale, and depending on the ore from this region for a supply, have been, and are being, erected at Rome, Syracuse, Rochester, and elsewhere in this State, requiring, for their use alone, as much as the entire quantity hitherto produced from the mines, leaving the larger demand already manifest from the Hudson river, and from Pennsylvania, to which much of this ore has been taken, without a supply, unless it shall come from the more extended facilities for mining, and transport to be yet supplied and set in motion. Several new lines of railroad are contemplated, and some already in progress, tending to a connection with our road, whereby to secure the readiest means of transport between the coal regions of Pennsylvania and the mountains of iron ore, lying contiguous to our line, in northern New York.

Several coal and railroad companies, already engaged in this trade, are earnestly looking and acting in view of the importance to them of any route which can be opened, securing to them, at the same time, a market for coal, and a return freight so well adapted, and almost the only available article that is adapted, to transportation in the class of cars used by them. The consumption of coal in northern New York, is now estimated at 100,000 tons a year, and constantly increasing, even under the present cost of transportation. This will doubtless be increased many fold as these new routes are opened for moving this class of freight, in opposite directions, thereby largely reducing the cost of each, to the consumer. Whenever this is done, it is believed, the ore trade from this region will far exceed, in quantity, the coal that will be sent here, but not the quantity of the latter that will be sent, in this direction, as far as Oswego, which is destined to become the great coal mart of the Lakes, within a very few years. These facts, now so apparent, will lead to every exertion being made by those at present engaged in the business, and also by new parties now preparing to enter the field of production, leaving to us, mainly the duty to ourselves and to the community dependent upon us, to supply the equivalent means of transportation to the end of our line. About 150 new cars were added in 1868, mainly for this purpose, and yet, during a considerable portion of the last autumn, the demand for cars upon our road was far beyond our ability to supply.

The business of mining ore for sending abroad from this section, began about 1868, during which year, the amount received by us was small; the past year, the freight earnings at the principal stations where ore is shipped, amount to about $80,000—what they will become henceforth, we are quite content to entrust to the future to develop. It does not seem unlikely that 200 additional cars will soon be required to meet the demands that will be made upon us. The rule which should govern in this case is, to ascertain, by the most careful and reliable means, what number and description of cars are needed, and can be permanently employed to advantage, and then, without regard to the number or what they may cost, to supply the demand.

In our report for 1867, reference was made to the project, then in contemplation, of building a railroad westward, from the city of Portland, Maine, across the States of New Hampshire and Vermont, to intersect the Ogdensburgh and Lake Champlain Railroad at or near Rouse's Point. By the report of the Portland and Ogdesburgh Railroad Company, just received, we learn that several sections in Maine, and several in Vermont, are under contract, and in process of construction, with an earnest intention of prosecuting the work vigorously, until the same is coempleted and the cars running upon the whole line.

The interest felt by us at first, when the road was only in contemplation becomes more intense in the nearer view of its completion. By it there will be opened a more direct route westward from the British Provinces, from the State of Maine, and from all northern New England, by an American line, of which the road of this company will form an important link.

It may in truth and perfect propriety be stated, that the excellent financial exhibit shown in this report, is not in any degree due to withholding from the road. On the contrary, a very full and liberal allowance has been made, of material, labor, and expenditure of every kind, to maintain

the same in all its parts, including machinery, buildings, &c., in the same excellent condition they were in at the beginning of the year. Indeed, in some respects there has been decided improvement.

The expenditures for this purpose in 1868, including taxes..... $323,685 31
The expenditures for this purpose in 1869, including taxes..... 318,748 96

More than 2,000 tons of new iron has been laid during the year, with a proportionate quantity of ties, and other material.

The new iron has been laid with the Howe joint, that in use previously having been found to realize our best expectations. There have been used for the first time on this road, a considerable quantity of the new and improved screw spike, in reference to which, it may be regarded as certain, that their holding power must be as much greater than an ordinary spike driven in wood—as a screw, under other circumstances, is more than that of a nail—hence, when used upon bridges, curves, switches, and other places where spikes are apt to work loose, must cause the track to be much more secure.

A large amount of ballasting has been done in the year. Culverts have been rebuilt, cattle guards and fences have received fully the usual attention, and in every department relating to the road proper, no known requirements have been neglected to maintain the same in the best and safest condition.

The rolling stock of the company at present consists of the following: 88 locomotives, 28 passenger coaches, 14 baggage and mail cars, 275 box and caboose cars, 20 cattle and barrel cars, 359 platform cars, and 4 snow plows.

It was supposed that the considerable additions made to the car stock of the company, in 1868, would prove quite sufficient for the present, and, therefore, not much has been done in new work, during this year, beyond building new cars in place of those which had become worthless, and rebuilding some of every class which could not otherwise be used safely. One new locomotive has been placed on the road, and another is under way. Perhaps the most important change which has been, or could well be made, to improve the rolling stock, is that of replacing the tires of very many of the locomotives with steel in the place of iron. Those of the latter material having been found to wear so uneven as to involve, besides frequent renewals, considerable loss of time, or the use of the engine, when in shops for the purpose of turning down the tires; the injury in this respect, aside from the cost of labor, often being as much for a single operation, as the difference in cost between iron and steel—the latter, also, being far superior in many other respects. It is our intention to maintain, as nearly as possible, each locomotive, coach, and car of every description, in condition to do a day's work for every day they may be required.

Fully the usual amount of material for construction and repair is now on hand in this department, and which has always to be provided in advance of the time when required for use.

The principal expenditure of the year, for new buildings, has been made at the city of Watertown, to accommodate the steadily growing business of that station, which is, undeniably, of greater importance to us than any other upon the line. The new structure is of brick, fifty feet square, three stories in height, and, together with the improvements made and contemplated to the former building, will afford excellent accommodations for the transaction of our own business and the convenience of our patrons.

Both as a matter of comfort, safety, and economy, the whole of the new building and the old are heated by steam apparatus of the best construction. At Rome, a new and large coach house has been built, which has been much needed, to obviate the necessity of having our coaches, in daily use, stand for many hours each day exposed to the elements. The one now built, is 85 feet by 240, and, with the one in use previously for coaches not in daily use, will be quite sufficient for many years to come. There has also been built, at the same place, an additional building of brick, connected with the paint shop, for the purpose of storing materials belonging to that department.

The freight house, destroyed by fire at Richland, in the autumn of 1868, has been replaced, also a new and larger freight house at Potsdam Junction, together with a new ice house at the same place, and another at Cape Vincent, at both of which points the ice is secured and housed for use in the cars, for butter, fish, &c. Tank houses, and sheds for the storage of coal, have been erected at several places on the line, as well as many minor improvements not necessary to specify in this report.

About the usual quantity of new or re-rolled iron, will be required for use this, as for several years past. Also, in consequence of considerable having been used in branches, side tracks, etc., it will probably be thought expedient to add a few hundred tons this Spring; and, perhaps, of steel rails instead of iron for use at points where most exposed to wear. Doubtless the policy of the past should be continued, of making some additions and improvements each year to our station buildings, at points where they are most needed.

The greatest outlay required for the coming year will doubtless be in making the necessary additions to the rolling stock, but the need for such expenditure brings its own recompense.

It will be observed that the balance of supply account, which covers fuel, lumber, materials for track and car construction, repairs, etc., is less than at the beginning of the year. It was then $274,192 64; from this should be deducted $19,296 29, erroneously credited in 1868 to surplus instead of supply account, still leaving the balance $22,961 86 less than it was at the time stated.

The results arrived at by our own experience thus far, in the use of coal, corresponds with that of others who have used it in part or altogether for many years. We have had an average of about six coal burners in use during the year, and from the most careful computation of cost and service performed, as compared with wood, there is no room left to doubt that there is great economy in the use of coal. We shall act upon this fact, and use more coal burners in future. There is not only a very material gain in the first cost, but an important saving in weight of fuel transported to do the same work, and also a large gain in time and expense for handling, storage, piling, etc., etc. There are some who have claimed that one important objection to its use, is the alleged abbreviation of the life or durability of the boilers, flues, fire boxes, etc., of the coal engine, as compared with those using wood, but from such facts as have come to our knowledge, we are more inclined to agree with those who consider this difference, if it exist at all, as quite inappreciable, and not to be compared with the decreased liability on account of the spark risk to property contiguous to the track, whether belonging to the company or to others.

An increase to the capital stock authorized by a vote of the stockholders to the extent of five thousand shares, has been mostly issued during the year, having been divided *pro rata* among the stockholders, at $50 per share, *and none otherwise*, bringing into the Treasury of $238,200, leaving the difference between that sum and par (or upon what has been delivered,) the same sum as above, viz., $238,200, which has been charged to surplus account, leaving still to the credit of that account an amount quite sufficient for all practical purposes, or for contingencies.

All that has been used of the money thus received for new stock, has been applied in payment of the company. The balance has been loaned on call on the best collaterals by instructions of the finance committee, to be used as required in further payment of bonds, or otherwise, as the board may direct. If there has been any apprehension that this company have fallen into the practice, too common nowadays, of stock *dilution*, one simple statement will doubtless be found sufficient to dispel any such fear. The stock, bonds, and debts of every description, outstanding, after applying the surplus and available means on hand, do not aggregate a sum equal to the actual cost of the property by several hundred thousand dollars.

The funded debt has been reduced $114,000 during the year, leaving the present amount of bonds outstanding, $1,439,000.

The company have no floating debt.

Two dividends of five per cent. each and Government tax on the same have been paid during the year, and one of same amount on the 15th January instant, which is the thirty-third dividend in order, and the thirteenth consecutive semi-annual dividend of five per cent. and tax, which has been paid by the company.

BALANCE SHEET, DECEMBER 31ST, 1869.

Cost of road and equipment		$4,000,000 00
" additional equipment		347,026 62
" new engine house		18,884 75
" new depot at Watertown & New work		23,880 59

President.—WM. C. PIERREPONT.

Vice President.—MARCELLUS MASSEY.

Directors.—Wm. C. Pierrepont, Marcellus Massey, Charles E. Bill, Samuel F. Phelps, John Ferguson, C. Zabriskie, Jr., Isaac N. Phelps, David Utley, S. D. Hungerford, Talcott H. Camp, Delos Dewolf, Gardner Colby, Jno. S. Farlow.

Gen'l Superintendent.—J. W. MOAK.

Secretary and Treasurer.—J. A. LAWYER.

☞ The following gentlemen have been elected directors of the Philadelphia and Reading Railroad Company for the ensuing year: Franklin B. Gowen, H. Pratt McKean, A. E. Borie, R. B. Cabeen, J. B. Lippincott, John Ashhurst, and Stephen Colwell. President, Franklin B. Gowen. Treasurer, Samuel Bradford. Secretary, Wm. H. Webb. General Superintendent, G. A. Nicolls Chief Engineer, Charles E. Byers.

Philadelphia and Reading Railroad.

We gave in our issue of 15th ult., an abstract of the "Transportation and Income Account" of this company for the fiscal year ending November 30, 1869. In our present issue we give the Report of the President. Below will be found several important tables referring to the years 1868 and 1869, including the "General Account." We also append a statement of the Cost, Earnings, Dividends, etc., etc., since the completion of the road in 1842-'43:

Roadway.	1868. Miles of	1869. Track.	1868. M. of	1869. Sidings.	1868. —Total—	1869.
Phila. and Reading	198.80	198.80	121.44	129.20	320.24	326.00
Mt. Carbon & Port Carbon	5.29	5.00	9.33	9.60	14.62	14.60
Mount Carbon	9.47	8.50	5.14	6.50	14.51	15.00
Lebanon Valley	86.66	94.70	15.80	15.80	102.46	110.50
Chester Valley	21.50	21.50	2.39	2.40	23.89	23.90
Schuylkill Valley	29.88	16.30	3.34	16.10	33.22	32.40
Mill Creek	15.58	7.60	8.71	17.10	24.29	24.70
Union	3.47	3.40	0.53	.....	4.00	3.40

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, February 19, 1870.

Stock Exchange and Money Market.

Money has been in quite moderate demand on speculative account at from 4@6 per cent., and for mercantile purposes at from 6½@8 per cent. per annum on very choice to prime grades of business paper. The offerings of capital from private hands have been liberal at the going rates. The city banks report an increase of nearly 1⅜ millions in their loan and discount averages, with, however, a loss of nearly 1½ millions of legal tender notes, nearly a million of specie and over 1⅛ millions of deposits. The city banks now hold about 33 millions more of specie and legal tender notes than the 25 per cent. of their liabilities on account of deposits and circulation, required by the national banking act. The U. S. Sub Treasury reduced its coin reserve nearly a million and increased its currency balance nearly ¾ths of a million, during the week. The general balance of the office on Wednesday, was $82,778,916, as against $80,766,970 on the 1st inst.

A few unimportant mercantile failures have been reported, since our last.

The specie reserve of the city banks according to the latest return is $38,072,184, against $27,854,331 same time last year. The city bank deposits are now $213,192,740, against $192,977,860 week ending Feb. 13, 1869. The legal tender reserve amounts to $56,603,000, against $52,334,952 same time last year. The circulation now stands at $33,703,572, against $24,263,451 same time last year. The loans are now $265,864,652, against $264,380,407 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $85,140,471 a day, against a daily average of $90,206,700 the preceding week, and $91,603,925 the week ending with Jan. 30, 1870. The current week's exchanges average about 92½ millions a day. The city banks, last week, reported a loss of $925,062 of specie, $1,546,439 of deposits, and $1,445,384 of legal tender notes. They increased their loans, $1,350,533; and reduced their circulation, $42,909.

National Bank notes to the amount of $288,350 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $320,802,741, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $21,239,385, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,563,356. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,307,350; and for the public deposits, $18,496,000—making a total of $360,803,350. The Treasury Department last week redeemed and destroyed $776,800 of worn and mutilated fractional currency, and issued $726,142 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 12, were $2,733,452 in coin, (including $2,495,000 from customs duties,) and $4,131,308 in currency; payments, $3,645,000 in coin, (including $521,394 of coin interest,) and $3,297,045 in currency; balance at the close of the week, $82,133,007 (including $74,641,054, of coin, and $6,089,576 of currency,) against $81,156,217 at the close of the preceding week, showing an increase of $976,790. The business of the Office on the first two days of the current week, was as follows: On Monday, receipts, $872,300 in coin, (including $638,695 from customs,) and $438,767 in currency; payments, $46,109 in coin, (including $34,000 of coin interest,) and $330,366 in currency. On Tuesday, receipts, $867,993 in coin, (including $854,064 from customs,) and $462,637 in currency; and payments $75,895 in coin, (including $67,316 of coin interest,) and $243,168 in currency. The balance at the close of business on Tuesday stood at $82,778,916, (including $6,417,447 of currency, and $76,259,343 of coin,) against $82,647,568 a week previous; and $79,931,305 on Feb. 20, 1870.

The aggregate receipts of the office in January were $68,407,045, including $10,152,898 in coin from customs at the port; aggregate payments, $77,697,503, including $17,698,727 of coin interest, and $1,232,271 of currency interest.

The U. S. Sub Treasurer retired, last week, $2,350,735 of coin certificates, received for customs.

Government revenues, have been up to a fair average yield since our last The excises have yielded about 3¼ millions; customs at the port of

New York, $2,449,735, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $7,790,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 106 millions. The reported yield of the excises from July 1, 1869 to Jan. 1, 1870, was $83,585,124 against $68,730,160 same time in the preceding fiscal year. It has been stated that the total for the six months ending Dec. 31, 1869, will be increased by twelve districts not yet heard from.

Government revenues from all sources for the quarter ending with Dec. 31, 1869 have been officially reported at $116,374,291; expenditures on all accounts, same time, $108,925,912.

Gold has been offered more freely and has been depressed in price, ranging from 119⅜@120⅞, and leaving off on Wednesday at 119¾. The speculative demand has been less confident, while the inquiry for Custom House purposes has been on an enlarged scale, and the export call has been somewhat brisker. Both the city banks and the Sub-Treasury have reported a decrease in their specie reserve, since our last, the former of nearly a million, and the latter of $911,548. The *Alaska* has delivered here $82,428 of specie from California, since our last. The specie shipments hence, during the past week, were up to ¾ths of a million. On Tuesday of the current week, the *Westphalia* took out $88,000 in specie. A rumor gained currency on Wednesday, to the effect that Government had marketed a million of Gold, privately, on the preceding day, but the rumor was deemed unfounded.

The coin interest payment of the Sub-Treasury on Wednesday were $1,548.

The customs demand for Gold last week, averaged $415,833 a day; thus far, this week, it has averaged $746,379 a day, or equal to a weekly aggregate of $4,478,274. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $241,382; and since Jan. 1 1870, $2,271,620, against $1,330,362 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $79,246,771, against $75,050,739 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to Feb. 4, was $603,451, against $594,384 same time last year.

The exports of specie, from this port, last week, were $741,721, against $927,899 same week last year; total, since July 1, 1869, $20,329,969, against $26,948,230 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $521,894, and since July 1, 1869, $62,527,837, against $62,743,131 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to Feb. 4, were $4,535,797, against $3,547,432 same time last year.

Foreign Exchange has been in better supply and less request at a partial reduction in rates, chiefly on Sterling bills, which have been most freely offered. Bankers' prime sixty day bills on London closed tamely and heavily on Wednesday at 108¾@108⅞, and on Paris to 5.21¼@5.17½; sight bills on London to 109¼@109½, and on Paris to 5.16¼c.@5.15. The offering of produce bills continue on a moderate scale. The week's exports of domestic produce have been to the currency value of $2,247,559, making the total since July 1, 1869, $126,629,940, against $99,692,575 same time preceding fiscal year.

Government securities have been comparatively quiet, most of the week, though prices have further receded a fraction, in partial sympathy with the decline in Gold. The offering of bonds to private buyers, however, have been very light, as most holders have been unwilling to sell at prevailing figures. On Thursday of last week, Government bought in a million of Five-Twenties at $112\frac{44}{100}$, net out of an aggregate offering of $5,702,700. The entire amount bought in was purchased of Messrs. Jay Cooke & Co., who made the lowest offer to the Sub-Treasurer. On Wednesday, there was a somewhat livelier inquiry for the coin bearing obligations, and the market closed with more steadiness.

U. S. sixes of 1881 closed here at 117⅞@118; U. S. Five-twenties of 1862, 114⅞@115; U. S. Five-twenties of 1864 at 114¼@114⅜; U. S. Five-twenties of 1865 at 114¼@114⅜; U. S. Five-twenties of 1865, consolidated, 113¼@113½; U. S. Five-twenties of 1867, 113⅝@113¾; U. S. Five-twenties of 1868, 113⅝@113⅞; U. S. Ten-forties at 112⅜@112½; U. S. Six per cent. currency bonds, 111½@111¾.

State and railway bonds have not been quite as active as through the preceding week, but prices have been generally very well supported. The Pacific Railway Mortgages have met with a steady demand from investment buyers, the Centrals at 96¼@96½, at which the offerings were light; the Western Pacifics (recently marketed at 90) at 94@95: and the Unions at 86⅛@86⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 2.	Feb. 9.	Feb. 16.

Railway and miscellaneous share property has been moderately active most of the week at, in the main, buoyant prices.

Business in Breadstuffs has shown more animation; Flour and Wheat have been quoted firmer. Cotton has been quiet and declining. A Cotton Exchange was formally opened in this city on the 14th inst. Provisions have been more active but irregular. Other articles of produce have been in moderate request. Middling upland cotton closed heavily on Wednesday at 25cts. per lb. The stock of cotton now here is given at about 73,500 bales. The receipts at the port this week, have averaged about 8,400 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,903,700 bales, against 1,482,500 bales in 1868–'9; exports, same time 1,059,000 bales, against 746,700 bales same time in 1868–'9; stock on hand at latest dates, 509,500 bales, against 405,750 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 997 pkgs., against 999 pkgs., same time in 1869. From Boston, 421 pkgs., in 1870, against 832 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in fair demand, at from 9½@17c., per lb.; week's receipts, 6,597. Milch cows continue very dull, at $40@$100 each, receipts, 149. Veal calves have been moderately inquired for at from 8½@13½c. per lb.; receipts, 793. Sheep and lambs in reduced supply and fair demand at from 5@8¾c., and 6½@9c. per lb.; receipts, 26,938. Swine in limited request at 9¼@10c. per lb., all live weight; receipts, 16,704.

Foreign goods have been rather more sought after at generally steady rates. The week's imports of foreign dry goods were to the specie value of $2,387,438; and of foreign merchandise, $2,146,761, making a total of $4,534,199, against $3,944,747 same week last year.

The ocean freight market has been tame and weak, since our last. For Liverpool we quote flour at 1s. 6d. by sail, and 1s. 3@1s. 6d. by steamer, per bbl.; grain at 3½d. by sail, and 3d. by steamer, per bushel; cotton at $\frac{5}{32}$d.@$\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 12s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 458.

The balance in the Sub-Treasury on Wednesday was $84,028,730 16.

The New York exports, exclusive of specie, for the week ending Feb. 15, and since the beginning of the year, compare as follows:

	1869.	1870.
For the week	$3,228,065	$2,247,559
Previously reported	17,437,506	18,136,556
Since Jan. 1	$20,665,571	$20,384,115

The imports for the week ending February 12, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,057,682	$2,387,438
Gen. merchandise	1,887,065	2,146,761
Total for the week	$3,944,747	$4,534,199
Previously reported	25,212,362	26,670,820
Since January 1	$29,157,109	$31,205,019

☞ Messrs. DAVIDSON & JONES, Bankers, No. 61 Wall st., this city, offer for sale 10,000 shares, at par, of the capital stock of the "People's Gas Company of Baltimore." The capital is $2,000,000 in 80,000 shares of $25 each, of which 12,000 shares, or $300,000, have been subscribed. This stock is recommended as a safe investment, it being the only opposition company in Baltimore, and the stock of the old company has sold at 600 per cent. on the original par.

Martinsburg and Potomac Railroad.

A meeting of the directors of this company was held at Martinsburg, West Virginia, on the 8th instant, at which measures were taken to commence a survey and location of the road immediately, or as soon as the weather would permit, "from the Potomac river to Martinsburg, and from Martinsburg to the Frederick and Berkeley lines, and also to the town of Winchester," if an extension of the corporate rights of the company to that town can be procured from the Virginia Legislature. Edward Watts, Engineer of the Cumberland Valley Road, was selected to make the survey and location, and all other arrangements necessary to the prompt execution of the measure made. The work will undoubtedly be prosecuted to completion.

A new [illegible] been introduced, during the [illegible] Fisk & Hatch, who so successfully [illegible] the Central Pacific, and the Western [illegible]. The road now known as the "Chesapeake and Ohio Railroad," (which is a consolidation of the Virginia Central, and the Covington and Ohio Railroads) is in operation from Richmond to the celebrated White Sulphur Springs of West Virginia—227 miles. The line is being rapidly extended to the Ohio at the mouth of the Big Sandy tributary, 200 miles distant, and it is expected that seventy five miles of this portion will be in operation during the current year. This line, which will be, when completed, one of the great Trunk lines between the seaboard and the Mississippi Valley, has the very important advantage of exceedingly light grades and curves, the average of the grades being from thirty to fifty per cent. lighter than the more northerly lines. The road will derive an important traffic from the transportation of the iron ores which are found in vast quantities and of superior qualities near the centre of its route, and the famous cannel and splint varieties of coal which are found in the Kanawha Valley. Besides the local traffic, its advantages of low grades, cheap fuel and equable climate will enable it to carry the surplus breadstuffs, provisions and the like, of the Ohio Valley, to their destination on the seaboard. The distance between tide water and common points in the interior is less by this line than by any other. It makes very direct and easy connections with the 16,000 miles of inland navigation, and also with the 20,000 miles of Western Railroads. The company are represented by some of our more prominent New York capitalists. Among others, are C. P. Huntington, A. A. Low, Wm. H. Aspinwall, David Stewart, and by Messrs. Fisk & Hatch as the financial agents. The First Mortgage bonds of the company have been brought on the market, with a view to facilitating the work of extending the road through to the Ohio River, as promptly as practicable. The bonds, which are protected by a first mortgage on the entire property of the company, are issued in denominations of $1,000, $500, and $100, in coupon or registered form, and bear interest at the rate of six per cent. per annum, in gold, payable May and November, in this city. The bonds are offered for the present at 90 per cent. and accrued interest.

☞ It is stated that sufficient stock has been subscribed for to pay for the grading of the entire route of the Stony Creek Railroad, which is to shorten the distance between Doylestown and Norristown, by connecting with the North Pennsylvania Railroad at either Gwynedd or Lansdale. James Hoover is President of the company.

☞ The Leavenworth, Lawrence and Galveston Railroad Company are now ready to contract for the grading, bridging and masonry from Garnett to the State line, about 90 miles. O. Chanute is Chief Engineer of the road.

☞ According to the Report of the Philadelphia and Reading Railroad Co., published in another part of this paper, the company has in use 1,141 90, miles of single track road, of which 33 21 miles were constructed during the past year. In addition to this, 59.1 miles are now under contract, and 173 miles located and projected.

RAILROAD LAW.

RAILROAD REGULATIONS—DISTINCTION BETWEEN REFUSAL OF PASSENGER TO SURRENDER TICKET AND PAY FARE—PASSENGERS CAN ONLY BE EXPELLED AT REGULAR STATIONS—COMPANY MAY ENFORCE REASONABLE RULES.

The facts of the late case of Illinois Central Railroad Company and ano. *vs.* Whittemore (43 Ill. p. 420) are clearly and fully stated in the following opinion by

LAWRENCE, J.—This was an action of trespass, brought by Whittemore against the Illinois Central Railroad Company and N. W. Cole, a conductor in the service of the company, for wrongfully expelling the plaintiff from a train. It appears that the plaintiff had taken passage from Decatur to El Paso, and had procured the necessary ticket. After the train passed Kappa, the station preceding El Paso, the conductor demanded the plaintiff's ticket which the latter refused to surrender without a check. This the conductor refused to give, and after some controversy with the plaintiff, stopped the train and with the aid of a brakeman expelled the plaintiff. There is considerable evidence in the record given for the purpose of showing that, even, admitting the right of the defendants to expel the plaintiff, an unnecessary and wanton degree of violence was used, from which the plaintiff received a permanent and severe injury. As, however, the case must be submitted to another jury, we forbear from any comments on this portion of it. The jury gave the plaintiff a verdict for three thousand one hundred and twenty five dollars, for which the court rendered judgment, and the defendants appealed.

In sustaining a demurrer to the fourth plea, and in giving the instructions, the Circuit Court held that, although the rules of the road required the conductor to take up the plaintiff's ticket and notwithstanding he may have refused to surrender it when demanded, the defendants had no right to expel him from the cars, except at a regular station. In support of this position, it is urged by counsel for appellee, that the refusal to surrender the ticket was merely equivalent to a refusal to pay the fare, and that the statutory prohibition against the expulsion of passengers for this cause, except at a regular station, should be applied to cases like the present. We held in the case of C. & A. R. R. *vs.* Flagg 43, Ill. 364, that a neglect to buy a ticket before entering the train, when required by the rules of the road, was the same thing in substance as the refusal to pay the fare, and justified an expulsion only at a regular station. But the refusal to surrender a ticket for which the requisite fare has already been paid, is certainly not the same thing as refusal to pay the fare. It may be no worse offense against the rights of the railroad company than the refusal to pay the fare, but it is not the same offense. Perhaps there was no good reason why the legislature should have forbidden railways to expel a passenger only at a regular station for the nonpayment of fare, and have left them at liberty to expel one at any other point, for the disregard of any other reasonable rule. But it has done so, and it is our duty to leave the law as the legislature thought proper to establish it.

What, then, is the right of a railway company in reference to its passengers? Clearly, to require of them the observance of all such reasonable rules as tend to promote the comfort and convenience of the passengers, to preserve good order and propriety of behaviour; to secure the safety of the train, and enable the company to conduct its business as a common carrier with advantage to the public and to itself. So long as such reasonable rules are observed by a passenger, the company is bound to carry him, but if they are wantonly disregarded, that obligation ceases, and the company may at once expel him from the train, using no more force than may be necessary for that purpose, and not selecting a dangerous and inconvenient place. This is a common law right, arising from the nature of their contract and occupation as common carriers, and, as already remarked, it has been restricted by the legislature only in cases where the offense consists in non-payment of fare. Ch., B. & Q. R. R. Co. *vs.* Parks, 18, Ill. 460. If, then, the regulation requiring passengers to surrender their tickets was a reasonable one, the ruling of the court below on this point was erroneous.

That the rule is a reasonable one really admits of no controversy. It was shown by witnesses on the trial, and must be apparent to any one, that the company must have the right to require the surrender of tickets, in order to guard itself against imposition and fraud, and to preserve the requisite method and accuracy in the management of its passenger department.

The Circuit Court left it to the jury to say whether the rule was reasonable. This was error. It was proper to admit testimony, as was done, but, either with or without this testimony, it was for the court to say whether the regulation was reasonable, and, therefore, obligatory upon the passengers. The necessity of holding this to be a question of law, and, therefore, within the province of the court to settle, is apparent from the consideration, that it is only by so holding, that fixed and permanent regulations can be established. If this question is to be left to juries, one rule would be applied by them to-day and another to-morrow. In one trial a railway would be held liable, and in another, presenting the same question, not liable. Neither the companies nor passengers, would know their rights or their obligations. A fixed system for the control of the vast interests connected with railways would be impossible, while such a system is essential equally to the roads and to the public. A similar view has recently been taken of this question in the case of Vedder *vs.* Fellows 20 N. Y. 126.

The judgment must be reversed; and if it appears, upon another trial, that unnecessary violence was used, the defendants must respond in damages.

Judgment reversed.

☞ A railroad is now being built from Mount Holly, N. J., to Whiting's Station on the Raritan and Delaware Bay road, which, when completed, will make the running time between Long Branch and Camden about two and a half hours.

☞ The gross earnings of the Atlantic and Gulf Railroad for the year ending December 31, 1869, were $784,329 75, actual operating expenses $539,797 19—net earnings $274,532 56, being an increase of $181,270 75 as compared with the year 1868.

Philadelphia and Reading Railroad.

In our issue of the 15th ult., we gave the result of the business of this company for the year ending November 30, 1869, as condensed from the "Transportation and Income Account." In our present issue we give in a condensed form several important tables, referring to the past and preceding years, including the "General Account," and append a statement of the Cost, Earnings, Dividends, etc., etc., since the completion of the road in 1842–'43. The President in his report says:

The coal tonnage for the year has amounted to 4,239,457 tons, being 524,772 tons in excess of the amount transported in any previous year, notwithstanding the fact that for six weeks in the months of May and June last, in consequence of a strike in the mining regions, there was an almost entire suspension of shipments of anthracite coal. For the four weeks ending August 5 last the coal tonnage of the road amounted to 513,914 tons, and for a corresponding period ending with November 25, it amounted to an aggregate of 505,756 tons. These figures show that the road is now sufficiently equipped with rolling stock to transport at least one hundred and twenty-eight thousand tons of coal per week, in addition to the large and increasing tonnage of other products and commodities. During the year 1870 it is proposed to add sufficiently to the rolling stock to increase this capacity to at least one hundred and forty thousand tons of coal per week; and judging from the number and extent of new colliery improvements made during the past year in Schuylkill and Northumberland counties, the productive capacity of the two great coal fields depending upon the road for an outlet will fully keep pace with the increasing facilities for transportation.

A reference to the report of the Chief Engineer of the company, herewith submitted, will show in detail the amount of new work completed and in progress during the past year.

The Perkiomen Railroad has been opened from Perkiomen Junction to Schwenksville, a distance of eleven miles, and seven miles in addition—from Schwenksville to Green Lane—are now being constructed. The Colebrookdale Railroad has been completed from Pottstown to Mount Pleasant, a distance of nearly thirteen miles, and it and the Perkiomen Railroad have been leased to and are now worked by this company.

The inhabitants of that part of Chester county lying along the waters of Pickering creek having obtained a charter for a railroad company known as the Pickering Valley Railroad Company, and having located a road tributary to and intersecting our own, the managers have responded to a request for assistance by subscribing for 1,200 shares of their capital stock, and agreeing to guarantee the bonds of the new company to a sufficient amount to construct twelve miles of the proposed railroad. This new road, when finished, will be leased by this company.

The Pine Grove and Lebanon Railroad, extending from Pine Grove to the Lebanon county line, has been completed and is now in operation, and the link which connects it with the borough of Lebanon will be finished and opened for business early in the present year.

Upon the 19th of May last, a lease of the East Pennsylvania Railroad was made to this company, for a term of nine hundred and ninety-nine years, at an annual rent of $78,552, equal to six per cent. clear of taxes, upon the capital stock of the East Pennsylvania Railroad Company. The rolling stock, workshops, materials, real estate and other property of the latter company, were transferred to this company, in consideration of its agreement to pay at maturity, in the year 1888, the bonded indebtedness of the East Pennsylvania Railroad Company, amounting to $506,900, the value of property so transferred being amply sufficent to cover the amount of bonds thus guaranteed to be paid.

That portion of the Allentown Railroad lying

between Port Clinton and Topton, and connecting the main line with the East Pennsylvania road has been placed under contract.

The Shamokin and Treverton Railroad has been finished and is now in operation, and the extension of the Good Spring Railroad to Brookside, near the Dauphin county line, has also been completed. An extension of the Lorberry Creek Railroad, to develop the southern fork of the western portion of the Schuylkill coal field, is now being constructed.

The map annexed to the report of the Chief Engineer exhibits the extent, location and connections of all of these several roads, as well as of all other railroads now owned, leased or controlled by this company, and the tabular statement accompanying the map shows that the aggregate lengths of all of these railroads, including sidings, amounts to 1,142 miles of single track road.

As this system of railroads, projected some years ago, approaches completion, there is no reason to doubt the wisdom of the policy which suggested its construction. So far as the roads are located in the coal regions, it will be seen that the effect of their construction has been to render tributary to the main line almost the entire territory of the southern and middle coal fields; and if a supply of cars sufficient to carry away the product of the mines is hereafter maintained, and the inducement of moderate rates of transportation offered to the trade, the company can rely with confidence upon the individual enterprise and energy of the coal operators as sufficient at all times to furnish a large and constantly increasing amount of tonnage.

The new roads constructed and secured outside of the coal fields are either important links in, or feeders of, the line of road extending from Harrisburg to Allentown, now owned or controlled by this company, over which passes a very large amount of traffic between New York city and the west; or are designed as tributaries of the main line, especially valuable as contributing a large supply of iron ore for the use of the furnaces along the road.

Next in value to the coal traffic, the iron interests of the Schuylkill Valley claim the attention and deserve the protection of the company; and the wisdom of the policy which for the past few years has been securing an unfailing supply of iron ore for consumption along the main line of the road will be fully justified by future results. The Lebanon Valley Branch, the East Pennsylvania Railroad, the Reading and Columbia Railroad and the Colebrookdale Railroad drain regions containing inexhaustible supplies of iron ore; limestone of the best quality is found in great abundance along the line; in the rich agricultural valleys of Montgomery, Berks, Chester, Lebanon and Dauphin counties labor will at all times be found as abundant as in any other portion of the State; anthracite coal of the very best description for smelting, puddling and heating purposes will always be as plentiful as in any other region; and it is believed that there is not at present in Pennsylvania any other locality possessing greater advantages for the manufacture of iron than the valley of the Schuylkill.

The rolling mill of the company at Reading has turned out during the last year 17,037 tons of finished rails, of which amount but two and a half tons have been worn out and removed from the track. Out of the 8,971 tons of rails made at the company's mill and laid in the year 1868, one hundred and eighty tons have up to this time been taken up and returned for re-rolling. While the rails thus manufactured have cost the company an average of less than the current market price, the result in their wear, when subjected to the test of our large tonnage, proves the superiority of their construction.

During the last year two steam colliers of about 600 tons burthen each have been built for the company, and are now engaged in transporting coal from Richmond to eastern ports. Four others, two of 1,000 tons burthen and two of 800 tons each, are now under contract, and will be placed in the trade early in the present year.

A large amount of real estate has been bought during the year, principally situate at Richmond and on Willow street, in the city of Philadelphia.

During the year just closed rolling stock of the value of $1,162,286 53 has been added to the property of the company, as follows:

1,054 eight-wheeled cars, built by the company	$666,736 07
10 first-class engines, built by the company	116,762 09
Work on one engine, built by the company	4,151 65
10 first-class engines, bought of M. Baird & Co.	142,000 00
152 cars, bought of East Pennsylvania Railroad Co	92,136 72
14 first-class engines, bought of East Pennsylvania Railroad Co	140,500 00
Total	$1,162,286 53

The statements accompanying this report will show the details and extent of property acquired by the company during the year; of the entire amount of which $3,170,042 05 has been added to capital account, $569,105 78 has been charged to income account, and the balance will be found included in the items embraced under the head of assets in the Treasurer's general account.

It was originally designed to pay for a proportion of this new work with the plain six per cent. bonds of the company, and during the early part of the year the contractors of several of the branch roads received the amounts of their monthly estimates in such bonds. It being discovered, however, that the necessities of the contractors frequently compelled them to sacrifice these securities at less than their proper value, it was thought advisable to pay for all work in cash, and to furnish the means to do so by a loan to be negotiated by the company itself. Since the first of June, therefore, all payments to contractors have been made in cash, furnished temporarily out of the dividend fund. To reimburse this fund, and at the same time to provide means to prosecute the new work and to supply additional rolling stock during the years 1870 and 1871, the managers have negotiated, at par, without commissions, a loan of $5,000,000 of seven per cent. coupon bonds, dated January 1, 1870, payable in twenty years, one-half convertible at the option of the holder into stock at par at any time after issue; and the other half convertible at par at any time after the 1st of January 1872. Of this loan the sum of $1,500,000 will be used to replace that amount of the past year's earnings used for construction of new work; $2,000,000 will be furnished and expended during the year 1870, and the remaining $1,500,000 during the year 1871, for new rolling stock and for the completion of work now in progress or contemplated to be placed under construction; and hereafter the earnings of the company can be appropriated to the payment of semi-annual cash dividends.

To any of the stockholders who may be disposed to complain of the increase of the capital stock of the company during the last seven years, it will be a sufficient answer to say that the tonnage, gross receipts and net profits have increased in a far greater proportion than the united capital and debt of the company, and that the result of the expenditures upon which the increase of capital was based has been to secure perpetually a great and ever-increasing tonnage for the road.

A railroad company owning a properly constructed and well equipped line of road, connecting two large cities, and relying for its business solely upon the traffic interchanged between the termini of its line, might reasonably expect to earn enough money annually not only to declare a fair dividend to its stockholders, but, in addition, thereto, to enlarge its supply of rolling stock, so as to meet the wants of its increasing business without adding to its debt or capital stock; and such a result would properly be accepted by its stockholders as an evidence of prosperity and financial strength. But in the case of this company, engaged in developing an area of territory embracing two distinct coal fields—one of sixty miles and the other over thirty miles in length—where every valley required a new railroad, and where the increase of tonnage incident to the opening of the new laterals has been so great as to require at times an annual expenditure for additional rolling stock of over a million of dollars, it was necessary to resort to either of the following plans, in order to accomplish the desired result:

First. To charge such high rates for tolls and transportation as would have enabled the company to earn money enough, after payments of cash dividends, to supply the funds required for improvements.

Second. To increase the debt of the company by loans made to finish the new work; or,

Third. To increase the capital stock, either by stock dividends paid in lieu of earnings diverted to improvements, or by receiving additional subscriptions to stock, issued to furnish the necessary funds for new construction.

The first of these plans could not have been seriously thought of for a moment. Although excessive rates of charges might result in a temporary advantage, they would not only have proved in the end destructive to the company, but would have been manifestly unjust to the public. Of the remaining two plans the latter was thought the wiser, and it was considered best to devote the earnings of the company to the construction of new improvements and the building of new rolling stock, and to issue to the shareholders stock dividends in lieu of the money.

During the last seven years the capital of the company has been increased by stock dividends, in all	$12,369,670 77
From the above deduct the amounts based upon the purchase of bonds by the sinking funds	1,685,811 71
Balance	$10,683,859 06

This sum of $10,683,859 06 of aggregate stock dividends has, however, been issued as the representative of $17,597,258 74 of actual net earnings invested in permanent improvements—the difference of $6,913,399 68 having been, from time to time, charged to income account, so that the increased capital stock should represent the property upon which it was based at a gold standard of value; and in conformity to this conservative rule of the company, as a five per cent. stock dividend was paid last July, and an issue of $608,800 of the plain six per cent. bonds was made during the year, there has been charged to income account out of the net earnings of the past year the sum of $569,105 78.

By order of the Board of Managers.

FRANKLIN B. GOWEN, President.

Philadelphia, January 8, 1870.

Whitehall and Plattsburg Railroad.

At the recent annual meeting of the stockholders of this company, the following gentlemen were elected directors for the ensuing year: John Hammond, H. G. Burleigh, Wm. E. Calkins, A. B. Waldo, J. B. Witherbee, John A. Griswold, Matthew Hale, C. F. Norton, E. S. Winslow, M. K. Platt, N. Lapham, of Pern; James Rogers, of Ausable; T. Hoyle. At a subsequent meeting of the directors, John Hammond was elected President, James Rogers, Vice President, Timothy Hoyle, Secretary and Treasurer. The business of the road from Plattsburg to the Ausable River, has exceeded the most sanguine expectations of the company. The company are in hopes of soon being able to make connection at or near Ticonderoga with the Lakes. The speedy construction of the entire route is what is desired as there is but little doubt that the freighting business will alone be sufficient to make it a paying road.

Chicago and Alton Railroad.

The Chicago and Alton Railroad Company will issue on the 1st of March, $3,800,000 new capital, say 38,000 shares, to the stockholders of Feb. 10, both common and preferred, in the proportion of one share of new to two shares of old capital. The stockholders receive one-half the new subscription on the payment of $2 50 per share, to represent their present interest in the surplus income or unrepresented cost of the property. They are required to pay the other half by instalments of $25 per share on the 1st of March, June, September and December, 1870, for the construction of an extension of the line from Dwight to Lacon. The effect of the new arrangement to the present stockholders is a stock dividend of 50 per cent. on the payment, or at the average cost of $51 25 per share, or a fraction over one-half its par value.

Intercolonial Railway.

The Commissioners who have charge of the construction of the Intercolonial Railway announce that they are ready to receive bids for the following rolling-stock: Ten locomotives to be delivered by March 15, 1871; fifteen by the 1st of January, 1872; and fifteen by the 15th of March, 1872; 150 platform cars by March 15, 1871, 250 freight cars by January 1, 1872. Bids will be received up to the 17th of March, 1870.

FOUNDRY FACINGS,

Second Hand Locomotives for Sale.

THE NEW JERSEY SOUTHERN RAILROAD Company (formerly the Raritan and Del. Bay R. R.) propose to sell Seven (7) Old Locomotives.
Four of these can be made useful for running construction trains, &c., at small expense for repairs; two of which are 4 ft. 10 in. Gauge and the others are 4 ft. 8½ inches
They can be seen at Manchester N. J. upon application to Rufus Blodgett Master Mechanic.
Sealed proposals for their purchase will be received at the office of the N. J. Southern R. R. 95 Liberty street, N. Y., until Thursday March 10th 1870, addressed to
W. S. SNEDEN,
318 Genl. Manager.

Wanted a Situation.

BY A MECHANICAL CIVIL ENGINEER having superintended Public Works, Brick Yards, Railroads, Bridges, etc., in Europe and America. Apply to A. M. R., 81 Bedford street, New York. 2t8

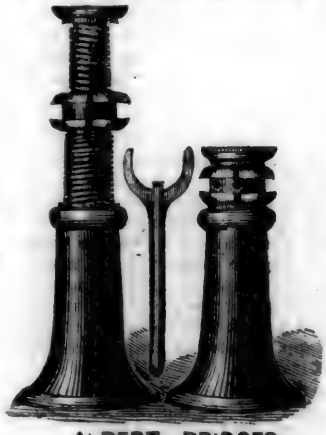
Proposals for Tunnel.

OFFICE SUMMIT BRANCH RAILROAD CO.,
Williamstown, Penna., Feb. 4, 1870.

SEALED PROPOSALS will be received at this office for one month from date, to complete the driving of the Tunnel through the South or Big Lick Mountain at this place, to Bear Valley, say a distance of 800 yards, more or less. To be driven from both ends, and of the following dimensions: 15 feet wide in bottom, 12 feet in top, and 8½ feet high over rail. A water drain or gutter, 18 inches deep and 2½ feet wide, to be carried along the entire length. The proposals to state the price per yard separately for clay, loose rock or boulders, red shale, conglomerate sand stone, slate and coal. All materials except rails and sills to be furnished by contractors.

JOS. ANTHONY, Superintendent.



Further information may be obtained at the Office of WM. B. FOWLE, 32 Summer street, Boston.

To Contractors.

SEALED PROPOSALS will be received until the 25th inst., for doing the Grading, Masonry and Bridging on the Ridgefield and New York Railroad from Port Chester, N. Y., to Ridgefield, Ct., 23 miles. For further particulars apply to
S. N. HAIGHT, Chief Eng.,
Morrisania, N. Y.
MORRISANIA, Feb. 7th, 1870.

A Merchant of Responsibility and in good standing desires to make an arrangement with some large manufacturer to act as agent for the sale of goods. He will be prepared to make advances upon goods consigned to his house, to an amount of $25,000 to $100,000. A business in metals preferred. Address E. E. H., Box No. 4,600 New York Post Office.

RAILROAD CROSS TIES.

THE WHARTON Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,
ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

Locked Safety Valves.

TO
MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

GEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

Hemp Packing.

BEST HACKLED HEMP PACKING,
For Sale by
WILLIAMS, PAGE & CO.,
91 Water St., Boston.

For Pure Water use this celebrated Pump, entirely tasteless, durable and reliable; equal to the good old-fashioned wooden Pump, and costing less than half the money. Easily arranged so as to be non-freezing, and in construction so simple that any one can put it up and keep it in repair.

THE BEST AND CHEAPEST PUMP NOW MADE.

Established 1851.

Williams' New Patent Coal Oil Head Light,

WITH BRAZED SAFETY BURNER,

Which will not take *fire* or *explode*, and is adapted to any make of Head Light Chimney. These Head Lights are either of Cylindrical or Square Form, and of first class workmanship. The Silver Plating on the Reflectors is warranted for fifteen years. They are acknowledged by all to be the best Head Light manufactured ,and are used on nearly all principal Railroads in the country.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby prevenating fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

Chesapeake and Ohio Railroad.

OFFICE OF FISK & HATCH.

BANKERS AND DEALERS IN GOVERNMENT SECURITIES.

No. 5 NASSAU-ST., NEW YORK, FEB. 15, 1870.

The remarkable success which attended our negotiation of the Loans of the CENTRAL PACIFIC RAILROAD COMPANY and the WESTERN PACIFIC RAILROAD COMPANY, and the popularity and credit which these loans have maintained in the markets, both in this country and Europe, have shown that the First Mortgage Bonds of wisely-located and honorably-managed railroads are promptly recognized and readily taken as the most suitable, safe, and advantageous form of investment, yielding a more liberal income than can hereafter be derived from Government bonds, and available to take their place.

Assured that in the selection and negotiation of superior Railroad Loans, we are meeting a great public want, and rendering a valuable service—both to the holders of capital and to those great national works of internal improvement whose intrinsic merit and substantial character entitle them to the use of capital and the confidence of investors—we now offer with special confidence and satisfaction the FIRST MORTGAGE BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY.

THE CHESAPEAKE AND OHIO RAILROAD, connecting the Atlantic coast and the magnificent harbors of the Chesapeake Bay with the Ohio River at a point of reliable navigation, and thus, with the entire railroad system and water transportation of the Great West and Southwest, FORMS THE ADDITIONAL EAST AND WEST TRUNK LINE, so imperatively demanded for the accommodation of the immense and rapidly growing transportation between the Atlantic seaboard and Europe on the one hand, and the great producing regions of the Ohio and Mississippi valleys on the other.

THE IMPORTANCE OF THIS ROAD AS A NEW OUTLET FROM THE WEST TO THE SEA magnifies it into one of national consequence, and insures to it an extensive through traffic from the day of its completion; while, in the development of the extensive agricultural and mineral resources of Virginia and West Virginia, it possesses, along its own line, the elements of a large and profitable local business.

Thus the great interests, both general and local, which demand the completion of the CHESAPEAKE AND OHIO RAILROAD to the Ohio River, afford the surest guarantee of its success and value, and RENDER IT THE MOST IMPORTANT AND SUBSTANTIAL RAILROAD ENTERPRISE NOW IN PROGRESS IN THIS COUNTRY.

Its superiority as an East and West route, and the promise of an immense and profitable trade awaiting its completion, have drawn to it the attention and co-operation of prominent Capitalists and Railroad men of this City of sound judgment and known integrity, whose connection with it, together with that of eminent citizens and business men of Virginia and West Virginia, insures an energetic, honorable and successful management.

The Road is completed and in operation from Richmond to the celebrated White Sulphur Springs of West Virginia, 227 miles, and there remain but 200 miles (now partially constructed) to be completed, to carry it to the proposed terminus on the Ohio River, at or near the mouth of the Big Sandy River, 150 miles above Cincinnati, and 350 miles below Pittsburg.

Lines are now projected or in progress through Ohio and Kentucky to this point, which will connect the CHESAPEAKE AND OHIO WITH THE ENTIRE RAILROAD SYSTEMS OF THE WEST AND SOUTHWEST, AND WITH THE PACIFIC RAILROAD.

Its valuable franchises and superior advantages will place the CHESAPEAKE AND OHIO RAILROAD COMPANY among the richest and most powerful and trustworthy corporations of the country; and THERE EXISTS A PRESENT VALUE, IN COMPLETED ROAD AND WORK DONE, EQUAL TO THE ENTIRE AMOUNT OF THE MORTGAGE.

The details of the loan have been arranged with special reference to the wants of all classes of investors, and combine the various features of convenience, safety and protection against loss or fraud.

The Bonds are in denominations of $1,000, $500 and $100.

They will be issued as coupon bonds, payable to bearer, and may be held in that form; or

The Bond may be REGISTERED in the name of the owner, with the coupons remaining payable to bearer attached, the PRINCIPAL being then transferable only on the books of the Company, unless reassigned to bearer; or

The coupons may be detached and canceled, the Bond made a PERMANENT REGISTERED BOND, transferable only to the registered owner or his attorney.

The three classes of Bonds will be known respectively as:

1st. "COUPON BONDS PAYABLE TO BEARER."

2d. "REGISTERED BONDS WITH COUPONS ATTACHED."

3d. "REGISTERED BONDS WITH COUPONS DETACHED," and should be so designated by correspondents in specifying class of Bonds desired.

They have THIRTY YEARS to run from Jan. 15, 1870, with interest at six per cent. per annum from Nov. 1, 1869. PRINCIPAL AND INTER-

EST PAYABLE IN GOLD IN THE CITY OF NEW YORK.

The interest is payable in MAY and NOVEMBER, that it may take the place of that of the earlier issues of Five-twenties, and suit the convenience of our friends who already hold Central and Western Pacific Bonds, with interest payable in January and July, and who may desire, in making additional investments, to have their interest receivable at different seasons of the year.

The Loan is secured by a mortgage upon the entire Line of Road from Richmond to the Ohio River, with the equipment and all other property and appurtenances connected therewith.

A SINKING FUND OF $100,000 PER ANNUM IS PROVIDED FOR THE REDEMPTION OF THE BONDS, TO TAKE EFFECT ONE YEAR AFTER THE COMPLETION OF THE ROAD.

The mortgage is for $15,000,000, of which $2,000,000 will be reserved and held in trust for the redemption of outstanding Bonds of the VIRGINIA CENTRAL RAILROAD COMPANY, now merged in the CHESAPEAKE AND OHIO.

Of the remaining $13,000,000, a sufficient amount will be sold to complete the road to the Ohio River, perfect and improve the portion now in operation, and thoroughly equip the whole for a large and active traffic.

The present price is 90 and accrued interest.

A Loan so amply secured, so carefully guarded, and so certain hereafter to command a prominent place amongst the favorite securities in the markets both of this country and Europe, will be at once appreciated and quickly absorbed.

Very respectfully,

FISK & HATCH,
BANKERS.

P. S.—We have issued pamphlets containing full particulars, statistical details, maps, &c., which will be furnished upon application.

We buy and sell Government Bonds, and receive the accounts of Banks, Bankers, Corporations and others, subject to check at sight, and allow interest on daily balances.

Eastern (Mass.) Railroad.

The annual meeting of the stockholders of this corporation was held in Boston on the 7th inst. The annual report was presented and accepted. The directors were authorized by vote to make such arrangements with the Boston and Lowell Railroad Company, to secure additional terminal facilities in Boston, as they deemed expedient. The directors were also authorized to consent to the issuing of new stock by the Portland, Saco and Portsmouth Railroad Company, as proposed at the meeting of that corporation in June, 1868. A vote was passed giving authority to the directors to take such action as they deem expedient to encourage and aid the construction of the Wolfborough Railroad. With reference to the proposed consolidation of the Boston and Maine and Eastern Railroads, the President stated that he had sent a letter to the President of the Boston and Maine Railroad Co., in which he set forth the advantages that would accrue to both corporations and the public. The expense of a new depot for the Eastern road would be avoided, and the fares and tariffs of freights would be very much reduced. The President of the Boston and Maine Railroad Co. laid the subject before his board, and a committee was appointed to consult with a like committee of the Eastern. Various propositions have been made, but without any definite result. The last proposition made by the Eastern to the Boston and Maine was that the stock of the latter road should be taken at $150 per share, or $6,825,000 for the entire stock.

Pennsylvania Railroad Company.

OFFICE OF THE PENNA. RAILROAD CO.,
Philadelphia, Feb. 12, 1870.

To the Shareholders of the

Pennsylvania Railroad Company:

Your Directors take pleasure in submitting to you the satisfactory results of the operation of your railways for the year 1869, as follows:

EARNINGS.

From passengers		$3,500,071 06
" emigrant passengers		131,065 93
" mails		118,961 91
" express matter		302,654 54
" general freights		12,932,656 88
" miscellaneous sources		265,401 41
		$17,250,811 73

EXPENSES.

Conducting transportation	$3,503,792 57	
Motive power	3,679,195 15	
Maintenance of cars	1,464,859 22	
Maintenance of road	3,341,568 10	
General expenses	213,852 56	
		12,203,267 60
Leaving net earnings for 1869 of		$5,047,544 13

The total amount of revenues compared with last year is:

1869	$17,250,811 73
1868	17,233,497 31
Increase	$17,314 42

The changes in the sources of revenue are shown below:

Increase in regular freights		$50,491 58
" emigrants		52,821 64
" mails		18,980 66
" express matter		10,773 33
		$133,067 21
Decrease in first-class passengers	$31,832 88	
" miscellaneous sources	83,919 91	
		115,752 79
Increase as above stated		$17,314 42

The apparent decrease in first-class passengers, shown above, is explained by the circumstance that there is included in the earnings of 1868 for military transportation, due in previous years, $113,433 29-100 whilst the collections from the same source in 1869 were but $5,655 66-100. By adding this amount to the reported decrease, and deducting the sum from that received in 1868 ($113,433 29-100, it will leave an actual increase of first-class passenger traffic in 1869 over 1868, of $75,944 75-100.

The gross revenues for 1869 are equal to $48,186 62 100 per mile of the main line of railroad.

The whole number of passengers carried in 1868 was 3,747,178, and in 1869 4,229,363—an increase in the number carried of 482,185, or nearly 13 per cent. The average distance traveled by each passenger was 34 22-100 miles, being 1 82-100 miles less than in 1868; showing this increase still to be mainly upon the local traffic of the line.

The number of tons of freight moved (including 410,966 tons of fuel and other materials transported for the company, was 5,402,991—embracing 2,829,358 tons of coal. The whole tonnage of your railway exceeds that of last year 680,976 tons of which increase 264,309 tons is bituminous coal.

The average charge per net ton per mile upon freights during the year was 1 718-1000 against 1 906-1000 cents last year, and per passenger 2 51-100 cents against 2 71-100 cents last year; or an average decrease in freight charges of 9 9-10 per cent., and in passenger charges of 7 4-10 per cent.

The earnings of the Philadelphia and Erie Railroad in 1869, were:

From passengers	$672,964 46
" freights	2,507,082 93
" express matter	81,327 51
" mails	24,616 67
" miscellaneous sources	26,713 72
Total (exceeding $11,000 per mile of road)	$3,262,705 29

The operating expenses during the same period were:

Conducting transport'n	$671,606 07	
Motive power	749,641 82	
Maintenance of cars	213,546 07	
Maintenance of way	733,415 17	
	$2,368,209 13	
To which add 30 pr ct. of earnings, payable to the Philadelphia and Erie Railroad Company	956,009 12	
		$3,324,218 25
Showing a loss to this company in operating the line under the lease (in addition to interest upon the capital invested in rolling stock, &c.,) of		$61,512 96

which is $21,661 69 less than in 1868.

The low rates at which the Philadelphia and Erie Railroad Company is compelled to carry its freights, averaging but 1 4-10 cents per ton mile, and the small passenger business it can command from the sparsely populated country that its road traverses, added to its greater distances as a through line from Eastern cities to all points in the West, are the reasons that more than 70 per cent. of its receipts are required to meet its working expenses. The operations of this railway during the past year have been carefully and economically conducted by A. L. Tyler, Esq., its General Superintendent.

In this connection it may be stated that, owing to some errors in the location of this line, but mainly from financial sacrifices incurred during its construction, this railway, with a single track of only 288 miles in length, laid with lighter iron rails, and but partially ballasted, cost the Philadelphia and Erie Company, without any equipment, $19,759,171 92, whilst the Pennsylvania Railroad, passing over a much more expensive country to build a railway upon, with a double track of 358 miles laid with heavy iron, and well ballasted, including a third or single track of 29 miles between Lancaster and Middletown, and branches to Hollidaysburg and Indiana, of 26 miles, in all equal to 771 miles of single railway, exclusive of sidings, is represented by $21,346,024 56, a difference of less than $1,600,000 upon the cost of over 265 per cent. more of single track railway.

These facts are referred to at this time only to show why it is that the shareholders of one of these lines have received regular dividends, while the other line has been unable to earn them.

The earnings of the Pittsburg, Fort Wayne and Chicago Railway under its lease to this company, for the six months ending December 31st, 1869, were	$4,146,822 22
And the expenses during the same period were	2,826,695 92
Balance	$1,320,786 80
The semi-annual rent, with the interest on the bonds of the company, expenses of maintaining the organization, contribution to sinking fund, &c., &c., amounted to	1,283,091 87
Showing a profit in the operation of the lease of	$36,794 48

The revenues of the lies operated by this company, and the amounts paid for their working expenses, interest and dividends, are as follows:

From the Pennsylvania Railroad and branches		$17,250,811 73
From the Pittsburg, Fort Wayne and Chicago Railway, for six months, ending December 31st, 1869		4,146,882 22
From the Philadelphia and Erie Railroad		3,262,705 29
Amount		$24,660,399 24
And the expenses of operating these lines were:		
Pennsylvania R. R.	$12,203,267 60	
Pittsburg, Ft. Wayne and Chicago Railway, including rent, &c	4,110,087 79	
Philadelphia & Erie Railroad, including 30 per cent. due that Co.	3,324,218 25	
Total		19,637,573 64
Leaving the net profits from the three railways for 1869		$5,022,825 60
From which deduct dividends declared May and November, with the taxes thereon	$3,075,643 24	
Balance to debit of interest account & discounts on bonds	888,375 10	
Due for the lease of the Harrisburg and Lancaster Railroad	135,274 18	
Annual payment to State of Pennsylvania on account of interest and principal due upon the purchase of her works between Pittsburg & Philadelphia	460,000 00	
		4,559,292 52
Leaving a balance of		$463,533 08

In our last annual report the Board referred in detail to the railway companies controlled through the ownership of a majority of their shares; and it is unnecessary to again mention them, further than to say that they continue to fulfil the objects this Company had in view when this interest was acquired, while they yield a reasonable profit upon the capital invested.

The working expenses of the other lines of railway leased by this Company, not already referred to—all of which are in Pennsylvania—show a balance of receipts over expenses.

The interest held by this Company in the Pennsylvania Canal Company is steadily improving in value, and when the enlargement is complete it will become a profitable addition to your investments in other works. Its cost stands upon your books at $1,101,156.

The coal traffic of this Company is gradually assuming large proportions, and already gives to your railway a constant business at rates that yield a very small profit per ton, but on the large amount transported (2,329,358 tons) the net revenue from it is of considerable importance.

Upon the Philadelphia and Erie portion of the Company's lines, this traffic is chiefly made up from the transportation of anthracite coal to supply the demands of the oil and lake regions, and amounted in 1869 to 138,138 tons, exclusive of 167,383 tons that were sent to Western New York via Elmira. Its bituminous coal fields are too far from the lakes to compete upon equal terms with those of Ohio and Western Pennsylvania in the markets of the West. A portion of the bituminous coal fields upon this railway—east of the tributaries of the Ohio—are favorably situated for the Atlantic markets, but they have not yet been developed to any material extent. The demand for bituminous coal of the Allegheny region in the Eastern markets has been confined, until recently, to blacksmiths, but the high price that has prevailed for some years for anthracite coal, has caused it to be introduced to a considerable extent for producing steam and the manufacture of iron. From the limited extent of the anthracite fields and the greater cost of mining this variety, it is reasonable to infer that the consumption of the bituminous coals will continue to increase on the seaboard.

Upon the main line of your railway and its branches the movement of anthracite coal is yet inconsiderable, whilst the transportation of the bituminous has been large for the manufacture of gas for Eastern cities and the other purposes already mentioned. This material exists in inexhaustible quantities along the whole line of your railway from the summit of the Allegheny to its western terminus, and in the Broad Top Mountain (already extensively developed) south of Huntingdon. A branch from the main line at Tyrone to the town of Clearfield, cuts the Allegheny coal field, and upon this mining is now carried on to a large extent, whilst another branch also extends from the same point to Lock Haven, on the Susquehanna River. From Altoona a branch extends to Hollidaysburg and Newry, a distance of nine miles. The last two mentioned, in connection with a portion of the main line, traverse the valley at the base of the Allegheny Mountains for seventy miles, commencing on the west branch of the Susquehanna River, and affords ample opportunities to develop this whole region by short branch lines into the coal fields at their summit wherever desired. In this valley and in the mountains and valleys that lie on its eastern border, there is an abundance of ore, easily mined and of a quality that will make the best quality of iron—already celebrated for its strength, and found to be superior to any other in the manufacture of cannon. The proximity of these ores to coal and limestone gives to this region advantages for the manufacture of iron in all its varieties and uses, a claim equal if not superior to that of any other—which advantages will doubtless be improved by capitalists, and thus largely increase the population upon your line and its local traffic—the most reliable business of your road. Your railway is therefore not dependent upon its through traffic for its support, although this item is important and necessary to the interests which brought it into existence.

The original policy of the Company was to reach the traffic of the Northwest, West, and Southwest, by assisting the construction of tributary lines leading to the markets of these sections, but not to control their management beyond the State of Pennsylvania. With this object in view it gave to the Pittsburg, Fort Wayne and Chicago Railway Company at several periods of its extremest need, large advances to complete its line and preserve its property to its shareholders, under written pledges, that its eastward business should follow the direction which prompted and justified this Company in granting the assistance so earnestly solicited. Under the conviction that this agreement was ample, it was not believed that further protection to your interests in the Northwest was either desirable or important. The rapid growth of this section of the country, however, placed that Company, in a few years after its completion, in a condition of great prosperity. It then—unmindful of its former obligations—endeavored to seek other Eastern connections that it could control, though this Company at all times gave to its business the same rates per mile that it charged upon its own line, upon both passengers and freight. Extensive surveys were accordingly made of the regions east Pittsburg by that Company to find a suitable line for this object, followed by material pecuniary advances to a Railway Company whose road it was proposed to use, as a part of this rival route to the East; but during the progress of these movements, an effort was inaugurated by the Erie Railway Board to absorb not only the Pittsburg, Fort Wayne and Chicago line, but nearly all the Western connections of the Pennsylvania Railroad Company, which, only failed from a misapprehension of the terms of the law under which they proposed to accomplish their object, and subsequent adverse legislation procured by the President of the Fort Wayne Company.

In view of these extraordinary movements, it became evident to your Board, that this Company must depart from the policy that had heretofore governed it, and obtain direct control of its Western connections. Negotiations were accordingly opened with the Directors of the Pittsburg, Fort Wayne and Chicago Railway Company, which had also become apprehensive (under the vicious system that had been developed in New York by which stock and bondholders of railways and their agents, sold their proxies to vote at the elections of the Company, without any regard to the interests involved in the issue), that their own work might fall into hands whose object would be to seriously impair the permanent interests of their constituents.

After a lengthened negotiation with the Directors of that Company, a lease was agreed upon, and this Company entered into possession of the Pittsburg, Fort Wayne and Chicago Railway on the first of July last. The terms of this lease, which gave to the shareholders 12 per cent. on their capital, were at the time considered very onerous, and only justified by the circumstances already referred to. The results of its operation, however, for the first half-year, notwithstanding a diminished revenue of $304,495,90, compared with that of the same months in 1868, have, through a vigorous retrenchment of expenses, left a net profit of $36,794 43 over all outlays, including the semi-annual contribution of $52,050 to the Sinking Fund.

For these favorable results the Company is much indebted to the energetic and economical administration of its affairs by J. N. McCullough, Esq., its General Manager.

The loss in the gross receipts of this railway occurs mainly at Chicago, and are, to a considerable extent, due to the low rates upon west-bound traffic that prevailed from the beginning of the lease to near the close of the season. The low price of grain, and the bad condition of the common roads leading to railway stations in the West, have been the chief cause of the falling off in the receipts of the line during the past few months. The business of this railway must, however, continue to increase with the advance in population and wealth of the section of country it accommodates, and we believe that its lease will prove a judicious operation for the Company.

The same reasons that induced this Company to become the lessee of the Fort Wayne line, prompted the Pittsburg, Cincinnati and St. Louis Railway Company, in which this Company holds a majority of its shares, to take at an earlier period a lease of the lines owned by the Columbus, Chicago and Indiana Central Railway Company. The results of this lease have not proved so satisfactory. The railway was found, contrary to expectations, to be, to a considerable extent, in an unfinished and a dilapidated condition, deficient in depot accommodations, with a limited rolling-stock largely out of repair, and shops entirely inadequate to place this machinery in good order. These deficiencies had to be supplied, and in the meantime its road and rolling-stock could only be placed in a condition for economical service at great *extra* cost.

Upon a representation of these facts to the Company, modifications in the lease have been made by it, which will, it is believed, render it acceptable to the lessees and to this Company, their largest stockholders.

These several arrangements still left our connections with Cincinnati, the great trade centre of the southwest, incomplete, the business with which has been steadily increasing since the termination of the late war. To perfect these the Pittsburg, Cincinnati and St. Louis Railway Company has also agreed upon a lease with the Little

Miami Railroad Company of their line, through whose railroad our connection with Cincinnati will be made, thus enabling this Company to participate in the growing prosperity of that city.

The connection of your line with St. Louis, the great city of the Mississippi valley, are now complete by way of Crestline, and nearly so upon the shorter and more direct route through Columbus, Indianapolis, Terre Haute and Vandalia. With these arrangements, all of which will be perfected this year, we will limit our extensions, unless some over-ruling necessity should require us hereafter to go further. We have no interest in any line beyond the Mississippi river.

Unwilling as we have been to enter upon this policy, a careful review of the subject since its adoption leaves no doubt as to its wisdom, under the circumstances that have been developed within the past eighteen months.

This company has not attempted, neither does it propose to absorb the natural connections of either of the trunk lines. There is business sufficient to give to each of these companies ample revenues to meet the interest upon any reasonable cost of their works, if equitable rates between the shipper and railway Company are at all times preserved, without a resort by one line to take from another by reduced charges business which it otherwise would have had an equal chance to secure at fair prices. Such attempts, though often repeated, have at all times failed to secure the professed object in view. They have not unfrequently been commenced to influence the market price of the shares of the Company, in disregard of its permanent interests, with a view to benefit the stock speculations of the Managers or their friends; and at other times from the recklessness of a sub-agent, which his superiors refuse to correct or to acknowledge, but more frequently with the unreasonable expectation of gaining some advantage over a rival interest.

There has been much complaint by the public, in consequence of the higher charges made by many Railway Companies for short than long distances. In this policy, to a limited degree, these Companies for obvious reasons are fully justified; but in many cases this practice has been carried to any unwarrantable extent. The rule that has governed this Company is, not to charge to any intermediate point a greater rate than is required to one at a long distance. Under this rule, which we think entirely defensible, the average charges for the through and local business per ton per mile passing over your line are nearly equal.

The Pennsylvania Railroad Company was organized mainly with a view to promote the commercial and manufacturing interests of the city of Philadelphia and the interior of the State, and its management has kept these objects steadily in view, giving at all times to this city the differences in transportation to and from the West, due to its geographical position. This policy has had a marked influence in developing the manufacturing industry of the city, but it seems only to have preserved its commercial interest from retrograding. With a view to sustain and promote this interest, every effort has been made by this Company to reduce the local expenses on produce at Philadelphia, that necessarily occur in its transfer at seaports, to minimum; but the pecuniary and shipping facilities required to second these movements, and retain the business of the West at this city until forwarded to its destination appear to be deficient, and, in consequence, the larger share of it, notwithstanding these advantages, passes on to New York. The Directors, recognizing the importance to the interests of this Company of building up the business of this port, will cheerfully unite in any reasonable plan by which this object can be secured.

In our last annual report the diversity of railway gauges between the East and the West was alluded to. Since that period all of your immediate Western connections have reduced the gauges of their lines from 4 feet 10 inches to 4 feet 9½ inches, which, when their machinery is adapted to it, will be further reduced to 4 feet 9 inches—the present gauge of the Pennsylvania Railroad.

Since your last meeting, the State of Pennsylvania has cancelled and disposed of its lien upon the Philadelphia and Erie Railroad to the Allegheny Railroad Company, accepting therefore a second lien upon the line that the Company is building between the Philadelphia and Erie Railroad and its present road, at the Mouth of the Mahoning; the bonds given to the State being guaranteed by the several railway Companies over whose lines the traffic of the new road is to pass to Philadelphia and Pittsburg, thus insuring to the Commonwealth the ultimate payment of its original claim of three and a half millions of dollars, and at the same time enabling the Allegheny Valley Railroad Company to develop, more promptly than it otherwise could have done, a section of the State that is rich in minerals and other products—all of which will remain undeveloped until this highway is constructed.

The location of this line has not yet been completed, but the character of the country, as shown by recent surveys, will render the construction of a railway costly. This route is generally known as the "Low Grade Line" between the East and the West, the construction of which will soon be required to accommodate the increasing tonnage between these sections. Its gradients *against* the heavy traffic may be confined within eleven feet per mile. About a half of a million of dollars have already been expended upon its graduation, and its total cost is estimated at about $5,500,000.

The Directors take pleasure in again expressing the obligations of the Company to its General Superintendent, E. H. Williams, Esq., and his two assistants, John A. Wilson, Chief Engineer, and A. J. Cassatt, Superintendent of Motive Power, for their careful and judicious management of the interests committed to their charge.

Respectfully submitted.

By Order of the Board,

J. Edgar Thomson, President.

The Brook's Paraffin Insulator.

Our attention has lately been called to a pamphlet on the subject of the insulation of telegraph lines by Mr. David Brooks, of Philadelphia, the patentee of the valuable invention known as the Paraffin Insulator, now coming into general use. The subject is one of much general interest, and from the pamphlet in question we have selected a few important facts for the information of our readers.

It has always been a feature of the reliability—or unreliability—of the telegraph, that its wires are practically useless in wet weather. In order to understand this fully, it is necessary to briefly examine the hydrostatic properties of insulating bodies. The amount of moisture in the atmosphere is called absolute humidity. The proportional amount of what the atmosphere will hold at a given temperature, is called relative humidity. Insulating bodies, or Insulators in clean and good condition, will conduct on the surface, from moisture gathered from the atmosphere when placed in the shade, nearly in the following order of relative humidity:

A species of white glass, made from kryolite	87 per cent.
Brown earthenware, or that species of pottery which has salt glazing	40 "
Ordinary glass	42 "
Porcelain, or that species of pottery with a dipped glaze, or glaze formed by dipping the biscuit body in a solution	68 "
Ebonite or Vulcanite	79 "
Shellac	83 "

Paraffin, no conduction at 100, or when the air is fully saturated.

Any of the foregoing bodies will show conduction over the surface, when exposed to the air dampened to the extent of relative humidity given, except Paraffin, using an astatic galvanometer and battery of one hundred cells. If the surfaces are carefully wiped dry with a clean cloth, the conduction is stopped for a time, until moisture is again gathered. If we clean the outer surface of an ordinary glass insulator and cover the surface with paraffin there is no conduction over this surface as long as the paraffin remains unbroken or unaffected by dirt or other cause. If, instead of using an insulator with paraffin thus applied, we connect a wire to the ground, and in the ground wire we place a paraffin candle, simply breaking the wire and fastening each end to the ends of the candle in such manner as to make up the circuit by using the candle for a portion, the repellant properties of the paraffin, as regards moisture, are sufficient to prevent a current passing over the candle in rain or fog, or both combined. This is one of the features of paraffin, applied to the surface of insulators. Another is that of stopping up the pores of such insulators as absorb moisture, and conduct through the body, by reason of the moisture contained. This is easily accomplished, by first heating the insulator sufficient to expel the air and moisture, and immersing, while hot, in melted paraffin. This method will effectually close the pores of porcelain and earthenware. It will do the same with cast-iron and prevent its absorbing moisture and oxydizing. It is very effectually done with either of these materials, because the heat can be carried to low red without injuring them. It can only be imperfectly applied to wood, because the heat necessary to dry it destroys or weakens it also. This difficulty occurs also in its application to the cotton covering of wire.

One of the obstacles in the use of paraffin, is shrinkage by change of temperature or by cooling. If we melt a portion in a vessel and carry the heat to the boiling point, say 450° Fahrenheit, on cooling the bulk will have diminished about one-quarter on solidifying at 110°. If cooled down to 30° Fahrenheit, the mass will contract to such a degree as to detach itself from the sides of the vessel, and when applied to wood, in lengths of, say one foot, and in a vessel holding a few gallons, if immersed in paraffin at 250° Fahrenheit, and the vessel taken from the fire and allowed to cool, the pores will be completely filled by the time the paraffin has cooled down to the point of solidifying.

As before stated, glass will become sufficiently hydroscopic to sensibly conduct upon the surface when exposed to air the relative humidity of which is forty per cent. of saturation; but unless perfectly clean it will conduct at a much lower temperature of humidity. An ordinary insulator, as brought from the glass works, will show conduction when exposed to air that has only twenty per cent. relative humidity. But supposing the surface clean, and relative humidity thirty five per cent. of saturation. If we draw the finger over the surface of the glass conduction takes place directly in the water, or mark, of the finger, though no visible mark or trace is left, and conduction can be stopped by simply wiping or drawing the finger, covered with a dry cloth or handkerchief across this track in an opposite direction.

The purpose of this is to show how easily the insulator is affected. If we hold the insulator in a current of smoke or gas of a burning candle for one minute, but far enough from it not to be heated by the flame, it is sensibly affected and will conduct when exposed in air, the relative humidity of which is less than forty per cent., and so are all insulators proportionately affected, but paraffin least of all. Glass is probably as susceptible to these agencies as anything, and when once dirty as difficult to clean; but if its surface is first covered with paraffin, in the manner described, subsequent cleanings are comparatively easy. The paraffin prevents these impurities from adhering so firmly to its surface. When the surface becomes an admixture of paraffin and dirt, sulphuric acid or caustic soda have no effect, and we are compelled to use the remedies resorted to in removing grease spots, such as turpentine, benzine, ether or any of the volatile hydrocarbon oils. Paraffin is miscible in those oils. By this treatment a clean surface is exposed ready for another application of paraffin. By this means an insulator, when deteriorated by use and exposure, can be cleaned and restored to its original standing, or nearly so. There is no more necessity for throwing away a paraffined insulator, simply because it is smoked or dirty, than there is for providing ourselves with a new set of chinaware every time we have occasion to use those articles.

We have devoted a considerable share of our space to this subject because of its importance. The Western Union Telegraph is using the Brooks Insulator and the efficiency of its lines is largely increased in consequence. It is to be hoped that it will soon come into universal use, as the reliability of the telegraph as a means of commercial communication between the different sections of the country at all times and seasons, is largely dependent on it.

Illinois Central Railroad.

The statement of this Company for the month ending January 31, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,190.13 for	$39,487 38
Acres Int. Fund Lands sold	40.00 for	418 00
Acres Free Lands sold	80.00 for	1,086 80
Total sales during month of Jan., 1870	4,310.13 for	$40,992 18
To which add Town Lot Sales		1,236 00
Total of all	4,310.13 for	$42,228 18
Cash collected in January, 1870		$181,174 54

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 258½ Miles.	Total. 965½ Miles.
Freight	$350,415 00	$61,038 00	$411,453 00
Passengers	117,223 83	22,585 25	139,759 08
Mails	6,375 00	1,029 08	7,404 08
Other sources	94,000 00	1,970 92	95,970 92
Total Jan., '70.	$568,013 83	$86,573 25	$654,587 08
Total actual earn'gs, Jan. 1869	$573,153 85	$84,286 00	$657,439 85

☞ An Order in Council has been passed by the Quebec Government, appropriating the subsidy of $1,500 per mile to the Sherbrooke Eastern Townships and Kennebec Railway agreeably to the terms of the act, the Company having been organized within the year.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for the month of January:

	1869.	1870.
Ashes, bbls	880	837
Breadstuffs—		
Wheat flour, bbls	208,760	22,3791
Cornmeal, bbls	45,594	5,4583
Wheat, bush	481,221	237,921

American Railroad Journal.

Saturday, February 26, 1870.

Stock Exchange and Money Market.

Money has been in quite liberal supply, all the week, notwithstanding the reported falling off in the city bank reserves, of nearly 1½ millions of legal tender notes; over a million in the deposit line; and $807,797 in the item of specie. The U. S. Sub Treasury had about 1¾ millions added to its currency balance, which told on the bank reserve through the Gold sales. Nearly half a million was added to its coin balance, though the actual Gold disbursements and sales of the office were quite heavy. In private hands there has been no perceptible falling off in the amount of capital seeking employment, especially in a controllable form. The inquiry for aid from borowers in good standing has been moderately active, though not remarkably urgent. Call loan rates have been quoted from 4@6; strictly prime to good mercantile credits at from 6@8 per cent. per annum. Notwithstanding the adverse changes in their averages, the city banks now hold nearly 38 millions more of specie and legal tender notes than the 25 per cent. of their liabilities on account of deposits and circulation, required by the national banking act. The general balance of the U. S. Sub Treasury office on Wednesday morning, was $85,667,190, as against $82,778,916 on the 1st inst.

The specie reserve of the city banks according to the latest return is $37,264,387, against $23,351,391 same time last year. The city bank deposits are now $212,188,882, against $187,612,546 week ending Feb. 20, 1869. The legal tender reserve amounts to $55,134,066, against $50,997,197 same time last year. The circulation now stands at $33,694,371, against $24,247,321 same time last year. The loans are now $267,327,368, against $263,428,068 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $85,191,978 a day, against a daily average of $85,140,471 the preceding week, and $90,206,700 the week ending with Feb. 6, 1870. The current week's exchanges average about 93⅝ millions a day. The city banks, last week, reported a further loss of $807,797 of specie, $1,003,858 of deposits, and $1,468,934 of legal tender notes. They increased their loans, $1,462,716; and reduced their circulation, $9,201.

National Bank notes to the amount of $299,340 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $321,102,081, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $21,132,210, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,569,871. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,396,350; and for the public deposits, $18,393,500—making a total of $360,789,850. The Treasury Department last week redeemed and destroyed $640,200 of worn and mutilated fractional currency, and issued $278,295 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 19, were $4,314,284 in coin, (including $3,907,000 from customs duties,) and $3,662,259 in currency; payments, $3,881,647 in coin, (including $303,386 of coin interest,) and $1,997,915 in currency; balance at the close of the week, $82,963,107 (including $75,078,692, of coin, and $7,753,890 of currency,) against $82,133,007 at the close of the preceding week, showing an increase of $830,100. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $805,954 in coin, (including $651,000 from customs,) and $307,712 in currency; payments, $42,151 in coin, (including $26,051 of coin interest,) and $393,722 in currency. Tuesday, having been observed as a holiday, no business was transacted. The balance at the close of business on Monday stood at $85,667,190, (including $7,667,879 of currency, and $75,837,494 of coin,) against $82,778,916 a week previous; and $82,647,568 on Feb. 8th, 1870.

The U. S. Sub Treasurer retired, last week, $3,668,629 of coin certificates, received for customs.

The expenditures of the U. S. Government for the fiscal year ending June 30, 1870, exclusive of interest on the public debt, are estimated at $206,101,430.

Government revenues, have been yielding more liberally since our last. The excises have yield-

ed about four millions; customs at the port of New York, $3,844,630, and at the outports about $1,150,000 (in coin) more, making the grand total income for the week equal to about $9,993,500 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 110 millions.

The Gold dealings have been fairly active, chiefly on speculative account, but the governing influence at the Gold Exchange have been decidedly against firmness in the price. The range of the week has been from 117¾@120, and the closing quotation on Wednesday was 117¾@117⅞ The customs drain has been unusually heavy, having reached nearly four millions. The export call has been light, however, having been confined to about five-eighths of a million. Government marketed Gold on Wednesday at from 117.95@118.37½. The aggregate of the bids was only $885,000, all which Secretary Boutwell accepted.

The U. S. Assistant Treasurer received instructions to commence the payment of the interest on Ten-forties, due March 1, without rebate, on and after Feb. 24.

The coin interest payment of the Sub-Treasury on Wednesday were $50,235.

The customs demand for Gold last week, averaged $651,170 a day; thus far, this week, it has averaged $651,000 a day, or equal to a weekly aggregate of $3,906,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $565,353; and since Jan. 1 1870, $2,836,973, against $1,730,440 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $83,154,303, against $77,979,711 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to Feb. 11, was $708,991, against $662,959 same time last year.

The exports of specie, from this port, last week, were $676,446, against $213,323 same week last year; total, since July 1, 1869, $21,006,415, against $27,161,553 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $303,336, and since July 1, 1869, $62,821,173, against $63,011,863 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to Feb. 11, were $4,916,213, against $4,765,131 same time last year.

The foreign exchange market has shown less firmness, under rather freer offering, and a very moderate call for other than strictly prime sterling bills. Bankers' prime sixty day bills on London closed heavily on Wednesday at 108¾@108⅞, and on Paris to 5.22½@5.17½; sight bills on London to 109¼@109½, and on Paris to 5.16¼c.@5.15. The offering of produce bills have been rather more liberal. The week's exports of domestic produce have been to the currency value of $3,208,786, making the total since July 1, 1869, $129,838,726, against $102,953,748 same time preceding fiscal year.

Government securities have been in quite limited supply in the open market, and though business has been devoid of animation, prices have held their own very well. Investment purchasers have been buying with rather more confidence at the going rates, though not in large amounts. The later issues of the Five-twenties, the Ten-forties, and the Currency Sixes have been the favorites, as usual of late, with this class of buyers. Government bought in a million of Five-twenties on Thursday at about current figures. On Wednesday, U. S. Six per cents of 1881, and Gold sold at precisely the same price—117¾. This circumstance indicates a very marked improvement in the public credit.

U. S. sixes of 1881 closed here at 117⅜@117¾; U. S. Five-twenties of 1862, 115¼@115½; U. S. Five twenties of 1864 at 114⅛@114¼; U. S. Five-twenties of 1865 at 114⅜@114⅝; U. S. Five-twenties of 1865, consolidated, 112⅞@112⅛; U. S. Five-twenties of 1867, 113¼@113⅜; U. S. Five-twenties of 1868, 113¼@113½; U. S. Ten-forties at 112⅛@112⅜; U. S. Six per cent. currency bonds, 111⅜@111⅝.

There has been a moderately active call for State bonds, but prices have been more than usually variable. The railway mortgages have been in remarkably good request, considering the difficulty in selecting the cheapest or best, where the variety is so great, a difficulty which increased by the continued multiplication of new schemes, some of the great highways of East and West or North and South trade, and others in direct competition with existing roads. A favorite with investment buyers through the week, has been the new Chesapeake and Ohio First Mortgage Loan, for which the financial agents Messrs. Fisk & Hatch have found a very ready sale. The limit of the Loan has been definitely fixed at fifteen millions. Of this amount, bonds have been already sold to the value of about a million and half, or fully a tenth of the whole loan, which was brought on the market on Thursday, the 17th inst. The investment purchases have included a number of round lots, chiefly on home account, but, in part for the German markets. The bonds yield interest at the rate of 6 per cent. per annum in gold, and both principal and interest of the loan are made payable expressly in gold coin in the City of New York. Some odd lots of the Central Pacific First Mortgage Bonds have been bought at 95¾@96, chiefly on foreign account, and at the close the bonds were in request and firm at 95⅞. Most of the recent purchases were made for the German markets. Western Pacific Sixes have been in very light supply and fair investment demand at 94@94½; The Union Pacific Sixes were saleable at 86¾@87.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 9.	Feb. 16.	Feb. 23.

At. and Gt. West		29½	

Railway and miscellaneous share property has been less confidently dealt in at fluctuating prices, closing weak and irregular.

Thursday was observed as a holiday in financial and commercial circles.

General business has been on a moderate scale in the leading articles of domestic produce, at variable prices. Middling upland cotton closed heavily on Wednesday at 24½cts. per lb. The stock of cotton now here is given at about 78,500 bales. The receipts at the port this week, have averaged about 2,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 1,998,300 bales, against 1,556,000 bales in 1868–'9; exports, same time 1,121,650 bales, against 807,150 bales same time in 1868–'9; stock on hand at latest dates, 532,250 bales, against 400,250 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 1,810 pkgs., against 2,117 pkgs., same time in 1869. From Boston, 470 pkgs., in 1870, against 843 pkgs. same time in 1869.

At the auction sale of Scranton Coal to day, 80,000 tons were disposed of at a shade easier prices, ranging from $3.92½@4.87½, as against $3.87½@$5, in January, per ton of 2240 lbs., deliverable at Elizabethport, N. J.

At the Live Stock markets, this week, Beeves have been in more demand, at from 10@17c., per lb.; week's receipts, 5,841. Milch cows are quiet, at $40@$100 each, receipts, 109. Veal calves have been in request at from 8½@13½ c. per lb.; receipts, 616. Sheep and lambs in fair demand at from 5¼@8¾c., and 6½@9c. per lb.; receipts, 24,770. Swine are in more request at 9½@10⅛ c. per lb., all live weight; receipts, 13,555.

Rather more inquiry has been noted for foreign goods, which have been quoted comparatively firm, notwithstanding the depression in gold. The week's imports of foreign dry goods were to the specie value of $1,992,573; and of foreign merchandise, $2,082,826, making a total of $4,075,399, against $7,439,253 same week last year.

The ocean freight market has been quiet, since our last, rates have favored shippers. For Liverpool we quote flour at 1s. 3d.@1s. 6d. by sail, and 1s. 3@1s. 6d. by steamer, per bbl.; grain at 3d. by sail, and 3d. by steamer, per bushel; cotton at $\frac{5}{32}$d.@$\frac{3}{16}$d. by sail, and ¼d.@$\frac{5}{16}$ by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 12s. 6d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 510.

The balance in the Sub-Treasury on Wednesday was $84,438,110 20.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending February 29, and since the beginning of the year:

	1869.	1870.
For the week	$3,261,173	$3,208,786
Previously reported	20,665,571	20,384,115
Since Jan. 1	$23,926,744	$23,592,901

The imports for the week ending February 19, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$3,395,505	$1,992,573
Gen. merchandise	4,043,748	2,082,826
Total for the week	$4,439,253	$4,075,399
Previously reported	29,157,109	31,205,019
Since January 1	$36,596,362	$35,290,418

European and North American R. R.

This road is now completed and in operation from Bangor to Mattawamkeag, 58 miles, and from the State line (Nanseboro) to St. John, New Brunswick, (Western Extension of the Provinces) 88 miles. There are about 56 miles more to build to the State line, 21 of which (Nanseboro West to Calais and Houlton Road) is under contract and in a state of forwardness, and will be ready to receive the rails the coming season. The other section, 35 miles, is to be provided for, a portion of which is heavy work, but if ample means were at hand no doubt would exist that the work could be pushed through and the whole line opened next winter. The contractors for the work in progress are Messrs. Brooks and Ryan. The officers of the road in Maine are: President, George K. Jewett; General Superintendent, James M. Lunt; Assistant Superintendent, J. J. Gerish; Treasurer, Noah Woods; in New Brunswick: President, Thomas Parks; Chief Engineer, E. R. Burpee.

The business of the road from Bangor has been very satisfactory since it opened. There are now running two trains daily to Mattawamkeag and four daily between Bangor and Oldtown. At Oldtown the Bangor and Piscataquis road connects, running from thence to Dover and Foxcroft, 40 miles, through the heart of the iron and slate quarries. The distance from St. John to Halifax is 262 miles, and this eastern extension is also completed, excepting the link between Dorchester and Truro, 65 miles, and that is under contract. By the summer of 1871 communication will undoubtedly be complete between Bangor and Halifax, 464 miles.

☞ The contract for building the Mattoon and Grayville Railroad has been re-let to J. Edwin Conant and associates, of New York, and P. C. Brink and associates, of Philadelphia. This line runs from Mattoon through the counties of Cumberland, Jasper, Richland, Edwards, and Posey, crosses the Ohio and Mississippi Railroad at Olney, Ill., and strikes the Ohio River at Mount Vernon.

☞ The West River Railroad company was recently organized at Jamaica, Vt., by the election of a board of directors, with the Hon. Wm. Harris, of Windham, as President. The town of Jamaica has bonded itself to the amount of $33,347, and stock has been taken to the amount of $20,000 by individuals, making a total of over $53,000 raised in that town for this road.

☞ The Quincy Mining Company have declared a dividend of $6 per share from the earnings of the past year, payable on the 10th of March to holders of record on the 28th inst., at the office of the company, 43 Exchange Place, N. Y., and at the office of T. Henry Perkins, 22 Devonshire St., Boston.

☞ The Lebanon Springs and Bennington and Rutland railroads have been consolidated under the name of the "New York and Harlem Railroad Extension."

☞ The North Carolina Railroad has declared an annual dividend of 6 per cent—3 per cent payable 1st of April, and 3 per cent 1st of July.

☞ Active operations will soon begin on the Potomac Railroad, extending from Fredericksburg to Alexandria, Virginia.

Journal of Railroad Law.

RAILROAD COMPANIES — LIABILITY FOR INJURY SUSTAINED FOR NEGLECT TO SOUND BELL OR WHISTLE AT STREET CROSSINGS.

The facts of the late case of Toledo, Peoria and Warsaw Railway Company, *vs.* Foster (43 Ill., 415,) are fully and clearly stated in the following opinion by

WALKER CH., J.—This was an action brought by appellee before a justice of the peace, against appellant, for the killing of his cow with their engine and cars. The trial before the justice resulted in a judgment against appellant, from which an appeal was prosecuted to the Circuit Court, where another trial was had resulting in a verdict for appellee. A motion for a new trial was entered, which was overruled by the Court, and a judgment was rendered on the verdict, to reverse which the case is appealed to this Court.

It appears from the evidence, that the animal was killed by the passenger train in January, 1866, within the corporate limits of the town of Fairhaven. Several persons testified that they saw the occurrence, and state that it took place on or near the road or street crossing. It appears that the train was running at the rate of fifteen or twenty miles an hour. And the evidence strongly preponderates to establish the fact, that the whistle was not sounded, nor the bell rung, until the engine was nearly in contact with the animal. That the rate of speed was so great, that the train passed the depot, and had to back up to the station. It is contended that the evidence shows that the cow was not killed until the train crossed the street, and that the appellant was not therefore liable under the thirty-eighth section of the railroad law.

It seems to be established, that when the animal was first seen she was west of the crossing, and that the train was coming from that direction. When thrown from the track she lay east of the street, but whether she ran that distance before being struck, or whether she was carried from the west side of the crossing to the place where she lay, by the engine, does not very clearly appear. But it does appear that the bell was not ringing or the whistle sounding, when she was first noticed and the train approaching. If the collision occurred before the train reached the street, then, under the statute, the company were guilty of such negligence as would render it liable for the injury which resulted therefrom. Whether it so occurred was a question for the determination of the jury.

On the contrary, if the cow was killed after the engine had passed the street, and at a place where the statute did not require the signal, still it was a question for the jury, under the common law, to say whether it was negligence. In the case of the Galena and Chicago R.R. Co., *vs.*, Dill 22 Ill., 264, it was held, that where the statute failed to require a railroad company to ring a bell or sound a whistle, the parties were left to their common law rights and duties. That both parties were bound to the use of every reasonable precaution to avoid injury to the other, and that it was a question for the determination of the jury whether it was, under all the circumstances, negligence for the servants of the road to omit the ringing of the bell or sounding of the whistle. It is for them to determine whether such acts would have tended to prevent the injury. That negligence is a question of fact, except it consists in the omission of a duty imposed by positive requirement of law. Our experience teaches, that while the sound of the bell might, and perhaps would not alarm cattle, and cause them to leave the track, still the sound usually made for the purpose by the whistle, ordinarily does have that effect when made in proper time.

If either ringing the bell or the sounding of the whistle would have prevented the injury, it was the duty of the servants of the company to have done so, although at a place where the statute has omitted to make the positive requirement. The common law requiring all reasonable efforts by both parties to avoid injury, it was for the consideration of the jury to say whether the sounding of the whistle was calculated to avoid the collision, and whether it was reasonable to require it. It was also for the determination of the jury, whether the company was running their train at too great a speed through or into a populous town, where persons and animals are constantly passing and repassing, and where there is necessarily great danger of injury to such persons and property. They seem to have passed upon these questions, and we are not prepared to say that their verdict is not sustained by the evidence. Appellee asked no instructions, and those asked by appellant were all given, and hence no question arises upon the law as given to the jury. We perceive no error in this record, and the judgment is therefore affirmed.

Judgment affirmed.

New York State Canals.

REPORT OF THE STATE ENGINEER.

The annual report of Van R. Richmond, State Engineer, shows that the amount of work done in 1869 under the supervision of the Engineers was $1,473,843 85. The total length of navigable canals and feeders, with rivers and lakes connected artificially therewith, is 1,228 miles. The number of locks on all the canals, is 565. The total feet of lockage is 5,286. The total number of bridges on all the canals is 1,318. The approximate cost of the structures on the enlarged Erie canal, is $16,494,218. The total cost of the canals for construction, management, &c., is $89,087,940. The receipts from tolls collected amounted to $97,625,066. The report makes the following interesting exhibit:

Total cost of construction of the State Canals	$64,710,832
Total interest on the same	93,736,654
Total cost of maintenance, repairs, and collection	24,377,114
Total interest on the same	27,268,895
Total from commencement to completion	$210,093,495
Aggregate receipts from tolls with interest thereon	202,619,510
Present cost cost to the State of the entire canal system	$7,473,985

A comparative statement of the total tonnage movement over the New York State Canals, New York Central Railroad and the Erie Railway, together with the receipts per ton per mile on each, from 1859 to 1868 inclusive, shows the following result:

New York Canals	9,094,948,812
New York Central Railroad	2,841,450,629
Erie Railway	3,801,468,983

It appears from the foregoing that the Canals since 1859, have moved about 40 per cent. more freight than the New York Central and Erie Railroads. As between the two railroad lines, the foregoing is not a fair comparison, as the Erie operates 201 more miles in 1868 than in 1859, while the New York Central operates only 37 miles more.

The following shows the cost of construction and equipment of the three lines:

N. Y. State Canals	$80,710,832	Total l'gth	900 m.
N. Y. Cen. Railr'd.	36,607,696	"	598 m.
Erie Railway	56,486,605	"	778 m.
	$173,805,133		2,266 m.

The total number of tons moved one mile on all the Railroads in the State in 1867, was 1,192,818,673; in 1868, the number was 1,308,451,978, an increase of 115,633,305, or 9¾ per cent., while the increase on the Canals for the same period was 7¼ per cent. Taking the whole period from 1860 to 1868 inclusive, the total increase in tonnage of the Canals is 27 per cent., and for the same period on all the Railroads in the State is 130 per cent.; or the increase in tonnage of the Railroads has been for the past nine years five times greater than the increase of the Canals. The total mileage in 1868, on the Canals was as great for nine months, as the mileage on all the Railroads in the State for twelve months.

WORK UNDER CONTRACT.

Statement showing the total amount of work done during the fiscal year ending September 30th, 1869; also the amount of work remaining to be done on all existing contracts upon the New York State canals, under supervision of the Engineer Department:

Name of Canal.	Amount done during the fiscal year.	Amount remaining to be done.
Erie	$446,191 20	$494,897 66
Champlain	154,393 91	146,469 00
Black River	5,636 72	1,340 00
Oswego	77,375 38	151,621 75
Chenango	11,108 37	70,461 50
Chemung	36,092 28	3,874 00
Crooked Lake	39,234 15	.....
Cayuga and Seneca	11,889 93	33,244 00
Baldwinsville	1,520 00	2,840 00
Genesee Valley	250,928 40	81,602 51
Total for ordinary and extraordinary expense	$1,034,370 34	$985,850 42
SPECIAL IMPROVEMENTS AND EXTENSION.		
Champlain Canal Improvement, chap. 186 Laws 1864	$82,480 00	$77,180 00
Oneida Lake Canal enlargement	99,760 00	126,680 00
Chenango Canal extension	248,676 41	394,732 00
Black River improvement, chapter 151, Laws 1864	8,557 10	.....
Doubling Locks on Western Division	.....	506,000 00
Total for improvm'ts	$439,473 51	$1,104,592 00
Total	$1,473,843 85	$2,090,442 42

WORK AUTHORIZED NOT UNDER CONTRACT.

The following is the estimated cost at engineers' prices of authorized work not under contract for extraordinary repairs:

Extension of the Chenango Canal	$350,854
Construction of Fish Creek Feeder	465,970
Total	$826,824

By referring to the Auditor's report, it will be seen that the value of the tonnage passing daily over the canals, amounts upon an average to $1,400,000; it has also been shown in the preceding pages of this report that the canals move as many tons of freight per mile in nine months as

all the railroads in the State move in a year, and that the canals have since 1859, made 40 per cent more mileage than the New York Central and Erie Railroads together for the same period. The most significant fact, perhaps, is that from 1860 to 1869, the total increase in tonnage over the canals is only 27 per cent, while for the same period over all the railroads in the State the increase is about 130 per cent, or about five times greater. These are important facts, not only in showing the magnitude of our canal commerce, but the great necessity of an improved management whereby a proper proportion of the increase in tonnage from the west may be retained for the canals. In my last annual report it is observed that: "It is to the Western trade that the attention of those interested in the future commerce of our canals should be directed, and to so manage and improve the canals, as not only to control but retain this vast tonnage, which has increased over our canals at an average annual rate of about 15 per cent. It is for this great prize that American capitalists are projecting new rail and water lines by the shortest routes to the seaboard, and it is this growing and powerful competition that should induce the State to adopt every means to secure the full working capacity of our canals and above all reliable and uninterrupted navigation.

Neglect and defective management have induced many to believe that the Erie Canal lacks capacity to transport all the freight that at certain seasons should naturally pass through that channel to tide water; that this is not true is clearly shown in the following:

The question of capacity is determined by the number of lockages that can practically be made in a definite time. The management of the locks upon the Erie Canal have never received the attention to which they are entitled, being indifferentl ymanned, and without mechanical auxiliaries, so essential in crowds. It is shown by the examples, that a boat can be passed in four minutes through a single lock, while the average time for the largest month in 1862 was 9½ minutes. The following examples will more clearly illustrate:

No. 1.—Experiments were made in 1848 and 1849, with a single enlarged lock in good repair and full attendance with the following average results:

For boat to enter lock snub and shut the gates	1½ minutes
To open valves, and empty the lock	1 "
To open the gates and get the boat out	1½ "
Total average time consumed.	4 minutes.

This result would give 360 lockages in 24 hours, at a single lock, and 720 at double locks, calling the movement from tide one-seventh of the tonnage going to tide water and the average length the season of navigation 230 days; it would make the annual capacity of the Erie Canal equal to 9,360,000 tons with single locks, and 18,720,600 tons with double locks.

No. 2.—Experiments were made with a single enlarged lock during the season of 1849, and 82 lockages were made in six hours, equal to 328 in 24 hours. This would give a capacity to the Erie Canal of 9,052,800 tons with single, and 18,105,600 tons with double locks.

No. 3.—Previous to 1850 experiments were made to determine the number of lockages that could practically be made through one of the single eularged locks, for the purpose of determining the quantity of water that would be required for the maximum capacity of the canal. It was found that two hundred could be made with a single lock in 24 hours, and four hundred with double locks. This would give a capacity to the canal of 5,520,000 tons with single locks and 11,040,000 with double.

No. 4.—At the first lock east of Rochester, 198 boats were passed in 1848 through a single lock in 24 hours equal to one every 7⅙ minutes, giving a capacity equal to about that established by the Engineers.

The greatest number of lockages made in any one day in 1862, (the season of greatest tonage ever experienced, with the exception of 1866, which was but a trifle in excess,) was 170, through a single lock in 24 hours, and 310 through double locks. These, if continued through the season, would give a capacity of 4,692,000 tons with single locks, and 8,556,000 tons with double locks. Taking only those examples where the lockages were continuous for 24 hours and the following shows the maximum working capacity of the Erie Canal with single and double locks:

	Single locks. Tons.	Double locks. Tons.
Established by Engineers in 1850	5,520,000	11,040,000
Established by Lockages in 1848	5,434,860	10,920,600
Established by Lockages in 1852	4,692,000	9,384,000
Average working maximum capacity	5,225,600	10,451,200

EXTENT OF CAPACITY REACHED.

The season of 1862 is taken and the tonnage calculated from the lockages upon the same basis as used to obtain the maximum capacity.

Eastern Division.—The daily average number of lockages for the season was 174, through double locks, which represents a movement of 4,802,400 tons, being 55½ per cent less than capacity.

The daily average number of lockages for the largest month was 198, which represents a movement of 5,454,800 tons, being 48 per cent less than capacity.

Middle Division.—The daily average number of lockages for the season was 171 through double locks, which represents a movement of 4,800,000 tons, being 56 per cent less than capacity.

The average daily for the largest month was the same as upon the Eastern Division, and 48 per cent less than capacity.

Western Division.—The daily average number of lockages (greatest at any of the locks upon the Division) for the season was 129, which represents a movement of 3,660,400 tons, being 37½ per cent less than capacity.

The average daily for the largest month through single locks was 130, which represents a movement of 3,588,000 tons, being 32 per cent less than capacity.

From the foregoing it appears that taking the largest month of movement in 1862, the capacity on the Eastern and Middle Divisions with double locks was not reached within 48 per cent, and upon the Western Division with single locks, within 32 per cent; and for the season, 56 per cent of the double, and 38 per cent of the single locks.

WHEN WILL THE CAPACITY OF THE ERIE CANAL BE REACHED?

The solution of this question is difficult from the fluctuation of annual tonnage. By taking the total tonnage shipped over the Erie Canal from other States, via Buffalo, Black Rock, and Tonawanda in 1837, and increasing this at the annual rate of 15 per cent up to 1864; it equals the tons actually shipped in that year. By dividing the whole period from 1837 to and including 1866, into periods of five years each; the first period increased at the annual rate of 42 per cent, the second 18 per cent, the third 10 per cent, the fourth no increase, and the fifth up to and including 1866 no material increase.

By taking a period of the past ten years, the increase amounts to an annual rate of ten per cent. The increase from and including 1859 to and including 1862 was at the rate of 42 per cent, but from and including 1862 to and including 1866, the decrease was at the annual rate of 8 per cent.

Assuming the annual rate of increase to be the same for the coming ten years as it was in the past, at ten per cent, the capacity (based upon the lockage tonnage of 1866) of the single locks will be reached in seven years, and the double locks in thirteen years.

NAVIGATING THE CANAL BY STEAM.

The question of the practicability of navigating the canals with steam as a motive power should be settled at the earliest practicable moment, and I would recommend that an appropriation be made of not less than $20,000, and authority be given to the Canal Board to have such experiments and examinations made as would determine the best method of applying steam to canal navigation, and that the said Board be empowered to employ a competent Engineer to assist in such investigation.

REIM'S CHAMPION BOAT SCALE.

There are now in use on the canals seven weigh locks. The expense to the State for their management for 1868 was for Weigh masters $13,347,-70 and the expense for same year for Collectors and Inspectors was $76 761.11, which in the aggregate amounts to $90,108.81. It is claimed that by the general introduction of these scales on the canals, at least one-half of this expense can be saved to the State. It is also claimed that their use would not only do away with the detentions connected with locking, waiting for measurement of cargoes, &c., but would add from one and one-half to two years to the age of the boats. The average number of boats built annually since 1857 is 452. The total number built from 1857 to 1868 inclusive, was 5,420, which have an aggregate tonnage of 795,200 tons. The present age of boats is about 10 years, and the largest class, including furniture, cost about $5,000. Assuming the number of boats to be 2,500, and their age increased 1½ years, the annual saving from depreciation would amount to $210,000—being at the rate of 37 cents per day per boat and $84 per season.

VAN R. RICHMOND,
State Engineer and Surveyor.

Rutland and Burlington Railroad Bonds.

In the suit of Messrs. Cheever and Hart, Trustees under the first mortgage, against the Rutland R. R. Co., the Supreme Court of Vermont has decided that the first mortgage bonds must be paid before June 1, 1870, or the possession of the road be surrendered on that day to the first mortgage bondholders. It will be remembered that in the year 1868 the second mortgage holders were incorporated under the name of the "Rutland Railroad Company," and were authorized to issue preferred stock for the redemption of such of the first mortgage bonds as the holders would relinquish. The opportunity for an exchange was generally accepted, but a minority of the holders of the first mortgage bonds refused to surrender their stock, and, represented by Messrs. Cheever and Hart, Trustees, brought suit to recover control of the road. The case was taken up to the general term of the Supreme Court at Montpelier, last fall, and argued with great ability on both sides. The decision of the court that the $780,000 of unconverted first mortgage bonds must be paid up, with interest, by the first of June next, or the control of the road relinquished to Messrs. Cheever and Hart, Trustees under the first mortgage, it is thought will induce the stockholders of the company to take steps to pay off the outstanding first mortgage bonds, and obviate the necessity of any transfer from the present managers. In that case, the only probable change will be that after the first of June the road will be formally run by the Rutland Railroad Company, of which Ex-Governor Page is President.

☞ The Middleboro' and Taunton Railroad Company has declared its first dividend of $2 per share.

Railroads in Virginia.

The following are the railroads in contemplation or in course of construction in Virginia: Chespeake and Ohio, Lynchburg and Clifton Forge, Lynchburg and Danville, Richmond and Lynchburg, Fredericksburg and Gordonsville, Fredericksburg and Alexandria, Winchester and Strasburg, Valley, Uniontown and West Virginia, Richmond and Newport News, Baltimore and Potomac, Farmville and Buckingham, Shenandoah Valley, Virginia and Kentucky, Clinch Valley, Glade Spring and Laurel, Saltville and Coal Mine, Wytheville and North Carolina, and Southwestern.

☞ A line of railway is now being surveyed from the Boston, Hartford and Erie railroad in Dorchester, through Railway Village, Spearsville, Quincy, Braintree, Weymouth to South Scituate. After crossing the Neponset river the new line joins the Granite Railway and diverges from it at Spearsville, taking thence a direct course to the Point.

☞ The earnings of the Central Railroad of New Jersey in 1869 were $4,010,121; in 1868 they were $3,729,412—increase, $280,709.

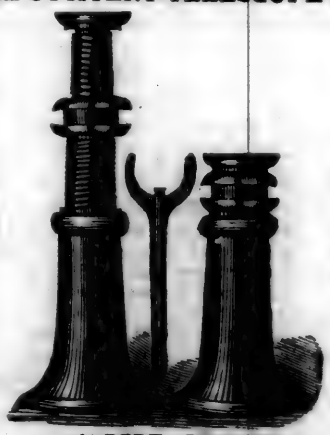
Second Hand Locomotives for Sale.

THE NEW JERSEY SOUTHERN RAILROAD Company (formerly the Raritan and Del. Bay R. R.) propose to sell Seven (7) Old Locomotives.

Four of these can be made useful for running construction trains, &c., at small expense for repairs; two of which are 4 ft. 10 in. Gauge and the others are 4 ft. 8½ inches

They can be seen at Manchester N. J. upon application to Rufus Blodgett Master Mechanic.

Sealed proposals for their purchase will be received at the office of the N. J. Southern R. R. 95 Liberty street, N. Y., until Thursday March 10th 1870, addressed to



W. S. SNEDEN,
3t8 **Genl. Manager.**

FOUNDRY FACINGS,

OF ALL KINDS AND SUPERIOR QUALITY.
SEND FOR CIRCULAR.
BOYD & PEASE,

ALBERT BRIDGES,
MANUFACTURER AND DEALER IN
Railway and Mining Supplies and Machinery,
No. 46 CORTLANDT STREET,
P. O. Box, 2843. New York.

Large Sales of the 7 PER CENT. 40 YEAR. GOLD BONDS

OF THE
CHICAGO, DANVILLE & VINCENNES
RAILROAD

have enabled the Company to provide liberally for the wants of the coming season. Among their recent purchases are 9,000 tons of the best iron rail, 80,000 white oak cross ties, delivered, and

20 FIRST-CLASS LOCOMOTIVES,

besides 130 freight and a considerable number of passenger cars. The road already built from Chicago to Momence is the very best, having 2,800 extra sized ties to the mile, a 56 pound rail connected throughout with fish joints, and all laid in the firmest manner. The part yet to be built will be in every respect as good. Everything is being made ready to accommodate the large business that is sure to press upon this road as soon as it shall open to traffic and travel. The

First Mortgage Bonds

of the Company, bearing 7 per cent. Gold Interest, payable in the City of New York on the first day of April and October, in sums of 1,000 each, are still offered at

95 AND ACCRUED INTEREST.

Many persons consider them the best security on the market and prefer them to the bonds of any other railroad. They are issued at the rate of only $16,000 per mile of completed road, are secured by

FIRST MORTGAGE

upon the road, the franchises, all present and future acquired property of the Company, and net income of the road. The

SINKING FUND,

created and set aside from the annual earnings, amply provides for the redemption of the bonds at maturity. They are coupon bonds, but may be registered at the option of any holder, and are subject to successive registration and deliveries.

THE UNION TRUST COMPANY,

of New York, being the Official Register and Transfer Agent of the Company. No bonds can be made more perfectly secure, or more absolutely safe.

Exchanged for Governments, they pay a handsome present profit, besides a large difference in interest.

Pamphlets, with maps and detail, and the bonds, may be obtained directly of us, or of our advertised agents.

W. BAILEY LANG & CO., Merchants,
No. 54 Cliff Street, New York.

Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 9353, Phila.

Locked Safety Valves.

TO
MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn.,

PACIFIC MAIL

Steamship Company's

THROUGH LINE TO

California and China.

FREIGHT AND PASSAGE GREATLY REDUCED.

Through rates, New York to San Francisco:

First Class.	Steerage.
$125 to $170.	**$60.**

according to location of berth.

These rates include berths, board and all necessaries for the trip.

Steamers of the above line leave Pier No. 42 North River, foot of Canal street, at 12 o'clock noon,

ON 5TH AND 21ST OF EACH MONTH,

except when those days fall on Sunday, then the day previous.

One hundred pounds baggage free to each adult. Medicine and attendance free.

Mar. 5, HENRY CHAUNCEY, CAPT. MAURY, connecting with GOLDEN CITY, CAPT. COMSTOCK.

Steamer CHINA, will leave San Francisco April 1, 1870, for China and Japan.

Freight for steamer HENRY CHAUNCEY, received until 4 P. M. on FRIDAY, Mar. 4. All usual facilities afforded shippers in collecting inland charges, &c.

For freight or passage tickets and all further information apply at the Company's ticket office on the wharf, foot of Canal street. F. R. BABY, Agent.

ENVELOPES.

SAMUEL RAYNOR & CO.,

115 & 117 William street, New York.

Manufacture every style of envelope, from the smallest drug size to the largest official; and any size, pattern, shape, or quality wanted for railroad companies, express and insurance companies, banks, bankers and brokers. All well made and gummed. Samples given when requested.

STAINED GLASS.

HENRY E. SHARP,

GLASS STAINER, EMBOSSER AND ENAMELER FOR

Car Builders and Railroad Companies,

147 & 149 E. 23d St., N. Y.

EDWARD W. SERRELL,

CIVIL ENGINEER,

64 & 66 BROADWAY,

NEW YORK CITY.

Railroads, Bridges, Explorations.

Particular attention given to the Examination of Public Works for Capitalists seeking Investments.

$18 IMPROVED WALTHAM WATCHES.

GET THE BEST, AND BUY WHERE YOU CAN BUY THE CHEAPEST.

Engineers, Railroad Men, Master Mechanics and Machinists, if you wish to obtain a genuine Waltham Watch, with all the late improvements, and run no risk whatever of not obtaining a reliable timekeeper, send for Descriptive **PRICE LIST**, giving full particulars of Watches, style and quality of cases, or call and examine. In Coin Silver Cases, **$18.** In 18k Gold Cases, **$80.** Ladies' Size, **$70.** Every Watch thoroughly examined and regulated, and if any one should prove imperfect, return it at once and we will correct or exchange it for one that is perfect, FREE OF CHARGE. H. O. FORD & CO.

Eight years with American Watch Company, 84 Tremont street, opposite Tremont House.

Watches sent to any address, and by selecting from Price List you can get as good a Watch as if selecting in person.

Portland, Saco and Portsmouth Railroad.

The Portland, Saco and Portsmouth Railroad was leased in April, 1847, to the Eastern and Boston and Maine Railroad Companies, in consideration of the payment by the latter to the Treasurer of the former company three dollars in coin semi-annually for each and every share of its capital stock. Payments under this contract were regularly made in specie until June, 1863, when they were made in legal tender currency—the Treasurer receiving the money under protest, and distributing the same among the stockholders in their respective proportions. This continued up to June, 1869, when claim was made for the difference between the value of coin and currency at the time the several payments were made. This claim was compromised by the payment by the lessors of the gross sum of $180,000 in full satisfaction of all claims for diminution of payments. The question then arose whether it belonged to those who were stockholders when the several dividends were declared, or to those who might be stockholders when a dividend, embracing the $180,000 received by way of compromise, should be declared. The matter was then presented to the Supreme Judicial Court (Chief Justice Appleton of Maine) for determination. The court held that the stockholders of a railroad corporation have no claim to a dividend until it is declared. Previous to that time it belongs to the company precisely as any other property it may own. When a distribution of the funds of the corporation, whether the whole or a part, is ordered, it is to be made between those who, at the time of the distribution are the owners of the stock. The court, therefore decreed that the $180,000 was to be divided among those who might be stockholders at the time when its distribution might be ordered, and a dividend thereof declared.

The Legal Tender Decision.

The decision of the Supreme Court of the United States declaring the Legal Tender Act unconstitutional and void, is a measure involving consequences of the most serious and important character. Without pausing to consider it on legal grounds, or even to discuss its expediency, we will endeavor to point out a few of the effects that must inevitably result from it. For instance, every person having a deposit in a savings bank made prior to February 25th, 1862, is entitled to demand the amount of that deposit in gold, or such portion of it as still remains to his credit. On the other hand, the banks may demand gold in payment of all loans made prior to or outstanding on that date. At least $100,000,000 is due depositors by the banks of New York State alone, and the amount of their loans receivable in gold under the late decision is not far from the same figures. The State life insurance companies hold, probably, not far from $25,000,000 of mortgages made before the date of the Legal Tender Act, and the fire and marine insurance companies as much more—in all about $50,000,000. If these companies avail themselves of the right to demand satisfaction in gold for all contracts entered into before the passage of the law, it will affect a large number of persons very seriously. Many thousand persons, doubtless, hold policies which have been running more than ten years, the premiums upon which have been paid in currency. Should the decision of the Court hold good; these premiums must be paid in gold. The principle, it is true, would operate both ways, and in the event of the death of life policy holders before the resumption of specie payments, or, if the contract related to property, having it destroyed previous to that time, the companies would be at a disadvantage in having to make up the deficiency between gold and currency. The general average of returns, in the end, would probably be largely in favor of the companies. It has been suggested, however, that a bar to this claim is found in the fact that currency payments have heretofore been accepted without protest, which changes the nature of the contracts and invalidates a demand for specie. It still remains to be seen how this would stand in law if cases were brought before the courts.

The indebtedness of our railroad companies affected by the decision is also very great. In 1862 there were 32,000 miles of railroad in the United States. Allowing on an average $10,000 of bonded debts per mile, which is a low estimate, we have $320,000,000 for this item alone. The following is an approximate statement of the bonded debts of the railroad companies named, issued prior to the passage of the Legal Tender Act, as taken from the latest official statement rendered: New York Central, about $11,250,000; Erie, $18,500,000; New York and Harlem, $5,000,000; Philadelphia and Reading, $3,250,000; Michigan Central, $6,500,000; Lake Shore, $15,500,000; Illinois Central, $4,250,000; Cleveland and Pittsburg, $3,750,000; Chicago and North Western $12,000,000; Chicago and Rock Island $1,000,000; Milwaukee and St. Paul, $16,000,000; Toledo, Wabash and Western, $12,000,000: a total of the above mentioned roads of one hundred and nine million dollars—about one third of the entire indebtedness of our railroads which, under the decision of the Supreme Court is payable only in gold. The same rule applies with equal force to all State, county and city bonds of this and other States, issued prior to Feb. 25th, 1862. The first fruits of the decision are already found in the following preamble and resolution lately adopted by the Assembly of this State by a very decisive vote of 85 to 20.

Whereas, by a recent decision of the Supreme Court of the United States, all liabilities, includ-

ing those of the State, contracted previous to the passage by Congress of the Legal Tender Act, are payable in coin;

Therefore, resolved, if the State concur, that the principal and interest of the State debt, other than that known as the bounty loan debt, except such parts as are held by the Comptroller or Commissioners of the Canal Fund in trust under the laws of the State, be paid as the same accrues and becomes due, in specie; and that the Comptroller and Commissioners of the Canal Fund respectively from time to time purchase the coin necessary to enable them to comply with this instruction.

The prompt action of this State in recognizing the binding force of the decision establishes a prominent precedent that will go far towards establishing a rule not only for other States, but also for corporations; a matter of much importance considering the disposition manifested in some quarters to continue the payment of anti-war debts in currency.

These are some of the effects naturally resulting from the decision; whether they will be ultimately beneficial or injurious to the interests of the community cannot yet be told. Fortunately for the debtor class, the difference between gold and greenbacks is not now so great as to entail absolute ruin, although in many cases the payment of outstanding obligations in specie, even at a comparatively low premium, will involve serious inconvenience. But though we may dread the results, we have no reason to question the justice and propriety of the decision. It has been rendered, not by the Chief Justice alone, but by the Supreme Court as a court, on abstract principles of constitutional law. That it has been well considered no one can doubt, and it stands as the pronounced law of the land which only the vote of the people can reverse.

Atlantic and Gt. Western Railway.

The Supreme Court of Pennsylvania, sitting at Philadelphia, on the 24th ult., rendered a decision in favor of the proposed lease of the Atlantic and Great Western railway to the Erie Company, and peremptorily dismissed the bill of exceptions that had been filed by the first mortgage bondholders and others opposing; the parties opposed to the lease being ordered to pay costs. The lease was executed accordingly, and the Erie Company is now in possession of the line from Salamanca to Cleveland, and through to Cincinnati.

☞ The Cumberland *Civilian* says that the combination of the Maryland Coal Companies amounts to just this: The Cumberland Coal and Iron Company and the American Coal Company have been merged into the Consolidation Coal Company, and these three companies are hereafter to be operated under the name and title of the last named. Then there has been a consolidation of the Central Company with the Maryland, and these are to be known hereafter as the Maryland Coal Company. It is altogether probable that a consolidation of Midlothian and Johnson Mines will be effected within a short time also.

☞ The Hanover (Pa.) *Citizen* says that the proposition of the individual stockholders of the Wrightsville, York and Gettysburg Railroad Company, to transfer their stock to the Pennsylvania Central has been accepted by that company the transfer to take effect on the 1st of April. The road in question is twelve miles long, extending from Wrightsville to York, and is now worked by the Northern Central Company.

New York Central Railroad.

The following is an abstract of the Report of this company for the year ending September 30, 1869, as made to the State Engineer and Surveyor:

Capital stock		$28,795,000 00
Funded debt		11,398,425 89
Interest certificates		23,036,000 00

Internal revenue	27,907 73	
Dividends	589,473 68	
		958,286 30
Surplus		$1,458 73

Ogdensburg and Lake Champlain R. R.

We learn from the Boston *Journal* that the Ogdensburg and Lake Champlain railroad has been leased to the Vermont Central and Vermont and Canada railroads for the term of twenty years. By the terms of the lease, the Ogdensburg and Lake Champlain railroad company are to receive for the first three years six per cent. per annum, for the three succeeding years seven per cent. and eight per cent. for the remaining fourteen years. This effects a practical consolidation of the roads between Lake Champlain and Boston for business purposes. The Boston and Lowell, Concord, Northern, Vermont Central, Vermont and Canada, and Ogdensburg and Lake Champlain, and it is believed to be the foundation of a permanent prosperity which the antagonistic influences of past years has tended to prevent. Under one head, managed with a single idea for the benefit of all, this consolidation will unquestionably prove an era in the railroad successes of Northern New England. The amount guarantied to the road is to be free of Government tax.

Washington and Ohio Railroad.

A bill authorizing the Alexandria, Loudoun and Hampshire Railroad Company to extend their road, its name being changed to the "Washington and Ohio Railroad," to the Ohio river, through any part of the State of West Virginia, has been passed by the Legislature of that State. The charter, it is understood, is very liberal in its provisions, and it is confidently asserted that the proposed extension will be commenced in a short time and pushed rapidly towards completion.

Vermont and Massachusetts Railroad.

The earnings of this road for the years ending November 30, 1868 and 1869, were:

	1868.	1869.
From passengers	$173,497 36	$201,984 35

Interest paid on debt of Co	.....	39,670 13
Total deficit		$78,435 38

The earnings of the Vermont and Massachusetts Railroad were $616,340 93; and of the Troy and Greenfield Railroad, $51,227 39—total, as above, $567,568 32, an increase over the previous year of $59,471 15.

The indebtedness of the company, as will appear by reference to the annexed statement, on the 30th of November, 1869, was $875,629 81; and the assets, (not including fuel, oil, waste, and stock materials on hand) $167,345 55—showing a balance of indebtedness of $708,284 26. The report says:

In accordance with the Acts of the General Court of Massachusetts and votes of the stockholders (which are given in our report of last year), we have taken a conveyance of the charter of the Turner's Falls Branch Railroad, and constructed a railroad under the same from our road near Greenfield across the Connecticut River, above the outlet of the Deerfield to Turner's Falls. The Turner's Falls Company conveyed to us the right of way over their land, together with a large tract near the Falls, centrally situated, to be used for depot and other purposes. Our purchase of the Railroad Charter was confirmed by Acts of 1869, ch. 238. Under this last Act and the vote of the stockholders, passed July 8th, 1869, we have issued seven per cent. bonds, convertible into stock at the holder's option any time within ten years from their date, to the extent of $174,500, and propose to sell the balance of the $200,000 authorized. No bonds have been issued at less than their par value. The proceeds of these bonds have been applied to building the new branch, and for other purposes of the company.

The serious damage done to the Troy and Greenfield road by the flood of October the directors as regard mainly arising from insufficient construction, and they called upon the State authorities to repair the road. The latter decided, however, that they had no power to do this, and that the matter would be left for legislation. All persons who have examined the road on the part of the State are of opinion that the Commonwealth should bear the main burden of repairs. That the public might not suffer by the possible delays of legislation, the directors have agreed with the Fitchburg Railroad to make these repairs at once at joint cost, and look to the Commonwealth for just remuneration. Under this arrangement the repairs have been nearly completed. The report says:

This road, aside from the flood, has been the source of considerable loss to us thus far; but the business will be constantly increasing. We look for a very much increased passenger traffic during this year, particularly in the through business, which benefits our whole line, and also for a considerable development of the freight and lumber business in the valley of the Deerfield, which hitherto has been very small.

If the freshet had not diminished the business of our two best months of the financial year, we should have shown a very fair sheet; and even without this, while we show an expenditure larger than our receipts, an examination of our accounts will show that our year's business has been good and increasing. In August and September before the flood we gained on the corresponding months of the preceding year $18,680 40. In October and November following we lost $18,050 20. Instead of that loss we had every reason to expect a like gain which would have given us some $36,000 more of income, in addition to the saving of all the losses and outlays which the flood has otherwise cost us. It will be seen that we had a gross gain every month in the year till the flood, amounting in the whole, for the ten months, to $77,521 35, or for the year, taking out the loss of October and November, to $59,471 15.

The company have 15 locomotives, 16 passenger, 10 baggage, mail, express and smoking, and 220 eight-wheel freight cars.

Supreme Court of the United States.

Susan P. Hepburn and Henry H. P. Hepburn, Plaintiffs in Error, vs. Henry A. Griswold. In error to the Court of Appeals of the State of Kentucky. (1). Construed by the plain import of their terms and the manifest intent of the legislature, the statutes of 1862 and 1863, which make United States notes a legal tender in payment of debts, public and private, apply to debts contracted before as well as to debts contracted after enactment. (2). The cases of *Lane County v. Oregon*, *Bronson v. Rodes*, and *Butler v. Horwitz*, in which it was held that, upon a sound construction of those statutes, neither taxes imposed by state legislation nor dues upon contracts for the payment or delivery of coin or bullion are included, by legislative intent, under the description of debts, public and private, are approved and reaffirmed. (3). When a case arises for judicial determination, and the decision depends on the alleged inconsistency of a legislative provision with the Constitution, it is the plain duty of the Supreme Court to compare the act with the fundamental law, and if the former cannot, upon a fair construction, be reconciled with the latter, to give effect to the Constitution, rather than the statute. (3½). There is in the Constitution no express grant of legislative power to make any description of credit currency a legal tender in payment of debts. (4). The words "all laws necessary and proper for carrying into execution" powers expressly granted or vested have, in the Constitution, a sense equivalent to that of the words laws, not absolutely necessary indeed, but appropriate, plainly adapted to constitutional and legitimate ends, which are not prohibited, but consistent with the letter and spirit of the Constitution; laws really calculated to effect objects entrusted to the government. (5). Among means appropriate, plainly adapted, not inconsistent with the spirit of the Constitution, nor prohibited by its terms, the legislature has unrestricted choice; but no power can be derived by implication from any express power to enact laws as means for carrying it into execution unless such laws come within this description. (6). The making of notes or bills of credit a legal tender in payment of pre-existing debts is not a means appropriate, plainly adapted, or really calculated to carry into effect any express power vested in Congress; is inconsistent with the spirit of the Constitution; and is prohibited by the Constitution. (7). The clause in the acts of 1862 and 1863 which makes United States notes a legal tender in payment of all debts, public and private, is, so far as it applies to debts contracted before the passage of those acts, unwarranted by the Constitution. (8). Prior to the 25th of February, 1862, all contracts for the payment of money, not expressly stipulating otherwise, were, in legal effect and universal understanding, contracts for the payment of coin, and, under the Constitution, the parties to such contracts are respectively entitled to demand and bound to pay the sums due, according to their terms, in coin, notwithstanding the clause in that act, and the subsequent acts of like tenor, which make United States notes a legal tender in payment of such debts. Mr. Chief Justice CHASE delivered the opinion of the Court.

The question presented for our determination by the record in this case is whether or not the payee or assignee of a note, made before the 25th of February, 1862, is obliged by law to accept in payment United States notes, equal in nominal amount to the sum due according to its terms, when tendered by the maker or other party bound to pay it.

As this requires, in the first place, a construction of that clause of the first section of the act of Congress passed on that day, which declares the United States notes, the issue of which was authorized by the statute, to be a legal tender in payment of debts.

The entire clause is in these words: "And such notes, herein authorized, shall be receivable in payment of all taxes, internal duties, excises, debts, and demands of every kind due to the United States, except duties on imports, and of all claims and demands against the United States of every kind whatsoever, except for interest upon bonds and notes, which shall be paid in coin; and shall also be lawful money and a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest as aforesaid." (12 U. S. St., 345.)

This clause has already received much consideration here, and this court has held that, upon a sound construction, neither taxes imposed by state legislation, (Lane County v. Oregon, 7 Wall., 71,) nor demands upon contracts which stipulate in terms for the payment or delivery of coin or bullion, (Bronson v. Rodes, 7 Wall., 229; Butler v. Horwitz, 7 Wall., 558,) are included by legislative intention under the description of debts, public and private.

We are now to determine whether this description embraces debts contracted before as well as after the date of the act.

It is an established rule for the construction of statues that the terms employed by the legislature are not to receive an interpretation which conflicts with acknowledged principles of justice and equity, if another sense, consonant with those principles, can be given to them.

But this rule cannot prevail where the intent is clear. Except in the scarcely supposable case where a statute sets at nought the plainest precepts of morality and social obligation, courts must give effect to the clearly ascertained legislative intent if not repugnant to the fundamental law ordained in the Constitution.

Applying the rule just stated to the act under consideration, there appears to be strong reason for construing the word *debts* as having reference only to debts contracted subsequent to the enactment of the law. For no one will question that the United States notes, which the act makes a legal tender in payment, are essentially unlike in

nature, and, being irredeemable in coin, are necessarily unlike in value, to the lawful money intended by parties to contracts for the payment of money made before its passage.

The lawful money then in use and made a legal tender in payment consisted of gold and silver.

The currency in use under the act, and declared by its terms to be lawful money and a legal tender, consists of notes or promises to pay impressed upon paper, prepared in convenient form for circulation, and protected against counterfeiting by suitable devices and penalties.

The former possess intrinsic value, determined by the weight and fineness of the metal; the latter have no intrinsic value, but a purchasing value, determined by the quantity in circulation, by general consent to its currency in payments, and by opinion as to the probability of redemption in coin.

Both derive, in different degrees, a certain additional value from their adaptation to circulation by the form and impress given to them under national authority, and from the acts making them respectively a legal tender.

Contracts for the payment of money, made before the act of 1862, had reference to coined money, and could not be discharged, unless by consent, otherwise than by tender of the sum due in coin. Every such contract, therefore, was, in legal import, a contract for the payment of coin.

There is a well known law of currency, that notes or promises to pay, unless made conveniently and promptly convertible into coin at the will of the holder, can never, except under unusual and abnormal conditions, be at par in circulation with coin.

It is an equally well known law that depreciation of notes must increase with the increase of the quantity put in circulation, and the diminution of confidence in the ability or disposition to redeem. Their appreciation follows the reversal of these conditions. No act making them a legal tender can change materially the operation of these laws.

Their force has been strikingly exemplified in the history of the United States notes. Beginning with a very slight depreciation when first issued, in March, 1862, they sank in July, 1864, to the rate of two dollars and eighty-five cents for a dollar in gold, and then rose until recently a dollar and twenty cents in paper became equal to a gold dollar.

Admitting, then, that prior contracts are within the intention of the act, and assuming that the act is warranted by the Constitution, it follows that the holder of a promissory note, made before the act, for a thousand dollars, payable, as we have just seen, according to the law and according to the intent of the parties, in coin, was required, when depreciation reached its lowest point, to accept in payment a thousand note dollars, although with the thousand coin dollars, due under the contract, he could have purchased on that day two thousand eight hundred and fifty such dollars. Every payment, since the passage of the act, of a note of earlier date, has presented similar, though less striking, features.

Now, it certainly needs no argument to prove that an act, compelling acceptance in satisfaction of any other than stipulated payment, alters arbitrarily the terms of the contract and impairs its obligation, and that the extent of impairment is in the proportion of the inequality of the payment accepted under the constraint of the law to the payment due under the contract.

Nor does it need argument to prove that the practical operation of such an act is contrary to justice and equity.

It follows that no construction which attributes such practical operation to an act of Congress is to be favored, or indeed to be admitted, if any other can be reconciled with the manifest intent of the legislature.

What, then, is that manifest intent? Are we at liberty, upon a fair and reasonable construction of the act, to say that Congress meant that the word "debts" used in the act should not include debts contracted prior to its passage?

In the case of *Bronson v. Rodes* we thought ourselves warranted in holding that this word, as used in the statute, does not include obligations created by express contracts for the payment of gold and silver, whether coined or in bullion. This conclusion rested, however, mainly on the terms of the act, which not only allow, but require payments in coin by or to the government, and maybe fairly considered, independently of considerations belonging to the law of contracts for the delivery of specified articles, as sanctioning special private contracts for like payments; without which, indeed, the provisions relating to government payments could hardly have practical effect.

This consideration, however, does not apply to the matter now before us. There is nothing in the terms of the act which looks to any difference in its operation on different descriptions of debts payable generally in money—that is to say, in dollars and parts of a dollar. These terms, on the contrary, in their obvious import, include equally all debts not specially expressed to be payable in gold or silver, whether arising under past contracts already due, or arising under such contracts and to become due at a future day, or arising and becoming due under subsequent contracts. A strict and literal construction indeed would, as suggested by Mr. Justice Story, (1 Story on Const., §921.) in respect to the same word used in the Constitution, limit the word "debts" to *debts existing*; and if this construction cannot be excepted because the limitation sanctioned by it cannot be reconciled with the obvious scope and purpose of the act, it is certainly conclusive against any interpretation which will exclude existing debts from its operation.

The same conclusion results from the exception of interest on loans and duties on imports from the effect of the legal tender clause. This exception affords an irresistible implication that no description of debts, whenever contracted, can be withdrawn from the effect of the act if not included within the terms or the reasonable intent of the exception.

As it is worthy of observation in this connection that in all the debates to which the act gave occasion in Congress, no suggestion was ever made that the legal tender clause did not apply as fully to contracts made before as to contracts made after its passage.

These considerations seem to us conclusive. We do not think ourselves at liberty, therefore, to say that Congress did not intend to make the notes authorized by it a legal tender in payment of debts contracted before the passage of the act.

We are thus brought to the question whether Congress has power to make notes issued under its authority a legal tender in payment of debts which, when contracted, were payable by law in gold and silver coin.

The delicacy and importance of the question has not been overstated in the argument. This court always approaches the consideration of questions of this nature reluctantly; and its constant rule of decision has been, and is, that acts of Congress must be regarded as constitutional unless clearly shown to be otherwise.

But the Constitution is the fundamental law of the United States. By it the people have created a government, defined its powers, prescribed their limits, distributed them among the different departments, and directed, in general, the manner of their exercise.

No department of the government has any other powers than those thus delegated to it by the people. All the legislative power granted by the Constitution belongs to Congress; but it has no legislative power which is not thus granted. And the same observation is equally true in its application to the executive and judicial powers granted respectively to the President and the courts. All these powers differ in kind, but not in source or in limitation. They all arise from the Constitution and are limited by its terms.

It is the function of the judiciary to interpret and apply the law to cases between parties as they arise for judgment. It can only declare what the law is, and enforce, by proper process, the law thus declared.

But, in ascertaining the respective rights of parties, it frequently becomes necessary to consult the Constitution. For there can be no law inconsistent with the fundamental law. No enactment not in pursuance of the authority conferred by it can create obligations or confer rights. For such is the express declaration of the Constitution itself in these words:

"The Constitution, and the laws of the United States which shall be *made in pursuance thereof*, and all treaties made, or which shall be made under the authority of the United States, shall be the supreme law of the land; and the judges of every state shall be bound thereby, anything in the constitution or laws of any state to the contrary notwithstanding."

Not every act of Congress then, is to be regarded as the supreme law of the land; nor is it by every act of Congress that the judges are bound. This character and this force belong only to such acts as are "made in pursuance of the Constitution."

When, therefore, a case arises for judicial determination, and the decision depends on the alleged inconsistency of a legislative provision with the fundamental law, it is the plain duty of the court to compare the act with the Constitution, and if the former cannot, upon a fair construction, be reconciled with the latter, to give effect to the Constitution rather than the statute. This seems so plain that it is impossible to make it plainer by argument. If it be otherwise the Constitution is not the supreme law; it is neither necessary or useful, in any case, to inquire whether or not any act of Congress was passed in pursuance of it; and the oath which every member of this court is required to take, that he "will administer justice without respect to persons, and do equal right to the poor and the rich, and faithfully perform the duties incumbent upon him to the best of his ability and understanding, agreeably to the Constitution and laws of the United States," becomes an idle and unmeaning form.

The case before us is one of private right. The plaintiff in the court below sought to recover of the defendants a certain sum expressed on the face of a promissory note. The defendants insisted on the right, under the act of February 25, 1862, to acquit themselves of their obligation by tendering in payment a sum nominally equal in United States notes. But the note had been executed before the passage of the act, and the plaintiff insisted on his right under the Constitution to be paid the amount due in gold and silver. And it has not been, and cannot be, denied that the plaintiff was entitled to judgment according to his claim, unless bound by a constitutional law to accept the notes as coin.

Thus two questions were directly presented: Were the defendants relieved by the act from the obligation assumed in the contract? Could the plaintiff be compelled, by a judgment of the court, to receive in payment a currency of different nature and value from that which was in the contemplation of the parties when the contract was made.

The court of appeals resolved both questions in the negative, and the defendants in the original suit, seek the reversal of that judgment by writ of error.

It becomes our duty, therefore, to determine whether the act of February 25th, 1862, so far as it makes United States notes a legal tender in payment of debts contracted prior to its passage, is constitutional and valid or otherwise. Under a deep sense of our obligation to perform this duty to the best of our ability and understanding, we shall proceed to dispose of the case presented by the record.

We have already said, and it is generally, if not universally, conceded, that the government of

the United States is one of limited powers, and that no department possesses any authority not granted by the Constitution.

It is not necessary, however, in order to prove the existence of a particular authority to show a particular and express grant. The design of the Constitution was to establish a government competent to the direction and administration of the affairs of a great nation, and, at the same time, to mark, by sufficiently definite lines, the sphere of its operations. To this end it was needful only to make express grants of general powers, coupled with a further grant of such incidental and auxiliary powers as might be required for the exercise of the powers expressly granted. These powers are necessarily extensive. It has been found, indeed, in the practical administration of the government, that a very large part, if not the largest part, of its functions have been performed in the exercise of powers thus implied.

But the extension of power by implication was regarded with some apprehension by the wise men who framed, and by the intelligent citizens who adopted, the Constitution. This apprehension is manifest in the terms by which the grant of incidental and auxiliary powers is made. All powers of this nature are included under the description of "power to make all laws necessary and proper for carrying into execution the powers expressly granted to Congress or vested by the Constitution in the government or in any of its departments or officers."

The same apprehension is equally apparent in the tenth article of the amendments, which declares that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the states or the people."

We do not mean to say that either of these constitutional provisions is to be taken as restricting any exercise of power fairly warranted by legitimate derivation from one of the enumerated or express powers. The first was undoubtedly introduced to exclude all doubt in respect to the existence of implied powers; while the words "necessary and proper" were intended to have a "sense," to use the words of Mr. Justice Story, "at once admonitory and directory," and to require that the means used in the execution of an express power "should be bona fide, appropriate to the end," (2 Story on the Const., p. 142, §1253.) The second provision was intended to have a like admonitory and directory sense, and to restrain the limited government established under the Constitution from the exercise of powers not clearly delegated or derived by just inference from powers so delegated.

It has not been maintained in argument, nor, indeed, would any one, however slightly conversant with constitutional law, think of maintaining that there is in the Constitution any express grant of legislative power to make any description of credit currency a legal tender in payment of debts.

We must inquire then whether this can be done in the exercise of an implied power.

The rule for determining whether a legislative enactment can be supported as an exercise of an implied power was stated by Chief Justice Marshall, speaking for the whole court, in the case of *McCullough vs, The State of Maryland;* (4 Wheat., 421.) and the statement then made has ever since been accepted as a correct exposition of the Constitution. His words were these: "Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly adapted to that end, which are not prohibited, but consistent with the letter and spirit of the Constitution, are constitutional." And in another part of the same opinion the practical application of this rule was thus illustrated: "Should Congress, in the execution of its powers, adopt measures which are prohibited by the Constitution, or should Congress, under the pretext of executing its powers, pass laws for the accomplishment of objects not entrusted to the government, it would be the painful duty of this tribunal, should a case requiring such a decision come before it, to say that such an act was not the law of the land. But where the law is not prohibited, and is really calculated to effect any of the objects entrusted to the government, to undertake here to enquire into the degree of its necessity would be to pass the line which circumscribes the judicial department, and tread on legislative ground." (4 Wheat., 423.)

It must be taken then as finally settled, so far as judicial decisions can settle anything, that the words "all laws necessary and proper for carrying into execution" powers expressly granted or vested, have in the Constitution, a sense equivalent to that of the words, laws, not absolutely necessary indeed, but appropriate, plainly adapted to constitutional and legitimate laws; laws not prohibited, but consistent with the letter and spirit of the Constitution; laws really calculated to effect objects entrusted to the government.

The question before us, then, resolves itself into this: Is the clause which makes United States notes a legal tender for debts contracted prior to its enactment, a law of the description stated in the rule?

It is not doubted that the power to establish a standard of value by which all other values may be measured, or in other words, to determine what shall be lawful money and a legal tender, is in its nature, and of necessity, a governmental power. It is in all countries exercised by the government. In the United States, so far as it relates to the precious metals, it is vested in Congress by the grant of the power to coin money. But can a power to impart these qualities to notes, or promises to pay money, when offered in discharge of pre-existing debts, be derived from the coinage power, or from other power expressly given?

It is certainly not the same power as the power to coin money. Nor is it in any reasonable or satisfactory sense an appropriate or plainly adapted means to the exercise of that power. Nor is there more reason for saying that it is implied in, or incidental to, the power to regulate the value of coined money of the United States, or of foreign coins. This power of regulation is a power to determine the weight, purity, form, impression, and denomination of the several coins, and their relation to each other, and the relations of foreign coins to the monetary unit of the United States.

Nor is the power to make notes a legal tender the same as the power to issue notes to be used as currency. The old Congress, under the Articles of Confederation, was clothed by express grant with the power to emit bills of credit, which are in fact notes for circulation as currency; and yet that Congress was not clothed with the power to make these bills a legal tender in payment. And this court has recently held that the Congress, under the Constitution, possesses, as incidental to other powers, the same power as the old Congress to emit bills or notes; but it was expressly declared at the same time that this decision concluded nothing on the question of legal tender. Indeed, we are not aware that it has ever been claimed that the power to issue bills or notes has any identity with the power to make them a legal tender. On the contrary, the whole history of the country refutes that notion. The States have always been held to possess the power to authorize and regulate the issue of bills for circulation by banks or individuals, subject, as has been lately determined, to the control of Congress, for the purpose of establishing and securing a national currency; and yet the States are expressly prohibited by the Constitution from making anything but gold and silver coin a legal tender. This seems decisive on the point that the power to issue notes and the power to make them a legal tender are not the same power, and that they have no necessary connection with each other.

But it has been maintained in argument that the power to make United States notes a legal tender in payment of all debts is a means appropriate and plainly adapted to the execution of the power to carry on war, of the power to regulate commerce, and of the power to borrow money. If it is, and is not prohibited, nor inconsistent with the letter or spirit of the Constitution, then the act which makes them such legal tender must be held to be constitutional.

Let us, then, first inquire whether it is an appropriate and plainly adapted means for carrying on war? The affirmative argument may be thus stated: Congress has power to declare and provide for carrying on war; Congress has also power to emit bills of credit, or circulating notes receivable for government dues and payable, so far at least as parties are willing to receive them, in discharge of government obligations; it will facilitate the use of such notes in disbursements to make them a legal tender in payment of existing debts; therefore Congress may make such notes a legal tender.

It is difficult to say to what express power the authority to make notes a legal tender in payment of pre-existing debts may not be upheld as incidental, upon the principles of this argument. Is there any power which does not involve the use of money? And is there any doubt that Congress may issue and use bills of credit as money in the execution of any power? The power to establish post offices and post roads, for example, involves the collection and disbursements of a great revenue. Is not the power to make notes a legal tender as clearly incidental to this power as to the war power?

The answer to this question does not appear to us doubtful. The argument, therefore, seems to prove too much. It carries the doctrine of implied powers very far beyond any extent hitherto given to it. It asserts that whatever in any degree promotes an end within the scope of a general power, whether, in the correct sense of the word, appropriate or not, may be done in the exercise of an implied power.

Can this proposition be maintained?

It is said that this is not a question for the court deciding a cause, but for Congress exercising the power. But the decisive answer to this is that the admission of a legislative power to determine finally what powers have the described relation as means to the execution of other powers plainly granted, and, then, to exercise absolutely and without liability to question, in cases involving private rights, the powers thus determined to have that relation, would completely change the nature of American government. It would convert the government, which the people ordained as a government of limited powers, into a government of unlimited powers. It would confuse the boundaries which separate the executive and judicial from the legislative authority. It would obliterate every criterion which this court, speaking through the venerated Chief Justice in the case already cited, established for the determination of the question whether legislative acts are constitutional or unconstitutional.

Undoubtedly among means appropriate, plainly adapted, really calculated, the legislature has unrestricted choice. But there can be no implied power to use means not within the description.

Now, then, let it be considered what has actually been done in the provision of a national currency. In July and August, 1861, and February, 1862, the issue of sixty millions of dollars in United States notes, payable on demand, was authorized. (12 U. S. St., 259, 313, and 338.) They were made receivable in payments, but were not declared a legal tender until March, 1865, (12 U. S. St., 370,) when the amount in circulation had been greatly reduced by receipt and cancelation. In 1862 and 1863 (12 U. S. St., 345, 532, and 709,) the issue of four hundred and fifty millions in United States notes, payable not on demand, but, in effect, at the convenience of the government, was authorized, subject to certain restrictions as to fifty millions. These notes were made receivable for the bonds of the national loans, for all debts due to or from the United States except duties on imports and interest on the public debt, and were also declared a legal tender. In March, 1863, (12 U. S. St., 711,) the issue of

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 5, 1870.

Stock Exchange and Money Market.

The Money Market has shown rather more activity, since our last. The speculative demand has been more animated, and there has been a more urgent call for accommodation from mercantile borrowers. Call loans have been quoted firmer at 5@6, and prime to good discounts at 7@8½ per cent. per annum, as the prevailing rates. The city banks have been losing ground in their averages, having reported a further decrease of over 1½ millions in their specie reserve, nearly 1⅜ millions in their legal tender average, and over a million of their deposit line. They have added about 1⅛ millions to their loan and discount average, and $126,534 to their circulation. The U. S. Sub-Treasury held on Wednesday morning a currency balance of less than five millions, against 7⅝ millions the preceding Wednesday. The general balance on Wednesday stood at $84,198,077, against $85,667,190 a week earlier. The city bank exchanges have been on a rising scale, having averaged nearly 99 millions the first two business days of the current week, against less than 92 millions through the preceding week. The country banks are now beginning to draw freely on the deposits to their credit at this point, and a rather extensive outflow of currency is looked for, through the spring months, which will tend to stiffen loan and discount rates in the local market, as the floating supply of money diminishes. The currency disbursements of the U. S. Treasury, this month will be large, chiefly in the half yearly pension account.

The specie reserve of the city banks according to the latest return is $35,694,289, against $20,832,603 same time last year. The city bank deposits are now $211,132,943, against $185,216,175 week ending Feb. 27, 1869. The legal tender reserve amounts to $53,771,824, against $50,835,054 same time last year. The circulation now stands at $33,820,905, against $24,247,981 same time last year. The loans are now $268,486,642, against $261,371,897 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $91,917,000 a day, against a daily average of $85,191,978 the preceding week, and $85,140,471 the week ending with Feb. 13, 1870. The current week's exchanges average about 99⅞ millions a day. The city banks, last week, reported a further loss of $1,507,098 of specie, $1,055,939 of deposits, and $1,362,242 of legal tender notes. They increased their loans, $1,158,274; and their circulation, $126,534.

National Bank notes to the amount of $293,830 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $321,395,911, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $21,721,557, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,674,354. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,898,350; and for the public deposits, $17,808,500—making a total of $360,206,850. The Treasury Department last week redeemed and destroyed $326,969 of worn and mutilated fractional currency, and issued $167,000 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 26, were $3,886,879 in coin, (including $3,117,000 from customs duties,) and $2,435,512 in currency; payments, $3,007,650 in coin, (including $1,512,564 of coin interest,) and $4,976,343 in currency; balance at the close of the week, $88,495,082 (including $75,950,920, of coin, and $5,213,060 of currency,) against $82,963,107 at the close of the preceding week, showing an increase of $531,975. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $512,301 in coin, (including $482,094 from customs,) and $667,522 in currency; payments, $94,349 in coin, (including $71,489 of coin interest,) and $667,522 in currency. On Tuesday, receipts, $661,959 in coin (including $515,618 from customs), and $255,006 in currency payments, $1,577,877 in coin (including $1,550,754 of coin interest; and $231,033 of currency. The balance at the close of business on Tuesday stood at $84,198,077, (including $4,996,570 of currency, and $75,454,955 of coin,) against $85,667,190 a week previous; and $82,778,916 on Feb. 15th, 1870. The aggregate re-

ceipts of the office in February were $38,237,062, including $11,951,925 from customs; aggregate payments, $35,331,006 including $1,749,000 of coin interest; balance at the close of the month, $83,673,026, against $80,766,970 at the close of January.

The U. S. Sub Treasurer retired, last week, $2,922,574 of coin certificates, received for customs.

Government revenues keep up to a fair average. In February, the customs at this port yielded nearly 12 millions, or within a fourth of a million of the customs in February 1869. The excises, during the week yielded about 3⅝ millions; customs at the port of New York, $3,061,574, and at the outports about $1,020,000 (in coin) more, making the grand total income for the week equal to about $8,318,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 111½ millions.

The receipts from internal revenue for the month of February, were $12,112,370 45.

Gold has been unusually active, since our last. The speculative dealings have been very heavy. The offerings of coin have been extensive, and the price has been depressed to 115. The range of the week was from 115@117¾. The closing quotation on Wednesday was 115¾. The customs inquiry has been fair, but the export call has been light. Government disbursed in February, 1¾ millions of coin interest; and thus far in March, over 2½ millions, the latter chiefly on account of the Ten-Forty Loan. It was erroneously announced on Monday that Government would sell three millions of coin in March. It will dispose of only two millions, one million on the 9th and another on the 23d inst. The terms of the sale will be the same as in January and February.

The coin interest payments of the Sub-Treasury on Wednesday were $344,374.

The customs demand for Gold last week, averaged $518,617 a day; thus far, this week, it has averaged $498,853 a day, or equal to a weekly aggregate of $2,993,118. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $214,597; and since Jan. 1 1870, $3,051,570, against $2,021,640 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $86,271,303, against $80,725,677 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to Feb. 18th, was $859,518, against $802,333 same time last year.

The exports of specie, from this port, last week, were $521,782, against $1,093,967 same week last year; total, since July 1, 1869, $21,528,197, against $28,255,520 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,512,564, and since July 1, 1869, $64,243,737, against $63,158,346 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to Feb. 18, were $5,252,424, against $5,576,802 same time last year.

The movement in foreign exchange has been on a limited scale, and rates have been weak and irregular. Bankers' prime sixty day bills on London closed heavily on Wednesday at 108½@108¾, and on Paris to 5.23¾@5.18¼; sight bills on London to 109⅛@109⅜, and on Paris to 5.17½c.@5.16¼. The offerings of produce bills have been to a full average. The week's exports of domestic produce have been to the currency value of $3,524,928, making the total since July 1, 1869, $133,363,625, against $106,478,676 same time preceding fiscal year.

Government securities have been in moderate demand at reduced prices. The severe decline in gold operated against values, but far less injuriously than had been anticipated in some quarters. The offerings of bonds have not been large at the prevailing rates, though towards the close rather more desire to realize was manifested. The foreign advices have been generally very favorable to the national credit. Government will purchase five millions of Five-twenties in March, as follows: Wednesday, March 2—One million dollars (Sinking Fund); Thursday, March 10 — One million dollars (Special Purchase); Wednesday, March 16—One million dollars (Sinking Fund); Thursday, March 24—One million dollars (Special Purchase); Wednesday, March 30—One million dollars (Sinking Fund). The Department reserves the right at its option to accept offers of bonds in excess of one million. On Wednesday, Government bought in a million of Five-twenties at from 110.57@110.75, (including $855,000 from Messrs. Fisk & Hatch at 110.75) out of an aggregate offering of $4,026,700.

The public debt exhibit for March 1, shows a further decrease of $6,484,812 since the 1st of February.

U. S. sixes of 1881 closed here at 116¼@116½; U. S. Five-twenties of 1862, 113¾@114; U. S. Five twenties of 1864 at 112¾@112⅞; U. S. Five-twenties of 1865 at 113@113¼; U. S. Five-twenties of 1865, consolidated, 111½@111¾; U. S. Five-twenties of 1867, 112@112⅛; U. S. Five-twenties of 1868, 112@112⅛; U. S. Ten-forties at 108⅜@108½, ex the March coupon; U. S. Six per cent. currency bonds, 111⅛@111¼.

State Bonds have shown more activity, and toward the close, renewed buoyancy in values.

Railway bonds and mortgages have been fairly active at well maintained prices. The bonds of the new Chesapeake & Ohio Loan, offered by Messrs. Fisk & Hatch, have been in very good request for investment purposes, at 90 per cent and interest. About two millions of the Loans have been already marketed.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 16.	Feb. 23.	March 2.
Consols	92¾	92½	92¾
U. S. 5-20's of 1862	87¾	89¼	90⅛

At. and Gt. West	29½	....	28½

Railway and miscellaneous stocks have been quite freely dealt in, but prices have been generally much depressed. Toward the close, a more confident demand was noted, and the market closed with reviving firmness and buoyancy.

General business has shown less animation. Breadstuffs and provisions have favored buyers, in most instances. Cotton has declined materially, under reports of very liberal receipts, and the fall in gold. Middling upland cotton closed heavily on Wednesday at 22⅞cts. per lb. The stock of cotton now here is given at about 80,000 bales. The receipts at the port this week, have averaged about 3,100 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,079,000 bales, against 1,610,000 bales in 1868–'9; exports, same time 1,193,150 bales, against 865,200 bales same time in 1868–'9; stock on hand at latest dates, 531,000 bales, against 384,550 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 1,974 pkgs., against 2,286 pkgs., same time in 1869. From Boston, 573 pkgs., in 1870, against 2,979 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in less demand, at from 10@17½c., per lb.; week's receipts, 6,224. Milch cows continue quiet, at $40@$100 each, receipts, 141. Veal calves have been in less request at from 8½@12½ c. per lb.; receipts, 625. Sheep and lambs in moderate demand at from 5@8c., and 6@8½c. per lb.; receipts, 21,868. Swine are more quiet at 9⅛@9⅞ c. per lb., all live weight; receipts, 12,550.

Foreign goods have been held with comparative firmness, though the dealings have been moderate. The week's imports of foreign dry goods were to the specie value of $3,480,389; and of foreign merchandise, $2,824,797, making a total of $6,305,186, against $4,762,501 same week last year. The marketed foreign dry goods have been to the specie value of $3,442,217.

Ocean freights have been generally dull and heavy. For Liverpool we quote flour at 1s. 3d. by sail, and 1s. 3@1s. 6d. by steamer, per bbl.; grain nominally at 2d.@2½d. by sail, and 2d. by steamer, per bushel; cotton at $\frac{5}{32}$d.@$\frac{3}{16}$d. by sail, and ¼d. by steamer per lb.; and heavy goods 10s.@25s. by sail, and 11s. 3d.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 455.

The balance in the Sub-Treasury on Wednesday was $84,537,875 80.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 1st, and since the beginning of the year:

	1869.	1870.
For the week	$2,108,676	$3,524,928
Previously reported	23,926,744	23,592,901
Since Jan. 1	$26,035,420	$27,117,829

The imports for the week ending February 26, and since the beginning of the year, have been as follows:

FOREIGN IMPORTS AT NEW YORK.

	1869.	1870.
Dry goods	$1,860,426	$3,480,389
Gen. merchandise	2,902,075	2,824,797
Total for the week	$4,762,501	$6,305,186
Previously reported	36,596,362	35,280,418
Since January 1	$41,358,863	$41,585,604

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Work on the Frederick and Pennsylvania Line Railroad is said to be progressing favorably, and the grading is expected to be completed by June next.

☞ The Portland, Saco and Portsmouth Railroad Company pay a special dividend of $12 per share, March 23.

Albany and Susquehanna Railroad.

The Albany *Evening Journal* says that the Delaware and Hudson Canal Company have taken a perpetual lease of the Albany and Susquehanna Railroad. By the terms of the contract, the lessees are to pay an interest of 7 per cent. upon $7,000,000, made up as follows:

On paid up stock	$2,500,000
On the Albany City bonds	1,000,000
On first mortgage bonds	1,000,000
On second "	2,000,000
On equipment bonds	500,000
	$7,000,000

To meet this interest will require an annual outlay of $490,000.

The Delaware and Hudson Company assume the interest on all the bonds from the 1st of March ensuing; but the interest on $2,500,000 of stock is not to be assumed until the 1st day of January next.

The 9,500 shares of subscribed stock, upon which 10 per cent. has been paid, is to be paid in full as the necessities of the road may require. The shares will only bear interest as, and to the extent that, they are paid for.

The road will continue to be run under its present management, the lessees, of course, having the power to make changes when and as they please, in the employes. The stockholders will continue to control the directorship of the road.

All existing contracts with other railroads and coal companies, to be carried out, in good faith, by the lessees.

The lessees have given the directors of the road, most positive assurances that the interests of Albany, and of the people living on the line of the road, shall be scrupulously regarded; and that nothing shall be done to make these local interests regret the arrangements which have been entered into.

Allegheny Valley Railroad.

The earnings, expenses, etc., of this road for the years ending January 31, 1869 and 1870, were as follows:

	1869.	1870.
Gross earnings	$928,083 37	$1,204,777 02
Expenses	682,863 69	693,852 34
Net earnings	$245,219 68	$510,924 68

Compared with the previous year, the gross earnings show an increase of $276,693 65, or 29.8 per cent.; with an increase in expenses of only $10,988 65, or 1.6 per cent—making the increase in net earnings, $265,705, or 108.4 per cent.

☞ The Commissioners of the Sinking Fund of the State of Pennsylvania have decided that "inasmuch as the recent decision of the Supreme Court of the United States on the question of legal tenders was concurred in by only three judges out of five, in a court composed of seven judges, and the legislation of the State only authorized the payment of her indebtedness in what is known as the legal tender currency of the United States, it would not be advisable for the State Treasurer to make any change in the present mode of paying the obligations of the commonwealth."

☞ The stockholders of the Western Maryland Railroad Company have accepted the ordinance passed by the Baltimore City Council, and ratified by the Legislature of the State of Maryland, endorsing $1,400,000 of the bonds of said company, to secure its completion from Baltimore to Williamsport.

Continued from page 261.

notes for parts of a dollar was authorized to an amount not exceeding fifty millions of dollars. These notes were not declared a legal tender, but were made redeemable under regulations to be prescribed by the Secretary of the Treasury. In February, 1863, (12 U. S. St., 669.) the issue of three hundred millions of dollars in notes of the national banking associations was authorized. These notes were made receivable to the same extent as United States notes, and provision was made to secure their redemption, but they were not made a legal tender.

These several descriptions of notes have since constituted, under the various acts of Congress, the common currency of the United States. The notes which were not declared a legal tender have circulated with those which were so declared without unfavorable discrimination.

It may be added as a part of the history that other issues, bearing interest at various rates, were authorized and made a legal tender, except in redemption of bank notes, for face amount exclusive of interest. Such were the one and two years five per cent notes and three years compound interest notes. (13 U. S. St., 218, 425.) These notes never entered largely or permanently into the circulation; and there is no reason to think that their utility was increased or diminished by the act which declared them a legal tender for face amount. They need not be further considered here. They serve only to illustrate the tendency remarked by all who have investigated the subject of paper money, to increase the volume of irredeemable issues, and to extend indefinitely the application of the quality of legal tender. That it was carried no farther during the recent civil war, and has been carried no farther since, is due to circumstances, the consideration of which does not belong to this discussion.

We recur, then, to the question under consideration. No one questions the general constitutionality, and not very many, perhaps, the general expediency of the legislation by which a note currency has been authorized in recent years. The doubt is as to the power to declare a particular class of these notes to be a legal tender in payment of pre-existing debts.

The only ground upon which this power is asserted is, not that the issue of notes was an appropriate and plainly adapted means for carrying on the war, for that is admitted; but that the making of them a legal tender to the extent mentioned was such a means.

Now, we have seen that of all the notes issued those not declared a legal tender at all constituted a very large proportion, and that they circulated freely and without discount.

It may be said that their equality in circulation and credit was due to the provision made by law for the redemption of this paper in legal tender notes. But this provision, if at all useful in this respect, was of trifling importance compared with that which made them receivable for government dues. All modern history testifies that, in time of war especially, when taxes are augmented, large loans negotiated, and heavy disbursements made, notes issued by the authority of the government, and made receivable for the dues of the government, always obtain at first a ready circulation; and even when not redeemable in coin, on demand, are as little and usually less subject to depreciation than any other description of notes, for the redemption of which no better provision is made. And the history of the legislation under consideration is that it was upon this quality of receivability, and not upon the quality of legal tender, that reliance for circulation was originally placed; for the receivability clause appears to have been in the original draft of the bill, while the legal tender clause seems to have been introduced at a later stage of its progress.

These facts certainly are not without weight as evidence that all the useful purposes of the notes would have been fully answered without making them a legal tender for pre-existing debts.

It is denied, indeed, by eminent writers, that the quality of legal tender adds anything at all to the credit or usefulness of government notes. They insist, on the contrary, that it impairs both.

However this may be, it must be remembered that it is as a means to an end to be attained by the action of the government that the implied power of making notes a legal tender in all payments is claimed under the Constitution. Now, how far is the government helped by this means? Certainly it cannot obtain new supplies or services at a cheaper rate, for no one will take the notes for more than they are worth at the time of the new contract. The price will rise in the ratio of the depreciation, and this is all that could happen if the notes were not made a legal tender. But it may be said that the depreciation will be less to him who takes them from the government if the government will pledge to him its power to compel his creditors to receive them at par in payments. This is, as we have seen, by no means certain. If the quantity issued be excessive, and redemption uncertain and remote, great depreciation will take place; if, on the other hand, the quantity is only adequate to the demands of business, and confidence in early redemption is strong, the notes will circulate freely, whether made a legal tender or not.

But if it be admitted that some increase of availability is derived from making the notes a legal tender under new contracts, it by no means follows that any appreciable advantage is gained by compelling creditors to receive them in satisfaction of pre-existing debts. And there is abundant evidence that whatever benefit is possible from that compulsion to some individuals or to the government is far more than outweighed by the losses of property, the derangement of business, the fluctuations of currency and values, and the increase of prices to the people and the government, and the long train of evils which flow from the use of irredeemable paper money. It is true that these evils are not to be attributed altogether to making it a legal tender. But this increases these evils. It certainly widens their extent and protracts their continuance.

We are unable to persuade ourselves that an expedient of this sort is an appropriate and plainly adapted means for the execution of the power to declare and carry on war. If it adds nothing to the utility of the notes it cannot be upheld as a means to the end in furtherance of which the notes are issued. Nor can it, in our judgment, be upheld as such if, while facilitating in some degree the circulation of the notes, it debases and injures the currency in its proper use to a much greater degree. And these considerations seem to us equally applicable to the powers to regulate commerce and to borrow money. Both powers necessarily involve the use of money by the people and by the government, but neither, as we think, carries with it as an appropriate and plainly adapted means to its exercise, the power of making circulating notes a legal tender in payment of pre-existing debts.

But there is another view, which seems to us decisive, to whatever express power the supposed implied power in question may be referred. In the rule stated by Chief Justice Marshall the words appropriate, plainly adapted, really calculated, are qualified by the limitation that the means must be not prohibited, but consistent with the letter and spirit of the Constitution. Nothing so prohibited or inconsistent can be regarded as appropriate, or plainly adapted, or really calculated means to any end.

Let us inquire, then, first, whether making bills of credit a legal tender, to the extent indicated, is consistent with the spirit of the Constitution.

Among the great cardinal principles of that instrument no one is more conspicuous or more venerable than the establishment of justice. And what was intended by the establishment of justice in the minds of the people who ordained it is, happily, not a matter of disputation. It is not left to inference or conjecture, especially in its relations to contracts.

When the Constitution was undergoing discussion in the convention, the Congress of the confederation was engaged in the consideration of the ordinance for the government of the territory northwest of the Ohio, the only territory subject at that time to its regulation and control. By this ordinance certain fundamental articles of compact were established between the original states and the people and states of the territory, for the purpose, to use its own language, "of extending the fundamental principles of civil and religious liberty, whereon these republics," (the states united under the confederation), "their laws, and constitutions are erected." Among these fundamental principles was this: "And in the just preservation of rights and property it is understood and declared that no law ought ever to be made, or have force in the said territory, that shall in any manner whatever interfere with or affect private contracts or engagements *bona fide* and without fraud previously formed."

The same principle found more condensed expression in that most valuable provision of the Constitution of the United States, ever recognized as an efficient safeguard against injustice, that "no state shall pass any law impairing the obligation of contracts."

It is true that this prohibition is not applied in terms to the government of the United States. Congress has express power to enact bankrupt laws, and we do not say that a law made in the execution of any other express power, which incidentally only, impairs the obligation of a contract, can be held to be unconstitutional for that reason.

But we think it clear that those who framed and those who adopted the Constitution intended that the spirit of this prohibition should pervade the entire body of legislation, and that the justice which the Constitution was ordained to establish was not thought by them to be compatible with legislation of an opposite tendency. In other words, we cannot doubt that a law not made in pursuance of an express power, which necessarily and in its direct operation impairs the obligation of contracts, is inconsistent with the spirit of the Constitution.

Another provision, found in the fifth amendment, must be considered in this connection. We refer to that which ordains that private property shall not be taken for public use without compensation. This provision is kindred in spirit to that which forbids legislation impairing the obligation of contracts; but, unlike that, it is addressed directly and solely to the national government. It does not, in terms, prohibit legislation which appropriates the private property of one class of citizens to the use of another class; but if such property cannot be taken for the benefit of all, without compensation, it is difficult to understand how it can be so taken for the benefit of a part without violating the spirit of the prohibition.

But there is another provision in the same amendment, which, in our judgment, cannot have its full and intended effect unless construed as a direct prohibition of the legislation which we have been considering. It is that which declares that "no person shall be deprived of life, liberty, or property without due process of law."

It is not doubted that all the provisions of this amendment operate directly in limitation and restraint of the legislative powers conferred by the Constitution. The only question is whether an act which compels all those who hold contracts for the payment of gold and silver money to accept in payment a currency of inferior value deprives such persons of property without due process of law.

It is quite clear that, whatever may be the operation of such an act, due process of law makes no part of it. Does it deprive any person of property?

A very large proportion of the property of civilized men exists in the form of contracts. These contracts almost invariably stipulate for the payment of money. And we have already seen that contracts in the United States, prior to the act under consideration, for the payment of money

were contracts to pay the sums specified in gold and silver coin. And it is beyond doubt that the holders of these contracts were and are as fully entitled to the protection of this constitutional provision as the holders of any other description of property.

But it may be said that the holders of no description of property are protected by it from legislation which incidentally only impairs its value. And it may be urged in illustration that the holders of stock in a turnpike, a bridge, or a manufacturing corporation, or an insurance company, or a bank, cannot invoke its protection against legislation which, by authorizing similar works or corporations, reduces its price in the market. But all this does not appear to meet the real difficulty. In the cases mentioned the injury is purely contingent and incidental. In the case we are considering it is direct and inevitable.

If in the cases mentioned the holders of the stock were required by law to convey it on demand to any one who should think fit to offer half its value for it, the analogy would be more obvious. No one probably could be found to contend that an act enforcing the acceptance of fifty or seventy-five acres of land in satisfaction of a contract to convey a hundred would not come within the prohibition against arbitrary privation of property.

We confess ourselves unable to perceive any solid distinction between such an act and an act compelling all citizens to accept, in satisfaction of all contracts for money, half or three-quarters or any other proportion less than the whole of the value actually due, according to their terms. It is difficult to conceive what act would take private property without process of law if such an act would not.

We are obliged to conclude that an act making mere promises to pay dollars a legal tender in payment of debts previously contracted, is not a means appropriate, plainly adapted, really calculated to carry into effect any express power vested in Congress; that such an act is inconsistent with the spirit of the constitution; and that it is prohibited by the Constitution.

It is not surprising that amid the tumult of the late civil war, and under the influence of apprehensions for the safety of the republic almost universal, different views, never before entertained by American statesmen or jurists, were adopted by many. The time was not favorable to considerate reflection upon the constitutional limits of legislative or executive authority. If power was assumed from patriotic motives, the assumption found ready justification in patriotic hearts. Many who doubted yielded their doubts; many who did not doubt were silent. Some who were strongly averse to making government notes a legal tender felt themselves constrained to acquiesce in the views of the advocates of the measure. Not a few who then insisted upon its necessity, or acquiesced in that view, have, since the return of peace, and under the influence of the calmer time, reconsidered their conclusions, and now concur in those which we have just announced. These conclusions seem to us to be fully sanctioned by the letter and spirit of the Constitution.

We are obliged, therefore, to hold that the defendant in error was not bound to receive from the plaintiffs the currency tendered to him in payment of their note, made before the passage of the act of February 25, 1862. It follows that the judgment of the Court of Appeals of Kentucky must be affirmed.

It is proper to say that Mr. Justice Grier, who was a member of the court when this cause was decided in conference, (Nov. 27, 1869,) and when this opinion was directed to be read, (Jan. 29, 1870,) stated his judgment to be that the legal-tender clause, properly construed, has no application to debts contracted prior to its enactment; but that upon the construction given to the act by the other judges he concurred in the opinion that the clause, so far as it makes United States notes a legal tender for such debts, is not warranted by the Constitution.

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN LIABLE FOR FAILURE TO WHISTLE OR RING BELL—RULES OF EVIDENCE.

The facts in the recent case of Toledo, Peoria and Warsaw Railway Company *vs.* Foster (43 Ill. p. 420) are fully and clearly stated in the following opinion by

LAWRENCE, J. — This was a *qui tam* action brought by Foster to recover the penalty of fifty dollars imposed upon railways, for a failure to sound a whistle or ring a bell for eighty rods before arriving at a crossing. There was a recovery in the Circuit Court, and the defendant appealed.

It is first argued for the appellant, that the suit should have been brought in the name of the people. It is true, as counsel suggest, the 42d section of the act authorizes suit to be brought by the prosecuting attorney in the name of the people for the recovery of all penalties imposed by the act, and the penalties when thus recovered, would go exclusively to the benefit of the State. But the 38th section, which imposes this particular penalty, provides one-half shall go to the informer, and the other half to the State. It follows, that the action for this penalty may be prosecuted in either form. See Higbee *vs.* The People 4 Scam. 165, and G. & C. U. R. R. Co., *vs.* Appleby 28 Ill. 283. In the last case, the Court say nothing on this question in the opinion, but the objection was expressly taken by counsel in a suit brought under this same statute, and the judgment of the Court below in favor of the plaintiff was affirmed. See also C. & A. R. R. *vs.* Howard 38 Ill. 414.

It is also argued, that the Court erred in instructing the jury, that a preponderance of evidence, only, was required, and that it was not necessary a jury should be satisfied of the guilt of the defendant beyond a reasonable doubt. This instruction was erroneous. While the law does not require the same completeness of proof in cases of this character, that is required in criminal prosecutions where life or liberty is in jeopardy, yet the evidence must be of such a character, as to bring home to the jury a reasonable and well-founded belief of the guilt of the defendant.

Neither a railway company nor a private individual should be subjected to a fine whereby their property is to be divested, merely because there is a little more evidence, that they did not perform some required act than there is that they did. To allow a jury to enter upon this nice balancing of probabilities in cases of this charac ter, would be to open wide a dangerous door. Before a jury render a verdict taking away a person's property under the form of a fine, they should be satisfied the law has been violated, and if the evidence fails to produce upon their minds, that degree of conviction upon which they would be willing to act in important affairs of their own, it is not sufficient, even though there may be a very slight preponderance. For the error in this instruction the judgment is reversed and the cause remanded.

Judgment reversed.

☞ A bill allowing twelve per cent interest in cases of special contract has passed the Virginia Legislature, and is now a law.

The Public Debt Statement.

The following is a recapitulation of the public debt statement, February 28, 1870:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$221,589,300 00
Six per cent. bonds	1,886,350,350 00
Total	$2,107,939,650 00
Accrued interest	38,708,342 84
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$45,555,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Total	$59,555,000 00
Interest	525,550 00
Debt on which interest has ceased since maturity	$3,973,346 64
Interest	$524,048 37
DEBT BEARING NO INTEREST.	
Demand and legal tender notes.	$356,109,978 50
Fractional currency	39,950,039 08
Gold certificates of deposit	44,382,840 00
Total	$440,442,857 58
Total amount outstanding	$2,611 910,854 22
Total interest	89,757,941 21
Total debt, principal and interest, to date, including c u pons due, and not presented for payment	$2,651,668,795 43
AMOUNT IN TREASURY.	
Coin	$102,400,739 97
Currency	10,280,285 68
Sinking fund in United States coin interest bonds, and accrued interest thereon	27,876,529 00
Other United States coin interest bonds purchased, and accrued interest thereon	72,782,763 61
Total	$213,340,318 26
Debt, less amount in Treasury.	$2,438,328,477 17
Debt, less amount in Treasury. February 1, 1870	$2,444,813,288 92
Decrease of debt during the past month	$6,484,811 75
Decrease of debt since March 1st, 1869	$87,134,782 84

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,075,000	$270,750 00
Kansas Pacific, late Union Pacific, Eastern division	6,303,000	63,030 00
Sioux City and Pacific	1,628,320	16,283 20
Central Pacific	2,362,000 / 23,519,000	252,905 00
Central Branch Union Pacific—assignees of Atchinson and Pike's Peak	1,600,000	16,000 00
Western Pacific	1,970,000	18,573 00
Totals	$64,457,320	$637,541 20
Interest paid by United States		$6,881,664 96
Interest repaid by transportation of mails, etc		1,994,074 61
Balance of interest paid by United States		4,887,590 35

☞ The Boston and Maine Railroad Company have decided to pay in gold the coupons of the Danvers Railroad bonds due on the 1st of March. These bonds are guarantied by the former company, and during the war the coupons have been paid in currency, but the change to gold has been made in accordance with the recent legal tender decision of the Supreme Court.

Commerce of New York.

The foreign imports at New York for the month of January, 1869 and 1870, are officially stated as follows:

	1869.	1870.
Entered for consumpt'n.	$11,698,755	$11,970,771
Do. for warehousing	9,378,719	10,122,477
Free goods	1,243,777	1,108,271
Specie and bullion	221,278	1,523,856
Total entered at port...	$22,542,529	$24,725,375
Withdrawn fr. wareh'use	8,506,630	8,674,238

The foreign imports at New York for seven months ending January 31, were:

	1869.	1870.
Entered for consumpt'n.	$80,510,927	$83,750,198
Do. for warehousing...	54,263,051	60,357,238
Free goods	8,053,755	8,025,035
Specie and bullion	3,267,767	7,301,058
Total entered at port..	$146,095,500	$159,433,529
Withdrawn fr. wareh'se	56,621,378	63,685,677

The receipts for customs at the port of New York, were:

	1869.	1870.
Six mos. ending Jan. 1	$57,845,963 97	$61,552,308 75
In January	9,615,894 43	9,840,502 99
7 months	$67,461,858 40	$71,392,811 74

The exports from New York to foreign ports in the month of January, were:

	1869.	1870.
Domestic produce	$12,672,824	$11,838,151
Foreign mdse. free	7,965	68,623
Do. dutiable.....	472,228	996,392
Specie and bullion.....	3,214,380	2,688,392
Total exports	$16,367,397	$15,576,558
Do. exclusive of specie.	13,153,017	12,893,166

The exports from New York to foreign ports for seven months ending January 31, were:

	1869.	1870.
Domestic produce.....	$89,647,090	$117,853,758
Foreign free goods	204,640	315,413
Do. dutiable	3,952 355	4,678,568
Specie and bullion.....	24,952,379	19,339,947
Total exports.....	$118,756,464	$142,187,686
Do. exclusive of specie	93,804,085	122,847,739

☞ The following is a comparative statement of the earnings of the St. Louis, Alton and Terre Haute Railway Company for the years 1868 and 1869; earnings of the main line for 1868, $1,692,828 43; Belleville Branch, $243,959 21; total earnings, $1,936,787 64. Earnings of the main line for 1869, $1,763,226 56; Belleville Branch, $252,315 56; total earnings, $2,015,542 12. Increase of earnings over 1868, on main line, $70,398 12; on Belleville Branch, $8,356 35; total increase, $78,754 98.

☞ A new railroad enterprise with the title of Mahopac and Boston railroad is projected, starting at Groton on the Hudson River and connecting at Brewster's station with the Boston, Hartford and Erie, New York and Harlem, and other roads.

☞ The Rensselaer and Saratoga Railroad company propose constructing a track from Schenectady to the Duanesburg station, on the Susquehanna railroad, and hope to be able to secure cheap coal to Troy and all the northern part of the State by such a connection.

☞ The survey of a branch road from the Wilmington and Reading Railroad, at Seed's Bridge to West Chester, has been completed.

☞ The Acting Commissioners of Internal Revenue has decided that in cases where sterling bonds are sold abroad, secured by mortgage on property in this country, the stamp duty thereon shall be at the rate of four dollars and eighty-four cents for each pound sterling.

☞ Bridgeport has voted to issue bonds to the amount of $45,000 in aid of the Addison County Railroad. This road is about 15½ miles in length, commencing at West Salisbury, and running thence, *via* Cornwall and Bridgeport, to the Lake.

☞ The following gentlemen have been elected directors of the Allegheny Valley Railroad Company for the ensuing year: Wm. Phillips, J. Patton Lyon, W. K. Nimick, Wm. M. Lyon, F. R. Brunot, B. F. Jones, James Park, Jr.

☞ The extension of the Concord and Claremont Railroad from its present terminus at Bradford to the Connecticut River is now considered certain, and the whole line will be under contract in the course of two months.

☞ A bill to provide a sinking fund for the State has passed the South Carolina Legislature. Under its provisions one sixth of the bonded debt of the State will be purchased and cancelled during the year.

☞ The issue of $10,000,000 of second mortgage bonds of the Boston, Hartford and Erie Railroad Company, payable in 1880, authorized by the directors at a meeting last week, has been unanimously ratified by the stockholders.

☞ The Nodaway Valley (Mo.) Railroad Company proposes to build a railroad from St. Joseph up the Nodaway valley, northward into Iowa. The officers of the road are: R. C. Bohart, President; J. M. Morgan, Secretary; Wm. Spencer, Treasurer.

☞ The Western Union Railroad is to be consolidated with the Milwaukee & St. Paul. A bill authorizing such a consolidation has passed the Wisconsin Legislature.

☞ The Athol and Enfield Railroad has been put under contract to Ansel Phelps for $600,000. The route is from Athol through Dana, Greenwich and Enfield to Palmer.

☞ The Central Mining Company of Lake Superior has declared a dividend fo $4 per share, payable March 10.

PACIFIC MAIL STEAMSHIP COMPANY.
SPECIAL NOTICE.

In consequence of loss of connecting Pacific steamer there wi l be no departure of this Company's line on 5th March. All slow freight received prior to the 5th inst. will be forwarded as fast per *Henry Chauncey*, 21st.

F. R. BABY, Agent.

DERING'S PERMANENTLY ELASTIC RAILWAY FASTENINGS.
American Patent No. 92,021 Issued June 29th, 1869.

Splice-plates, Chairs, and Spikes constructed under said patent, and licenses to manufacture and use the same may be had of

GEORGE EDWARD DERING,
Lockleys, near Welwin,
3t10 **Herts, England.**

Second Hand Locomotives for Sale.

THE NEW JERSEY SOUTHERN RAILROAD Company (formerly the Raritan and Del. Bay R. R.) propose to sell Seven (7) Old Locomotives.

Four of these can be made useful for running construction trains, &c., at small expense for repairs; two of which are 4 ft. 10 in. Gauge and the others are 4 ft. 8½ inches

They can be seen at Manchester N. J. upon application to Rufus Blodgett Master Mechanic.

Sealed proposals for their purchase will be received at the office of the N. J. Southern R. R. 95 Liberty street, N. Y., until Thursday March 10th 1870, addressed to

W. S. SNEDEN,
3t8 **Genl. Manager.**

Locked Safety Valves,
TO
MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

GEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

RAILROAD SPIKES.
10,000 KEGS, BEST MAKE, 9-16th by 5½ inches For sale by

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

American Bridge Literature.*

BY S. H. SHREVE, A. M., C. E.

The recent publication of a large work on that most interesting branch of Engineering, Bridge Building, by the best known of American Bridge Engineers, Mr. Reobling, following close upon a new edition of the first work of the kind published in this country, ought with Mr. Haupt's well known work, to present us with somewhere near a correct knowledge of the subject. Very unlike are the three volumes in appearance; the first a sturdy, self-reliant duodecimo; the second, patrician in aspect as it stands upon the shelf, octavo as to height and dressed in smooth black; while the third, no thicker than either of its companions, is of height and breadth so enormous that it stands not at all, but spreads itself over half our table. No more unlike are their appearances than are their contents and their methods of treating the same subject. Bridge Engineering is one of the highest branches of the profession and a knowledge of its correct principles implies great study, accurate observation and a close acquaintance with applied mechanics. The application of such tests, however, would render our notice of two of these books too brief. In works of a mathematical nature, as these necessarily are, we have a right in any case to look for correctness as far as they go, and the newness of the subject to the author can never be accepted as an excuse for error in method. However wrong the premises, the mathematical reasoning from them must be correct. Neither can new processes do away with old ones or prove them wrong. The inventor of the Calculus did not detect errors in Euclid. Mathematics, pure and applied, advance daily, and we build with unerring safety to-day upon foundations laid for us thousands of years ago. So if Mr. Haupt, the one of our authors who most uses mathematics, attempts to fill a space not previously occupied, or offers, by their light, to lead us into new paths; we need not look long to determine if the space is well filled, or a new path really shown, or on the other hand, whether our time has not been wasted.

His style is pleasant, rather positive at times, and generally dignified and self satisfied. The illustrations are very good and abundant. Some of his methods of solving old and well known problems are quite ingenious and simple, promising great clearness in the rest of his book. When confined within the walls erected by older workmen, his talents at times throw additional light upon the way; and often when he knows the goal, he reaches it by a nearer and shorter path; but when he leaves well known land marks, his compass loses its magnetism; he never thinks to range out his line by his back sites, but wanders right and left, confused and blundering, his footsteps a maze to which there can be no clue. Still he walks with head erect, and under the circumstances, with the most wonderful dignity. He so pursues his investigations that he reaches their utmost limits and leaves the student no other paths. The new light that he imagines he throws on mathematics, he himself absorbs. He stands on his own highest pinnacle and furnishes no aid for others to mount higher.

One cannot help thinking while reading his book with full faith in the author; here is perfection; why build other styles of bridges than here directed; why learn other methods of calculation; why read or write other books.

There are two points on which the author of The General Theory of Bridge Construction seems to delight in confusing himself and his readers and to claim credit for many original hints. Originality we will willingly accord him and doubt not that the reader will find in this work what he will find in none other before or since. These two points are so constantly referred to, either together or separately, that they are the first to attract our attention and invite our investigation; for aside from the author's observations concerning them, calculations about them and results from them, we have nothing that cannot be found in other works. They are the chief part of Haupt's General Theory of Bridge Construction, they show his originality and particularly illustrate his clearness as a mathematical writer. These points therefore demand our chief attention; they are The Vertical Force and Counter-bracing. "There exists, also," he writes, "a force called by Dr. Young, detrusion, the effect of which is to crush across the fibres close to a fixed point."

"The existence of this vertical force, and its effects at other points, have not been considered by writers on the resistance of solids."

Hence our author's opportunity. Here the wide field in which to rear his mathematical standard, and take possession, and mete out laws.

It is necessary, before going further, to explain, that the moment of a force at any point, is the amount of the force itself, multiplied by the perpendicular distance from that point to the line of direction of the force. Consequently, it will be seen, that the definition given on page 21 of Bridge Construction, that, "the moment is the weight multiplied by the distance from the fulcrum at which it acts" is incorrect in its general application. It is correct for the moment at the fulcrum.

* Bridge Building, being the author's original work published in 1847, with an Appendix, containing corrections, additions, and explanations suggested by subsequent experience, to which is annexed an original article on the Doctrine of Central Forces. By S. WHIPPLE, C. E., Albany, 1869.

General Theory of Bridge Construction; containing demonstrations of the principles of the Art and their application to Practice; furnishing the means of calculating the strains upon the chords, ties, braces, counter-braces, and other parts of a bridge or frame of any description. With practical illustrations. By HERMAN HAUPT, A. M., Civil Engineer, New York. D. Appleton & Co., 1856.

Long and Short Span Railway Bridges. By JOHN A. ROEBLING, Civil Engineer. New York, D. Van Nostrand, 1869.

But to find the moment at any other point, we must multiply the weight by its distance from that point. The moment is not always the greatest strain the weight produces, and had our discoverer kept this simple fact in mind, he might have comprehended some plain rules of the method of taking the moments of forces and learned what many authors had written years before Bridge Construction. He has never learned that when a body, acted upon by different forces, is in equilibrium, the sum of the moments of the forces that tend to turn the body in one direction about a certain point, is equal to the sum of the moments of the forces that tend to turn it in an opposite direction. These moments are taken from the same point, and are not the greatest moments of the forces from any point in the body. This well known law and the principles of the lever are all the Bridge Constructor needed.

He obtains the horizontal strain at the centre of a beam, loaded only at the center, correctly, and he also gets it for any point between the centre and the abutment.

The operation is easily understood and well known, but as we shall have occasion to refer to it, we will repeat it here. Let a beam rest at its ends upon two abutments, and be loaded with a weight at the centre, disregarding its own weight and considering the horizontal strain to act only on the surface. Each abutment receives half the weight and is taken as acting upwards with that force. To find the horizontal strain at the centre, we will take the moments around a point in the lower surface, directly under the weight; these are, the reaction of the abutment, which is equal to half the weight, and expressed as $\frac{w}{2}$ multiplied by its distance from the point above referred to, which is equal to half the length, expressed as $\frac{l}{2}$, tending to turn the body in one direction; and the opposing force is the horizontal strain in the upper surface of the beam, multiplied by its distance from the point, which is the depth of the beam, and expressed as d; the horizontal strain in the lower surface, passing through the point, has no moment. Expressing the horizontal strain as H, we can from this equation.

$$Hd = \frac{w}{2} \times \frac{l}{2} \text{ or } H = \frac{wl}{4d}.$$

In the same manner, if the moments be taken at any point between the centre and the abutment, whose distance from the abutment is u, we shall have as the moment of the force at the abutment $\frac{w}{2} \times u$, and the horizontal strain which we will call H′, multiplied as before by d, the depth of the beam, for the opposing moment, or $H'd = \frac{wu}{2}$ or $H' = \frac{wu}{2d}$.

Having obtained, in his own way, the equations, Mr. Haupt proceeds to deduce from them the vertical force above alluded to. Let us not be understood, as denying in any way, the vertical force or shearing strain in a beam; we are only attempting to follow some strange reasoning.

The horizontal strains are the greatest at the centre of a beam and decrease to the ends where they are nothing; but in what lines, strains pass through a solid beam to the abutment, is unknown to most Engineers. Mr. Haupt, however, would teach us, that there are but two kinds of strains in a beam, vertical and horizontal strains; and at any point, there are two horizontal strains; one from the centre and the other from the abutment, and their difference is the vertical force. In other words he has discovered that if two horizontal forces acting in opposite directions are unequal, they may be kept in equilibrium by a vertical force. It does not matter if the right or left force be greater, the same vertical force will balance them and can consequently act in an upward or downward direction. Is it a wonder that an author, who asserts that two unequal opposing forces and a force at right angles to them can be in equilibrium, forgets what moments of forces are and becomes confused generally.

To discover the value of this force, he says, "the equation of moments is $H' = \frac{wl}{2d}$" here w, l, and d, are the same as before, but what does H′ mean? The horizontal strain at the centre is the greatest possible, and equals $\frac{wl}{4d}$, or one half this H′, and where to look for this new strain we can not imagine. But he says it is so, because the weight acts with one half the leverage of the beam; he is therefore, so far as we can judge, taking his moments about the left abutment. To take them there correctly, we have the weight at the centre, w, multiplied by half the length, $\frac{l}{2}$, or $\frac{wl}{2}$ for the moment in one direction and to oppose it the reaction of the right abutment, $\frac{w}{2}$, multiplied by the length, l, or $\frac{wl}{2}$, the same as the first and showing no horizontal strain over the abutment. But in place of the reaction of the right abutment, a new horizontal strain is introduced, at the left abutment, sufficient to hold the beam in place, and the equation made to assume the form $H' = \frac{wl}{2d}$; we will now quote from page 66:

"But we have seen that the horizontal strain at S is actually $H = \frac{wu}{2d}$.

"The difference is $(H' - H) = \frac{w}{2d}(l - u)$.

"As this expression cannot become zero for any point between W (the centre) and C, (the end) it follows that the horizontal force is not sufficient to sustain the weight, and there must consequently be a cross strain upon the fibres which must compensate for this deficiency, and be resisted by a vertical reaction."

We cannot see that "it follows" at all. Let us look a little farther; $\frac{wl}{2d} - \frac{wu}{2d}$ is greater than $\frac{wl}{4d}$ because $\frac{wu}{2d}$ is less than $\frac{wl}{4d}$; or the difference of the horizontal forces at u is greater than the horizontal strain at the centre; again make u equal to $\frac{l}{2}$ and we have $\frac{wl}{4d}$ for the difference of the horizontal forces at the centre, an evident absurdity and contradiction.

Let us now assume u to be greater than $\frac{l}{2}$; we have seen that $H' = \frac{wl}{2d}$ is the horizontal strain in the beam at the left abutment sufficient to hold it in its position if the right abutment be removed. And as this right abutment becomes useless and is ignored by our author, we will remove it, and his equation will give us $\frac{w}{2}$ as the shearing strain in a beam fixed at one end and loaded with a weight W at one half its length.

It is difficult to comprehend how any one, having the slightest mathematical knowledge or training, could be guilty of such work. But this continues whenever our distinguished author wanders from his text books; occasions which he is always glad to seek, and which redound so much to his credit and the reader's amazement.

To obtain the vertical force in a uniformly loaded beam, a different process is adopted, the former precious style of reasoning not being suited to all cases; but in this as in the other our author is unapproachable. A partially loaded beam is, fortunately for the student's comprehension, beyond Mr. Haupt's high mathematical prowess.

It would be amusing to change the various styles of reasoning and apply, for example, the method of obtaining the vertical force for a beam loaded in the centre only, to a beam uniformly loaded. In the first, the beam with the load at the centre, "the equation of moments" taken about the left abutment is, $H' = \frac{wl}{2d}$; in the second, the beam uniformly loaded, we would, in the same manner, have the whole weight acting with a leverage equal to the distance of its centre of gravity from the abutment, which would be half the length, and the equation would be the same as before, $H' = \frac{wl}{2d}$, or H′ is equal in both cases.

But the equation at a point distant u from the right abutment, page 67 is $H = \frac{wu}{2d}\left\{\frac{l-u}{l}\right\}$.

The difference is $(H' - H) = \frac{wl}{2d} - \frac{wu}{2d}\left\{\frac{l-u}{l}\right\} = \frac{w}{2d}\left\{l - u\right\} + \frac{wu^2}{2dl}$.

"As this expression cannot become zero for any point between W and C, (centre and end,) it follows, that the horizontal force is not sufficient to sustain the weight and there must consequently be a cross strain upon the fibres which must compensate for this deficiency, and be resisted by a vertical reaction."

"Call this vertical force f, it acts with a leverage $= DS = (l - u)$. The difference of the horizontal forces, or H′—H, acts with a leverage $= d$. The equation of moments will therefore be $f(l-u)$" $= d\left\{\frac{w}{2d}(l-u) + \frac{wu^2}{2dl}\right\}$ or $f = \frac{w}{2} + \frac{wu^2}{2l(l-u)}$ for "the cross strain upon the fibres," for any point between the centre and the abutment. To apply this equation to the centre and show its utter absurdity, we have only to make $u = \frac{l}{2}$ and we have, $\frac{w}{2} + \frac{w}{4} = \frac{3}{4}w$, for the vertical force at the centre when the beam is uniformly loaded and where really it is zero. It will also be seen from this equation that the vertical force increases as u increases, and is greatest at the left abutment.

But our interesting mathematician does not a second time follow this original process; sufficient for it is the glory thereof in its first application. He does better, he calculates the horizontal strain at any point, called S, between the centre and the right abutment; which force we will designate as H. He then proves that the left section, that is between S and the left abutment, presses to the right with a certain force, which we will term L; and that the right section in the same manner thrusts towards the left with another force, which we will term R. H thrusts right and left equally, consequently the difference between R and L is the cause of the vertical force. He next satisfied himself that $H : R :: l-u : u$, and $L : H :: l-u : u$; (u is the distance of the point S from the right abutment) therefore $L-R=H\left\{\frac{l-u}{u}-\frac{u}{l-u}\right\}$. This is the horizontal force that caused a vertical strain on the fibres. Call the vertical force as before f, it still acts with the leverage $l-u$ and the horizontal force with its former leverage d, and we have the equation

$$f(l-u)=Hd\left\{\frac{l-u}{u}-\frac{u}{l-u}\right\}$$

or $f=Hd\left\{\frac{1}{u}-\frac{u}{(l-u)^2}\right\}$ and by substituting the value of H, the value of f can be found to exceed many times the whole load, still another absurdity. And so it might be shown, that in the whole of this question of vertical force, on the originality of which he prides himself, all his premises, whether examined by the author's own processes or with mathematical correctness, lead only to preposterous results.

The calculation of the shearing strains is a very important point in the mathematical investigation of the plans of bridges. In girders with one or both chords or flanges curved, this strain may pass partly through the chords and it is consequently of the last importance that it should be well understood. It is, too, a very difficult subject, except in bridges with straight chords, and it seems almost farcical to attempt to palm off upon the profession such ridiculous stuff as the above for a solution of such questions. Yet his dignified and positive manner has disarmed the indolent and careless student and many have looked upon this mass of blunders as science.

The most difficult case of all Mr. Haupt wisely avoids, the case of a partially loaded beam. The vertical force varies so under a partial load that the question of determining its value is too difficult to be solved even by his original ingenuity, and yet it is the most important. It would have led him to a different proportioning of the sizes of the main and counterbraces. Instead of making the braces in the centre panel to bear simply the load of a panel, he would have learned, had he correctly solved the question, that in the case of a bridge half loaded one of these braces has to transmit one-fourth the load to the abutment towards which it slopes. And when the load reaches to within one panel of the centre, then the counterbrace becomes a main brace and has to carry a certain proportion of the load, much greater than half the weight on one panel.

It is not worth our while to investigate his reasonings concerning counterbracing, and we will glance at a few points only, all of which are in keeping.

He states, that in a panel, a weight upon the main braces having left a small space between the end of the counterbrace and the angle of the panel, a key should be tightly introduced to prevent the elasticity of the truss from bringing it back to its original position when the weight is removed, and this is supposed to exert the same strain, consequently, as the weight did. It might do so, to a certain extent, if the key were driven in until the whole amount of compression on the counterbrace equalled that on the mainbrace; not otherwise. He further says on the subject of counterbracing: "The strain under consideration must therefore result from the variable load, and as the effect of a weight on one side of a truss is to produce a rise at the opposite side which is resisted by the counterbraces; and as the strain is not confined to a single timber but is distributed among several," etc. He therefore concludes that it would be a very complicated problem, and devises another method, drawing a square with diagonals and sagely remarks:

"As the greatest accidental load that can ever act at a single point when compared with a uniform load is very small, it follows, that counterbraces may be very small when compared with other timbers," or as an accidental load is to a uniform load so is the size of a counterbrace to the size of any other timber in the bridge.

As the merest tyro is well aware there is no difficulty in calculating the greatest strain that can come upon any counterbrace, and that the weight of the bridge itself affects these strains, in many cases rendering the counterbraces near the ends useless.

In the same spirit and mathematical clearness is the following: "In fact it is evident that if the truss rest against an abutment capable of opposing a horizontal resistance the tie AB (the lower chord) could be cut entirely through without danger of the truss falling, for the strain upon the tie at C (the centre) is exactly replaced by the two resistances to compression at A and B." (the abutments). "For the reasons assigned we think wedges behind the ends of the lower chords of straight bridges should never be omitted."

It is admirable, the quiet snubbing our author stops to give some gentleman who was so thoughtless as to differ from him on this point. Rather subdued by this, we would, in the most modest manner, suggest what we think an improvement upon this end wedging idea. And in this wise. Instead of wedging the ends of the counterbraces when the bridge is loaded, as the author recommends, we would load the bridge to its greatest capacity and then wedge the ends of the chords as tightly as possible. This will not only overcome the elasticity of the chords, but will remove all necessity of counterbracing and other wedging, for it will most assuredly prevent all tendency to rise at any point, no matter where nor what the load is, provided it is not a load of gunpowder.

We might throw the book aside after learning this much of the nature of its contents, but that the calm and positive assertions of the author have not been without effect upon many of his readers, and while he may have taught them some things which they did not know, he has inculcated many erroneous principles.

They, who have not been prevented, by the obscurity of his mathematical investigations, from applying his processes of reasoning to some of our recent bridges, must wonder why some of them do not fall of their own weight.

In a lattice girder our author "is not prepared to prove that the inclination of the ties is injurious although several considerations lead us to suppose that it is less efficient than when the ties are perpendicular." (vertical ?)

Probably one of these considerations was absence of the opportunity to wedge the counterbraces. In this connection we may call attention to the simple means he gives us for ascertaining the most economic angle for braces.

"The braces must not be so long as to yield by lateral flexure."

"The chords being unsupported in the intervals between the ties, these intervals must be limited by the condition that no injurious effects shall be produced by the passage of a load."

We must not pass unnoticed his criticisms, in a general way, of some particular modes of construction.

One "has no counterbracing and consequently would be deficient in stiffness."

In another, he advises "to secure stiffness by counterbracing."

Another has bad results "which necessarily follow from the absence of counterbracing."

But we now come to one which is counterbraced, and alas for human hopes, he does not know whether, "the architect wedged the counterbraces to increase the stiffness of the truss."

Again, another "is an admirable one but is destitute of counterbracing."

Were it a mathematical expression, we should call this simple formula for bridge criticism, very rich and decidedly unique.

Had The General Theory of Bridge Construction been read abroad, could Engineering now be disgraced by such structures as the iron bridge over the Rhine at Greithausen, 320 feet span, with upright struts and diagonal ties, but, *horresco referens*, no counterbracing; and we must also mention as a warning to presumptuous Engineers, the double track iron bridge between Mannheim and Ludwighafen, also of 320 feet span and without counterbracing.

In reference to the advantage of continuity in a bridge supported by several piers, we will not investigate the mathematical curiosities displayed by our author, but merely remark that it is very apt to be overrated. The upper chord across the pier and for some distance beyond must undergo tension; in the centre of the span, it is subject to compression alone; there is, therefore, a point where there is neither tension nor compression. In a wooden bridge of not very long span, say less than 100 feet, this point is affected by a moving load, and changes its position, compelling a provision for both tension and compression. Hence continuity had better be avoided, unless the spans are very long, piers very secure, and constant loads a large portion of the whole weight.

Mr. Haupt undoubtedly intended to write a perfect, thorough, and exhaustive work on Bridge Building. A work teaching the whole theory of strains as applied to this subject; a work enabling the engineer to calculate and plan correctly any style of bridge; a work that might

have many editions and but few additions. Such it is, undoubtedly, in his mind, but he has failed in every point. To the student it is a treacherous guide; to the experienced engineer, a useless sacrifice of common sense and accuracy.

The contrast presented to the work of Mr. Haupt by Mr. Whipple's small volume is very great. Had the former possessor the latter's accuracy and scientific knowledge; or the latter, the former's excellent arrangement and printer's skill, the result would have been an improvement upon either. Mr. Whipple's work is clear, accurate, scientific, and practical, and in many important points, original. There is no assumption of superior knowledge, no pompousness and display as in the other work. It deserves a place in every engineer's library, but its arrangement and typographical defects make it objectionable as a text book. He is a skilful engineer, a clear-headed mathematician, and of all who have written, probably the most competent to give us what we need, a good book on this subject. Not a treatise on strains with false applications of a weak theory; but a clear method of calculating strains and examples of the best bridges, old and new, not only in America, but in the whole world. Explain to us what is Von Ruppert's great plan, what the Saltash type, what the Pauli system, what Sedley's great bridge, what the Grana Kuilemberg Iron Bridge, something of Ead's magnificent scheme, tell us, for instance, how to calculate a bow string girder, post us up generally and relieve us from the incubus and gyves of truss with horizontal chords, with its hundred names derived from patentees of some device but owing in most cases its origin to Whipple.

The boldness and fertility of resource displayed by Mr. Roebling in constructing the Niagara Suspension Bridge, qualities peculiarly American, placed him at once among the ablest of Engineers. No matter if not a single idea of the construction originated with him. No matter what others may claim. All the credit is as much his as if every part and detail were original with him. It does not detract from Mr. Roebling's boldness and genius that many engineers publicly disagreed with the strong disapproval of suspension bridges then so fashionable, or that Ordish had just made public his system of rigid suspension bridges. He alone accomplished the work. He built the best bridge for the time and place. The British Engineers, quarrel as they may for the honor of building the Brittania Bridge, did not build the best bridge for the time and the place. Far from it; with the science of the time, they could hardly have done worse. Every day condemns their plan. Every day adds to the approval of the American Bridge. One shows the wealth of genius; the other the wealth of pounds sterling.

The genius that flashed when the Niagara Bridge was constructed, was not displayed in the subsequent copies; nor in the plan for spanning the East River, resting its enormous towers on great sunken rafts and rising and falling over the masts of vessels; nor, we are sorry to be obliged to add, in this glorification of the rejected plan for a bridge over the Mississippi, called Long and Short Span Railway Bridges.

Mr. Roebling merely gives us this one plan in his broad book. The plan that was rejected when brought into competition with Ead's noble bridge. We cannot be surprised at the decision of the committee; we should be surprised had it been otherwise. Between the two it was easy to decide, and had there been but this one, it would have been as easy to reject it. It is a strange scheme, a huge hermaphrodite. Fastened to one pier, and rolling its towers over the others, it is a combination of arch, suspension, stay and lattice work, each acting independently of the other and each bearing a portion of the weight. The title leads us to expect something more than this plan and its details, altogether more curious than useful, and some calculations for sizes for trusses. It is a very large book, but its bulky and inconvenient form is no objection to it. It has been a great disappointment to the profession.

Eastern (Mass.) Railroad.

The receipts of this company for the fiscal years ending November 30, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$978,405 95	$1,117,670 35

Net income.....	$425,329 92	$529,913 79

By the foregoing statement it appears that our receipts have been larger than last year by the sum of $223,026.79, or about 16 per cent; and this per centage of increase has not been limited to this single year, but has been maintained on the average for a long period. Six years ago we congratulated our Stockholders on the continued increase of income up to that period, which had then become "much larger in fact than in any other year in the history of the road." It then amounted to $812,556.63. This year it will be seen it is twice as much. In other words our business has increased one hundred per cent in six years; and it is three times as great as it was in 1861. These comparisons hold good substantially after making the necessary deductions for the estimated income of the Rockport and Lawrence Branches, included now in our income, but not included six years ago.

It has been our constant endeavor to keep our road and equipment up to the highest standard, so as to keep pace with our increasing business.

During the year we have built in our own shops three first class locomotive engines, (by this we mean, not merely putting together the several parts of an engine purchased of the manufacturers, but the actual construction throughout,) from our own drawings and patterns, and we have rebuilt two engines and made general and large repairs upon twenty-four others, putting on nine sets of steel tyres, and made such repairs upon the remainder as has been needed. Our motive power was never in so good a condition as at present.

In our car shops we have built five first class passenger cars, four baggage and fifty-eight freight cars, besides a very large amount of work in rebuilding and repairing many others. In addition to the foregoing, we have now in process of construction twelve first class passenger cars, eight in our own shops, and four elsewhere; enough altogether to furnish an ordinary railroad, but made necessary by the pressure of travel, especially in the summer months.

We have a very large number of men employed, both in our machine shops on new engines and our car shops on new cars; larger proportionally than most railroads. The increase of business has created a constant demand for new rolling-stock, and we think we get more thorough workmanship at moderate cost in this way than we should be likely to obtain by purchase.

We have laid down during the year 2,000 tons of rails, including 140 tons of steel, besides welded rails; also, 48,000 sleepers. We have now on hand, and paid for, some 800 tons of new rails, ready for use in the spring, besides about 1,100 tons of old rails, a part of which will do to weld. In addition to ordinary track work, a special gravel train has been employed throughout the season, at a cost for labor alone to man the train of $23,189.39, to which is to be added the cost and use of the train itself; and this expenditure has been almost wholly for new work, building new side tracks, filling bridges, grading depot lands, and other improvements.

We have completed the filling with solid embankment the three bridges on the Saugus Branch, spoken of in our last Report, and have also excavated a new channel for the river, made necessary by filling two of the bridges through which the old channel formed an ox-bow.

We have completed the new passenger house at Chelsea, which gives great satisfaction. At Caryville we have established a new depot for the accommodation of that growing neighborhood, and at Chelsea Beach we have also made preparations for summer travel. A new freight-house has been built at Lynn, and also an extension shed or awning for protection of passengers on the platform: and the water fixtures at the easterly end of the depot have been removed more easterly, so as to take the trains more out of Exchange Street in taking water for the engines.

Additional lands for station and other purposes have been purchased at Swampscot, Marblehead, Manchester, Hamilton, Newburyport, Salisbury, Amesbury, Hampton Falls, Portsmouth, and perhaps at some other places, at a cost of $30,227.71. New freight houses have been built at Peabody and at Hampton Falls. An addition has been made to the passenger house at Rockport. At East Boston we have entirely rebuilt the smaller wharf and built a new coal shed of large capacity upon it, at a cost of $25,495.22.

The subject of obtaining enlarged terminal facilities in the city of Boston has been forced upon our consideration, with an urgency constantly increasing with the rapid development of our business. Our passenger house, constructed only six or seven years ago, and since enlarged to the utmost limit our space allows, occupying indeed every square inch of ground we can make available, is already too small; and should our travel increase in the next half a dozen years, as in the last, will be quite inadequate for the reasonable accommodation of the travelling public. For freight we have indeed ample accommodations at East Boston; but the ferry intervenes, and shuts us off practically from a very large share of that business which naturally would seek our line. We have no freight grounds in the city proper as is known; and it has become of vital importance to the continued prosperity of that department of our business that a suitable area should be obtained if it can be had at a reasonable proportionate cost. Several plans for providing for this want have received our attention—one of extending our location to Haymarket Square, and occupying the space between

Canal and Friend Streets; another of a line from Chelsea through Charlestown, coming into the city easterly of the Fitchburg and the Boston and Maine Railroads, and thereby avoiding the dangerous crossings of both of those roads, and saving a mile and a half in distance. Both of these projects had occupied the attention of our predecessors in the earlier history of the road, and each at different times has received to a certain extent legislative sanction.

The Legislature at its last session passed an Act, a copy of which is hereto appended, entitled "An Act to authorize the Boston and Lowell Railroad Corporation and the Eastern Railroad Company to increase their terminal facilities in the city of Boston, and for other purposes." Under this Act we can do nothing indeed except with the concurrence of the Boston and Lowell Railroad Company; but acting with their concurrence we can obtain (not indeed what will ultimately be necessary in the expansion of business, but for the present,) a sufficient amount of territory, for the convenient enlargement of our passenger accommodations when that becomes imperative, and also for the accommodation of a portion of our freight within the city proper. The additional capital necessary to carry out the plan on our part contemplated by the Act and complete the requisite structures, will probably be not less than $1,000,000.

From the best consideration we have been able to give the subject in all its bearings, we have come to the conclusion that it is not best to let the opportunity, such as it is, escape us, and that it is expedient, and we accordingly recommend, that you give to the Directors authority to enter into such arrangements and contracts with the Boston and Lowell Railroad Co., and take such other measures and do such acts as they may deem necessary or expedient, to secure additional terminal facilities in the city of Boston.

In making this recommendation, we do not forget to notice the 8th and 9th Sections of said Act, Sections which were interpolated into it at a late period, and which impose upon us very heavy and unreasonable burdens in the re-construction of our draw bridges. It is only about sixteen years since the draws in our Boston bridge were constructed, and they were constructed in exact conformity with the requirements at that time of the Legislature itself, and under the direction of a Commissioner appointed by its authority. Now we are required, by these sections, to reconstruct them on a different and much larger and more expensive scale, at a cost to us probably of not less than $50,000; and this, without any equivalent or compensation whatever.

The long pending claim of the Portland, Saco and Portsmouth Railroad Co., for payment of its rent in coin under the contract of April 1st, 1847, has been compromised by an agreement of the Boston and Maine Railroad and our corporation to pay $90,000 each, in currency, in full of all arrearages up to June last, and all payments thereafterwards in coin. Accordingly we furnished $22,500 in coin, for the payment of the June dividend, and we have provided a like sum for that of December. These sums, and others that we may be called upon to advance under that contract, we look upon in the nature of a temporary loan to be reimbursed to us out of the earnings of that corporation.

In 1868, the Legislature of the State of Maine authorized an addition of $500,000, to the capital stock of the Portland, Saco and Portsmouth Railroad Co., and the stockholders of that corporation have accepted the Act, and authorized the stock to be issued whenever the consent of the Eastern and Boston and Maine Railroads should be obtained. The latter corporation have given their consent, and we recommend our stockholders to concur.

A controversy has long existed between us and the Boston and Maine Railroad, in relation to the division of earnings from freight to and from the Portland, Saco and Portsmouth Railroad, under the contract of April 1st, 1847, much the larger part, fully two-thirds of the freight, passing over the Boston and Maine Road, by reason of their location in the city proper. To terminate that controversy a reference was agreed upon, and an award has been made, a copy of which is hereto annexed. Although this award by no means gives us as much as we think it ought, and although it calls for the opening and readjusting of accounts and settlements of fifteen and twenty years standing, a part of which accounts were long ago lost by the accident of fire, and which settlements nobody so far as we know had ever complained of, or desired to have opened; yet, it does, nevertheless, give to us for the future a valuable share of the profits of that business beyond what has heretofore been conceded.

The citizens of Wolfborough have obtained a charter for a railroad to connect that thriving town and the Lake Winnipisseogee with our Portsmouth, Great Falls and Conway Railroad, and have also voted to contribute five per cent of the valuation of the town, amounting to some $35,000, as an outright gift in aid of the construction of the road. Such a connection, bringing new business over the whole length of our line of road from Boston to Union, ninety-two miles, would unquestionably be of great benefit to us, and we recommend that authority be given to the Directors to adopt such measures to encourage and secure its construction as they may find expedient.

During the year we have, under authority of Stockholders heretofore given, issued bonds to the amount of $788,000, and stock to the amount of $149,600, the proceeds of which have been applied to the reduction of the floating debt and $75,000 of bond debt, and for new work and improvements—besides $5,000 of stock issued in place of $5000 of convertible bonds that have been cancelled.

The number of miles run by locomotives has been 959,318. Number of passengers carried, 3,849,246. Tons of freight carried, 321,326.

TRIAL BALANCE, NOV. 30.

	1868.	1869.

President.—GEORGE M. BROWNE.

Directors.—George M. Browne, Henry L. Williams, Samuel Hooper, Nathaniel Thayer, Wm. L. Dwight, Benj. C. Bates and Franklin Haven.

Treasurer.—JOHN B. PARKER.

Superintendent.—J. PRESCOTT.

☞ The contract for the construction of the Bridge over the Schuylkill river at South Street, Philadelphia, has been awarded to John W. Murphy for $770,000. The Bridge is required to be constructed of wrought iron, to have cast iron piers in the river with stone abutments, arches of brick and girders of iron. Its entire length is to be 2419 feet, the truss spans to be each 185 feet, with pivot draw giving an opening of 77 feet on each side.

☞ A meeting of the citizens of Bethel (Penn.) and adjacent townships, was held last week, to take into consideration the propriety of building a branch railroad, along the west branch of Chester creek, between Glen Riddle and Ivy Mills.

Burlington and Missouri River R. R.

Through trains are now running over this road from Burlington to Council Bluffs, a distance of 290 miles. The Burlington and Missouri River railroad was first projected in 1852. The company was organized in November, 1853. The road was surveyed and located from Burlington to Ottumwa, a distance of 75 miles, and early in 1854 it was put under contract. The dates of completion were: To Danville, from Burlington, 13 miles, March, 1856; to Mt. Pleasant, 28 miles, July, 1856; to Rome, 35 miles, June, 1857; to Fairfield, 51 miles, August, 1858; to Ottumwa, from Burlington, 75 miles, August, 1859. Delays consequent on the breaking out of the Rebellion, kept the terminus at Ottumwa till 1865, when the company entered upon the extension of the line with great energy, in anticipation of the completion of the Pacific Road. Since that date, the last 200 miles have been built, the work of construction going on only in the summer season, however, every few months of which saw an extension from station to station: To Albia, from Burlington, 100 miles, Nov., 1866; to Chariton, 130 miles, July, 1867; to Osceola, 156 miles, Jan., 1868; to Afton, 180 miles, Sept., 1868. The last 100 miles from Afton west was wholly constructed last season, being finished in December. The cost of the entire road stands as follows:

Mortgage Bonds	$5,200,000
Capital Stock	1,800,000
Convertible Bonds	3,400,000
Total cost of road	$10,400,000

or, about $37,000 per mile. Deducting from the above $4,000,000, assured receipts from land sales, the cost of the road to the owners reduces to about $6,500,000. The road is operated in three divisions, viz.: the first, Burlington to Ottumwa, 75 miles; the second, Ottumwa to Creston, 115 miles; the third, Creston, to Council Bluffs, 100 miles.

The company have 35 locomotives, 20 first-class passenger, 12 baggage, mail and express, and 550 freight cars.

Buffalo and Lake Huron Railway.

The terms of the new agreement recently made between this company and the Grand Trunk Railway Company of Canada is as follows:

In addition to £42,500 a year in perpetuity and in priority of the equipment mortgage bonds, the Buffalo Company is to receive in 1870 a sum of £2,500, to rank next after the second equipment mortgage bonds, and an additional £5,000 every year until 1874, when the additional sum will amount to £22,500. This sum will be further increased by £1,000 every year until the year 1879, when the additional sum will amount to £27,500, ranking after the second equipment bonds, and be continued in perpetuity, making with the £42,500 a total of £70,000 a year payable half-yearly to the Buffalo Company.

☞ The Delaware and Hudson Canal company will soon commence the construction of a railroad from Susquehanna, on the Erie railway, to Newark on the road they now lease—a distance of twenty miles. From Susquehanna the Erie company is now building a branch, thirty-six miles long, to Carbondale, to connect with the coal roads of the Delaware and Hudson Company.

☞ The directors of the Connecticut Valley Railroad have decided to make Saybrook the southern terminus of their road.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "§."

Years ending.	Railroad: Main Line.	Branch Line.	2d Track and Sidings.	Railroad in progress.	Rolling Stock: Engines.	Cars: Pass.	Cars: B. M. &c.	Cars: Freight.	Companies. American Railroad Journal.

Saturday, March 12, 1870.

Stock Exchange and Money Market.

The feature of the week's business in the financial line has been a further decline of full five per cent. in Gold. The fall in Gold has had the effect of checking operations in most lines, and of generally depressing commercial values. The demand for Money has been only moderately active, and has been readily responded to on the basis of 4@6 per cent. on call, and 7@8½ per cent. per annum, in the discount form, on strictly prime to good mercantile paper. The city banks, in their last weekly return, show an addition of nearly two millions to their deposits, over a quarter of a million to their reserve of legal tender notes, and nearly ¼ of million to there specie hoard. They have enlarged their loans, and reduced their circulation, a little. The U. S. Sub-Treasury cut down its general balance about 2½ millions during the week. It held on Wednesday morning a currency balance of 5¼ millions, against less than five millions the preceding Wednesday. The general balance on Wednesday stood at $81,693,682, against $84,198,077, a week earlier.

The specie reserve of the city banks according to the latest return is $35,898,493, against $19,486,634 same time last year. The city bank deposits are now $213,078,341, against $182,604,437 week ending March 6, 1869. The legal tender reserve amounts to $54,065,933, against $49,145,369 same time last year. The circulation now stands at $33,783,942, against $24,275,885 same time last year. The loans are now $268,634,212, against $262,089,883 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $100,530,417 a day, against a daily average of $91,917,000 the preceding week, and $85,191,978 the week ending with Feb. 20, 1870. The current week's exchanges average about 92½ millions a day. The city banks, last week, reported a gain of $204,204 of specie, $1,945,393 of deposits, and $294,109 of legal tender notes. They increased their loans, $148,570; and reduced their circulation, $36,963.

National Bank notes to the amount of $219,820 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $321,615,731, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $21,958,382, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,657,349. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,384,350; and for the public deposits, $17,683,500—making a total of $360,047,850. The Treasury Department last week redeemed and destroyed $677,700 of worn and mutilated fractional currency, and issued $444,582 of new.

The U. S. Sub-Treasury receipts, week ending with March 5, were $3,824,453 in coin, (including $2,698,000 from customs duties,) and $3,359,831 in currency; payments, $4,942,988 in coin, (including $2,497,664 of coin interest,) and $3,755,549 in currency; balance at the close of the week, $80,494,089 (including $74,334,385, of coin, and $4,817,341 of currency,) against $83,495,082 at the close of the preceding week, showing a decrease of $3,000,993. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $543,300 in coin, (including $428,000 from customs,) and $713,789 in currency; payments, $126,779 in coin, (including $76,600 of coin interest,) and $457,630 in currency. On Tuesday, receipts, $567,891 in coin (including $474,302 from customs), and $642,495 in currency; payments, $111,558 in coin (including $108,000 of coin interest) and $436,957 of currency. The balance at the close of business on Tuesday stood at $81,693,682, (including $5,278,989 of currency, and $75,206,739 of coin,) against $84,198,077 a week previous; and $85,667,100 on Feb. 22d, 1870. The aggregate receipts of the office in February were $38,237,062, including $11,951,925 from customs; aggregate payments, $35,331,006 including $1,749,000 of coin interest; balance at the close of the month, $83,673,026, against $80,766,970 at the close of January.

The U. S. Sub Treasurer retired, last week, $2,505,172 of coin certificates, received for customs.

Government revenues have been yielding quite satisfactorily, since our last, in both forms of excises, and customs. The excises, during the week

yielded about 3¼ millions; customs at the port of New York, $2,633,172, and at the outports about $875,000 (in coin) more, making the grand total income for the week equal to about $7,108,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 116¼ millions.

The Gold speculation has been unusually active and excited, since our last, with a general and very decided tendency toward a reduced premium. The offerings of coin have been extensive, and the operators for a fall have been pressing sales with extraordinary energy. Washington dispatches have been of a very variable tenor, relative to the funding and currency projects now before Congress; and have been made skilful use of, to promote the interests of the conflicting elements of the Gold Exchange. There has not been any very notable demand for coin, of a legitimate business nature, other than the call for Custom House purposes. The export inquiry has been unimportant. The abundance of foreign exchange, especially of commercial bills, has been against an export drain of specie. The range of the price, during the week, has been from 110⅛@115⅝ and the closing quotation on Wednesday was 110½. On Wednesday, Government marketed a million of Gold at from 110.60@111.10. The bids reached over three millions, and ranged from 107½@111.10.

Many merchants, and jobbers have been paying out silver in change, in retail transactions, during the week.

The coin interest payments of the Sub-Treasury on Wednesday were $67,375.

The customs demand for Gold last week, averaged $449,667 a day; thus far this week, it has averaged $451,500 a day, or equal to a weekly aggregate of $2,709,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $12,811; and since Jan. 1 1870, $3,084,381, against $2,097,452 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $88,972,094, against $83,987,493 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to Feb. 25th, was $995,347, against $973,808 same time last year.

The exports of specie, from this port, last week, were $298,453, against $507,853 same week last year; total, since July 1, 1869, $21,827,653, against $28,692,304 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,497,664, and since July 1, 1869, $65,589,902, against $65,642,192 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to Feb. 25, were $6,279,166, against $6,527,869 same time last year.

Foreign Exchange has been offered freely at lower and irregular prices, yet has not been in much request. The heavy cotton shipments have added largely to the available supply of bills. Bankers' prime sixty day bills on London closed heavily on Wednesday at 108⅛@108⅜, and on Paris to 5.25@5.19½; sight bills on London to 108¾@109, and on Paris to 5.18¾c.@5.17½. The offerings of produce bills have been quite liberal. The week's exports of domestic produce have been to the currency value of $3,902,429, making the total since July 1, 1869, $143,115,099, against $111,633,425 same time preceding fiscal year.

Government securities bearing gold interest, declined 3@4½ per cent, in sympathy with the fall of full five per cent in gold. At the reduced rates, more liberal offerings and purchases of bonds have been reported. The 1881 six per cent currency sixes have shown most firmness. The severest depression has been in the instance of the later issues of the Five-twenties. Early on Wednesday, the 1867 Five-twenties sold as low as 107½, but rallied through the day to 108⅝@108¾, closing at 108¼@108½. On Thursday, Government bought in a million of Five-twenties at about the open market price.

U. S. sixes of 1881 closed here at 113¾@114; U. S. Five-twenties of 1862, 109½@109¾; U. S. Five twenties of 1864 at 109@109¼; U. S. Five-twenties of 1865 at 109⅛@109⅜; U. S. Five-twenties of 1865, consolidated, 107¾@108; U. S. Five-twenties of 1867, 108¼@108½; U. S. Five-twenties of 1868, 108½@109; U. S. Ten-forties at 105⅞@106, ex the March coupon; U. S. Six per cent. currency bonds, 111@111¼.

State Bonds have been in rather quick request, but unsettled in price. A good inquiry has been noted for substantial railway bonds and mortgages at well supported rates. Of the bonds of the the new Chesapeake and Ohio Loan, offered by Messrs. Fisk & Hatch, further considerable sales have been made for investment purposes, at 90 per cent and interest.

Central Pacific Sixes closed on Wednesday at Frankfort at 82¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 28.	March 2.	March 9.

At. and Gt. West		28½	

Railway and miscellaneous share values have been quite irregular through the week, on a rather less extensive Board and street business. At the close the market showed rather more steadiness.

General business has been less active and buyers of most kinds of domestic produce have had any existing advantage as to price. Middling upland cotton closed heavily on Wednesday at 21cts. per lb. The stock of cotton now here is given at about 68,500 bales. The receipts at the port this week, have averaged about 2,250 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,153,700 bales, against 1,652,600 bales in 1868–'9; exports, same time 1,250,000 bales, against 883,500 bales same time in 1868–'9; stock on hand at latest dates, 538,000 bales, against 398,100 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 2,146 pkgs., against 2,385 pkgs., same time in 1869. From Boston, 802 pkgs., in 1870, against 2,981 pkgs. same time in 1869.

At the Live Stock markets, this week, Beeves have been in limited demand, at from 10@17c., per lb.; week's receipts, 5,613. Milch cows continue quiet, at $40@$100 each, receipts, 120. Veal calves have been in slack request at from 8@13 c. per lb.; receipts, 1,028. Sheep and lambs in fair demand at from 5½@9c., and —@—c. per lb.; receipts, 17,781. Swine are dull and heavy at 9⅛@9¾ c. per lb., all live weight; receipts, 12,382.

Foreign goods have been moderately sought after at less firm prices. The week's imports of foreign dry goods were to the specie value of $3,274,840; and of foreign merchandise, $4,257,212, making a total of $7,532,052, against $7,255,441 same week last year. The marketed foreign dry goods have been to the specie value of $3,559,969.

The ocean freight market has been fairly active, especially in the line of cotton, and grain shipments, and rates have been quoted much stronger. For Liverpool we quote flour at 1s. 6d.@1s. 9d by sail, and 1s. 9@2s. 0d. by steamer, per bbl.; grain at 4d. by sail, and 4d.@4½d. by steamer, per bushel; cotton at $\frac{3}{16}$d.@$\frac{7}{32}$d. by sail, and $\frac{5}{16}$@$\frac{7}{16}$d. by steamer per lb.; and heavy goods 12s. 6d.@30s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 405.

The balance in the Sub-Treasury on Wednesday was $81,279,433 23.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 8th, and since the beginning of the year:

	1869.	1870.
For the week	$2,865,839	$3,902,429
Previously reported	26,035,420	27,117,829
Since Jan. 1	$28,901,259	$31,020,258

The imports for the week ending March 5th, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$3,507,848	$3,274,840
Gen. merchandise	3,747,593	4,257,212
Total for the week	$7,255,441	$7,532,052
Previously reported	41,358,863	41,585,604
Since January 1	$48,614,304	$49,117,656

Savannah and Charleston R. R.

Advices from Charleston, S. C., report the completion of the Savannah and Charleston Railroad. This road will shorten the time between New York and Savannah, *via* Charleston, as compared with the old route, ten hours. First mortgage bonds of the Company, issued at the rate of $5,000 per mile, are offered for sale by Messrs. Conduct & Co., 78 Broadway, N. Y.

☞ A contract for grading forty-one miles of the Kansas Pacific Railroad from Denver, was closed on the 4th inst. A large quantity of ties for this road are now being cut at the mouth of the Platte Canon, and the work of laying the iron will be commenced as soon as the Denver Pacific track is completed. It is expected that the Denver Pacific track will be completed in June and the Kansas Pacific track in October.

☞ The *Cecil* (Md.) *Whig* says it is announced on good authority that the Columbia and Port Deposit Railroad will be put under contract for the grading as soon as the spring opens and the weather is favorable for the work, and the grading pushed forward energetically. The property holders on the route are clearing the wood off the land condemned for the track, and making preliminary preparations for the grading.

☞ Sufficient iron and ties for eighty miles of the California and Oregon Railroad are now at the junction of that and the Central Pacific Roads.

☞ The city of Portland, Me., has commenced paying gold, or its equivalent, for municipal coupons, according to the decision of the Supreme Court.

Columbus, Kukora and Springfield R. R.

The subscription books of the Columbus, Kukora and Springfield (N. J.) Railroad, will open on the 29th inst. This road starts at a point on the Camden and Amboy Railroad two and one-half miles below Bordentown and connects with the Pemberton and New-York railroad at New Lisbon. The distance saved by the road between this City and Trenton will be from eight to fifteen miles; and it is thought that Trenton, by means of this road, will become the distributing depot for the merchandise of Monmouth, Burlington and Ocean Counties. The consolidated companies intend, it is said, to render material aid to the enterprise.

☞ The directors of the Boston and Albany Railroad Company have voted that stockholders of record March 2, 1870, will be entitled to receive *one* new share of the capital stock of said Company for every five shares held by them, respectively, on the payment of $100 per share, fifty per cent of which must be paid on or before April 1, 1870, and the balance on or before October 1, 1870. This increases the capital stock $8,200,000, and raises the whole capital to $19,700,000. The principal object is the payment of the temporary loan to Messrs. Baring Brothers & Co. of London of £250,000, the balance being for construction account. By Legislative Act, approved June 23, 1869, the Company are further authorized to issue stock to the amount of $8,000,000.

☞ The directors of the Worcester and Nashua railroad company have voted to sell 1,550 shares of the capital stock now owned by the company. The stock is offered to stockholders at $100 per share, in the proportion of one new to ten old shares. The proceeds are to be expended on the road. The books of subscription, which are now open, will be closed on the 1st of May. Each stockholder subscribing will be required to pay fifty per cent May 1, twenty-five per cent October 1, and the balance by December 1.

☞ Bridge Theories as well as the structures themselves cannot be too closely scrutinized and criticised. We therefore call attention to the article by Mr. Shreve, Civil Engineer, of this city, in our present issue. As spans of bridges are growing longer, economy, as well as safety, demands that the strains which determine their proportions and style should be well understood by engineers and weak and false theories exploded and abandoned.

☞ A bill has been introduced into the Canadian Parliament to incorporate the "Detroit River Transit Company." It is in the interest of the Great Western and Michigan Central Railroad companies. The capital stock of the company is $3,000,000. The company is to be organized as soon as $1,000,000 are subscribed and ten per cent thereof paid up. The company will have power to build either a bridge over the Detroit River or to construct a tunnel.

☞ The contract for building the Belleville and Southern Illinois Railroad from its present terminus at New Athens to Duquoin, where it will connect with the Illinois Central, will be let on the 17th inst. The length of this section is 41 miles.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of February, were:

ENTERED FOR CONSUMPTION.

	1869.	1890.
Manufactures of wool.....	$1,799,449	$1,967,695

☞ The Wilmington (N. C.) *Star* says that on Saturday, 5th inst., in the Judge of Probates Court a deed was probated, the consideration of which amounted to $275,000. The deed was made by M. Cronly, Esq., commissioner, in favor of Mr. W. T. Walters, of Baltimore, being for the conveyance of the Wilmington and Manchester Railroad to the latter party, who became the purchaser some time since.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for the two months from January 1st:

	1869.	1870.

☞ A company has been incorporated in California to build a railroad from some point near San Francisco through the northern coast counties, with a view to the opening of a route through the picturesque county of Mendocino.

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN LIABLE FOR INJURY—MEASURE OF LIABILITY.

The action of The Illinois Central Railroad Company *vs.* Middlesworth (43 Ill. p 64) was one of trespass on the case of Middlesworth *vs.* The Illinois Central Railroad Company and contained three counts. The first for negligence, in failing to fence their track, whereby the stock was killed. The second and third for killing the plaintiff's mules, by negligent management of the engine and cars of the company in operating their road.

A trial was had by the court and a jury. It appears that plaintiff had a large herd of mules in a pen adjoining the road-way of defendant, the fence on the side of the road forming one side of the lot in which the mules were confined. That the mules broke into the road, and a passing train killed twenty-two of the herd, worth, as it was agreed, $2,840.

Plaintiff introduced evidence to prove negligence on the part of the employees of the road, and defendant, testimony to prove care and diligence.

The jury found a verdict for the plaintiff, and assessed the damages at $2,840. Defendant entered a motion for a new trial, which was overruled, and judgment rendered on the verdict, and defendant, to reverse the judgment, prosecutes this appeal.

The following is the opinion of the court by

WALKER, CH. J.—A reversal is asked, because the court below refused to give appellant's fifth instruction. It asserted a correct legal proposition, and should have been given. It informed the jury, that although the railroad company might have been guilty of negligence in the management of their train, yet if appellee was also guilty of a want of proper and reasonable care and prudence on the occasion of the injury, by placing so large a number of mules in an enclosure of the size stated, then, unless the evidence showed that the conduct of the engineer was negligent, and not merely imprudent, the appellee could not recover.

This court has repeatedly held, that, in this class of cases, where it appears that the plaintiff has been guilty of negligence contributing to the injury, he cannot recover, unless it appears that the defendant has been guilty of negligence more gross than that of the plaintiff, that in this class of actions the jury may compare the degrees of negligence. This instruction substantially told the jury, that, if appellee had been guilty of unreasonable negligence, and the engine driver had not been guilty of gross negligence, they should find for appellant. By this instruction the jury would have been required to determine whether appellee had been guilty of unreasoable negligence, and if so, then whether the employees had been guilty of gross negligence. If they had so found, then they would have been required to find for appellee; but if they found appellee guilty of negligence, and the engineer of no greater or higher degree of negligence, they would have found for appellant.

The first count in appellee's declaration proceeds for a liability in failing to fence their railroad track, whereby the stock was killed. The second and third counts proceed for damage to the stock from the negligence of the company

Each count containing a separate cause and ground of recovery, to succeed under it, the plaintiff must sustain it by proof of the facts contained in its averments. A count setting up one cause of action cannot be sustained by proof of another and different cause of action. To have recovered under the second or third counts, in this declaration, it was, therefore, indespensably necessary to prove negligence on the part of the appellant, producing the injury complained of and for which a recovery was sought. The sixth instruction announced these rules, and should, therefore have been given. The judgment is reversed and the cause remanded.

Judgment reversed.

Great Western Railway of Canada.

It will be remembered that in October, 1869, a deputation of the Great Western Railway of Canada Board, on invitation of Mr. James F. Joy, President of the Michigan Central Railroad Company, visited this country for the purpose of conferring with a committee of the Directors of the Michigan Central with a view of the adoption of such measures as might be deemed best calculated to preserve and protect their respective properties by bringing them into closer union and thus establishing a more efficient cooperation for the advantage of both companies. The deputation having concluded a working arrangement with the Michigan Central, so far as the through traffic is concerned, on the joint purse system and division of the gross earnings according to the average of past results, a special general meeting of the shareholders of the Great Western was held in London on the 16th ult., at which it was resolved unanimously that the terms of a traffic agreement between the Great Western Railway of Canada, the Michigan Central Railroad, and the Detroit and Milwaukee railroad companies be approved and adopted. At this meeting the Chairman of the Board of Directors (Mr. Alderman Dakin) made a full and lucid statement of the agreement concluded between the Great Western, Michigan Central, and the Detroit and Milwaukee for the division of the through traffic of the three companies, and of which the following is the substance:

The shareholders would remember that in October last the subject of the Michigan Central Railroad was discussed under the authority of the board. Two of the directors accompanied him to America for the purpose of conferring with three directors of the Michigan Central Company, in order to bring about a more harmonious working of the two companies than had hitherto been the case, and he found a most friendly desire on the part of the Michigan Central Company to establish a close alliance with them, and he thought that the shareholders would think that their visit to Canada had been beneficial, not only as regarded the agreement with the Michigan Central, but also with respect to the more economical and better working of their own line. The Michigan Central was one of the most stable and well worked lines in America, and they felt that it was of great importance to maintain a friendly alliance with them. There were four lines of railway carrying the through traffic from Chicago to New York. Their own line once stood as No. 1, but it had since gone down to No. 3 or 4. The other lines were consolidated and vigorously managed, and they thought it better to have recourse to some immediate scheme for the consolidation and better working of the line. The question of a working arrangement with the Michigan Central appeared to have the advantage of remedying the evils which they deprecated, and it would deal with the through traffic and leave them to deal with the local traffic themselves. The arrangement was to last two years, from January 1870, and at the end of that period would be subject to revision. The proportion which the profits of the two companies for the past two years bore to each other was thought to be the proper proportion in which the proffts should be divided for the next two years. The Detroit and Milwaukee Railroad had also been admitted into the agreement. The Great Western would receive 48¼ per cent of the profits; the Michigan Central, 44¼; and the Detroit and Milwaukee about 7 per cent. The through mileage of the three lines is as follows: Great Western, 229; Michigan Central, 284; and Detroit and Milwaukee, 189. The reason of the Detroit and Milwaukee Company receiving such a small proportion as 7 per cent was the smallness of the through traffic on that line. This was, however, amply balanced by the large amount of local traffic which that company carried, and out of which the profits chiefly arose.

Commerce of the United States.

During the first six months of the fiscal year commencing July 1, 1868, the imports of merchandise into the United States amounted to $181,889,329; and of specie to $6,158,258—making a total of $188,047,587. During the same period the exports of merchandise, reduced to the standard of gold at 39½ per cent (the average premium of the year,) amounted to $120,713,681; the exports of specie and bullion were $23,991,016—making a total of $144,704,697. During the same period the re exports of merchandise were $5,075,595, and of specie, $4,075,694—total, $9,151,289; showing the total exports of the country for the first six months of the fiscal year 1868--9 to have been $153,855,986; and the apparent balance of trade against the United States, $34,139,601. Of the aggregate trade between the United States and other countries, merchandise was carried in American vessels to the amount of $125,756,903. Estimating the freights at 8 per cent gives $10,060,552, as the amount received for the use of American ships in the foreign trade. This amount deducted from the apparent balance against the United States shows an actual balance against the United of $24,129,049.

The merchandise imported during the six months commencing July 1, 1869, amounted to $202,520,884; and of specie, $11,172,308—making an aggregate of imports of $213,693,192. The exports of merchandise for the same period, reduced to the standard of gold at 31 per cent (the average premium of the six months) amounted to $165,541,772; the specie and bullion exported during the same period was $21,282,062—making an aggregate of $186,823,834. The re-exports of specie for the same period were $5,426,091, and of merchandise $6,874,186—making a total of exports of $199,124,111, and showing a nominal balance against the United States of $14,569,081. Of the entire amount of exports and imports, merchandise was carried in American ships to the amount of $156,035,216. Estimating the freight at 8 per cent, gives $12,490,817, which deducted from the nominal balance against the United States of $14,569,081, shows a real balance against the United States for the six months commencing July 1, 1869, of $2,668,264. For the six months commencing July 1, 1868, the exports and re exports of specie and bullion amounted to $28 066,710; during the same period the imports amounted to $6,156,258—showing a balance against the United States of $21,910,452. The exports of specie for the six months commencing July 1, 1869, were $21,282,062, and the re exports of specie and bullion $5,426,091—showing total of exports $26,708,153. During the same period the imports of specie amounted to $11,172,308, or a balance against the United States for the same period of $15,535,845; showing an improvement in favor of the latter period in the specie account of $6,375,607.

Tehuantepec Canal.

The Minister of the Department of Public Improvement, Colonization, Industry and Commerce of Mexico, has transmitted to the Congress of that Republic a letter, containing the draft of a law authorizing the Tehuantepec Railroad Company to build a ship canal in addition to its railway across the isthmus. Surveys are to be made in five years and the plans must be approved by the Government. The construction of the canal is to be commenced within three years after the approval of the plans. The right of way and large grants of land are made in aid of the enterprise; the machinery, tools, coal and articles of prime necessity for the use of the employees are to be imported free of duty; the capital invested in the canal is to be free from contribution and taxation and no transit tax is to be levied. Various other important privileges are granted, but certain clauses would seem to place the stockholders at the mercy of the Mexican Government. The objectionable sections of the proposed law provide that "all persons now or hereafter engaged in the enterprise are to be regarded as naturalized Mexicans, and cannot bring forward claims as foreigners," and also that "controversies concerning the construction of the grant and the execution of the law shall be decided by Mexican tribunals." The Minister of Public Improvement recommends the granting of the application by the Tehuantepec railway, and asserts that explorations already made demonstrate that the Isthmus of Tehuantepec presents less difficulties than the Isthmus of Darien, to which the attention of the United States is now directed.

Chesapeake and Cincinnati Railroad.

A meeting of the corporators of the Chesapeake and Cincinnati Railroad was held in Cincinnati on the 4th inst., Judge Johnson, of Ironton, in the chair. This is the river route, with the eastern terminus opposite the Guyandotte river, passing through Ironton, Portsmouth, Manchester, Ripley, Agginsport and New Richmond to Cincinnati. Resolutions were adopted providing for a preliminary survey, and appropriating $4,000 for this purpose. A temporary organization was effected, with George H. Peneleton, President; Joseph Kinsey, Secretary; D. T. Woodrow, Treasurer. The friends of this road appear to be determined to push it forward.

☞ Mr. Ruff, contractor of the first ten miles of the Pittsburg and Connellsville Railroad, from Connellsville, will have his contract finished by the 1st of July next, and trains will be running to Indian creek. That portion already finished is an excellent piece of road and reflects great credit on the able and efficient contractor.

☞ The following gentlemen have been elected directors of the Pennsylvania Railroad Company: J. Edgar Thomson, Josiah Bacon, Wistar Morris, George Black, Samuel T. Bodine, Joseph B. Myers, Edward C. Knight, Washington Butcher, John M. Kennedy and John Rice.

☞ The locomotive on the branch of the Memphis, El Paso, and Pacific Railroad is now running to Black Cypress, on Caddo Lake.

Martinsburg and Potomac Railroad.

The engineering party under the direction of Edwin Watts, who are engaged in the survey and location of the railroad from the Potomac River to Martinsburg, consists of a chief engineer, two assistants, and six men in other capacities. They have not been engaged in their field operations more than ten days, and although retarded by the late spell of bad weather, are pushing on their work with vigor and energy. They are now quartered at the Falling Waters. The President of the Baltimore and Ohio Railroad has instructed James L. Randdolph, the Chief Engineer of the Baltimore Road, to co operate with Edwin Watts, the Chief Engineer of our road, in the selection of a suitable point for the crossing of the track of the Baltimore Road. In view of the heavy business on the Baltimore Road, involving the constant use (day and night) of the tracks both east and west of Martinsburg, it maxes the selection of a suitable point of crossing a subject of careful considerotion.—*Berkely (West Va.) Union.*

Baltimore and the Northwest.

The following from the Columbus (Ohio) *Statesman* shows the route by which Baltimore expects to reach the Lakes and the Northwest by an additional route in connection with the Baltimore and Ohio road:

The certificate of incorporation of the Baltimore and Ohio, Toledo and Michigan Railroad Company was filed Wednesday at the office of the Secretary of State. The company is organized for the purpose of constructing a railroad from the city of Mansfield, Ohio, to the boundary line between the States of Ohio and Michigan. The road will pass through the counties of Richland, Crawford, Huron, Seneca, Sandusky, Wood and Lucas, and also through the city of Toledo. Capital $1,500,000, in shares of $50 each. The corporators are Samuel M. Young, John Fitch, Richard Mott, Valentine H. Ketcham and Valentine Braun.

☞ The Sherbrooke *Gazette* says there is every prospect that the Massawippi Valley Railroad will be completed and in running order within the contract time, July 1, 1870. The 18 miles from Lennoxville to Ayre's Flat, is now ready for the track. The section above is already completed and accepted. The road follows the valleys of the Massawippi and Tomifobi Rivers and the Massawippi Lake.

☞ A bill has passed the Minnesota Legislature providing for the payment of the old State Railroad bonds, and exempting the lands from taxation for ten years.

☞ The Extension of the Hackensack and New York Railroad, from Hackensack to Hillsdale, 8½ miles, has been completed. The final terminus of the road will be Haverstraw.

☞ Twenty six additional miles of the Missouri River, Fort Scott and Gulf Railroad, south of Fort Scott, Kansas, have been completed and are open to business.

☞ A railway to run between Benares, Fyzabad, and Lucknow, India, has been commenced.

IMPORTANT TO OWNERS OF STEAM BOILERS.

LARGE PEREMPTORY SALE.

Very Valuable Machinery.

RICHARD NORRIS & SON'S LOCOMOTIVE WORKS,
17th Street between Pennsylvania Avenue and Spring Garden Street.,
PHILADELPHIA, PENN.

THOS. BIRCH & SON, Auctioneers.

On Tuesday morning, May 3rd, 1870, at 10 o'clock, will be sold at public sale on the premises of Richard Norris & Son's Locomotive Works, 17th Street, between Pennsylvania Avenue and Spring Garden St., the entire valuable machinery, consisting of 5 STATIONARY ENGINES varying from 15 to 100 horse power; 14 Cylinder Boilers; 50 Plaining Machines varying from 12 to 60 inches, length of bed from 2 to 36 feet; 100 Slide Rest and Screw Cutting Lathes varying from 12 to 36 inches swing; Length of Shears from 3 to 26 feet; 50 small hand Lathes; 2 very large Slide Rest, Wheel Lathe swing 6 ft. 6 in.; 25 Sloting machines various size strokes; 2 Merrick & Son's Large Steam Hammers; 20 double and Single Drill Presses; 1 Seller's Hydraulic Wheel Press; 1 Seller's large size Boring Mill with universal chuck; 1 Whitworth Radial Drill Press; 1 Whitworth Screw Cutting Slide Rest Lathes large size; 1 Whitworth 48 inch Planer; Double head gear cutting engine, large size; large and heavy Railroad Iron Shears; 1 Tyre Expanding and Rounding machine; 1 Tyre Bending machine with Furnace Castings with Fire Brick; Shafting, Hangers, Pulleys, and Couplings; 3 large Platform Scales; 6 small Platform Scales; 4 new Lever Beams —graduated to weigh 16 Tons each with weight complete —the above Scales made by Abbott & Co.; 2 complete Furnaces for Heating Scrap Iron with Boiler on top—to supply Steam Hammers; 100,000 Lbs. Slabs Wrought Iron faggottit from Boiler and machine shops scraps of the best quality; 1 complete Pho ographic Apparatus; Tons wrought and cast scrap Iron $50,000 worth; New Bar and Tool Steel; Bar Iron; 10,000 feet of Belting; 50,000 feet of Gas pipe; 200 feet large Lead Water Pipe; Machinists', Blacksmiths' and Boiler makers' Tools; complete assortment of Foundry Flasks; Ladders; 2 Cupolas; Large Foundry Cranes; 1,000 new Birmingham Boiler Fines; 2 in. Diameter No. 12 Wire Gauge; 200 Anvils; 500 Vices; Spinners, Lathes and Tools, Jacket, Machine, Wood Plaining machines, Circular Saws, Large Locomotive Trucks, Turn Tables, Carts, Drays, Harness, &c., &c. Catalogue ready April 1st, can be obtained by applying to the Auctioneers. The sale will commence Tuesday, May 3rd, at 10 o'clock, and will be continued daily until the whole is sold. The Factory will be open on Monday, May 2d, for examination.

CHEAP PAINTING.—
1/2 COST LEAD
100 lbs. of the PECORA COMPANY'S COLORED PAINT (costing $12.50) will paint as much as 250 lbs. of Lead, and wear longer. For particulars, address S. BOWEN, Sec'y., No. 150 North 4th St., Philada.
or 75 Maiden Lane, N. Y.

Providence Water-Works.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the Office of the Board of Water Commissioners, Wood's Building, City of Providence, until 11 o'clock A. M. of Tuesday, the 12th day of April 1870, for the construction of a RESERVOIR on SOCKANOSSET HILL in CRANSTON.

The Reservoir is to be a first-class work, of nearly triangular form, about one thousand feet long, and eight hundred and sixty feet wide, at the base, and nineteen feet deep, with inlet and outlet chambers and connecting conduit.

Plans may be seen, and Specifications of Contracts and Proposals obtained, at the said Commissioners' Office.

M. B. LOCKWOOD,
CHAS. E. CARPENTER,
JOSEPH J. COOKE,
} Water Commissioners.

J. HERBERT SHEDD, Chief Engineer.

Locked Safety Valves.

TO

MASTER MECHANICS

AND

LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

Chesapeake and Ohio Railroad.

OFFICE OF FISK & HATCH.

BANKERS AND DEALERS IN GOVERNMENT SECURITIES.

No. 5 NASSAU-ST., NEW YORK, FEB. 15, 1870.

The remarkable success which attended our negotiations of the Loans of the CENTRAL PACIFIC RAILROAD COMPANY and the WESTERN PACIFIC RAILROAD COMPANY, and the popularity and credit which these loans have maintained in the markets, both in this country and Europe, have shown that the First Mortgage Bonds of wisely-located and honorably-managed railroads are promptly recognized and readily taken as the most suitable, safe, and advantageous form of investment, yielding a more liberal income than can hereafter be derived from Government bonds, and available to take their place.

Assured that in the selection and negotiation of superior Railroad Loans, we are meeting a great public want, and rendering a valuable service—both to the holders of capital and to those great national works of internal improvement whose intrinsic merit and substantial character entitle them to the use of capital and the confidence of investors—we now offer with special confidence and satisfaction the FIRST MORTGAGE BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY.

THE CHESAPEAKE AND OHIO RAILROAD, connecting the Atlantic coast and the magnificent harbors of the Chesapeake Bay with the Ohio River at a point of reliable navigation, and thus, with the entire railroad system and water transportation of the Great West and Southwest, FORMS THE ADDITIONAL EAST AND WEST TRUNK LINE, so imperatively demanded for the accommodation of the immense and rapidly growing transportation between the Atlantic seaboard and Europe on the one hand, and the great producing regions of the Ohio and Mississippi valleys on the other.

THE IMPORTANCE OF THIS ROAD AS A NEW OUTLET FROM THE WEST TO THE SEA magnifies it into one of national consequence, and insures to it an extensive through traffic from the day of its completion; while, in the development of the extensive agricultural and mineral resources of Virginia and West Virginia, it possesses, along its own line, the elements of a large and profitable local business.

Thus the great interests, both general and local, which demand the completion of the CHESAPEAKE AND OHIO RAILROAD to the Ohio River, afford the surest guarantee of its success and value, and RENDER IT THE MOST IMPORTANT AND SUBSTANTIAL RAILROAD ENTERPRISE NOW IN PROGRESS IN THIS COUNTRY.

Its superiority as an East and West route, and the promise of an immense and profitable trade awaiting its completion, have drawn to it the attention and co-operation of prominent Capitalists and Railroad men of this City of sound judgment and known integrity, whose connection with it, together with that of eminent citizens and business men of Virginia and West Virginia, insures an energetic, honorable and successful management.

The Road is completed and in operation from Richmond to the celebrated White Sulphur Springs of West Virginia, 227 miles, and there remain but 200 miles (now partially constructed) to be completed, to carry it to the proposed terminus on the Ohio River, at or near the mouth of the Big Sandy River, 150 miles above Cincinnati, and 350 miles below Pittsburg.

Lines are now projected or in progress through Ohio and Kentucky to this point, which will connect the CHESAPEAKE AND OHIO WITH THE ENTIRE RAILROAD SYSTEM OF THE WEST AND SOUTHWEST, AND WITH THE PACIFIC RAILROAD.

Its valuable franchises and superior advantages will place the CHESAPEAKE AND OHIO RAILROAD COMPANY among the richest and most powerful and trustworthy corporations of the country; and THERE EXISTS A PRESENT VALUE, IN COMPLETED ROAD AND WORK DONE, EQUAL TO THE ENTIRE AMOUNT OF THE MORTGAGE.

The details of the loan have been arranged with special reference to the wants of all classes of investors, and combine the various features of convenience, safety and protection against loss or fraud.

The Bonds are in denominations of $1,000, $500 and $100.

They will be issued as COUPON bonds, payable to bearer, and may be held in that form; or

The Bond may be REGISTERED in the name of the owner, with the coupons remaining payable to bearer attached, the PRINCIPAL being then transferable only on the books of the Company, unless reassigned to bearer; or

The coupons may be detached and canceled, the Bond made a PERMANENT REGISTERED BOND, transferable only to the registered owner or his attorney.

The three classes of Bonds will be known respectively as:

1st. "COUPON BONDS PAYABLE TO BEARER."

2d. "REGISTERED BONDS WITH COUPONS ATTACHED."

3d. "REGISTERED BONDS WITH COUPONS DETACHED," and should be so designated by correspondents in specifying class of Bonds desired.

They have THIRTY YEARS to run from Jan. 15, 1870, with interest at six per cent. per annum from Nov. 1, 1869. PRINCIPAL AND INTER-

EST PAYABLE IN GOLD IN THE CITY OF NEW YORK.

The interest is payable in MAY and NOVEMBER, that it may take the place of that of the earlier issues of Five-twenties, and suit the convenience of our friends who already hold Central and Western Pacific Bonds, with interest payable in January and July, and who may desire, in making additional investments, to have their interest receivable at different seasons of the year.

The Loan is secured by a mortgage upon the entire Line of Road from Richmond to the Ohio River, with the equipment and all other property and appurtenances connected therewith.

A SINKING FUND OF $100,000 PER ANNUM IS PROVIDED FOR THE REDEMPTION OF THE BONDS, TO TAKE EFFECT ONE YEAR AFTER THE COMPLETION OF THE ROAD.

The mortgage is for $15,000,000, of which $2,000,000 will be reserved and held in trust for the redemption of outstanding Bonds of the VIRGINIA CENTRAL RAILROAD COMPANY, now merged in the CHESAPEAKE AND OHIO.

Of the remaining $13,000,000, a sufficient amount will be sold to complete the road to the Ohio River, perfect and improve the portion now in operation, and thoroughly equip the whole for a large and active traffic.

The present price is 90 and accrued interest.

A Loan so amply secured, so carefully guarded, and so certain hereafter to command a prominent place amongst the favorite securities in the markets both of this country and Europe, will be at once appreciated and quickly absorbed.

Very respectfully,

FISK & HATCH,
BANKERS.

P. S.—We have issued pamphlets containing full particulars, statistical details, maps, &c., which will be furnished upon application.

We buy and sell Government Bonds, and receive the accounts of Banks, Bankers, Corporations and others, subject to check at sight, and allow interest on daily balances.

Marietta and Cincinnati Railroad.

The earnings of this road for the years ending December 31, 1868 and 1869, were as follows:

	1868.	1869.
From passengers	$639,373 46	$388,316 03
" freight	844,529 25	939,602 26
" mail	23,737 44	23,737 44
" express	42,718 49	38,454 09
" telegraph	7,728 48	6,235 83
	$1,288,087 12	$1,391,345 65
Expenses, viz.:		
Road department	$402.967 23	$491,077 19
Machinery "	381,265 85	380,302 60
Transp. "	236,257 40	240,403 08
General charges	71,642 18	86,151 76
Telegraph	12,985 27	13,971 29
Mileage of cars	12,499 42	31,758 41
	$1,117,617 35	$1,243,664 33
Net earnings	$170,469 77	$147,681 32

Compared with the previous year the gross earnings show an increase of $103,258.53; with an increase in expenses of $126,046.98—making a decrease in net earnings of $22,788.45. The report says:

In May, 1869, a fast schedule for passenger trains between Baltimore and Cincinnati was adopted, reducing the time of transit to 23½ hours, being the quickest time heretofore made between those cities. The Marietta and Cincinnati road was enabled, because of the greatly improved condition of its track and road-bed, to contribute its share, with the Baltimore and Ohio road, to the increased speed; and the route was, for the first time, successfully opened, as a first-class passenger line, via Parkersburg, between Cincinnati and the seaboard cities, especially Baltimore and Washington. This schedule was maintained with great success, without accident, during the season.

Agents have been employed to present the advantages of the route to the public, and it is believed that this valuable business will rapidly develop, and become, at an early day, a source of largely increased revenue. The increase of $10,834 68 in excess of 1868, in through passengers, is very gratifying, being 33 per centum.

For several months in 1869, the Northern Trunk Lines were engaged in a reckless competion for control of the through business between New York and the West. When rates reached the point at which it was an absolute loss to transport the property, the Baltimore and Ohio Company withdrew from the New York market, and consequently this company did not receive as much revenue from through freights as was anticipated. The continuance of that conflict reduced prices from all the Atlantic cities, thus affecting the earnings from through business.

Under those circumstances, the very considerable increase of receipts from through freight, $58,097.16, is very encouraging. The great advantages secured, by transporting freight directly through, without transhipment, have been appreciated by shippers at Cincinnati, Indianapolis, Lafayette and other Western points, as well as the Eastern cities, and the route has become a favorite one.

It is to be regretted that the Ohio and Mississippi Company has not changed the guage of their road. A very considerable amount of through business has been interchanged between the two companies at the transfer depot, and largely increased revenues, over previous years, realized. But the traffic would greatly improve, if cars could be run through without breaking bulk, between the Atlantic cities and St. Louis, in connection with the Ohio and Mississippi road.

During the last six months of the year the company was unable, for want of a sufficiency of engines and cars, to transport at all times, the traffic offering, particularly in September and October, when it was obliged to decline some through business. All the equipment of the company was taxed to its utmost capacity. The great necessity for increased plant must be met before next season.

Local shipments of wheat, flour, pig iron and ore, increased in comparison with 1868. A reduction in local tariffs was established in July, 1869, affecting the revenue from this branch of business.

A new and valuable traffic has been established in the transportation of Missouri and Lake Superior iron ore, to combine with the native yields. 7480 tons of these ores have been hauled in 1869 from Cincinnati to the furnaces along the line, affording freight for flat cars, which otherwise would, to a great extent, have been returned eastwardly empty.

The coal trade shows a decrease of $32,057.56, as compared with 1868. This is to be accounted for, to a great degree, by the suspension of work by the Southern Ohio Coal Company, during the autumn, when this traffic is largest.

The policy adopted in 1868 of placing the line, as rapidly as practicable, in good condition, was steadily maintained during 1869. Notwithstanding a very considerable floating debt was created previous to 1869 in furtherance of this object, the Board decided to continue this liberal policy until the road could be regarded as in first-class condition.

During most of the year two construction trains were used upon the road, and a very large amount of ditching and surfacing accomplished. In addition to these expenditures over forty miles of road, never ballasted hitherto, were ballasted with broken stone and gravel.

2,984 tons of new and re-rolled rails were placed in the track, making a total of 5,152 tons, from March 1, 1868, to December 31, 1869.

At Little Creek, where a two span bridge on wooden supports, was lost by flood in 1868, a single span bridge, 100 feet long, with stone abutments has been built. Stone masonry has been substituted for wood structures, at several other places.

144,049 new cross-ties were used during the year.

$62,075.77 was expended in repairing and renewing bridges, and these structures may be regarded as in good condition.

The water stations have been greatly improved during the year; $32,201.29 having been expended on this account.

The machinery and the condition of freight and passenger cars have been maintained to the full standard.

The following statement furnishes in detail, the items of construction during the year:

Arching Pilcher Tunnel, completed in May, 1869, and timbering Tunnel, No. 1	$25,875 64
New Sidings (nearly four miles in the aggregate)	26,095 50
New Water Stations at Chillicothe and Loveland	10,438 93
Fencing	2,554 25
Ferris' Branch	242 65
Mineral Branch	109 00
Depot Grounds	2,287 56
Rights of Way	6 657 75
New Stationary Machinery	1,503 87
Locomotives; expenditures for changing guage of engines received from Scioto and Hocking Valley Road, and not heretofore in use on M. and C. road, and for rebuilding engines not in use since the re-organization of the company	14,466 06
New passenger cars	6,971 94
New construction cars	620 94
68 flat and coal cars, and 10 stock cars	43,504 82
Hand cars	2,131 31
Total	$143,460 22

The very heavy expenditures of the past two years, incurred in the effort to place the road in first-class condition, have created a floating debt amounting to $972,290.32.

In view of the insecure physical condition of the road in the spring of 1868, the company was obliged, either to allow the property to continue to depreciate—the result of which policy would have been to render, in a very brief period, the road unsafe for transportation of either passengers or freights—to take the risk of most disastrous accidents, and to fail in the duty of presenting a road warranting the confidence of the public, or to incur a heavy floating debt.

The Board, in consideration of the desirable and essential object to be attained, did not hesitate to assume this great burden, confidently expecting that the period would arrive when the debt could be funded upon satisfactory terms. During a period of great financial stringency, the floating debt, with the assistance of the Baltimore and Ohio company, has been successfully carried upon moderate terms.

Although so much has been accomplished, a great amount of work upon the road remains to be done, and additional equipment must be provided to meet the rapidly increasing traffic.

Ten new locomotives, two hundred and fifty freight cars, ten passenger cars, and four baggage cars, in addition to the present equipment, will, it is believed, be required to accommodate the traffic in 1870, and this expectation is only reasonable when it is remembered that this amount of additional equipment could have been profitably used from 1st July to 31st December, 1869.

Sixty miles of road have never been ballasted,

It is important this should be done next season.

Additions to the machine shops, and a new station house at Chillicothe, are urgently needed.

A great portion of track between Chillicothe and Loveland was laid originally with English "compound rail," of excellent quality. Much of it is yet on the track, and has been in use from thirteen to sixteen years. These rails have worn very rapidly of late, and, to a considerable extent, the track between the points named will require relaying.

Additional subscriptions to the stock of the Cincinnati and Baltimore railway company, to the extent of $150,000, will be required.

Iron bridges should be substituted for wooden structures as rapidly as practicable. Heavy expenditures must be incurred in additional permanent improvements of the roadway and structures upon the line.

The trestles east of Athens should be filled, if the road be permanently maintained upon the existing route.

Vanderwarker Tunnel, 1,300 feet in length, should be arched.

At Athens a permanent route should be established, either through the proposed tunnel or around the town.

It is important, in order to insure economy in working the line, that the temporary grades and curves be abandoned, and the road located permanently with low grades, and as nearly as practicable, upon a straight line.

This company, under its agreement with the Baltimore and Ohio company, is obliged to furnish one-third of the capital required to build the bridge over the Ohio river at Parkersburg. No payment has been made on this account.

These improvements are essential to the ultimate success of the company and the permanent value of its property.

It is evident the net receipts of the road will, for the present, be absorbed in paying the interest on the bonded debt.

The company owns real estate, embracing land in Hamilton county, and coal lands in Athens and Vinton counties, not required for railroad purposes, valued at $600,000, and stock in the Columbus and Hocking Valley road which cost $50,000. Apart from these resources, the company has no means to pay the floating debt, and to meet the heavy expenditures referred to, and the Board therefore recommends to the stockholders, that a third mortgage be issued for three millions of dollars to meet these essential requirements. It is believed that these securities can be disposed of at fair rates; and by careful management the proceeds will relieve the company of financial embarrassments, and furnish a road thoroughly equipped and provided with the facilities to accommodate satisfactorily a large and remunerative traffic.

BRIDGE AT PARKERSBURG.

The Baltimore and Ohio company has pressed with great vigor, the work upon this structure, and has completed all the piers in the Ohio river. A large amount of work has also been done upon both shores, and there is every reason to suppose that the bridge will be finished in 1870. This improvement is of the greatest value to the Marietta and Cincinnati company, and a large increase of revenue, particularly from through traffic, may be anticipated upon its completion.

CINCINNATI AND BALTIMORE RAILWAY.

The work upon this road was commenced at Mill Creek Bridge, above the Hamilton and Dayton Junction, in June, 1869. After careful surveys, it was decided to adopt the route upon the east side of Mill Creek, although more expensive, because of the greater length and additional height of embankment as compared with the route upon the west side—the eastern route being 1130 yards shorter, and affecting most advantageously the company's property in that locality. It is believed that the additional price which will be realized, in the enhanced value of the company's real estate, will more than compensate for the increased outlay, besides securing a route in all respects the most desirable. Under the resolution of the Board authorizing a subscription for $250,000 of the capital stock of the Cincinnati and Baltimore company, the Marietta and Cincinnati company has subscribed and paid for $100,000 of stock, and advanced $72,929 in cash, additionally. During the great financial stringency, prevailing through the entire year, very little progress was made in obtaining individual subscriptions to the stock, but efforts will be renewed to secure subscriptions in Cincinnati. The guarantee by the Marietta and Cincinnati company of a dividend of eight per cent. annually, free of tax, makes this a most desirable investment.

Upon the completion of the road to Spring Grove avenue, the work was suspended, because of a temporary injunction obtained against the company, restraining it from building bridges across Spring Grove avenue and Colerain pike. With the desire of meeting all objections, the company contracted for expensive wrought-iron bridges, of graceful proportions and superior workmanship, elevated at a height of thirteen feet across these roads, and it was expected that this liberal action would have been met in a proper spirit by the avenue companies. The delay has been serious, and has caused very considerable increased outlay, as well as retarded an improvement highly beneficial to the city of Cincinnati.

In January, 1870, the case was tried in the Court of Common Pleas, and the temporary injunction obtained by the avenue companies dissolved, and a perpetual injunction granted to the Cincinnati and Baltimore company prohibiting any interference in the work. The case goes to the District Court in April next for final hearing, and no apprehension is felt as to a decision in favor of the company.

GENERAL REMARKS.

The large outlays upon the road during 1868 and 1869 have greatly improved its material condition, which may now be regarded as superior to that of any previous period in the company's history. The singular exemption from accident with which a schedule for passenger trains, much faster than heretofore in operation, has been maintained, and with which the large freight traffic has been performed, is sufficient evidence of the wisdom and true economy of these expenditures. There is every reason to believe that the business of the company for 1870 will exceed that of any previous year.

From the relief to the financial condition of the company, by sale of bonds proposed to be issued, it is expected that the company will be able to furnish, at all times, sufficient equipment to perform any amount of business it can secure.

The completion of the Cincinnati and Baltimore railway, and the Ohio river bridge at Parkersburg, together with the improvements, which will be vigorously pressed, will furnish a first-class line from Cincinnati to the Atlantic seaboard, shorter than any existing route, and the ultimate success of the company can not be doubted.

No settlement having been effected regarding $155,000 second mortgage bond not accounted for by S. B. Keys, or Keys & Brother, referred to in last annual report, suit has been ordered against A. L. Mowry, Samuel B. Keys and George E. Bend.

The company have 52 locomotives, viz: 19 passenger and 33 freight; of these 46 are now burning coal. During the year the engines have made the following mileage: passenger trains, 511,100; freight trains, 608,440; wood and other trains, 152,960; construction, 135,500—total, 1,408,000.

The number of through passengers transported during the year was 8,857; do., local do., 319,642—total, 328,499. Number of tons of through freight, 100,449: do., local do., 287,618—total, 388,067.

This shows an increase in mileage of engines of 217,400; in number of passengers carried, 16,694; and in tons of freight transported, 59,173.

President.—JOHN KING, Jr.

Directors.—John King, Jr., Johns Hopkins, Henry C. Lord, Thomas Whitridge, Nathaniel Wright, R. M. Bishop, J. N. Camden, A. A. Chapman, William T. McClintock, Wylie H. Oldham, John Donnell Smith, W. W. Scarborough, Thomas Phillips.

Treasurer.—CHAS. F. LOW.

Superintendent.—W. W. PEABODY.

☞ The total debt of the city of Portland, Me., including loans to railroads, is $3,389,349, of which the city debt proper, not secured, amounts to $1,822,341. The city valuation is $30,000,000, an increase of $8,000,000 during the last decade, notwithstanding the great fire.

Western Maryland Railroad.

The ordinance passed by the City Council, and ratified by the Maryland State Legislature, authorizing the endorsement by the City of Baltimore of the bonds of the Western Maryland Railroad Company to the amount of $1,400,000, has been approved by the voters of Baltimore at an election for that purpose held on the 8th inst. The ordinance not only provides for the completion of the road to Williamsport, but also binds the railroad company to locate a new, direct and independent line of railroad from a point at or near Owings' Mills to a point in the city of Baltimore west of Pennsylvania avenue, and the principal or main work and repair shops of the company are to be located in or adjacent to the city of Baltimore. Of the amount of bonds authorized to be issued and endorsed, $200,000 are to be set apart and reserved for the construction of the line referred to from Owings' Mills to Baltimore. The ordinance also provides that the Western Maryland Railroad Company, before appropriating any portion of the bonds for the endorsement of which provision is made to the completion or construction of that part of its road west of Smithsburg, in Washington county, shall set apart and apply a sufficient portion of the bonds to complete the construction of the road from its present terminus at Big Pipe Creek, in Carroll county, to Smithsburg; and before any of the bonds shall be applied to the construction of the road between Smithsburg and Hagerstown, the mayor and commissioners of finance shall be satisfied that the Western Maryland Railroad Company has entered into a contract or contracts for the completion of the portion of road east of Smithsburg, and shall reserve enough of said bonds to pay the price at which said portion of the road is contracted for. A portion of the bonds is also to be reserved by the city as a sinking fund to provide for the redemption of the whole on maturity.

New York and Ridgefield Railroad.

The directors of the New York and Ridgefield Railroad have entered into a contract with Messrs. Myers & Co. for the construction and equipment of their proposed railroad from Ridgefield, Conn., to Portchester, N. Y., where it will form a junction with the New York and New Haven Railroad, and thus open direct communication with the city for those residing in the beautiful and fertile valleys through which the road will pass. The contractors will break ground at a very early day, and bind themselves to complete the new road in seventeen months.

☞ Work on the Memphis and Little Rock Railroad is to be commenced as soon as the waters recede sufficiently to allow it. Under the new contracts, the road to White river will be completed by July first. There is only a gap of thirty-four miles in the road between Memphis and Little Rock, and fifteen miles of that distance is graded ready for the laying down of the cross ties and rails.

☞ The Morris and Essex Railroad is now nearly finished from Rutherford Park to the tunnel, including the bridges over Berry's and Kenston's Creek and the Hackensack River. Construction trains now run over the meadows for a considerable distance.

Railroads of Massachusetts.

A tabular statement of the Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the year ending November 30, 1869.

Manufacturing Enterprise.

The McKay Iron Works are now getting in some of the best tools that can be made at Worcester, Mass., for their business; the shops are running daily and machinery is going in which means business. The Works will soon be ready to commence full operations and employ the men that are now doing nothing about the streets. There is perhaps no manufacturing establishment in this city that will bring in more money or employ more labor. An enterprise like this is one of the many things that enrich a city. We are confident that there is no place in this country where manufacturing can be carried on at such an advantage as in Jersey City. You can ship directly to all parts of the world both by land and water. If you want to sell anything you are within fifteen minutes walk of the largest market on this continent, and if people want to buy they all come to New York before they go any where else. Think of the people that arrive in and depart from New York in one day on all the different railroads, and you can judge what is its business. Most of the large manufacturers will be driven out of New York on account of the high rents and the small quantity of land they have to work on. We have plenty of land in Jersey City as yet for all that will come, and we shall welcome all manufacturing enterprises that bring us money and business.

Chesapeake and Ohio Railroad.

In the Virginia Senate, on the 7th inst., in response to the resolution of Mr. Pendleton "inquiring into the terms of contract entered into between the president and directors of the Chesapeake and Ohio Railroad Company and C. P. Huntington and others for the transfer of the franchise and property of the Virginia Central and Covington and Ohio Railroad," reported "that they had examined the terms of the contract entered into between the president and directors of the Chesapeake and Ohio Railroad Company and C. P. Huntington and others, of New York, (a copy of which contract in full is submitted with this report for the information of the Senate,) and that they are of the opinion that the contract is a valid agreement between the parties competent to make it."

The committee respectfully request to be relieved from any further consideration of the subject.

The report was concurred in.

☞ Great changes are about to take place in the organization of the Russian Railways. The government has decided to sell all the existing State railways to private companies, in order to facilitate the speedy completion of the projected lines in the south.

☞ The gross receipts of the Northern (Canada) Railway in 1869 were $671,076, and the ordinary expenses, $338,085. Besides which $164,122 were expended on additional locomotives and rolling stock, new sidings, and works of extension.

☞ It is stated that the Lake Erie division of the Baltimore and Ohio Railroad has contracted to deliver one thousand car loads of Lake Superior iron ore, the present season, to parties in Zanesville, Wheeling and Baltimore.

☞ The completion of the Southern Central Railroad was celebrated at Auburn, N. Y., on the 7th inst., Gen. John H. Chedell is president of the company.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, March 19, 1870.

Stock Exchange and Money Market.

Though the city banks have reported, as the result of the week's business, a loss of about 3¼ millions of deposits, nearly ¾ths of a million of legal tender notes, and 2½ millions of specie, the supply of Money available to responsible borrowers nearly all through the week has been more than equal to their requirements, and ease in rates has been the rule, call loans having been quoted at from 4@6; and strictly prime to good discounts at from 7@8½ per cent. per annum. There has been no notable pressure for accommodation from any source. The speculative demand has been urgent. The mercantile inquiry has been somewhat brisker, but not difficult to meet. There has been a very moderate outflow of currency reported. The Government sold a million of Gold, for currency, during the week. It disbursed a little over half a million of coin interest. The customs revenue of the port exceeded 2⅝ millions. The U. S. Sub-Treasury cut down its general balance slightly during the week. It held on Wednesday morning a currency balance of 5¼ millions, against 5¼ millions the preceding Wednesday. The general balance on Wednesday stood at $81,303,476, against $81,693,682, a week earlier.

The specie reserve of the city banks according to the latest return is $33,399,035, against $17,358,671 same time last year. The city bank deposits are now $209,831,225, against $180,484,458 week ending March 13, 1869. The legal tender reserve amounts to $53,302,004, against $49,639,025 same time last year. The circulation now stands at $33,835,739, against $34,690 445 same time last year. The loans are now $268,140,603, against $261,669,695 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $91,336,000 a day, against a daily average of $100,530,417 the preceding week, and $91,917,000 the week ending with Feb. 27, 1870. The current week's exchanges average about 87½ millions a day. The city banks, last week, reported a loss of $2,499,358 of specie, $3,247,116 of deposits, and $763,929 of legal tender notes. They reduced their loans, $403,609, and increased their circulation, $51,797.

National Bank notes to the amount of $279,320 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $321,895,051, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $22,202,102, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,692,949. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,364,350; and for the public deposits, $17,483 500—making a total of $359,847,850. The Treasury Department last week redeemed and destroyed $635,500 of worn and mutilated fractional currency, and issued $329,206 of new.

The U. S. Sub-Treasury receipts, week ending with March 12, were $3,437,435 in coin, (including $2,573,000 from customs duties,) and $3,755,084 in currency; payments, $3,213,672 in coin, (including $502,390 of coin interest,) and $3,433,952 in currency; balance at the close of the week, $80,851,740 (including $74,558,149, of coin, and $5,138,473 of currency,) against $80,494,089 at the close of the preceding week, showing an increase of $357,651. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $574,487 in coin, (including $464,000 from customs,) and $118,193 in currency; payments, $63,807 in coin, (including $59,000 of coin interest,) and $364,185 in currency. On Tuesday, receipts, $487,643 in coin (including $378,000 from customs), and $355,847 in currency; payments, $113,500 in coin (including $103,000 of coin interest) and $357,714 of currency. The balance at the close of business on Tuesday stood at $81,303,476, (including $5,136,606 of currency, and $74,932,291 of coin) against $81,693,682 a week previous; and $84,198,077 on March 1, 1870. The aggregate receipts of the office in February were $38,237,062, including $11,951,925 from customs; aggregate payments, $35,331,006 including $1,749,000 of coin interest; balance at the close of the month, $83,673,026, against $80,766,970 at the close of January.

The U. S. Sub Treasurer retired, last week, $2,-

504,720 of coin certificates, received for customs.

Government revenues have been yielding quite encouragingly, since our last. The excises, during the week yielded about 3⅝ millions; customs at the port of New York, $2,653,720, and at the outports about $870,000 (in coin) more, making the grand total income for the week equal to about $7,501,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 120 millions.

Gold has been moderately active. The main dealings have been on speculative account. Rather more confidence has been manifested by operators for a rise, though the uncertainty in regard to the pending funding, tax, and tariff legislation in Congress has had a disturbing influence on the general movement. Friday was the liveliest day of the week at the Gold Exchange and the price was advanced to 114. The clearances of that day's business were nearly 147½ millions. The range of the price during the week has been from 110½@114, and the closing quotation on Wednesday was 111⅞. The customs demand has been fair; and the export inquiry quite moderate. The Gold Exchange Bank clearances on Wednesday were down to 59⅝ millions, the smallest amount reported since March 3, when the clearances were only 51¾ millions.

The coin interest payments of the Sub-Treasury on Wednesday were $38,829.

The customs demand for Gold last week, averaged $455,170 a day; thus far, this week, it has averaged $421,000 a day, or equal to a weekly aggregate of $2,526,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $431,414, and since Jan. 1 1870, $3,496,795, against $2,236,377 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $91,703,903, against $87,628,769 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to March 4th, was $1,016,000, against $998,000 same time last year.

The exports of specie, from this port, last week, were $775,685, against $304,228 same week last year; total, since July 1, 1869, $22,603,338, against $28,996,532 same time preceding fiscal year. Government disbursed last week through the U. S. Sub Treasury here, on account of the coin interest on the public debt $502,390, and since July 1, 1869, $66,092,592, against $66,149,377 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to March 4, were $7,648,660, against $6,870,725 same time last year.

From a statement prepared at the National Bureau of Statistics, the aggregate amount of gold produced in the United States from 1848 to 1869, is shown to be $1,071,451,461.

Foreign Exchange has been in liberal supply and more request at reduced figures. Bankers' prime sixty day bills on London closed heavily on Wednesday at 107¾@108, and on Paris to 5.26¼@5.22½; sight bills on London to 108⅜@108⅝, and on Paris to 5.21¼c.@5.20. The offerings of produce bills have been again quite liberal. The week's exports of domestic produce have been to the currency value of $2,586,541, making the total since July 1, 1869, $145,701,640, against $114,309,803 same time preceding fiscal year.

Government securities have been quite sensitive to the fluctuations in gold in the local market, and the variable prospects of the funding bill before Congress, and have been irregular in price, though not offered very freely at the going rates. The inquiry has been on a moderate scale, partly from investment buyers. Government on Wednesday bought in a million of Five-twenties at 106.60@106.75, out of an aggregate offering of nearly 3½ millions.

U. S. sixes of 1881 closed here at 114¾@115; U. S. Five-twenties of 1862, 110@110¼; U. S. Five twenties of 1864 at 108⅞@109; U. S. Five-twenties of 1865 at 109⅜@109⅝; U. S. Five-twenties of 1865, consolidated, 108⅛@108¼; U. S. Five-twenties of 1867, 109@109⅛; U. S. Five-twenties of 1868, 109¼@109½; U. S. Ten-forties at 105⅞@106, ex the March coupon; U. S. Six per cent. currency bonds, 112½@112¾.

Central Pacific Sixes closed on Wednesday at Frankfort at 81½.

State Bonds have been in fairly active demand at, however, irregular prices. Railway bonds and mortgages have been in good request, as a rule, including the new Chesapeake and Ohio Loan, which has been quoted at 90 per cent and interest.

Railway and miscellaneous stocks have been somewhat less confidently dealt in at quite variable figures. The market closed pretty fairly on Wednesday, though without notable activity.

There has been less animation in the line of domestic produce, though, in most instances buyers have had any existing advantage as to price. Middling upland cotton closed heavily on Wednesday at 22¼cts. per lb. The stock of cotton now here is given at about 65,000 bales. The receipts at the port this week, have averaged about 2,700 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,221,600 bales, against 1,689,400 bales in 1868–'9; exports, same time 1,326,650 bales, against 915,325 bales same time in 1868–'9; stock on hand at latest dates, 531,600 bales, against 387,450 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 2,353 pkgs., against 4,158 pkgs., same time in 1869. From Boston, 802 pkgs., in 1870, against 3,006 pkgs. same time in 1869.

Foreign goods have been moderately inquired for, but at irregular figures. The week's imports of foreign dry goods were to the specie value of $3,342,213; and of foreign merchandise, $3,823,035, making a total of $7,166,248, against $7,021,605 same week last year. The marketed foreign dry goods have been to the specie value of $2,995,391.

At the Live Stock markets, this week, Beeves continue in limited demand, at from 8@16½c., per lb.; week's receipts, 4,830. Milch cows are very dull, at $40@$100 each, receipts, 110. Veal calves have been in less request at from 8@12½ c. per lb.; receipts, 1,076. Sheep fairly active at from 5½@8½c., per lb.; receipts, 22,051. Swine rule dull and heavy at 9⅛@9¾ c. per lb., all live weight; receipts, 10,519.

Ocean freight have been less active, but, on the whole, compartively steady. For Liverpool we quote flour at 1s. 6d.@1s. 9d by sail, and 1s. 9@2s. 0d. by steamer, per bbl.; grain at 4d. by sail, and 4½d. by steamer, per bushel; cotton at $\frac{3}{16}$d.@$\frac{7}{32}$d. by sail, and $\frac{5}{16}$@$\frac{3}{8}$d. by steamer per lb.; and heavy goods 12s. 6d.@30s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 373.

The balance in the Sub-Treasury on Wednesday was $81,990,127 58.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 15th, and since the beginning of the year:

	1869.	1870.
For the week	$2 676,878	$2 586 541
Previously reported	28,901,259	31,020,258
Since Jan. 1	$31,577,637	$33 606,799

The imports for the week ending March 12th, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$3,036,604	$3,843 213
Gen. merchandise	3,985,001	3 823,035
Total for the week	$7,021,605	$7 166,248
Previously reported	48,614,304	49,117,656
Since January 1	$55,635,909	$56,283,904

Railroad Project in Dakota.

A letter from Yankton, Dakota Territory, says a great railroad scheme has just been started there by prominent Eastern capitalists, looking to the early construction of a north and south trunk road, some four hundred miles in length, running through Central Dakota and Nebraska, and connecting the Union and Northern Pacific roads, by which means it is claimed that the vast future trade of the northern mountains will be diverted from the Northern Pacific and carried southward by way of Yankton down to the Union Pacific; thence by way of Omaha to Chicago, instead of passing over the Northern Pacific, via St. Paul to Lake Superior. The movers in the project are Union Pacific parties, who have already filed articles of incorporation with the Governor of the Territory. It is called the Dakota Central Railroad Company. Stock books were opened Feb. 28, and over three millions subscribed in one day.

☞ The agreement entered into on the 1st of February, 1870, between the Columbus, Chicago and Indiana Central Railway Co., the Pittsburg, Cincinnati and St. Louis Railway Co., and the Pennsylvania Railroad Co., was ratified by the stockholders of the former company, at a meeting held for that purpose at Columbus, Ohio, on the 10th inst.

☞ The officers of the Northern Pacific Railroad Company, recently elected are as follows: J. Gregory Smith, of St. Albans, Vt., President; R. D. Rice, of Augusta, Me., Vice President; A. H. Barney, Treasurer; Samuel Wilkeson, Secretary.

The International Coal and Railway Company, of Nova Scotia.

The great value of the rich coal deposits of the British North American Provinces, and the importance to the people of the Atlantic States of developing and utilizing the cheap and abundant supply of fuel now practically useless, has already led to two important results: *first*, an effort to secure a repeal of all duties on imported coal; *second*, the construction of the International Coal Railroad, by an American Company incorporated by the government of Nova Scotia. Whatever success may attend the anti-tariff movement, it is certain that the last named enterprise, already begun will be carried out without unnecessary delay. The proposed railroad, starting at Sidney Harbor—the safest and most commodious harbor on the Atlantic coast, at a point convenient, safe and desirable in all weather, will run a distance of twelve miles to connect with the Bridgeport Coal Areas of the International Company. These areas, according to the estimates of Professor Lesley, contain the practically inexhaustible quantity of 65,000,000 tons of superior gas and furnace coal. When completed, the railroad will be worked by a force sufficient to carry to the loading pier, at Cape Breton, no less a quantity than 2,500 tons daily. The port from which shipments will be made is accessible from April to December, inclusive, those months being the limits of the season during which a profitable trade in coal can be conducted in that latitude.

The enterprise thus briefly described is one of international importance, inasmuch as it will enable the capitalists who have undertaken it to meet the constant and increasing demand for coal throughout New England and the Northern border States, with a cheap and abundant supply from the hitherto undeveloped mines of the British Provinces. A few years ago the coal trade of Nova Scotia appeared to be rapidly increasing, and a ready market was found in this country for the product of her mines, which, for purposes of gas manufacture, is superior to any other American or foreign coals; but the traffic, mutually advantageous and profitable, was interrupted by the abrogation of the Reciprocity Treaty and the imposition of a high tariff on imported coal by this government. There are now strong indications that this tariff, practically prohibitory in its operation, will be materially reduced, if not entirely removed. As a revenue measure the present tariff is of but little consequence, and Congress cannot long resist the earnest and persistent demands of the people of New York and the Eastern States for its repeal. Throughout the entire area of these vast and wealthy Northern and Northeastern sections there are no deposits of available coal of any kind, and the necessarily high price of the fuel obtained from the distant coal fields of Pennsylvania is a a heavy tax on our manufacturing industries and on the comfort of a large proportion, at least, of the population. The natural source of supply for this section is Nova Scotia. Coal from that Province may be delivered at our doors, so to speak, by the same vessels that receive their cargoes at the mines. East of the Alleghanies, at least, there is no gas producing coal that can compare with that of the Cape Breton mines, and the greater part of this de-

scription of coal for the supply of the cities of the Atlantic coast is now transported by rail not less than three miles, transhipped to coasting vessels at the seaboard and thence distributed to the various cities and towns where it is consumed. There is but one way in which the consumer can be relieved of the heavy burdens thus imposed by the necessarily great cost of transportation, and that is by the free introduction of foreign coal, in competition with the native product, for the supply of those sections of the country remote from the fields of production.

The coal trade of the United States may be said to have begun in 1820, and the amount of coal forwarded to market that year was 385 tons. From that time to the present there has been a rapidly increasing demand, and the amount of coal placed in the market since 1820 shows an average annual increase of 434,557 tons. During this period the population of the country has increased from nine millions to nearly forty millions, and although the facilities for transportation by both land and water routes have proportionately increased throughout the country, a cheaper and more readily accessible supply of fuel than is now obtainable from the coal fields within our own territory is essential to the maintenance of many of our principal manufacturing industries and the general prosperity of the country. Another important consideration is found in the fact that our railroads must, sooner or later, depend solely upon coal for fuel, owing to the scarcity of wood and the high price of all kinds available for use in locomotives. For this purpose alone the consumption is already very gerat, and each year it becomes greater. Cheap coal is, therefore, essential to economy in the operation of our roads, and for this we must look to the source above mentioned. Cape Breton is favorably situated for the shipment of her coal to the United States, and the importance of the International Coal road, thus practically considered, is at once apparent. The property of the company, from which its supplies will be drawn, consists principally in valuable mining lands. The chief coal areas are situated on or near the sea coast, from twelve to fourteen miles east of Sidney Harbor, and embrace four square miles of territory in one tract. They are held under leases direct from the Government, extending through a period of sixty years. The royalty demanded by the Government is only 10 cents per ton for all coals actually shipped, not exceeding 250,000 tons per annum, and on all coals over this amount 5 cents per ton. Upon these areas are five workable seams underlying nearly the whole property. One of them was worked for several years before the company came into possession, and since that time the facilities for working have been greatly extended and improved. Under the direction of an able and energetic board of officers and directors, the enterprise promises to prove a complete and profitable success; and, while utilizing the hitherto undeveloped mineral resources of Nova Scotia, its more important work will be to supply the great and increasing demand for cheap fuel throughout the Northern and Eastern States.

☞ A bill increasing the capital stock of the Morris and Essex Railroad to fifteen millions, has passed the New Jersey Legislature.

Journal of Railroad Law.

THE CONSIGNOR OF PROPERTY IN TRANSITU MAY CHANGE ITS DESTINATION—WHEN CONSIGNEE MAY ENFORCE LIEN FOR GENERAL BALANCE AGAINST CONSIGNOR.

The facts in the late case of Strahorn *vs.* The Union Stock Yard and Transit Company (43 Ill., p. 424) are fully and clearly stated in the following opinion by

WALKER CH. J.—This was an action of trover, brought by appellants in the Superior Court of Chicago, appellees, for the recovery of a car load of hogs. On the trial it appeared in evidence, that appellants, in September, 1866, wrote a letter to M. V. Butler, at Iowa City, in which they authorize him to draw on them for $500, and for the balance when he gets stock to the railroad; but would not like him to hold it more than a week at a time. On the back of the letter they indorsed the following:

"First National Bank, Iowa City: We will honor all drafts drawn on us by M. V. Butler.

R. STRAHORN & Co."

Butler gave this letter of credit of Hubbard, the cashier of the bank, and it seems that an arrangement was made by which Butler could, in purchasing hogs, check on the bank to pay for hogs purchased, and then draw upon Strahorn & Co. to cover such advances. Hubbard testifies that Butler never drew in advance of purchases, but made his checks on the bank for his purchases and afterward drew upon Strahorn & Co. to cover such advances.

The business continued in this manner until the 30th of January, 1867, when the last draft was drawn by Butler on appellants. This draft was for $1,000, at three days after sight, and was delivered to Hubbard, the cashier, and lacked something of balancing his account with the bank.

It seems, that between that date and the third of February, the bank advanced $1,295.75 to Butler, and he had, in the mean time, made deposits sufficient to cover the balance against him on the 30th of January, 1867, and to reduce the balance due the bank to $800.

On the 3d day of February, Hubbard received a letter from appellants, that they would accept no more drafts drawn by Butler. Hubbard thereupon saw Butler at the depot, and learned that the hogs had just been shipped to appellants. He insisted that Butler should secure the bank for the money it had advanced to purchase this car load of hogs. Butler thereupon sold the hogs to Hubbard for $1,074.80, being the amount paid for the hogs, and the sums still due the farmers of whom they were purchased, which the bank agreed to, and did afterward pay. The railroad agent at Iowa City was notified of the sale, and Butler gave up the freight receipt and the railroad company gave to Hubbard a new one, and he directed that the hogs be delivered to Conger & Co., on his account. Butler gave the agent at Iowa City an order to the agent at Chicago, notifying him that he had sold the hogs to Hubbard, and directed him to deliver them on their arrival to R. P. & M. Conger for Hubbard. The order was immediately sent to the agent at Chicago, and he was directed to change the name on the way-bill from Strahorn to Conger & Co.

The hogs arrived at Chicago on Sunday, the the 4th of February, and were delivered to appellees. The way-bill named Strahorn & Co. consignee for account of M. V. Butler, with a line erased, and these words written in: "Consignee Conger & Co., account of W. H. Hubbard." The Stock was unloaded at the yards and placed in a pen, and fed over Sunday by the order of Strahorn's agent, but the freight was not paid, and an actual delivery was not made to them.

The letter of the agent at Iowa City was received by the agent at Chicago, who sent it to the agent of the railroad company, who had unloaded the hogs and delivered them to the stock company. On Monday morning, the 5th, the stock-yard agent informed the division agent of the yard, that the consignment had been changed from Strahorn & Co. to Conger & Co., and that he must change it on the books, which he did, and Strahorn & Co. were informed of the change and that they must not sell the hogs. The hogs remained in the actual possession of the stock yard company until they were sold. They made no actual delivery to either consignee.

On Tuesday the 6th, the railroad agent who delivered the hogs to the stock-yard, proposed to both consignees, that the hogs be sold, and the money held by the railroad company until it should be decided which of them was entitled to receive it, to which they both agreed. The freight, sixty-four dollars, and the stock-yard charges, eight dollars for corn, and keeping the hogs, were paid by the railroad agent. A demand was made, and a refusal to deliver the hogs, and appellants sued to recover for a conversion. The cause was tried by the Court by consent, and the issues were found for defendants. A motion for a new trial was entered, which the Court overruled, and rendered judgment according to the finding, to reverse which this appeal was prosecuted.

It is insisted, that inasmuch as Butler was indebted to appellants on a general balance, and as he shipped to them this carload of hogs, appellants thereby acquired such a lien on the property, as placed it out of the power of Butler to sell the property to the bank, to pay their debt against him. There seems to be no question raised as to the *bona fides* of either of these debts. Appellant's claim was for a balance due on money advanced to pay for previous shipments, while the debt to the bank was for the very money paid on the purchase of these hogs. Had Butler the power, while the property was *in transitu*, to change its destination, and to have it delivered to a different consignee? In the case of Winne *vs.* Hammond 37 Ill. 99, it was held that a factor has a lien for a general balance on the property of his principal, in his actual possession, and that such possession was notice of his lien to creditors and purchasers.

In the case of Lewis *vs.* Galena & C. U. R. R. 40 Ill. 281, the questions were very similar to those presented by this record. It was there said, "the question then is, has the consignee of the property which he has put in the possession of a common carrier to be carried and delivered to a designated consignee, a right to change the destination before is is delivered, and can the carrier refuse to obey the consignor's orders to that effect? The principle may be broadly stated, that a consignor of goods has the right to direct a change in their destination, and that the carrier

is bound to obey such directions." In that case, as in this, the consignor was indebted to the consignee on a general balance. The Court say, "It is in vain to pretend that Campbell & Woodruff had any lien or claim on this grain; it was never in their possession, symbolically, by bill of lading, or actually, by delivery, before the notice was given to the railroad company by the consignors, that they had made advances upon it." Appellants, in this case, had not acquired possession of the hogs, any more than had the consignees of the grain, in that case. In both the bill of lading and contract for the freight described the consignee. The carrier had, in each case, received the actual possession of the property to be transported, and in the same manner, in each case, the destination was changed by the order of the consignor.

No material difference is perceived in the two cases, and that must govern this. The judgment of the Court below is affirmed.

Judgment affirmed.

From the Louisville Courier-Journal.

Bridge over the Ohio River at Louisville.

To-day, February 18, 1870, the completion of the great bridge over the Ohio river at this point, one of the most stupendous enterprises of the nineteenth century, will be officially announced, and the structure opened as a public highway. In magnitude and importance the event is second to none in the history of Louisville, and it is meet that it should be celebrated in an appropriate manner. The completion of this great work forms the first and only connecting link between the great railway systems of the north and south, securing to the people of both sections the most direct and favorable line of communication, thus insuring more intimate commercial relations and increased prosperity. By this bridge three great and distinct systems of railways are directly connected. First, as Louisville is almost directly on the line between Pensacola or Mobile and Chicago, this bridge completes the direct north and south all-rail route. Second, it furnishes the missing link in the connection between Memphis, New Orleans, and points in the lower Mississippi Valley and in Texas, and New York, Boston, Washington, Baltimore, and the principal cities in the Northeastern States, forming a continuous and unbroken line between the Southwest and Northeast. Thirdly, it forms the last link in the chain of roads connecting Savannah, Charleston, Wilmington, Norfolk, and the principal cities in the Southeast, with St. Louis, Quincy, Burlington, Rock Island, and the lines starting from points on the upper Mississippi river and penetrating the far West to the Pacific, making Louisville the central point on the line of unbroken rail route between the Southwest and Northwest. And it also connects us more closely with the thriving cities of New Albany and Jeffersonville, materially adding to the prosperity of all.

* * * * *

The location may be described as follows: The track connecting the Louisville and Nashville railroad with the bridge leaves the yard of the depot, north of the engine house near Tenth-street, and entering Maple street follows that street to Fourteenth, thence down Fourteenth to Portland Avenue, and thence to High street on a prolongation of the line of Fourteenth street, and thence curving to the right crosses the river at right angles to the direction of the current, striking the Indiana shore at a point 1,500 feet below Smith & Smyser's mill. From there the line continues in the same direction which it crosses the river until it strikes the dirt road between New Albany and Jeffersonville. Thence curving to the right, it enters Ninth street, Jeffersonville, and continues along that street to the depot of the Jeffersonville, Madison and Indianapolis railroad. The total length of the bridge proper is 5,299 feet. The grade of the track at the approach on the Kentucky side corresponds with that of High street at the point of crossing that street. From this point it ascends at the rate of 76 feet per mile, striking the first span at an elevation of 63 feet above low water mark, and continues at the same rate of ascent until pier No. 13, on the south side of the middle channel, 2,500 feet from High street and 2,196 from the face of the southern abutment, is reached. Here the grade has an elevation above low water mark of 95 feet. From this point the grade is level for 2,243 feet, until pier No. 21, on the north side of the Indiana channel, is reached. In this channel the elevation above low water mark is 101½ feet (low water mark in this channel being 6½ feet lower than in the middle channel.) From here the grade descends at the rate of 76 feet per mile, reaching the northern abutment at a distance of 790 feet from pier No. 21 at an elevation of 35 feet above the natural surface of the earth. The grade of the Indiana approach continues at the same rate of descent, reaching the surface of the earth 2,500 feet from the northern abutment. The superstructure of the approach consists of an earth embankment.

The superstructure of the bridge is placed below the grade of the track except over the Kentucky and Indiana channels. The lowest part of the superstructure over the middle channel is 90 feet above low water mark, and over the Indiana channel 96½ feet above low-water mark.

* * * * *

The length of each span, counting from the Kentucky to the Indiana shore, and the entire length of superstructure, including abutments, are shown in the following table. The length of spans are from center to center of the piers:

	Feet.
Kentucky abutment	35
Two spans of 50 feet	100
1 pivot draw over canal	261
4 spans of 149 6-10 feet	398 4-10
2 spans of 180 feet	360
2 spans of 210 feet	420
2 spans of 227 feet	454
1 span of 370 feet	370
6 spans of 245½ feet	1473
1 span of 400 feet	400
3 spans of 180 feet	540
1 span of 149 6-10 feet	149 6-40
1 span of 100 feet	100
Indiana abutment	35
Total	5299

* * * * *

The masonry consists of two abutments and twenty-seven piers, comprising, in the aggregate, 80,500 cubic yards of limestone work, which for beauty and excellence, both of material and workmanship, is unsurpassed.

The piers vary in length from 60 to 105 feet, and are laid in hydraulic cement manufactured in this vicinity. The piers all rest upon the solid rock bed of the river.

* * * * *

The superstructure, except the portions spanning the channels, is placed below the grade of the road. The below grade, or deck portion, is what is known as Fink's Suspension Truss. The spans over the channels are of a plan especially arranged for this bridge. The entire superstructure is of iron, except the flooring, and consists of twenty-seven spans, varying in length from 50 to 400 feet. The channel spans, 370 and 400 feet, are the longest ever built on the American continent. In the suspension trusses all parts are of wrought iron except the chords and post shoes, which are of cast iron. In the long spans the chords and brace shoes are of cast iron, all other posts being of wrought iron. The Phœnix wrought iron columns have been used exclusively for posts and braces throughout the bridge.

* * * * *

The bridge, when entirely finished, will have footwalks four feet wide on each side, with hand-railings. It has a single line of track, and is so arranged that, if desirable, the space of twenty feet six inches between the footwalks may be floored and used for the accommodation of carriages when not occupied for railroad purposes. The superstructure is proportioned for a maximum moveable load of 2,240 pounds per lineal foot, which can only be brought upon it by a train of engines coupled together. Seven times this maximum load is calculated to be the weight necessary to break it down. In all ordinary railroad work the load that it will be called upon to sustain is at most two-thirds of this maximum, so that even more than seven fold is provided to prevent accident.

The total number of pounds of wrought and cast iron used in the construction is 8,723,000, and for the rail-posts, flooring and hand-railing, 639,000 feet of timber (board measure) were used.

* * * * *

In the fall of 1867 the plans for the superstructure were commenced by the engineers of the company, and in March, 1868, the contract for the entire work was awarded to the Louisville Bridge and Iron Company. They were to furnish the iron ready for erection at a price per pound from drawings furnished by the engineers of the bridge who undertook its erection. Great credit is due the Bridge and Iron Company for the promptness and fidelity with which they executed this great contract. Everything has been done to make it a work of unsurpassable mechanical excellence. All of the iron material used, except the wrought iron columns, was manufactured here and in New Albany. The Ohio Falls Nail Works, New Albany, furnished all the wrought iron proper.

* * * * *

The entire superstructure was erected, under the supervision of the engineers, by Mr. Henry Bolla. To his energy, experience and judgment the successful accomplishment of the work is in a great measure due. Mr. Henry Thatcher, in addition to his duties as assistant engineer, had special charge of the instrumental work, and performed his various duties with credit to himself and to the satisfaction to all concerned. Mr. Albert V. Guch rendered very valuable aid as assistant engineer. To Mr. Albert Fink, chief engineer, and to Mr. F. W. Vaughan, principal assistant engineer, who has had direct supervision of the work in all its various details from its commencement, for the skill, energy and ability, is due the great meed of praise for this great achievement.

☞ All the cars, equipments, patents and contracts heretofore belonging to the Central and Southern Transporting Companies, have been transferred to the Pullman Palace Car Co. By this arrangement the Pullman Company acquire the right to run their cars over 6,000 miles of additional railway, as well as the entire ownership of all sleeping car patents the right of which has heretofore been in litigation between the Central and Pullman Companies.

West Virginia Railroad Legislation.

Among the acts passed by the Legislature of West Virginia at the session just closed were the following: To incorporate the Shenandoah Valley Railroad Company; confirming and amending the charter of the Chesapeake and Ohio Railroad Company; to authorize an extension of the Alexandria, Loudoun and Hampshire Railroad to the Ohio river; for the extension of the Pittsburg, Virginia and Charleston, S. C., railroad across West Virginia; to authorize the extension of the Shenandoah Valley Railroad through Jefferson county; to charter the Northern and Southern West Virginia Railroad Company; to amend the charter of the Guyandotte Valley Railroad Company; to amend the charter of the Martinsburg and Potomac Railroad Company; to incorporate the Pennsylvania and West Virginia Railroad Company; to enable the Hampshire and Baltimore Coal Company to build railroads from its mines and connect with other railroads.

☞ A contract for the construction of a railroad from Yedo to Osaka, Japan, 300 miles in length, has been concluded by Mr. H N. Gay. He represents capitalists who have intrusted him with money to be lent to the Japanese Government for the construction of reproductive public works, and he advances one million sterling for the construction of the above road. The road is to be built by English engineers, and will be the property of the Government.

☞ The first section of a railroad in Finland intended to put St. Petersburg into communication with Helsingfors has just been opened for traffic. The section extends to Wyborg, and has a development of 120 verstes. Another section from Wyborg to Rikkimaki will be completed in September; the length of this second section will be 227 verstes.

☞ The following subsidies were paid by the Dominion of Canada to railways in New Brunswick during the year ending June 30, 1869:

Western Extension	$550,000
Eastern "	186,000
Fredericton Branch	125,000
Woodstock "	44,800
Total,	$704,800

☞ We learn from Somerset, Penn., that the Keystone Coal Company has agreed to subscribe $75,000 towards building a branch road from the Pittsburg and Connellsville Railroad to their mines in Elklick township.

☞ The Western Division of the Chesapeake and Ohio Railroad, extending to Gauley Bridge, has been let to contract in Charleston. An army of contractors were on hand, and the bidding must have been very spirited.

☞ The Cobourg *Star* learns that operations on the Cobourg, Peterborough and Marmora Railway, as well as the Marmora iron mines, are to be commenced at once.

☞ The amount expended on the St. John and Shediac Railway on construction account during the fiscal year ending June 30, 1869, was $30,496 89.

☞ The city debt of Memphis amounts to $4,422,462 47. Its available assets are $745,911 28.

☞ The officers of the Memphis and Little Rock Railroad for the present year are Mr. R. C. Brinkley, president, Jas. L. Meigs, chief engineer, Col. B. D. Williams, superintendent and general agent, John W. Goodwin, secretary and treasurer.

FOR SALE.

A STEAM EXCAVATOR, nearly new, combining all the latest improvements, manufactured by JOHN SOUTHER, South Boston, Mass. Has been in use only some six months. Will be sold cheap. It can be seen at Galesburg, Ill., and can be taken to any point by rail on the truck on which it stands, without taking down. For further particulars apply to

D. J. WELLS,
Milwaukee, Wis.

NOTICE IS HEREBY GIVEN, IN PURSUANCE of law, that a meeting of the Stockholders of the Beach Pneumatic Transit Company, for the purpose of increasing the capital stock of said company to ten millions of dollars, will be held at the office of the company No. 260 Broadway in the city of New York, on Saturday the ninth day of April, one thousand eight hundred and seventy, at one o'clock in the afternoon.

NEW YORK, *March 12th*, 1870.

LARGE PEREMPTORY SALE.

Very Valuable Machinery.

RICHARD NORRIS & SON'S
LOCOMOTIVE WORKS,
17th Street between Pennsylvania Avenue and Spring Garden Street.,
PHILADELPHIA, PENN.

THOS. BIRCH & SON, Auctioneers.

On Tuesday morning, May 3rd, 1870, at 10 o'clock, will be sold at public sale on the premises of Richard Norris & Son's Locomotive Works, 17th Street, between Pennsylvania Avenue and Spring Garden St., the entire valuable machinery, consisting of 5 STATIONARY ENGINES varying from 15 to 100 horse power; 14 Cylinder Boilers; 50 Planing Machines varying from 12 to 60 inches, length of bed from 2 to 36 feet; 100 Slide Rest and Screw Cutting Lathes varying from 12 to 36 inches swing; Length of Shears from 3 to 26 feet; 50 small hand Lathes; 2 very large Slide Rest, Wheel Lathe swing 6 ft. 6 in.; 25 Sloting machines various size strokes; 2 Merrick & Son's Large Steam Hammers; 20 double and Single Drill Presses; 1 Seller's Hydraulic Wheel Press; 1 Seller's large size Boring Mill with universal chuck; 1 Whitworth Radial Drill Press; 1 Whitworth Screw Cutting Slide Rest Lathes large size; 1 Whitworth 48 inch Planer; Double head gear cutting engine, large size; large and heavy Railroad Iron Shears; 1 Tyre Expanding and Rounding machine; 1 Tyre Bending machine with Furnace Castings with Fire Brick; Shafting, Hangers, Pulleys, and Couplings; 3 large Platform Scales; 6 small Platform Scales; 4 new Lever Beams —graduated to weigh 10 Tons each with weight complete —the above Scales made by Abbott & Co.; 2 complete Furnaces for Heating Scrap Iron with Boiler on top—to supply Steam Hammers; 100,000 Lbs. Slabs Wrought Iron faggottit from Boiler and machine shops scraps of the best quality; 1 complete Photographic Apparatus; Tons wrought and cast scrap Iron $50,000 worth; New Bar and Tool Steel; Bar Iron; 10,000 feet of Belting; 50,000 feet of Gas pipe; 200 feet large Lead Water Pipe; Machinists', Blacksmiths' and Boiler makers' Tools; complete assortment of Foundry Flasks; Ladders; 2 Cupolas; Large Foundry Cranes; 1,000 new Birmingham Boiler Flues; 2 in. Diameter No. 12 Wire Gauge; 200 Anvils; 500 Vices; Spinners, Lathes and Tools, Jacket, Machine, Wood Planing machines, Circular Saws, Large Locomotive Trucks, Turn Tables, Carts, Drays, Harness, &c., &c. Catalogue ready April 1st, can be obtained by applying to the Auctioneers. The sale will commence Tuesday, May 3rd, at 10 o'clock, and will be continued daily until the whole is sold. The Factory will be open on Monday, May 2d, for examination.

THOS. BIRCH & SON,

8t11 **Philadelphia, Pa.**

49 Walnut St., Cin., O.

CHEAP PAINTING.—1/2 COST LEAD { 100 lbs. of the PECORA COMPANY'S COLORED PAINT (costing $12.50) will paint as much as 250 lbs. of Lead, and wear longer. For particulars, address S. BOWEN, Sec'y. No. 150 North 4th St., Philada. or 75 Maiden Lane, N. Y.

Locked Safety Valves.

TO

MASTER MECHANICS
AND
LOCOMOTIVE BUILDERS.

THE UNDERSIGNED OFFERS FOR SALE, SAFETY VALVES, effectually guarded against tampering, invented and patented by himself; patent bearing date Sept. 14th, 1869.

Said Valves are sold with Spring, Guard, Studs, and Nuts, complete, and all ready to put on to boiler domes. Price for size suitable for Locomotives, $27 50.

The Valve and Seat are made of hard composition. Spring of best cast steel.

The above Valve is sensitive, and is not liable to stick from corrosion; and is particularly well suited for large stationary and marine boilers, giving large area for escape of steam, and requiring a short lever, and light weight or spring, for holding Valve against pressure.

GEO. F. MORSE,
Supt. Portland Locomotive Works,
PORTLAND, MAINE.

PACIFIC MAIL STEAMSHIP COMPANY.
SPECIAL NOTICE.

In consequence of loss of connecting Pacific steamer there will be no departure of this Company's line on 5th March. All now freight received prior to the 5th inst. will be forwarded as fast per *Henry Chauncey*, 21st.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

BRADY'S RAILROAD LANTERNS.

The strongest and best in use; are made principally of Malleable Iron. Here lies the secret of their strength, the frame being capable of supporting a weight of Four or Five Hundred Pounds; and yet they are little heavier than ordinary Lanterns. The guards are rivited through the top and bottom flanges, the rings wound with wire where they cross the guards, and the whole frame tinned, uniting each piece with the other, making it the *strongest* Lantern ever offered to the public. RAILROAD MEN *especially* cannot fail to see that it will be economy to purchase these Lanterns, as there is no part that can be broken with ordinary use, except the Globe, which being adjustable, is easily and cheaply replaced with any color and at a small cost; the greater weight being at the bottom, it cannot readily upset. Now used on the following Railroads: New York and New Haven; Hartford and New Haven; Shore Line, Conn.; Providence and Worcester; Boston and Maine; Conn. and Passumpsic Rivers; Fitchburg; Rensselaer and Saratoga; Troy and Boston; Boston and Providence; Boston, Clinton and Fitchburg; Charlotte, Columbia and Augusta; Connecticut River; European and North American; Hartford, Providence and Fishkill; Mobile and Ohio; Portland and Kennebec; Boston, Hartford and Erie; Worcester and Nashua; Lake Superior and Miss.; Hudson River, and many others.

The trade supplied from our Store, or from the Factory, New Britain, Conn,

American Railroad Journal.

New York Saturday, March 26, 1870.

Baltimore Bridge Company.

This enterprising Company, amongst its other large works, has recently erected on the New York and Oswego Midland Railroad, across the gorge of Lyon Brook, near the town of Norwich, Chenango county, New York, the most extensive Wrought Iron Viaduct yet constructed in this country. It is 820 feet in length and 155 feet from the bed of the stream to the rails. The bents of this high trestle-work are placed 30 feet apart from centre to centre, upon stone pedestals.

The bent legs are composed of tiers of Phœnix Wrought Iron Columns, standing in cast-iron shoes and connected by cast-iron joints, until grade is reached, where they are capped with a cast-iron head, prepared to receive the superstructure, which sustains the track.

This superstructure is in spans of 30 feet each, reaching from bent to bent of the trestle.

The chords of the superstructure are of wood, and the longitudinal struts stretching from joint to joint are also of wood. These are of wood to avoid the evils arising from expansion and contraction in so long a structure.

All else is of iron, including the cross-strutting and rod-bracing longitudinally, and across which binds the whole structure together.

In the centre of this trestlework swings a wrought iron channel span of 100 feet, 155 feet in the air, on the Fink Suspension principle.

The whole structure, at a little distance, looks like a vast cobweb, and on December 24th, when opened for the passage of the first trains, three thousand people assembled to witness the event. As the engine reached the channel-span and rested a moment over the gorge, the excitement was intense, and as she proceeded on her way unharmed, the crowd dispersed, with a sigh of intense relief at the safe passage of the great bridge.

In addition to this Viaduct, the Baltimore Bridge Company has constructed within the past year seven other Wrought Iron Viaducts—six on the short line from Cincinnati to Louisville, and one on the Nashville and Chattanooga, varying from 300 feet to 750 in length, and from 40 feet to 105 feet in height.

These Viaducts have been Patented by the Baltimore Bridge Company, and must become very much used, from their admirable adaptation to the economical crossing of deep valleys or long flats when masonry and embanking is very expensive, if at all possible.

The celebrated High Bridge, on the South Side railroad, Virginia, is about to be rebuilt in wrought iron by this Company, thus placing a substantial and permanent structure in the place of the present wooden bridge.

This structure will consist of 21 spans of 112 feet each, at a height of from 110 to 120 feet above the valley. The style of truss to be used in this bridge will be the Fink Suspension.

As the present brick piers only come within 23 feet of grade, the elevation will be made up with strong wrought iron piers, springing from the summit of the brick work.

This will, when finished, make one of the finest wrought iron viaducts in the country from its great height and length, which is nearly one-half mile. The erection of this bridge will make the South Side railroad, forming as it does the central link in the chain of roads from Norfolk to Bristol, one of the safest and most delightful routes from the seaboard to the Southwest.

It will also enhance the value of the first preferred mortgage eight per cent. bonds of the Company, which, even at the present price of gold, make most attractive investment, and as safe as attractive, from the fact that the present able administration is enhancing every day the value of the property by ballasting the line thoroughly with stone, laying new track out and out, putting up permanent wrought iron structures in place of the old wooden ones, and supplying the ever-increasing traffic of their great through line with new rolling stock and first-class equipments.

Baltimore and Ohio Railroad.

The following is a comparative statement of the earnings and expenses of this road for the years ending September 30, 1868 and 1869:

MAIN STEM, INCLUDING THE WINCHESTER AND POTOMAC AND WASHINGTON CO. BRANCHES.

Earnings:	1868.	1869.
From passengers	$1,451,513 60	$1,246,919 48
Tonnage	6,107,130 91	7,477,996 26
Total	$7,558,644 51	$8,724,915 74
Working expenses:		
Transportation exp.	$1,317,388 82	$1,505,218 85
General expenses	70,054 73	61,213 84
Losses by accidents	17,827 08	54,862 82
Repairs of railway	1,261,513 63	1,514,479 26
" locomotives	606,753 11	665,742 87
" burden cars	423,089 68	556,088 92
" pass. cars	104,695 50	117,257 40
" stationary machinery	147,237 86	125,478 11
" depots	265,406 85	363,651 48
" water stat'ns	45,829 77	54,320 70
" bridges	348,235 45	279,495 96
" telegraph	11,454 95	9,491 96
Fuel, preparing, etc.	281,223 93	285,598 34
Cleaning engines and cars	79,913 37	82,944 12
Pumping water	15,848 99	14,169 69
Watching cuts, tunnels and bridges	54,682 10	58,739 85
Contingent expenses of machinery department	9,292 91	7,352 84
Total	$5,054,448 73	$5,756,106 46
Net earnings	$2,504,195 78	$2,968,809 28

It is shown that the earnings, in comparison with the fiscal year 1868, have increased $1,166,271 23, and the working expenses have increased $701,657 73—making a comparative increase in net profits of $464,613 50. Compared with the fiscal year 1867, the increase of earnings being $1,282,231 64, and the increase of working expenses $1,379,840 60, the decrease of net profits amounted to $97,608 96.

The ratio of expenses to earnings was in 1867, 58.79, in 1868, 66.86, and in 1869, 65.97.

During the fiscal year 1868–'9, the sinking fund

for the redemption of the city loan increased to $1,201,438 82—showing a gain of $61,784 42.

Dividends of 4 per cent. each upon the capital stock were paid on the 23d of October, 1867 and 1868, and the 30th of April 1868 and 1869. The U. S. tax thereon was also paid by the company.

The liabilities of the company, compared with the statement of September 30, 1868, show reductions by payments on account of the loans stated as follows:

On N. W. Va. second mortgage bonds, endorsed by the B. & O. R. R. Co...	$7,500 00
On N. W. Va. third mortgage bonds, endorsed by the B. & O. R. R. Co...	9,000 00
	$16,500 00

The balance of cash in the Treasury, Sept. 30, 1869, was $64,125 54, after deducting $121,215 for payment of interest on the city loan, and on the bonds of the company which matured Oct. 1, 1869.

Statement of profit and loss for the years ending September 30:

	1868.	1869.

Losses by accidents, etc.	1,785 01	1,572 36
Fuel, preparing, etc	31,282 95	33,789 71
General expenses	2,455 25	1,363 02
Cleaning engines & cars	4,958 07	5,520 21
Contingent expenses	683 78	727 24
Total	$621,067 87	$694,605 34
Deficit	$89,753 11	$158,572 09

The aggregate earnings of the Main Stem, (including the Winchester and Potomac and Washington County Branches,) and of the Washington Branch and Parkersburg Branch, for the years ending September 30, 1868 and 1869, were as follows:

	1868.	1869.
Main Stem	$7,558,644 51	$8,724,915 74
Washington Branch.	382,258 49	415,924 05
Parkersburg Branch.	531,314 76	536,033 25
Totals	$8,472,217 76	$9,676,873 04

The aggregate expenses of operating and repairs were as follows:

	1868.	1869.
Main Stem	$5,054,448 73	$5,756,106 46
Washington Branch.	104,594 91	138,415 80
Parkersburg Branch.	621,067 87	694,605 84
Totals	$5,780,111 51	$6,589,127 60

And the aggregate net earnings, after deducting the cost of operating and repairs, as follows:

	1868.	1869.
Main Stem	$2,504,195 78	$2,968,809 28
Washington Branch.	277,663 58	277,508 25
Parkersburg Branch.	*89,753 11	*158,572 09
Totals	$2,692,106 25	$3,087,745 44

* Deficit.

Showing an aggregate net increase compared with the preceding year of $395,639 19.

The following table gives the receipts of the last nine years—those for 1861, 1862, 1863, 1864, 1865, 1866, 1867 and 1868, being inserted as a measure for comparison:

Main Stem—

	Passengers.	Tonnage.	Total.

1865..	5,067,539 15	6,704,336 57	11,771,875 72
1866..	2,182,164 12	5,516,260 71	8,698,424 83
1867..	2,116,033 27	6,224,375 80	8,340,409 07
1868..	1,852,353 21	6,619,864 55	8,472,217 76
1869..	1,677,862 04	7,999,011 00	9,676,873 04

The locomotive equipment at the close of the fiscal year 1868 consisted of 299 engines; to which there were added in 1869, 16—making a total of 315; of these, 55 were passenger, and 260 tonnage; 268 were 1st class, 38 2d class, and 9 3d class.

The number of cars in service at the close of the fiscal year 1868 was 4,712; to which there were added in 1869, 626—making the total at the close of that year, 5,338; of which 149 were passenger, 136 smokers, baggage, mail, express, etc., 1 pay, 1 post office, 7 officers', and 5,044 tonnage, stock and coal cars.

The mileage of engines in 1868 and 1869 was as follows:

	1868.	1869.
Main Stem	5,589,394	6,640,721
Washington Branch	412,074	418,895
Parkersburg Branch	679,358	691,644
Total	6,680,826	7,751,260

No returns are given of the number of passengers carried. The through tonnage, which amounted in 1868 to 808,690 tons, was in 1869, 199,873 tons—showing a decrease of 108,817 tons.

The aggregate quantity of coal transported on the main stem in 1868 was 766,011 tons; and in 1869, 1,857,990 tons—showing an increase of 591,979 tons.

The tonnage of live stock in 1868 was 53,598; and in 1869, 51,702—decrease, 1,896.

The quantity of lumber brought to Baltimore in 1868, was 86,007 tons; and in 1869, 82,002 tons—decrease, 4,005 tons.

The quantity of flour brought to Baltimore in 1868, was 752,789 barrels; in 1869, 630,049 barrels—a decrease of 122,750 barrels.

On the 27th of November, 1867, an agreement was made with the Winchester and Potomac Railroad Company, by which the management of that road and its property was transferred to this company under a lease which embraces provisions that cause it to be of a permanent character. This road connects at Harper's Ferry with the Main Stem, and furnishes the first link in a great chain of improvements through the Valley of Virginia.

On the 1st of December, 1867, the Washington County Railroad, extending from Weverton, on the Main Stem, through Washington County, to Hagerstown, 24 miles, was opened for business. The subscription and advances to that road by this company to the close of the fiscal year 1869, amounted to $778,624 93.

On the 15th of April, 1868, the Camden Cut-off was completed. This improvement extends from the vicinity of Jackson's Bridge, by nearly a straight line, 1 2-5 mile, crossing Gwynn's Falls, to a point within 1¼ mile of Camden station.

On the 18th of February, 1869, an agreement was made between the Sandusky, Mansfield and Newark Railroad Company, as reorganized, and the Central Ohio Railroad Company, as reorganized, for the lease of the former by the latter road, under the guarantee of the Baltimore and Ohio Railroad Company. Under this contract the working and management of the Sandusky, Mansfield and Newark Railroad was transferred to the Baltimore and Ohio Railroad Company on the 1st of July last. This line, now known as the Lake Erie Division of the Baltimore and Ohio Railroad, is 116 miles in length, namely, from Newark, on the Central Ohio Division, to the city of Sandusky, on Lake Erie. It extends through five of the richest and most important counties in the State of Ohio, viz: Licking, Knox, Richland, Huron and Erie. It passes through a number of cities and centres of manufacturing and commercial enterprise. Its terminus, the city of Sandusky, possesses one of the best harbors on the Lakes, which is readily susceptible of such improvement as to furnish great facilities for an extensive commerce. The direct line under the control of the Baltimore and Ohio Company, from Sandusky to Baltimore, is 595 miles in length, over which loaded cars are transported without break of bulk.

☞ The Baltimore *Sun* says that the new Virginia bonds of 1866 carry 24 per cent. back interest; those of 1867 carry 18 per cent., and the old coupon bonds carry 9 per cent. The State has about one million dollars which could be made applicable to interest, and may, by a pending law, order part of the back due to be paid in cash; the remainder will undoubtedly be included in the new issue, so that the whole dues will be acknowledged.

☞ It is stated that the Vermont Central Railroad Company have leased the St. Lawrence and Ottawa Railway, which runs from Prescott to Ottawa.

☞ Work on the extension of the Portland and Rochester (Me.) road is rapidly prosecuted. Large gangs of men are at work between Alfred and Lebanon.

☞ The Hecla Mining Company have declared a dividend of $5 per share, payable April 15.

New York Arcade Railway.

REPORT OF A BOARD OF ENGINEERS.

The undersigned have been requested to consider the question of a sub-way under Broadway, in the city of New York, with the view of relieving that street from its present interruptions, and of affording a more convenient and speedy transit for passengers and for merchandise, without injury to the property upon the line of the street, or diversion of the established classes of business thereon.

The New York Arcade Railway Company have laid before us their plans for accomplishing these purposes, and we have had under consideration other plans which have, from time to time, been proposed for the same objects.

It is considered unnecessary, at this time, to compare the relative advantages of these several plans, and we therefore for the present will confine ourselves to the consideration of the necessities of the case, and how far the plans of the Arcade Company meet them.

It is apparent that what is demanded is:

1. To convey passengers between that portion of the city which is devoted to business, and that occupied by residences, with speed, comfort, and convenience.

2. To convey merchandise along the main channels to trade and distribution, with despatch, cheapness and convenience.

3. To accommodate the existing business along this avenue, and preserve the street to its original purpose; and

4. To secure the above-mentioned objects with the least possible temporary obstruction of the travel and trade passing through the street, and of the business now transacted thereon.

This street is now used for the transportation of what may be termed local and through passengers and merchandise. That which requires the slowest movement controls the speed of that which demands the fastest transit. The transportation of merchandise now so completely gorges not only the main artery, but also the crossing streets, as frequently to render all progress, for a time, impracticable. Hence, a plan which will systematize the travel will of itself afford a certain degree of relief; and one which not only accomplishes this object, but also duplicates Broadway, will much more than double its present capacity.

A sub-way which will permit of a rapid movement for the through travel, and a slower but still rapid movement of the local travel, will not only accommodate these two classes of travel, but will remove from the upper surface of Broadway so large a number of vehicles as to leave it free for carriages moving rapidly, and carts moving slowly, without impeding, as now, the progress of both.

The object aimed at should be, not to turn travel from Broadway, but to accommodate it in its most accustomed and natural channel. Any plan which tends to such diversion is not only injurious to the property along Broadway, but also to the public, exactly in proportion to its success.

It is worth remembering that it now costs almost as much to convey freight from Thirtieth street, where it is left by steam, to the business portions of the city, as it does from Albany to New York; and to convey it across the city, as it does to Liverpool.

By this sub railway, the cost of movement along its route, connecting, as it will, with the steam railways entering New York, will be very nearly in proportion to its distance, and not, as

now, by a change of conveyance, more than ten-fold as expensive.

The following, among other incidental advantages, will be obtained by means of the sub-way, namely:

A convenient vault for placing the water and gas pipes and the sewers, where they may be examined, repaired or relaid, without disturbing any portion of the street, sub-way or convenient use of any of the buildings.

The surface of the upper street, no longer liable to be disturbed by breaking up the pavement to reach these pipes and sewers, will remain intact for years, and thus save large sums to the city and render Broadway the most perject carriage road in the world.

The most valuable story in any of the buildings is the one level with the sidewalk. By this subway a story almost as valuable will be added to each building.

This sub-way will be well lighted and well ventilated without any sacrifice to the upper street.

The general plan of construction we understand to be: The excavation of a sub-way street, with sidewalks for foot passengers, at a general level of twelve feet below the grade of the present sidewalks, and between those sidewalks a central roadway some three feet lower, in which are to be placed four railway tracks, the two middle ones designed for fast-moving trains by steam power, stopping at intervals of perhaps a mile, and two exterior tracks, designed for local or shorter travel and connecting with the fast trains; the upper street to be supported on columns and girders, with arches between, and completed with a road-bed and pavement of the most approved construction.

An area or space of six feet width, adjacent to the buildings, to be left for ventilation and light; and a portion of the sidewalks made of glass, increasing the light to the subway, so that it will, in this respect, be far better lighted than the basement stories now on the street. The existing vaults may be rebuilt under the lower sidewalks.

The sewers to be carried through the space between the two middle tracks, and the water and gas-pipes between the other tracks. The water and gas-pipes may be suspended over the sidewalks, as is done in the sewers of Paris.

The motive power is assumed to be steam; and to avoid the exhalation of the gases of combustion, the locomotives may take their supplies of steam at certain localities, where it will be generated in stationary boilers. For the same reason, the exhaust steam should not be discharged into the tunnel, but should be condensed in cold water tanks attached to the locomotive.

It is alleged that compressed air, of the same pressure of the steam, might with advantage be substituted for the latter, the exhaust of which into the tunnel would be unobjectionable. This kind of power has been successfully applied for many years at Mont Cenis and Hoosac tunnels; but further examination would be required before it should be determined upon as a substitute for steam power.

The plan of working, as arranged, contemplates no interruption to the travel along the street, nor to the accustomed occupancy of the buildings thereon.

A series of parallel bridges are proposed to be used, which will allow a vehicle to stand opposite each building, and yet allow four other vehicles (two on each side of the street) to pass each other; similar bridges along the sidewalks, allowing the foot passengers to pass freely. These bridges to be elevated four feet above the level of the street, with sloping approaches at each end, to be removed at midnight, panel by panel, as the work progresses. Side steps to each building giving access thereto.

The surplus materials taken out of the street, and new materials required, are all proposed to be removed through the completed subway, without in any case using the street therefor.

The engineers of the company estimate that the average rate of progress of the work will be a lineal yard each day for each place of working And to finish the whole road, or any section of the work, in two years, would require three places of working on each mile, and in that proportion for any desired rate of progress. There are places where the presence of rock or water will not permit of a progress of a lineal yard per day; and in such cases more frequent working places must be provided. It is proposed to excavate the rock by quarrying and not by blasting.

The foundations of the buiidings erected during the last twenty years are below the proposed level of the excavations. Where it becomes necessary to excavate below the foundations of any of the older buildings, it can be done without danger or injury, by the exercise of the same care as is now practiced in extending the foundation of one building deeper than that of the adjacant ones.

The method proposed for executing the work will prevent interruption to the supply of water and gas, and to the discharge of the sewage.

The new pipes and sewers will be placed in their proper positions in the subway, and the connections to be made, provided with shut-off cocks, with all of the adjacent buildings. Meanwhile, the present system of pipes to be maintained, first by supporting them from the temporary bridge, and subsequently from the subway girders. As frequently as may be desired, temporary connections may be made with the existing pipes, and the water and gas turned from the old to the new system in less than an hour.

We have to some extent examined the details of construction, and are satisfied that they have generally been well designed to meet the necessities of the case. There will no doubt be found many modifications improving the plan, and perhaps lessening the cost of the work.

The engineers of the company have laid before us their estimates for this, varying from $1,600,000 to $2,000,000 per mile. All of the important items of cost are of easy determination, and the highest of these sums would in general be sufficient to cover the cost.

The most obvious difficulty in the construction of the road is in the crossing of Canal street. The method which most readily suggests itself is one which would greatly enhance the value of all the property affected; that is, to raise the grade of Broadway, Canal, and the adjacent streets. This plan, however, is not likely to be adopted, and the engineers of the company have proposed to carry the sub-way across Canal street by a water-tight iron caisson.

A portion of the sewage which comes down from the east side of Broadway will require to be transported across Broadway; but much the largest portion may be intercepted and conveyed under the sub-way, where its bottom grade is sufficiently high to allow the under-passage of the sewer.

The plans, as thus developed, seem to have been arranged to meet all the objections which would naturally occur in a careful examination of the project.

A *resume* of the foregoing statements, and discussion of the subject, shows that a sub-arcade railway will accomplish the objects desired, namely:

1. It provides a pleasant, rapid transit for through passengers between the lower and upper ends of the island, and slower but still speedy movement for the local passengers.

2. It provides a cheap and convenient channel for the conveyance of freight between the termini of the steam railways and a large portion of the business houses in the city.

3. It classifies the travel and trade, and removes from the present street so many of its vehicles, as to render it more useful and pleasant for carriages.

4. It furnishes an arcade avenue, and promenade, convenient for pedestrians at all times, in warm, cold, or stormy weather.

5. The sub-way will be well ventilated and lighted, so that its use will be pleasant and healthy.

6. It can be constructed without interruption either to the travel on the street or the convenient use of the buildings adjacent, and without occupying the street for the hauling of the materials required from or to the work; and it can be built without endangering any of the structures along the street, and with arrangements for a better location of the water and gas pipes and sewers, and without any interruption of the present connections.

7. The route selected is determined by the topography of the island.

8. It in no case occupies or injures any private property, but in nearly all cases greatly enhances the value of property along its route.

9. There are no difficulties attending the construction of the work which cannot be overcome with engineering skill, and at a comparatively moderate cost.

Finally, it meets a necessity in the most complete and unobjectionable manner.

New York, Feb. 26, 1870.

Journal of Railroad Law.

EXPRESS COMPANIES—MEASURE OF DAMAGES FOR CONVERSION OF NOTES—LIABILITY OF BAILEE FOR ROBBERY OF GOODS.

The facts of the recent case of The American Express Company *vs.* Parsons, (44 Ill. p. 312,) are as follows:

William A. Baldwin testified that he took the note to the company for Parsons, and took their receipt, which is this:

"American Express Co., Chicago, Jan. 23, 1860.

"Received from J. B. Parsons, the following note for collection: Daniel McNair, Galveston, Texas, $545. Proceeds of collection will be returned in funds current where collections are made, and no paper protested unless we have special instructions to do so.

"For the proprietors,

COOPER."

The court gave this instruction for the plaintiff.

"The court instructs the jury that if they believe from the evidence that the plaintiff gave to the defendants, and the defendants received from the plaintiff, the promissory note in question for collection, for a compensation or reward therefor to be paid by plaintiff to defendants, and that the defendants, or other persons to whom they intrusted it for collection, lost it by carelessness, then the plaintiff is entitled to recover the value of the note; and that the value, in the absence of evidence to the contrary, is the amount of the note; and that, if the plaintiff is entitled to recover the value of the note, she is also entitled to interest on that value, from the time the note became due to the date of the verdict; and that if the jury believe, from the evidence, that the defendants, or those to whom they intrusted it, lost it, and it is not shown under what circumstances it was lost, it is presumed that it was by carelessness."

The court refused this instruction for the defendant.

"If the jury find for the plaintiff under the first count, the proper measure of damages is not necessarily the amount of the note in question; and that if the maker of the note has been all the time, and still is, responsible, good and solvent, the damages should be only such actual damage as the plaintiff's intestate sustained under the circumstances of the case, which may be nominal only."

The jury found a verdict for plaintiff for $768.

The following is the opinion of the court delivered by

WALKER, CH. J.—That appellants are liable for damages in this case, is not, nor can be, contested. But it is urged that the court below adopted in the instruction given, a wrong measure for such damages. It informs the jury that "if the company lost the note by carelessness, that the plaintiff is entitled to recover the value of the note, and that the value, in the absence of evidence to the contrary, is the amount of the note." There seems to be no question that the note was lost, and the jury were warranted by the evidence in finding that it was through the carelessness of the other company with which they had arrangements to make such collections. The law seems to be well settled, that in an action of trover for the conversion of a note, the amount expressed in it is, *prima facie*, the measure of damages, and devolves upon the defendant to prove that it was different. So then if a recovery had in this case been under a count in trover, this was the true measure of the damages.

But if the finding was under the count in case, for the negligence in losing the note, the question arises whether a different rule should prevail. In all actions for wrongs, unaccompanied with circumstances which authorize a jury to give punitive damages, the true measure is the amount of damages the plaintiff really sustained; and in an action of case like the present this would no doubt be the rule. But when appellee proved the loss of the note through negligence, *prima facie* the sum due on the note would be the actual loss which he sustained. In case, as in trover, the note is lost to the owner, and his injury by the loss would be the same. Whether lost by negligence, or delivered to a wrong person, can make no difference as to the injury sustained. In this case he has lost his note, and it is by the negligence of the bailee. It is conceded that appellee's action at law is gone, but it is contended that his remedy in equity is complete. Even if this were granted, would it follow that appellee was bound to resort to it? He has by the negligence of appellant been deprived of the evidence of the debt, and the evidence shows that the maker of the note was solvent, and had the company presented the note it would probably have been paid.

If a bailee was robbed of goods through his negligence, it would not be an answer to an action on the case to say that the owner could pursue the thief, and recover his property by an action of replevin, and could only recover the expense of the replevin suit. Yet in that case the ownership would not be changed, and he could recover as effectually as appellee can in this case. Appellants undertook to collect the money, and it was their duty to have used the usual means by themselves or their agents to do so, or answer in damages for loss occasioned by their negligence.

Notwithstanding the sum of money due on the note, with interest, is *prima facie* the measure of damages, the defendants may prove, by any legitimate evidence, that the damage was in fact less. If they had in this case shown that the maker was insolvent, or that there was any legal defense to the note, or any other state of facts by which his loss was reduced, it would have lessened the damages to what the real loss was shown to have been.

In this case the appellants gave no such evidence to the jury. It then follows that if their instructions on this question did present correct abstract legal propositions, no injury has resulted by their refusal, or by giving appellee's instructions.

It is not error to refuse to give instructions which contain correct legal propositions, if there is not evidence upon which to base them. We have, however, been referred by appellant to the case of Hamilton *vs.* Cunningham, 2 Brockenbrough, 350, as an authority in this case. We have examined and carefully considered it, and fail to see that it militates against the views here expressed. The facts of the two cases are different. In that, the bills of exchange were remitted and received as a payment, or the means of payment, of an existing indebtedness, and the question was, as to which should sustain the loss, the debtor or the creditors. The creditors having failed to give notice of the protest of the notes received in payment of the bills, and having given credit to the debtor, the creditors were held to be liable for the loss. That case was decided on the principles of commercial law. In this case the note was received by an agent to collect for a compensation, and through their carelessness the note was lost, and they are *prima facie* liable for the face of the note. By its loss the holder is deprived of the evidence of his debt, and he should not be required to be at the trouble and expense of supplying it; that should fall upon the party whose wrong has produced the injury.

If a recovery of the debt may yet be had, it is but reasonable for appellants to take the hazard, incur the expense and suffer the inconvenience. They have the proof in their power, and the court will, upon indemnifying appellee, permit appellants to proceed in her name for its collection. Their negligence has produced the difficulty, and they should suffer the inconvenience and consequent loss. They have no right to shift it to others who have in no way contributed to the injury. By appellee suing and recovering the principal and damages in this case, appellants thereby become invested with the right to look to the maker for the means of indemnifying themselves for money when paid in this action.

It is again urged that the court erred by instructing the jury, that if it appeared that the note was lost by the defendants, or those to whom it was intrusted, and it is not shown under what circumstances it was lost, it is presumed that it was lost by carelessness.

When a party is intrusted with property, and is unable to account for it only by proving that it has been lost, and can show no circumstances attending its loss, if not a legal presumption of carelessness, it is of that strong character that the court would be inclined to reverse a judgment for giving such an instruction, even if it were not a legal conclusion. It is so strong that such an instruction could not mislead a jury by informing them that it created a legal presumption. We can imagine no answer that could be urged against its forcible character.

The statements of the facts produce convictions of carelessness to every mind.

The judgment of the Court below must be affirmed.

Judgment affirmed.

Commerce of New York.

The foreign imports at New York for the month of February, 1869 and 1870, are officially stated as follows:

	1869.	1870.
Entered for consumpt'n.	$14,205,473	$13,739,351
Do. for warehousing	8,548,655	9,334,667
Free goods	1,190,397	757,588
Specie and bullion	1,882,755	1,536,442
Total entered at port	$25,827,280	$25,367,998
Withdrawn fr. wareh'use	9,880,388	9,981,615

The foreign imports at New York for the two months from January 1, were:

	1869.	1870.
Entered for consumpt'n.	$25,904,228	$25,710,122
Do. for warehousing	17,927,374	19,457,144
Free goods	2,434,174	1,865,809
Specie and bullion	2,104,033	3,060,298
Total entered at port	$48,369,809	$50,093,373
Withdrawn fr. wareh'use	18,387,018	18,655,853

The foreign imports at New York for eight months of the fiscal year were:

	1869.	1870.
Six months ending		
Jan 1	$123,552,971	$134,708,154
January	22,542,529	24,725,375
February	25,827,280	25,367,998
Total for 8 months	$171,922,780	$184,801,527

The duties received at New York for eight months ending with February, were:

	1869.	1870.
Six months ending		
Jan. 1	$57,845,963 97	$61,552,308 75
January	9,615,894 43	9,840,502 99
February	11,996,628 46	11,750,424 06
8 months	$79,458,486 86	$83,143,235 80

The exports from New York to foreign ports in the month of February, were:

	1869.	1870.
Domestic produce	$10,507,041	$11,180,695
Foreign mdse. free	4,941	46,162
Do. dutiable	312,830	713,289
Specie and bullion	3,232,083	2,194,256
Total exports	$14,056,895	$14,134,402
Do. exclusive of specie	10,824,812	11,940,146

The exports from New York to foreign ports for two months from January 1, were:

	1869.	1870.
Domestic produce	$28,179,865	$28,018,846
Foreign free goods	12,906	109,785
Do. dutiable	785,058	1,709,681
Specie and bullion	6,446,463	4,877,648
Total exports	$30,424,292	$29,710,960
Do. exclusive of specie	23,977,829	24,833,812

Exports (exclusive of specie) from New York to foreign ports for eight months ending with February:

	1869.	1870.
Six months ending		
Jan. 1	$80,651,068	$109,954,573
January	13,153,017	12,893,166
February	10,824,812	11,940,146
Total produce	$104,628,897	$134,787,885
Add specie	28,184,462	21,534,203
Total exports	$132,813,359	$156,322,088

☞ We learn that since New York capitalists became interested in the Chesapeake and Ohio Railroad, in Virginia, all the floating debt of the company—over one million of dollars—has been paid off, and a sufficient amount of State bonds (about $600,000) to cancel the State's interest in the Blue Ridge division have been purchased.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 26, 1870.

Stock Exchange and Money Market.

Money has been in fair supply all through the week, and rates have been unusually steady at 4@6 per cent. on call, and 7@9 per cent. per annum, in the discount form. Some time advances have been made to prominent street dealers in Stocks and Gold on the basis of 6 per cent. per annum. The demand for accommodation has been only moderately active from all sources. The city banks, in their last weekly return, showed a further loss of over a million in the deposit item, 1⅜ millions of specie, and half a million of legal tender notes. They added nearly 1⅞ millions to their loan and discount averages; and reduced their circulation slightly. Their deposits are now under 209 millions, against 214¾ millions six weeks since. There legal tender reserve is down to 52¾ millions, against 58 millions Feb. 5. Their specie board is 32 millions, against 40½ millions on Jan. 29. The loan average is up to 270 millions against 253½ millions at the opening of the year. The U. S. Sub-Treasury coin balance on Wednesday morning was 76¾ millions, against about 75 millions the preceding Wednesday; and the currency balance 4¼ millions, against 5⅛ millions a week earlier. The cash balance of the U. S. Sub-Treasury at Boston, on the 19th inst., was $2,690,537, against $2 553,697 on the 12th inst. Included in the cash balance there, last Saturday, was coin to the amount of $2,036,407. The customs revenue of Boston last week, was $308,867.

The specie reserve of the city banks according to the latest return is $32,014,747, against $15,213,306 same time last year. The city bank deposits are now $208,816,823, against $183,504,999 week ending March 20. 1869. The legal tender reserve amounts to $52,774,420, against $50,774,874 same time last year. The circulation now stands at $33,699,563, against $24,741,310 same time last year. The loans are now $270,003,682, against $263,098,302 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged about $87,518,258 a day, against a daily average of $91,336,000 the preceding week, and $100,530,417 the week ending with Mar. 6, 1870. The current week's exchanges average about 87¾ millions a day. The city banks, last week, reported a loss of $1,384,388 of specie, $1,014,402 of deposits, and $527,584 of legal tender notes. They increased their loans, $1,863,079; and reduced their circulation, $136,176.

National Bank notes to the amount of $179,640 were issued last week by the Treasury Department, making the total issue to 1,692 banks thus far, amount to $322,074,691, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $22,458,907, leaving, with the existing 1,614 banks, (having an aggregate capital of $426,399,151,) an actual circulation at this date, of $299,615,784. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $342,863,650; and for the public deposits, $17,253 500—making a total of $359,617,150. The Treasury Department last week redeemed and destroyed $522,400 of worn and mutilated fractional currency, and issued $859,093 of new.

The U. S. Sub-Treasury receipts, week ending with March 19, were $3,537,990 in coin, (including $2,631,237 from customs duties,) and $3,159,794 in currency; payments, $2,066,324 in coin, (including $346,099 of coin interest,) and $3,852,911 in currency; balance at the close of the week, $81,653,246 (including $76,029,815, of coin, and $4,445,357 of currency,) against $80,851,740 at the close of the preceding week, showing an increase of $801,506. The business of the Office on the opening day of the current week, was as follows: On Monday, receipts, $477,954 in coin, (including $469,000 from customs,) and $287,782 in currency; payments, $43,787 in coin, (including $32,201 of coin interest,) and $433,462 in currency. On Tuesday, receipts, $332,848 in coin (including $320,991 from customs), and $220,997 in currency; payments, $57,203 in coin (including $44,500 of coin interest) and $248,517 of currency. The balance at the close of business on Tuesday stood at $81,059,987, (including $4,227,156 of currency, and $76,789,726 of coin,) against $81,803,476 a week previous; and $81,-

693,682 on March 8, 1870. The aggregate receipts of the office in February were $38,287,062, including $11,951,925 from customs; aggregate payments, $35,331,006 including $1,749,000 of coin interest; balance at the close of the month, $83,673,026, against $80,766,970 at the close of January.

The U. S. Sub Treasurer retired, last week, $2,486,237 of coin certificates, received for customs.

Government revenues show a satisfactory yield for the season. The excises, during the week yielded about 3¾ millions; customs at the port of New York, $2,631,237, and at the outports about $850,000 (in coin) more, making the grand total income for the week equal to about $7,667,000 in currency. The receipts from excises, thus far in the current fiscal year, commencing with July 1, 1869, have been 123⅛ millions.

Gold has been unusually steady, since our last, the extremes of the week having been 111¾@112¾, and the closing quotation on Wednesday 112⅛, against 111⅞ the preceding week. The speculative dealings have been on a restricted scale, the investment demand having been much less confident. The reports of the varying fortunes of the funding bill before Congress operated rather against an active movement. The customs drain has been under half a million a day. The export call has been light. Last week, the specie exports were only $310,491; while the imports of foreign specie were $343,210. The specie exports from this port, since Jan. 1, have been $6,257,271; while the specie imports have been $3,840,005. On Wednesday, Government marketed a million of Gold at from 112 20 to 112 35. The aggregate of the bids was $5,173,000.

The customs revenue of the port on Wednesday was $314,000.

The coin interest payments of the Sub-Treasury on Wednesday were $68,488.

The customs demand for Gold last week, averaged $448,170 a day; thus far, this week, it has averaged $395,000 a day, or equal to a weekly aggregate of $2,370,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $343,210; and since Jan. 1 1870, $3,840,005, against $2,411,767 same time in 1869. The total customs revenue of the Government, in coin, at this port, thus far in the current fiscal year, commencing with July 1, 1869, has been $94,404,035, against $90,729,931 in 1868–'69.

The customs revenue at the port of San Francisco, from Jan. 1 to March 11th, was $1,892,116, against $1,393,462 same time last year.

The exports of specie, from this port, last week, were $310,491, against $181,332 same week last year; total, since July 1, 1869, $22,913,829, against $29,177,864 same time preceding fiscal year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $346,099, and since July 1, 1869, $66,438,391, against $66,529,793 in 1868–'69.

The specie exports from San Francisco, from Jan. 1 to March 11, were $8,008,570, against $7,721,288 same time last year.

Foreign Exchange has been quoted firmer, on an improved demand, and a lighter offering of strictly prime banker's bills. Bankers' prime sixty day bills on London closed more firmly on Wednesday at 108⅛@108¼, and on Paris to 5.25@5.22½; sight bills on London to 108¾@109⅛, and on Paris to 5.20¾c.@5.20. The offerings of produce bills have been more extensive. The week's exports of domestic produce have been to the currency value of $4,219,526, making the total since July 1, 1869, $149,921,166, against $116,749,223 same time preceding fiscal year.

Dealings in Government securities have been on a reduced scale, and although bonds have not been offered with freedom, prices have yielded a fraction owing mainly to the prevailing dullness in the open market. There has been some investment call for the later coin-bearing bonds, and the currency sixes; but there has been no disposition to purchase freely on speculative account, pending final Congressional action on the funding bill. Registered bonds have been more sought after than usual of late.

U. S. sixes of 1881 closed here at 114@114¼; U. S. Five-twenties of 1862, 110@110⅛; U. S. Five-twenties of 1864 at 108⅝@108¾; U. S. Five-twenties of 1865 at 108⅞@109; U. S. Five-twenties of 1865, consolidated, 107½@107⅝; U. S. Five-twenties of 1867, 108⅝@108¾; U. S. Five-twenties of 1868, 108¾@109; U. S. Ten-forties at 105¼@105½, ex the March coupon; U. S. Six per cent. currency bonds, 112¾@113.

Central Pacific Sixes closed on Wednesday at Frankfort at 81¼.

State bonds have been in more general request, and steadier in price. Railway bonds have been more sought after and have been held with firmness. The new Chesapeake and Ohio Loan has been in better demand, under the continued ease in Money, and the bonds have been steadily gaining in favor with buyers for permanent investment. The Legislature of West Virginia has authorized investments in the Loan, by savings banks, trust companies, &c., as a thoroughly reliable security.

A more buoyant speculation has been reported in Railway and miscellaneous share property, the dealings in which have been on an enlarged scale.

There has been a moderate movement in most kinds of domestic produce at yielding prices. Middling upland cotton, which opened stronger, closed heavily on Wednesday at 22¾cts. per lb. The stock of cotton now here is given at about 60,000 bales. The receipts at the port this week, have averaged about 3,500 bales a day. The receipts at all the ports, thus far in the year commencing with Sept. 1, 1869, have been 2,265,250 bales, against 1,721,650 bales in 1868–'9; exports, same time 1,417,900 bales, against 929,450 bales same time in 1868–'9; stock on hand at latest dates, 1,417,900 bales, against 394,700 bales same date 1869. The exports of domestic cotton goods from this port, since Jan. 1, 1870, have been 2,741 pkgs., against 6,085 pkgs., same time in 1869. From Boston, 819 pkgs., in 1870, against 3,023 pkgs. same time in 1869.

In foreign goods, there has been less animation apparent, though buyers, in most instances, have had any existing advantage as to price. The week's imports of foreign dry goods were to the specie value of $1,729,483; and of foreign merchandise, $3,199, 469, making a total of $4,928,952, against $6,246,407 same week last year.

At the Live Stock markets, this week, Beeves have been in more demand, at from 10@17c., per lb.; week's receipts, 4,914. Milch cows rule very dull, at $40@$100 each, receipts, 175. Veal calves have been in more request at from 8@12½c. per lb.; receipts, 1,046. Sheep in fair demand at from 5½@9¼c.; lambs at 20@24 c. per lb.; receipts, 14,204. Swine quiet at 10@10⅜ c. per lb., all live weight; receipts, 9,526.

Ocean freights have been dull and heavy. For Liverpool we quote flour at 1s. 3d.@1s. 6d by sail, and 1s. 9@2s. 0d. by steamer, per bbl.; grain at 3½d. by sail, and 3½@4d. by steamer, per bushel; cotton at 3/16d.@3/32d. by sail, and ¼d. by steamer per lb.; and heavy goods 12s. 6d.@25s. by sail, and 15s.@35s. by steamer, per ton. Total number of vessels in port on Wednesday, 417.

The balance in the Sub-Treasury on Wednesday was $82,404,321 73.

The following will show the exports (exclusive of specie) from New York to foreign ports for the week ending March 22nd, and since the beginning of the year:

	1869.	1870.
For the week	$2 440,120	$4,219,526
Previously reported	31,577,637	33,606,799
Since Jan. 1	$34,017,757	$37,826,325

The imports for the week ending March 19th, and since the beginning of the year, have been as follows:

	1869.	1870.
Dry goods	$2,619,046	$1,739,483
Gen. merchandise	3,627,861	2,199,469
Total for the week	$6,246,407	$4.928,952
Previously reported	56,635,909	56,288,904
Since January 1	$61,882,316	$61,212,856

☞ By act of the General Assembly of Maryland, the Baltimore and Ohio Railroad Company have been released from the further payment of the capitation tax on the Washington Branch Railroad, amounting to one-fifth of the gross receipts from passengers, provided that all arrearages due to the State by virtue of the act of 1832, chapter 175, up to the passage of the act for release, shall be settled and paid up to the entire satisfaction of the Assembly.

☞ A quarterly dividend of $3 on each share of full stock, and $1 50 on each share of scrip stock, free of Government tax, standing on the books the 22d inst., has been declared by the Hartford and New Haven Railroad Company, payable on the 1st of April at the Union National Bank.

☞ The East Boston Land Company has declared a dividend of $2 per share, payable April 5 to stockholders of record April 1. The amount of the dividend (on 20,000 shares) is $40,000. This is the first dividend made for several years.

☞ The first fifty miles of the Brunswick and and Albany Railroad in Georgia are completed, which entitle the road to State aid.

☞ The charter of the Metropolitan Branch of the Baltimore and Ohio Railroad, which would have expired on the 21st inst., has been extended to the 21st of March, 1873.

Chesapeake and Ohio Railroad.

At a meeting of the directors of this company, held in New York last week, contracts were awarded for all the principal work on the extension to the Ohio river at rates more favorable by twenty to twenty-five per cent. than the engineer's previous estimates. The following parties were awarded contracts: C. R. Mason, Dunham & Bendinger, Robert Harvey, Kelley & McMahon, McMahon & Son, McMahon, Green & McMahon, C. L. DeHane, W. R. Johnson, Jr., H. Cady, B. A. Warthen, L. B. Vaughn, McMinn, Burke & Co., J. M. Keesee & Co., J. Kinsley, Haskins & Cavanagh, Myers & Donaghy, Hubbard & McCurdy, Falloon & Carrier, A. H. Wilson, J. J. & F. Powers & Co., Kerr & Myers, C. Snyder & Co., W. W. Gates, Bibb & Tablee, Lee & Huston.

Finances of Virginia.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

Of the many subjects demanding wise, cautious, and comprehensive legislation from the general assembly, none can exceed in gravity and importance the financial condition of the commonwealth. The magnitude of the public debt; the character, condition and ultimate disposition of the assets and securities held by the State; the prompt restoration of our credit and the mode of accomplishing it; the sources of our revenue and the ability of the people to respond to taxation in an amount sufficient to meet the current expenses of the government and the maturing interest upon the State debt; are all subjects demanding profound consideration and the most mature deliberation and action on your part.

The Legislature which convened in 1866, several months after the close of the war, finding it impossible in the then impoverished condition of the State to provide for the payment of the matured interest upon the public debt, by an act passed March 2d, 1866, authorized the funding of such interest in new bonds of like character and bearing the same rate of interest as the old bonds, to be dated on the 1st day of January, 1866, and running not less than ten nor more than thirty-four years; but it was expressly provided that no interest should be paid upon the bonds thus authorized to be issued until the 1st day of July, 1867; and it was further provided by the same act that all unfunded and matured interest on old bonds, on the 1st day of January, 1867, might then and thereafter be, in like manner, funded in like bonds, but dated on that day, and drawing interest from that date.

Under this act a large proportion of the then matured interest has been funded. On the 21st day of March, 1867, the General Assembly passed an act providing for the payment, on the 1st day of July, 1867, and on the 1st day of January, 1868, of two per centum of interest upon the principal of the public debt of the State, excluding therefrom the bonds given for interest under the first above-mentioned act, "that being (in the language of the act) the interest which this State feels obliged to pay until there is a settlement of accounts between this State and West Virginia.' Soon after the enactment of this law the State passed under military control by virtue of the laws of Congress, and its affairs were administered by military authority from that time until the restoration of the State to representation in the Federal Congress, on the 26th day of January last. From the adjournment of the General Assembly, in 1867, to the assembling of your honorable bodies on the 8th day of February last, the State has been without any law-making power save the arbitrary will of the military commanders. Fortunately, those military commanders have been honorable men, who, according to their judgment, as far as practicable administered the law as they found it, collecting and disbursing the

public revenues in accordance with existing statutes. These facts are here stated in vindication of the honor and good faith of our people, and for the purpose of explaining to the creditors of the State the reason why our credit has remained to this time in a condition of dishonor. Our people have not had the control and management of their own affairs. Under the law of March, 1867, two per centum of interest was paid on the 1st days of January and July, 1868. But the increased expenses incident to the peculiar condition of affairs, and the administration of the government by military authority, together with the expenses of the constitutional convention of 1867-'8, and the partial, though perhaps not culpable, failure to collect all of the public revenues, prevented the payment thereafter of the interest, as provided by the laws of 1867. However, the two per centum due January 1st 1868, on the sterling bonds was paid, together with one per centum on the dollar bonds, and subsequently, in August, 1869, one per centum more was paid on the latter bonds. This comprises all the interest which has been paid since the war, leaving unpaid one per centum per annum on all of the old six per centum bonds, and one-half of one per centum per annum on the five per centum dollar and sterling bonds to January 1st, 1869, and five and six per centum per annum respectively since that date, together with the interest upon the funded interest bonds, dated respectively Jan. 1st, 1866-7, as well as the interest on the unfunded interest due on old bonds at the latter date. The old and recognized debts or liabilities of the State, direct and contingent, correctly stated, are as follows:

6 per cent. registered bonds		$21,865,578 40
5 per cent. registered bonds		63,000 00
6 per cent. coupon bonds		11,108,000 00
5 per cent sterling bonds reduced to dollars		1,865,000 00
Bonds guaranteed by the State		
Chesapeake & Ohio Canal Co.		500,000 00
Va. Central Railroad Co		100,000 00
Richmond & Danville R. R. Co		200,000 00
City of Wheeling		366,000 00
Alex. Canal Co. and city of Alexandria		15,000 00
City of Petersburg		323,500 00
Total		$36,406,078 40
From this sum, however, may be deducted the following items, which are either owned by the State, or upon which the liabilities on the part of the State is not recognized, or is so remote as practically to amount to nothing, viz:		
Bonds held by State on account of sinking fund	$1,729,315 46	
Bonds held by State on account of literary fund	248,000 00	
Coupons lost at sea in steamer Arctic.	145,000 00	
Guaranteed bonds of Chesapeake and Ohio R. R. Co	500,000 00	
City of Petersburg	323,500 00	
Va. Central R. R. Co.	100,000 00	
Richmond & Danville R. R. Co	200,000 00	
City of Wheeling	366,000 00	
Alexandria city and Canal Co	15,000 00	
		6,626,815 46
Which reduces the old funded debt of the State to		$32,779,262 94

Which has been recognized as legal and valid, and the interest upon which has been funded and paid, to the extent above stated, under the laws of 1866 and 1877.

The new funded debt of the State, under the act of March 2, 1866, is as follows, viz:

Coupon bonds dated January 1st, 1866		$1,534,000 00
Registered bonds dated Jan. 1st, 1866		1,899,768 51
Coupon Bonds, dated January 1st, 1867		1,938,000 00
Registered Bonds, dated Jan. 1st, 1867		1,326 074 40
Sterling Bonds reduced to dollars		466,250 00
		$7,164,092 91
To which should be added the unfunded interest on old bonds, due January 1st., 1867 and not yet funded, but fundable in bonds of that date, at the option of the owner, amounting in all to the sum of		720,880 65
		$7,884,973 56

The recognized liabilities of the State, as they on the 1st day of January, 1870, may be stated as follows:

Old funded debt		$32,799,262 94
New funded debt and to be funded		7,884,973 56
Interest due and unpaid on old funded debt		3,384,776 33
Interest due and unpaid on new funded debt		1,611,335 17
		$45,660,348 00
To this sum should be added the amount of bonds of the James River and Kanawha Company assumed by the State and authorized to be converted into bonds, but not yet funded		112,430 00
Total State debt Jan. 1st., 1870		$45,872,778 00

The State is also annually liable for $5,800 *perpetually*, being 6 per cent. interest on $95,000 of old James river company stock.

The assets and securities owned by the State on the first day of January, 1870, is as follows:

Balance in treasury		$567,891 89
Alexandria, Loudoun & Hampshire Railroad Company bonds		50,862 40
Blue Ridge Railroad, owned by the State, (cost)		1,744,728 23
Chesapeake and Ohio Railroad Company:		
6 per cent bonds	$58,500 00	
Interest on the same.	17,550 00	
Common stock	2,013,987 50	
7 per cent loan	210,000 00	
Interest on the same.	66,150 00	
Amount due from use of Blue Ridge Railroad, under act of March 5th, 1849	117,947 24

First and second-class preferred scrip	161 91	
		202,611 91
James River & Kanawha Canal Company:		
Common stock		10,400.000 00
Other navigation Companies		1,192,616 30
Interest in sundry plank-roads, turn-pikes and bridge companies		4,761,564 49
Claims against Chesapeake & Ohio Canal Company, about		900,000 00
Claims against Selden, Withers & Co		436,000 00

Of these various stocks, bonds and claims, some are worth about par, some are much below par, but constantly improving in value, while others are worthless.

Considering them in the order above named, it is probably safe to say that the bonds of the Alexandria, Loudoun and Hampshire railroad company are good, and that the full amount, $50,862,-40 will be paid. These bonds were given by the company in payment for stock held by the state, and sold to the company at $5 per share, and are secured by mortgage upon its franchise and real and personal property. There are three bonds of $16,594 13 each, and due respectively on the 7th day of April, in the years 1872, 1874, and 1877; and the terms of sale of the stock by the State, as well as the prosperous condition of the company, justify the confident expectation that they will be promptly paid at maturity.

The Blue Ridge railroad was built by the State at a cost of $1,744,728 23. By an act of the General Assembly, passed March 1st, 1867, the Chesapeake and Ohio railroad company was authorized to purchase the interest of the State in this work, "by the surrender of State bonds to an amount equal to the value of said road at the time of purchase under the contract with the Virginia Central railroad company, said amount to be ascertained by the commissioners of the Covington and Ohio railroad." The Chesapeake and Ohio railroad company have not yet completed the purchase of this interest, nor is it authoritatively known by the Board of Public Works that said commissioners have ascertained the amount which is to be paid by the same, although it is believed that the amount will be from one-third to one-half of the amount of said interest.

The Chesapeake and Ohio Railroad Company was formed by the consolidation of the Virginia Central and the Covington and Ohio Railroad Companies, under the law above mentioned, and succeeds to all the rights and liabilities of each of those companies. By the terms of said law, said company has "the right, at any time within two years of its organization, to purchase the stock held by the State in said company at the date of

the purchase, by transferring to the Board of Public Works, bonds of the State for an amount equal to the stock proposed to be purchased, and also to pay any debt which it may owe the State at the date of the payment, on account of loans made to any of the companies which may have consolidated, by surrendering to the Board of Public Works State bonds for an amount equal to the debt proposed to be paid."

The consolidation above referred to was perfected August 15, 1868, and by the terms of the above quoted law, the right of said company to purchase the stock or pay the debts which the State holds in and against the same, will expire on the 15th day of August, 1870. The debt due the State by this company for loans and interest on the same, and for the use of the Blue Ridge railroad, amounting to $460,147 24, is perfectly good, and will be paid. It is also hoped that this company will redeem the stock owned by the State therein, amounting to $2,013,987 50, as provided by the law above quoted. This company has been recently reorganized, and now numbers in its board of directors some of the ablest and wealthiest financiers, as well as some of the most experienced, energetic and competent railroad men in the country. The unfinished portion of the road is being put under contract, and the whole work, it is said, will be rapidly pushed to an early completion to the Ohio river. When completed, it will undoubtedly prove to be one of the most profitable and valuable public improvements of the country, and of immense commercial and pecuniary advantage to our State. It must soon become one of the great arteries through which will be poured the vast and increasing commerce of the Ohio and Mississippi valleys and the northwest to our own city and seaboard, as well as to cities and communities to the north of us. The interest of the State in this company, if not purchased by it, will, it is confidently believed, at no distant day rise to par in value; provided always, that the undertakings and representations of those now controlling this improvement are fully and promptly executed.

The Norfolk and Petersburg railroad company's bonds, held by the State and secured by a first mortgage upon its property, are worth nearly par. No dividends have been paid upon either the preferred or common stock since the war, but if the road continues to prosper and increase in its business and capabilities as it has for the past four years the stock will soon be as valuable as any railroad stock in the State.

The bonds of the Orange and Alexandria railroad company are also secured by first mortgage on the company's property, and rate much higher in the market than our state bonds. The Manassas Gap railroad has been transferred to this company, under an act of the General Assembly, passed February 14th, 1867, and the corporate name of the company changed to the Orange, Alexandria and Manassas railroad company; and in that transfer the State surrendered or donated to this company its interest in the original Manassas Gap railroad. The road from Manassas Junction has been rebuilt and extended to Harrisonburg, so that it now commands the business of a very large, wealthy and growing section of the State. No dividends have been paid upon either the preferred or common stock since the war, not is it safe to anticipate a resumption of payment of dividends for some years to come, although the business of the company is constantly improving and the stock daily increasing in value.

The Richmond and Danville railroad company's loans, amounting, with interest, to $658,987 02, are well secured, and may be reckoned among the solvent and best assets held by the State. This road has rapidly recuperated since the war, and with its large increasing business, ought to be able, in a few years, to resume the payment of dividends upon its common stock.

In the Richmond and Petersburgh railroad company, the interest of the State consists only of common stock, not now dividend-paying, but with the general increase of prosperity and business, it ought in a few years to be nearly or quite at par.

The stock of the Richmond, Fredericksburg and Potomac railroad company rates higher than any other railroad stock in the State, and will doubtless soon become dividend paying.

The Richmond and York River railroad company's preferred and common stock, held by the State, will not, for some time to come, prove a source of revenue to the State.

The State owns $800,000 of the seven per cent. mortgage bonds of the Southside railroad company, and on the 1st of January, 1870, the accrued and unpaid interest thereon amounted to $280,000. These bonds were originally secured by a first mortgage upon the property of the company, but the Legislature, by an act passed January 18th, 1866, authorized the company to issue and dispose of its bonds to an amount equal to an amount not exceeding the balance due upon a loan made to the company by the State under an act of the General Assembly passed February, 1853 (the same loan above mentioned), to be secured by a mortgage upon the property of the company, "the full force and effect of such mortgage to the State first above mentioned being hereby suspended, and the claims thereof are hereby postponed until the bonds issued under the mortgage herein authorized to be given in its place and stead, as aforesaid, shall have been paid." (See acts of Assembly, 1865-'6, pages 337-8.) The company by authority of this act, but notwithstanding the subrogation of this mortgage to the lien of the State, the claim of the State, amounting, with interest, January 1st, 1870, to $1,080,000, is considered a solvent asset, and it is believed the company will soon be able to resume the payment of interest thereon. The common stock, under the impulse of prosperity and the increasing business of the company, is constantly appreciating, and if the wise policy which now controls the management of this road shall continue, it will one day, not many years in the future, become a dividend paying stock.

The stock held by the State of the Virginia and Kentucky railroad company, amounting to $103,438 69, is at present valueless. Work upon this road will probably be soon resumed, and when completed this stock may become valuable.

The Virginia and Tennessee Railroad is one of the most valuable and important public improvements in the State. The volume of business has annually increased since the war, and if its success in the future shall continue to increase in the same ratio as it has during the past four years, within the next five years it will be able to pay a dividend upon its common stock. Its preferred, and even common stock, will, in four or five years, rate at or near par. A loan made by the State to this company, of $1,000,000, is claimed by the company to have been paid during the war, but this claim is disputed by the State and can only be settled by the courts. As soon as our courts are organized a statement of the facts can probably be agreed upon by the State and the company, and the case be submitted to and decided by the proper tribunal. If judgment shall be given in favor of the State it will be paid by the company. The claim and interest amounted, on the 1st of January, 1870, to $1,455,000.

The stock of the Marietta and Cincinnati Railroad Company was obtained by the State from Selden, Withers & Co. It is improving in value but not worth par.

The interest in the James River and Kanawha Canal Company owned by the State, amounting to $10,400,000, is of no considerable marketable value. The State and private stockholders in this company could well afford, if authorized, to surrender gratuitously all its and their interests to any persons or corporation who would undertake, under suitable guarantees, to complete that important improvement. The interest of the "other navigation companies" is of no particular value.

The interest of the State in the various plank road and turnpike companies, amounting to $2,183,318 72, is comparatively worthless.

The claim of the State against the Chesapeake and Ohio Canal Company, being for interest paid on account of the bonds of that company guaranteed by the State, is in process of settlement; and the agents of the State who have the matter in charge, are confident that the State will soon realize therefrom, less expenses, nearly or quite the sum of $600,000.

From the claim against Seldon, Withers & Co., it is believed the State will realize about the sum of $150,000.

Relative to the claims against the State of West Virginia, for her proportion of the public debt, three commissioners have been appointed by this State, and provision has been made for the appointment of a like number by West Virginia, to adjust the same. It is hoped that an early settlement will be reached. Any discussion of the merits or amount of this claim would be out of place in this paper. It may not be improper to remark, however, that it would seem from the language of the act of March 21, 1867, that our general assembly were of the opinion that West Virginia ought to assume and pay one-third of the public debt.

From this brief review of the assets and securities held by the State, it will be observed that $2,612,776 87 are considered of equal or greater value than State bonds at present quotation, consisting of the following items, viz:

Bonds Alexandria, Loudoun and Hampshire Railroad Company	$50,862 40
Bonds Chesapeake and Ohio Railroad Company, with interest, and inclusive use of Blue Ridge Railroad	460,147 24
Bonds of Norfolk and Petersburg Railroad Company, with interest	141,371 82
Bonds Orange, Alexandria and Manassas Railroad Company, with interest	276,207 89
Bonds Richmond and Danville Railroad Company, with interest	658,987 02
Stock Richmond, Fredericksburg, and Potomac Railroad Company	275,200 00
Amount to be realized from claim *vs.* Chesapeake and Ohio Canal Company, less expenses, and claim *vs.* Seldon, Withers & Co	750,000 00
	$2,612,776 87

[The balance in the treasury is not included among these items, for the reason that a portion of it will necessarily be used to meet the current expenses of the government, and the disposition of the remainder is at the discretion of the General Assembly.] It will also be observed that of the assets, $10,048,267 91, it is hoped in a few years will be equal in value to State bonds, and will be available for the redemption of the State debt as follows:

Stock Chesapeake and Ohio Railroad Company	$2,013,987 50
Stock Norfolk and Petersburg Railroad Company	1,199,970 00
Stock Orange, Alexandria and Manassas Railroad Company	874,000 00
Stock Richmond and Danville Railroad Company	1,188,598 50
Stock Richmond and Petersburg Railroad Company	385,600 00
Stock South Side Railroad Co	803,500 00
Stock Virginia and Tennessee Railroad Company	2,300,000 00
Stock Marietta ane Cincinnati Railroad Company	202,611 91
Bonds South Side Railroad Company, including interest	1,080,000 91
	$10,048,267 91

Deducting the amount of solvent assets which are immediately available for the redemption of the State debt, viz: $2,612,776 87, together with those which it is hoped and believed will become available for that purpose in a few years, viz: $10,048,267 91, from the gross amount of assets first above mentioned, leaves a balance of $21,-

302,238 62, which is now, and probably never will become, of much value to the State. But in addition to this large amount, the State has lost, abandoned, or surrendered and released the following large sums, viz:

Subscription paid to Covington and Ohio Railroad Company	$3,206,461 83
Subscription paid to Fredericksburg and Gordonsville Railroad Co	168,299 00
Subscription paid to City Point Railroad Company	110,000 00
Subscription paid to Blue Ridge Railroad Company say	1,100,000 00
Subscription paid to Manassas Gap Railroad Company	2,280,000 00
Subscription paid to Portsmouth and Roanoke Railroad Company	406,650 00
Subscription to Roanoke Valley Railroad Company	807,402 00
Subscription to Winchester and Potomac Railroad Company	270,000 00
Subscription to Alexandria, Loudoun and Hampshire Railroad Co	1,717,248 00
Subscription to Navigation and other Companies	298,032 05
Loss by Seldon, Withers & Co., and Chesapeake and Ohio Canal Co.	580,000 00
	$9,739,092 00

Which, added to the amount above stated as comparatively valueless, makes the enormous sum of $31,041,326 50, or nearly the amount of the old State debt.

McKay Iron and Locomotive Works.

The McKay Iron and Locomotive Works, Jersey City, N. J., have commenced operations, and are now building five new locomotives for the New Jersey Southern Railroad. These machines are all made in duplicates, and are of the neatest pattern. Mr. McKay has built a great many locomotives in Boston, and he now has the best place to do business near New York. He is one of the most enterprising men in the country. His machines are equal to those of any other maker. We wish the company abundant success. They have entire new tools, of the latest patterns made by L. W. Pond of Worcester. The shops are well arranged, and Mr. McKay has all his patterns and drawings, and small tools, from his old works in Boston, which are of great value to the new concern. Mr. McKay has built 40 locomotives for the Central Pacific Railroad, 17 for the Chicago and Northwestern, 1 for the Central Railroad of Iowa, and many others. Mr. McKay's experience as a mechanic is not surpassed by any other mechanic in the country, and we are confident that his new enterprise in New Jersey will be a success. We append the following letter from Mr. Gilman, President of the Central Railroad of Iowa, which will give the character of the machine:

CENTRAL RAILROAD OF IOWA.
Marshalltown, Iowa, March 14, 1870.

N. McKAY, ESQ.,
Jersey City, N. J.

MY DEAR SIR—Riding upon the Locomotive "Thos. Kensett" last night with Mr. Vodder, our M. M. he remarked that she had been out for 7 months without going into the shops for repairs, and would pull a bigger load than any 15+22 inch cylinder engine on our road. The "K." is 14+22. I write you this as in justice I believe it due you.

Very truly yours,
C. C. GILMAN, Pres't.

Illinois Central Railroad.

The statement of this Company for the month ending February 28, 1870, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	4,748.98 for	$49,884 87
Acres Int. Fund Lands sold	80.00 for	1,170 40
Acres Free Lands sold	..... for	.....
Total sales during month of Feb., 1870	4,828.98 for	$51,055 27
To which add Town Lot Sales		190 00
Total of all	4,828.98 for	$51,245 27
Cash collected in February, 1870		$157,571 20

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 258½ Miles.	Total. 965½ Miles.
Freight	$375,159 00	$62,370 00	$437,529 00
Passengers	118,837 57	23,649 45	142,487 02
Mails	6,875 00	1,029 08	7,404 08
Other sources	74,000 00	1,970 92	75,970 92
Total Feb., '70	$574,371 57	$89,019 45	$663,391 02
Total actual earn'gs, Feb. 1869	$461,698 64	$62,994 84	$524,693 48

☞ Another railroad is to be built in New Jersey the coming summer. The proposed road is to run from Tuckerton to Manchester, thence to Vincentown, Pemberton, Merchantville and Camden.

LARGE PEREMPTORY SALE.
Very Valuable Machinery.
RICHARD NORRIS & SON'S
LOCOMOTIVE WORKS,
17th Street between Pennsylvania Avenue and Spring Garden Street,
PHILADELPHIA, PENN.'
THOS. BIRCH & SON, Auctioneers.

On Tuesday morning, May 3rd, 1870, at 10 o'clock, will be sold at public sale on the premises of Richard Norris & Son's Locomotive Works, 17th Street, between Pennsylvania Avenue and Spring Garden St., the entire valuable machinery, consisting of 5 STATIONARY ENGINES varying from 15 to 100 horse power; 14 Cylinder Boilers; 50 Planing Machines varying from 12 to 60 inches, length of bed from 2 to 36 feet; 100 Slide Rest and Screw Cutting Lathes varying from 12 to 36 inches swing; Length of Shears from 3 to 26 feet; 50 small hand Lathes; 2 very large Slide Rest, Wheel Lathe swing 6 ft. 6 in.; 26 Sloting machines various size strokes; 2 Merrick & Son's Large Steam Hammers; 20 double and Single Drill Presses; 1 Seller's Hydraulic Wheel Press; 1 Sellet's large size Boring Mill with universal chuck; 1 Whitworth Radial Drill Press; 1 Whitworth Screw Cutting Slide Rest Lathes large size; 1 Whitworth 48 inch Planer; Double head gear cutting engine, large size; large and heavy Railroad Iron Shears; 1 Tyre Expanding and Rounding machine; 1 Tyre Bending machine with Furnace Castings with Fire Brick; Shafting, Hangers, Pulleys, and Couplings; 3 large Platform Scales; 6 small Platform Scales; 4 new Lever Beams—graduated to weigh 10 Tons each with weight complete—the above Scales made by Abbott & Co.; 2 complete Furnaces for Heating Scrap Iron with Boiler on top—to supply Steam Hammers; 100,000 Lbs. Slabs Wrought Iron faggottit from Boiler and machine shops scraps of the best quality; 1 complete Photographic Apparatus; Tons wrought and cast scrap Iron $50,000 worth; New Bar and Tool Steel; Bar Iron; 10,000 feet of Belting; 50,000 feet of Gas pipe; 200 feet large Lead Water Pipe; Machinists', Blacksmiths' and Boiler makers' Tools; complete assortment of Foundry Flasks; Ladders; 2 Cupolas; Large Foundry Cranes; 1,000 new Birmingham Boiler Fines; 2 in. Diameter No. 12 Wire Gauge; 200 Anvils; 500 Vices; Spinners, Lathes and Tools, Jacket, Machine, Wood Planing machines, Circular Saws, Large Locomotive Trucks, Turn Tables, Carts, Drays, Harness, &c., &c. Catalogue ready April 1st, can be obtained by applying to the Auctioneers. The sale will commence Tuesday, May 3rd, at 10 o'clock, and will be continued daily until the whole is sold. The Factory will be open on Monday, May 2d, for examination.
